Winnipeg Electric Railway Co.—Permission to appeal against the order of the Public Utilities Commission conceding the temporary increase of fares to the company, was sought in the appeal court last week by the city, and Chief Justice Perdue, after hearing the arguments, reserved judgment. T. A. Hunt, K.C., city counsel, in support of the application, submitted that the order in question was a permanent one and as such could be made the basis of an appeal. Edward Anderson, K.C., for the street railway company, took the opposite view, stating that the order was only of an interim or provisional nature and could not be appealed against until made final. He stated that the order would only be in force until the physical appraisal of the street railway company's holdings could be determined, when the order would be brought up before the public utilities commissioner again.

Employees of the Winnipeg Electric Railway Co. will receive pay under the Mathers award for every day the company received increased fares, according to an announcement made by A. W. McLimont, vice-president and general manager. A committee of the men has been given this assurance by Mr. McLimont, and in return the men have agreed to wait for the $100,000 back pay under the award until the courts have finally disposed of the city solicitor's action to restrain the company from collecting the new six-cent fare, according to the announcement.

Western Canada Flour Mills Co.—The annual meeting of the company was held in Toronto on October 22. In the annual report presented for the year ended August 31 last, profits showed a falling off of $105,858, as compared with the figure for 1918. The profits for the period were $437,986, as compared with $543,844 for the previous period. After the payment of bond interest the balance available for distribution among holders of the company's shares amounted to $353,431, or equal to 14.4 per cent. on the outstanding capital stock, as against 19.9 per cent. last year.

Early in the company's fiscal year shareholders received an extra dividend, in the form of Victory bonds, at the rate of 10 per cent. of their holdings, which, with the quarterly disbursements at the rate of 10 per cent. per annum, brought the amount distributed up to the half-million mark. After deducting the regular dividend requirements there remained a surplus of profit for the year of $104,431. This, added to the previous balance carried forward, from which was taken

The Transfer Books of the Bank will be closed from the 17th to the 29th of November next, both days inclusive.

By order of the Board.
JOHN AIRD,
General Manager.
Toronto, 17th October, 1919.

DEBENTURES FOR SALE

FITZROY TOWNSHIP, ONT.

Sealed tenders will be received by the undersigned up to noon on Friday, the 24th inst., for an issue of debentures for the sum of $3,000.00, bearing interest at the rate of 6% per annum, and payable in (15) fifteen equal annual instalments, for the purpose of completing a schoolhouse in S.S. No. 8, Fitzroy Township.

WM. BOYLE,
Clerk,
Fitzroy Township, Kinburn, Ont.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance: 50 per cent extra if charged.

TRAINED EXECUTIVE, experienced, to assume large responsibility for executive functions, desires connection. Several years as secretary-treasurer, manager, etc. Special training as comptroller and internal auditor, coupled with latest accounting practice, graphic presentations, statistics and production, makes services especially valuable. Age 34, Canadian, active, character and references of the best. Executive ability guaranteed. Box 225, *Monetary Times*, Toronto.

WANTED,—For Western Canada Branch Office of Large Fire Insurance Company, Young Man Having Underwriting and General Office Experience. Apply Box 235, *The Monetary Times*, Toronto.

WANTED—Manager for Montreal Branch by important Casualty Company. Apply stating full particulars, experience, etc., Box 239, *The Monetary Times*, Toronto.

INVESTMENTS AND THE MARKET

(Continued from page 42)

the $250,000 Victory bond payment, brought the total surplus as at August 30 last up to $712,865.

The balance sheet reveals a further strengthening of an already strong position, current assets standing at $2,110,171, against current liabilities of $1,101,626, leaving the amount of working capital at slightly over $1,000,000, as compared with $910,730 a year ago, and practically the same figure in the 1917 exhibit. This improvement in the liquid position was effected despite an increase in inventory of some $425,000, this standing at $935,779, as against $509,084 at the end of the previous year.

RECENT FIRES

Loss of $250,000 at British Columbia Lumber Plant—Other Losses Light

Coaticook, Que.—October 18—The lumber plant of A. H. Cummings and Son, was destroyed. Estimated loss, $12,000, with no insurance.

Fort Rouge, Man.—October 19—The warehouse at the Canadian National Railway shops was destroyed. Estimated loss, $100,000.

Glace Bay, N.S.—October 16—Operative store warehouse at Dominion No. 2 was destroyed, with its contents. Estimated loss, $3,000.

Montreal, Que.—October 17—Premises of the Montreal Waterproof Co., 50 St. Lawrence Blvd., were damaged. Estimated loss, $2,000.

Ottawa, Ont.—October 21—Apartment house at 176 Nepean St., was damaged. Mr. B. F. Stapleton is the proprietor. Estimated loss, $500.

Sarnia, Ont.—October 17—The plant of the Stratford Flax Co., was destroyed. Estimated loss, $6,000, largely covered by insurance.

Saskatoon, Sask.—October 17—Premises of the Bitulithic and Contracting Co., Ltd., Ontario Ave., were damaged. Estimated loss, $1,000.

Vancouver, B.C.—October 15—The plant of the British Columbia Fir and Lumber Co., Sixth and Laurel Streets, was practically destroyed. Over 3,000,000 feet of lumber was destroyed. The estimated loss is $250,000.

ADDITIONAL INFORMATION CONCERNING FIRES

Port Arthur, Ont.—October 9—The Burk Block was damaged. Estimated loss, $1,500. Insurance on the building amounted to $8,000; on contents, $3,700.

Lutes Mountain, N.B.—Farm buildings of O. W. Friter were destroyed. Estimated loss, $3,300. Insurance was carried to the amount of $4,300 in the British-American Assurance Co.

Ontario.—The fire marshal's report for the month of August, 1919, shows that losses amounted to $1,455,907, while the insurance loss was $416,633. The loss not covered by insurance totalled $1,039,274. For the eight months of the year the loss amounted to $6,705,671, and the insurance loss was $4,221,313. The loss not covered by insurance for the eight months totalled $2,484,358. Comparing these figures with those of 1918, substantial decreases are shown. In the case of loss not covered by insurance, the figure for 1918 was $2,641,339.

Vancouver, B.C.—In submitting his monthly report for September, 1919, to *The Monetary Times*, Fire Chief Carlisle states that the total loss by fire amounted to $23,145, and of that amount $22,645 was covered by insurance, leaving the property loss above insurance at $500. The total value of property involved was $496,050. Some of the causes of the fires were: Carelessness with cigarettes, etc., 6; children playing with matches, 3; electrical origin, 4; defective fireplace, 1; incendiary, 1; flying sparks, 4; spontaneous combustion, 2; unprotected stove-pipe, 1. Four of the causes were unknown.

Manitoba.—The following is the report of the provincial fire commissioner for the month of September: The estimated total amount of fire loss during the month was $107,270, a reduction of $7,925, from that of the previous month. The total number of fires was 123, as compared to 155 during August. The total property values at risk in the September fires was $1,224,854, and the amount of insurance $801,730 as against $641,432 in property values in the August fires with $453,313 insurance covering. The records show a phenomenally good month for Winnipeg both in regard to the number of fires and in the fire loss; the total loss in 47 fires being $5,415 or 5 per cent. of the total fire loss of the province.

COBALT ORE SHIPMENTS

The following is a statement of shipments of ore, in pounds, from Cobalt Station for the week ended October 18th, 1919:—

Peterson Lake, 95,867; O'Brien Mine, 64,000; Buffalo Mine, 263,880; Nipissing, 730,143. Total, 1,153,885.

The total since January 1st is 19,985,504 pounds, or 9,992.752 tons.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	3 19-64 pm	3 23-64 pm	....
Mont. funds	par	par	⅛ to ¼
Sterling—			
Demand	$4.2975	$4.3050	....
Cable transfers	4.3075	4.3150	....

Rate in New York for sterling demand, $4.16¼.
Bank of England rate, 5 per cent.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first two weeks of October:—

Canadian Pacific Railway.	1919.	1918.	Inc. or dec.
October 7	$3,965,000	$3,458,000	+ $ 507,000
October 14	4,029,000	3,524,000	+ 505,000

Grand Trunk Railway.			
October 7	$1,611,553	$1,460,738	+ $ 150,815
October 14	1,619,110	1,433,788	+ 185,322

Canadian National Railways.			
October 7	$2,102,281	$1,789,180	+ $ 313,101
October 14	1,974,750	1,745,665	+ 229,085

YIELDS ON INVESTMENTS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. MORROW & JELLETT, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

Oct. 22nd, 1919.

	Div. Rate	Price about	Yield about
Preferred			
Canadian Locomotive	7	94	7.44
Canada Cement	7	101	6.93
Canada Steamships	7	86	8.13
Dominion Foundries	8	103	7.76
Mackay Companies	4	67	5.97
Maole Leaf Milling	7	104	6.73
Robert Simpson Company	6	83	7.22
Steel of Canada	7	100	7.00
Common			
Bell Telephone	8	119	6.72

Victory Loan Campaign Successfully Opened

Subscriptions, Both Large and Small, Are up to Last Year's Level—Total for First Three Days Exceeds 1918 Figure—Work of Business Committee in Recording Figures—List of Large Subscriptions

EARLY reports of the Victory Loan campaign indicate that it will be an unqualified success, and the government's final war requirements met, although it is not anticipated that last year's total will be reached. The figures for the first three days are, however, ahead of those for the first three days of the 1918 campaign. This may be accounted for by the fact that the work of recording subscriptions is now better organized. Up to the end of Wednesday, 1918, the total reported to Business Committee headquarters was $69,775,900. This year it was $87,587,554.

A summary of the daily totals is given below. The figures are, of course, cumulative. They are, moreover, incomplete, as some divisions are more prompt in reporting than others. In comparing, it must be remembered that Montreal is entirely separate from the rest of the province of Quebec for campaign purposes.

	Monday.	Tuesday.	Wednesday.
British Columbia	....	$ 561,350	$ 1,298,454
Alberta	....	381,850	1,342,750
Saskatchewan	....	....	1,371,800
Manitoba	....	920,450	1,381,650
Ontario	$10,226,750	43,493,600	52,099,300
Montreal	....	20,792,350	26,886,500
Quebec	....	....	1,404,850
New Brunswick	....	534,350	908,650
Nova Scotia	522,600	522,600	837,600
Prince Edward Island.	....	25,300	56,000
	$10,749,350	$67,231,850	$87,587,554

The figure for Thursday for Ontario, which is the only one available at the time of writing, is $67,741,100, bringing the Dominion total to $103,229,354.

The figures for some of the cities, for the first two days, are as follows:—

	Monday.	Tuesday.
Toronto	$17,749,250	$20,042,800
Montreal	....	24,444,500
Winnipeg	....	....
Vancouver	153,150	....
Calgary	142,700	$786,550
Victoria	91,550	....
Edmonton	115,550	319,250
New Westminster	98,750	....
Lethbridge	27,000	55,900
Medicine Hat	31,750	78,550
Brandon	40,000	......
Halifax	....	690,350

The task of compiling the returns from all parts of Canada, which is by no means a small one, is performed by the Dominion Business Committee. The chairman of this committee, W. S. Hodgens, outlined its work in an interview with *The Monetary Times*, as follows:—

"The Dominion Business Committee has charge of installing the system for recording and reporting of subscriptions throughout the Dominion. It lays out the form in which subscriptions are to be recorded and reported by the canvassers in each unit to the Unit Headquarters, by Unit Headquarters to Provincial Headquarters, and by Provincial Headquarters to Dominion Headquarters. All the necessary forms for reporting by canvassers and recording by Unit Headquarters and Provincial Headquarters are drawn up by the Dominion Business Committee and submitted to each province for the guidance of the Provincial Committees. Wherever requested, this committee prints these forms for the provinces, and in the case of the western provinces and some of the eastern ones, practically all of the forms used are printed and shipped from Toronto.

"This committee attends to the preparation of the prospectus and its distribution throughout Canada. It cooperates with the banks through a bankers' committee to facilitate the handling of subscriptions by the banks, and to ensure the co-operation of the branch banks with the local units throughout Canada. It also works with the Department of Finance at Ottawa in connection with the distribution of bonds and the literature sent out by the department to the branch banks and to the Finance Department Agencies throughout Canada to facilitate the handling of subscriptions, delivery of bonds, and other matters connected with the operation of the Finance Department with which the Victory Loan Organization is vitally interested."

Large Subscriptions

The following is a list, compiled by *The Monetary Times*, of subscriptions of $10,000 and over. In cases of error or omission, *The Monetary Times* will appreciate being advised so that correction may be made:—

Life Insurance Companies

Sun Life Insurance Co., Montreal	$10,000,000
Canada Life Assurance Co., Toronto	10,000,000
Manufacturers' Life Insurance Co., Toronto	5,000,000
New York Life Insurance Co., New York	5,000,000
Metropolitan Life Insurance Co., New York	5,000,000
Great-West Life Insurance Co., Winnipeg	5,000,000
Mutual Life Insurance Co., New York	5,000,000
Confederation Life Association, Toronto	4,000,000
Prudential Insurance Co., Newark	4,000,000
North American Life Insurance Co., Toronto	2,000,000
Equitable Life Insurance Co., New York	1,000,000
Dominion Life Insurance Co., Waterloo	750,000
National Life Assurance Co., Toronto	400,000

Fire and Miscellaneous Insurance Companies

Dominion Fire Insurance Co., Toronto	$ 750,000
Great American Insurance Co., New York	100,000
Royal Exchange Assurance Co., Montreal	50,000
Lumber Mutual Fire Insurance Co., Boston	25,000
Northern Assurance Co., of Eng., Montreal	25,000

(Continued on page 8)

PLANS FOR LARGER INDUSTRIAL CONGRESS

Next Year's Meeting Will be Organized by Two Provinces—Larger Attendance is Expected

(Staff Correspondence)

THE west will have another great industrial conference. The congress this year, which was held in Alberta, proved such a remarkable success that the work of the Alberta Industrial Development Association is being continued. The movement, which has for its object the development of the natural resources of the west, is strongly supported by the business men of the country. Last year's congress was supported by the Alberta government, the railways and the Alberta cities.

Next year's congress will be held in Alberta and British Columbia. The sessions will take place in Edmonton and Vancouver. Mayor Brown, of Medicine Hat, the originator of the movement, in company with John F. Sweeting, industrial agent, C.P.R., Geo. W. Craig, city engineer, Calgary, and J. E. Brown, general manager, Revillon Bros., Edmonton, visited Vancouver and Victoria recently and concluded arrangements with the business interests of British Columbia, for a joint congress in 1920.

The sum of $50,000 has been subscribed to defray the Congress expenses and this fund will be administered by a joint board of business men from Alberta and British Columbia.

Almost a billion dollars of capital was represented by leading men at last year's congress and it is expected that this year a large delegation from eastern Canada, the United States and Great Britian will visit the west and attend the congress sessions. Extensive plans are being made for next year's program, and it is probable that a speaking tour of the east will be arranged. Prominent business men of Alberta and British Columbia will doubtless make such a tour this coming winter. It is evident that the leaders of industry in eastern Canada realize the importance of the western movement and are making plans to co-operate with the business men of the west.

At a banquet held in Medicine Hat last week, T. A. Russell, of Toronto, president of the Willys-Overland Co., stated that in his judgment the movement was timely and eastern Canadian manufacturers should extend their industries west of the great lakes. Western Canada had now as many people and as large a market, stated Mr. Russell, as there was in eastern Canada when manufacturing commenced in Ontario a number of years ago.

That the western movement will be successful is the opinion of the leading business men of the west and it is very evident that the wide-awake industrial leaders of the east are also convinced of the soundness of the movement.

HEALTH INSURANCE ADVOCATED AT COAST

The question of health insurance as benefiting and protecting the working man when put on a workable basis by intelligent government study of the needs of the worker, and the increase of efficiency and production by such insurance, was given an exposition before a meeting of the Vancouver Board of Trade by Mr. E. S. H. Winn, of the Workmen's Compensation Board, on October 4th. The board heartily endorsed his proposals with respect to the operative methods of the insurance. Mr. Winn stated that the war had proved military success to be dependent upon industrial efficiency and this efficiency was the mental and physical condition of the worker. Mr. Winn stated that practically every state federation of labor which have considered health insurance legislation have adopted it. A number of state medical bodies have endorsed it. It is anticipated that by 1920 twelve of the American states will have it in operation. "There is no measure before the public at the present time which equals the power of health insurance for its power for social regeneration," he said in conclusion.

CROP CONDITIONS IN PRAIRIE PROVINCES

Thrashing 95 Per Cent. Completed—Yields as Estimated Earlier in Season Were Approximately Correct

THE Manitoba Free Press, in its annual report on crop conditions issued on October 21st, finds that earlier estimates are sustained. Questionnaires were sent out to all sections of the prairie provinces. Thrashing is 95 per cent. completed in all three provinces. The damage from sprouting, due to damp, warm weather during thrashing, is apparently very small. The largest individual loss reported from any district is 30 per cent., while the bulk of the replies indicate that even where sprouting took place acreage was very slight, and at most meant the loss of one grade.

The average of wheat yields agrees very closely with those of August 26th, when an earlier estimate of the Free Press was issued. The 66 points heard from in Manitoba, on the whole, indicate a slightly higher yield—probably 17 bushels to the acre, instead of 16; but the returns from Saskatchewan do not seem to show anw material change, and the same is true of many districts in Alberta, though a few show higher returns from the thrashing machines than the stand of wheat indicated at the time of inspection. The Alberta returns, however, do not include figures from the Peace River country, where provincial government figures recently issued give very high yields, so that, on the whole, the wheat crop of Alberta will probably be a little larger than was estimated in August.

The replies to the query as to whether the thrashing returns indicated any improvement in the yield of oats are to the effect that there has, on the whole, been no improvement, the districts showing greater returns being pretty well balanced by other districts showing lower yields than had been anticipated in August.

No estimate was made on flax last August, as the crop was not sufficiently advanced. The question as to flax yields has not brought very reassuring results. A great many districts where flax was seeded report "none," while yields in Manitoba vary from 7 to 18 bushels. In Saskatchewan, out of 67 points heard from, 14 report "none" and yields at other points run from 2 to 11 bushels. Quite a number of districts, more especially in the northern part of Saskatchewan, report late flax caught by frost. From the returns sent in from Alberta, the flax crop of that province is very much of a failure, with, of course, the individual good crop.

Two questions that were answered definitely and fully are: "Are farmers marketing freely?" Only 10 points in Saskatchewan and five in Manitoba report marketing as limited; all others state farmers marketing freely. The other question was: "Any speculation in participation certificates?" Only five points in the three provinces report any speculation on these certificates; all the others state "no speculation," often adding: "Farmers think them a joke!" or "Farmers think them not worth the paper they are written on!"

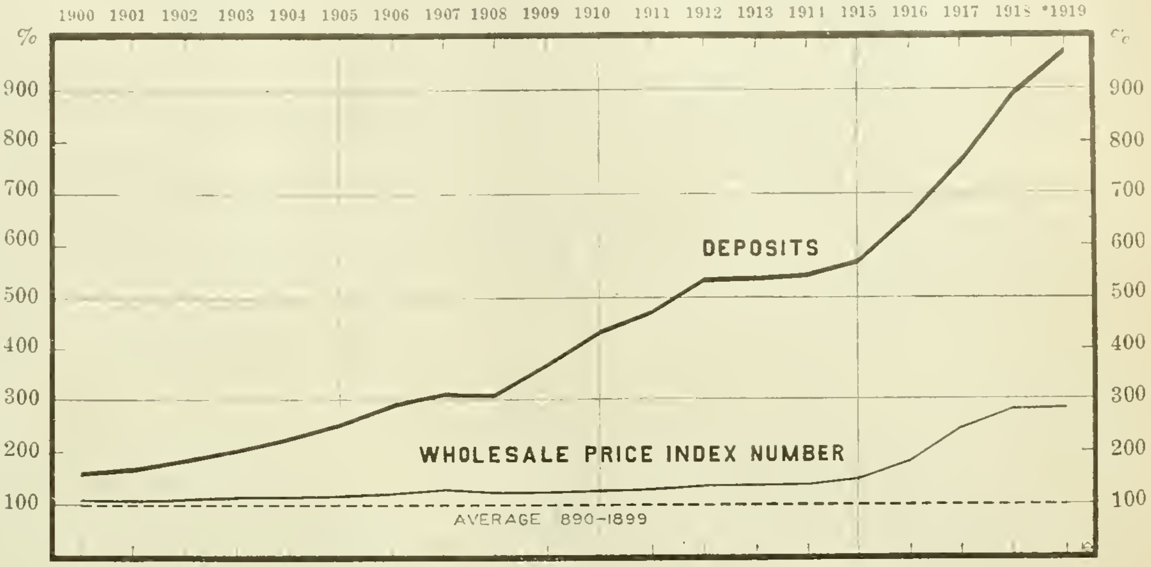
Weather has apparently been much colder in Saskatchewan and Alberta than in Manitoba or else harvesting operations are more delayed. A number of points in these provinces report serious damage to potatoes. For example, Edmonton reports potatoes frozen in ground; Prince Albert reports 60 per cent. of potato and all root crops frozen in ground; Lumsden reports much the same condition; Windthorst reports ground too hard frozen to plow for two weeks past. Birch Hills reports snow has seriously delayed thrashing.

A number of points on the C.N.R. and G.T.P. report serious shortage of cars for grain movement. A number of points in Manitoba and Saskatchewan report the shipment of over 100 cars of grain already this season. Calgary reports wheat weighing 77 pounds to the measured bushel.

The head office of the Canadian Pulp and Paper Association has been moved to 701-2 Drummond Building, Montreal.

Bank Deposits and Commodity Prices

The October Letter of the Bank of Commerce compares the expansion in bank deposits with the increase in prices during the past twenty years. "A large increase in bank deposits," it says by way of comment, "might naturally be looked for after the recent period of unprecedented prosperity, during which our industries were operating under exceptional war conditions, and wages and prices were governed more by the exigencies of war than by normal commercial considerations. To meet these exigencies credits were perforce created and an immediate expansion of deposits resulted. The advance in prices did not increase the cost of living sufficiently to check extravagance in personal expenditures, nor did it obstruct the steady increase in deposits, which reached the large total of $1,781,000,000 at the end of last August, being equal to $221 per capita as compared with $128 per capita in 1913, the year prior to the war. In the intervening period $1,400,000,000 in government loans were taken up. The public, therefore, have apparently been able to meet all calls made upon them by the government, to set aside large savings and, with the exception of the salaried classes and those with fixed incomes, to live as well as, if not more generously than, they did in the period immediately prior to the war. In August, 1919, according to the figures of the Department of Labor, the average weekly budget of a family for food, fuel, light and rent, in sixty cities, was $22.86, as compared with $14.40 in August, 1914, an increase of 59 per cent. The index number of the wholesale prices of commodities, which excludes rent, but includes many other items not contained in the official family budget, may be a more accurate gauge of the cost of living, and it shows an advance of 124 per cent. in the same period. It is instructive to follow the course of these prices as compared with that of the deposits, assuming the latter to represent the current purchasing power of the people. Taking the average wholesale price of commodities during the period 1890-1899, and the average deposits for the same period as being each equal to 100 (represented in the following chart by a broken line), it is found that the percentage of increase in deposits is very much greater than that in prices. The upper line indicates the yearly percentage of increase in deposits as compared with the average for the period 1890-1899, and the lower line the percentage of increase in the wholesale price index number. It would thus appear that after providing for personal requirements on a liberal scale, the people of Canada are able to accumulate a surplus of purchasing power that could not be put to a better use than the purchase of the government securities now being offered to them."



*Average January—July, 1919.

COCKSHUTT PLOW CO., LTD.

As previously noted in these columns, the net profits, after providing for depreciation, of the Cockshutt Plow Co. for the year ended June 30th, 1919, were $571,586, as compared with $553,214 the previous year. A balance of $86,401 had been brought forward, making a total of $657,987. Only 4 per cent. was paid on the 7 per cent. cumulative preferred shares, requiring $258,600, and the balance of $399,387 carried forward in profit and loss. The president stated that it was the intention to continue such payments until conditions became more settled. Dividends on the preferred stock were stopped for the quarter ended September 30th, 1914; 1 per cent. quarterly was resumed beginning November 1st, 1917; there are, therefore over 22 per cent. in arrears. Nothing whatever was paid on the common during this period. Some of the principal items in the balance sheet, compared with last year, are as follows:—

	1918.	1919.
Preference stock issued	$ 6,465,000	$ 6,465,000
Common	5,000,000	5,000,000
Bank and other loans	577,403	594,767
Accounts payable	492,159	598,650
Dividends	68,854	68,757
Reserves	3,000,000	3,000,000
Profit and loss	86,401	399,387
Property, plant and business	8,036,689	7,920,361
Stock in affiliated companies	570,000	675,000
Raw materials, etc.	2,494,096	2,844,446
Accounts and notes receivable	4,536,068	4,603,841
Total assets	15,699,493	16,136,044

Further details are given elsewhere in this issue.

The old board of directors, Colonel H. Cockshutt, Geo. Wedlake, E. A. Mott, Sir Augustus Nanton, James Adams, G. K. Wedlake and S. Perry were re-elected, and at a meeting of the board, the following officers were chosen: Col. H. Cockshutt, president, managing director and treasurer; Geo. Wedlake, first vice-president and general manager.

The 1919 annual meeting of the Canadian Mining Institute will be held in Vancouver, B.C., November 26th to 28th.

The Eagle, Star and British Dominions Insurance Co. is opening a branch at Antwerp, Belgium, with six sub-branches in other Belgian cities.

PUBLICATIONS RECEIVED

Bridging the Chasm.—By P. F. Morley, J. M. Dent and Sons, $1.35. This is still another contribution to the discussion of the race question in Canada. While Mr. Morley sets forth a point of view held by the majority of Canadians who have carefully inquired into the subject, his style is too didactic, particularly in view of the fact that those who read his book will be little in need of being preached at as to the proper attitude towards the French-Canadians.

Mercantile Credits and Collections.—By Charles A. Meyer, Macmillan Co., New York, 302 pp., with index, $3.50. This book is intended for credit men and for those interested in mercantile credit, and is based on actual experience. By confining himself to this subject, rather than discussing the nature of credit and its various classes, the author has produced something really useful to a class of men whose work is highly specialized. He deals with the securing of information, examination of financial statements, co-operation with salesmen, methods of collecting, bankruptcy, etc.

Manual of Statistics, 1919.—Manual of Statistics Co., 38 Park Row, New York, 1,106 pp., $6. This manual, which has been issued for forty-one years, gives in alphabetical order a list of companies whose securities are quoted on the leading stock exchanges, including Montreal and Toronto, with their capitalization, funded debt, directorate, dividends, date of annual meeting, etc. Maps are inserted in the case of important railways. This information takes up most of the volume, the balance giving stock exchange quotations, statistics of banks and trust companies, quotations of grain and provisions, cotton, money, etc.

Canada, The Land of Opportunity.—By F. W. Freir, A. and C. Black, London, Eng., 154 pp. with index, 3/6. Written for the many thousands of prospective emigrants in the old country, this book gives a fair and adequate description of conditions and opportunities here. The author, who was the founder and for many years editor of "The Colonizer," is well qualified to write on Canada for the British reader, and has already written several books of this kind. Recent years have, however, changed the situation considerably. He deals with openings for the unskilled, the trained worker, and the small capitalist, as well as the numerous practical difficulties which face all classes alike.

THE VICTORY LOAN PROSPECTS

EARLY reports of the results of Victory Loan canvassing indicate that the support which made our previous war loans successful is again forthcoming. Not only is the general public buying the bonds liberally, but the larger subscribers, concerning whom there was some doubt this time, are also duplicating or exceeding their previous subscriptions. A number of important factors have been considered as militating against the success of this loan. First of all is the fact that public interest in war activities and war expenditures ceased to a large extent with the signing of the armistice, and more especially with the return of the Canadian troops from overseas. The fact, however, that expenses cannot so readily be forgotten has been strongly emphasized in the publicity work, and no doubt this influence has been and will be offset as far as possible. There is a difference between an appeal for patriotic contributions and a campaign for the sale of war bonds, which will be appreciated by the canvassers who find that they have to offer an investment which is the most attractive available at the present time, and which investors will not be able to duplicate for a long time to come, unless some great and unexpected new situation develops.

Another point was the fact that this issue being taxable would not appeal to the large investors to whom the income tax is an important consideration. A difference of one-half per cent. in the yield from bonds is, however, more than offset by an income tax which is relatively low in the scale adopted at the last session of parliament. The subscriptions already received seem to indicate that this attitude is not being taken by the companies. In a great number of cases, however, the large subscribers ask if the market will again be supported in the case of this loan, from which it might be assumed that the subscriptions are being entered for advertising purposes, and that the bonds will come upon the market shortly; this really means that a substantial proportion of the total which will be accumulated will not represent real subscriptions, as the bonds in these cases will have to be resold to ultimate investors. This happened to some extent with both the 1917 and 1918 Victory Loans. The fact that few individuals have thus far entered large subscriptions would seem to bear out this point.

There is also to be considered the fact that industrial conditions during 1919, have not been as buoyant as in 1918. Industrial concerns which last year were making good profits from war orders were able to subscribe for large amounts. This year the scale of profits is somewhat lower. Employment conditions have also not been as good and canvassers in such cases find themselves confronted with difficulties which are insurmountable; on the other hand the general wage scale has increased and the experience of large number of employees in automatic saving should increase their readiness to subscribe to this loan.

While these and similar difficulties are being encountered there are on the other hand new conditions which make this loan more easy of success. It is to be the last Victory Loan and future borrowings of the Dominion government should be at lower interest rates. The organization in this case is more complete than ever before and in many sections of the country larger staffs are being employed.

TRANSPORTATION AS A WAR SERVICE

THE Department of Militia and Defence has issued a statement showing what was accomplished by Canadian railways, and by steamship lines serving Canada, in the transport of troops and supplies. The report, which was prepared under the direction of Quartermaster-General J. Lyons Biggar, states that the Canadian Pacific Railway carried 490,868 troops, the Grand Trunk 423,712, and the Canadian National Railways 612,451. These figures do not correspond with statements made as to the number of troops raised, for the same body of troops may be carried on two or more railways, and would be counted on each railway which carried them. During mobilization the C.P.R. carried 306,269 troops, the Grand Trunk 318,453, and the C.N.R. 345,051. During demobilization the C.P.R. transported 184,599, the G.T.R. 105,259, and the C.N.R. 267,436.

The Canadian Pacific Railway ocean services transported 264,013 Canadian troops across the ocean to and from England, the Cunard-Donaldson-Anchor Line carried 224,581; and the White Star Dominion Line 288,870. These figures for both railways and steamships include not only Canadian soldiers, but United States troops and allied troops raised in Canada. United States soldiers carried on Canadian troop-ships numbered 56,802. French, Serbian, Montenegrin, and Polish reservists carried by the railways totalled 16,103. Imperial troops numbering 3,292 were carried to the war zone by the Cunard-Anchor-Donaldson Line, which also brought back 1,805 Imperial service men who had been demobilized. The C.P.R. transported 9,032 Imperials who returned to this country after discharge. Chinese coolies for overseas to the number of 81,530 were carried by the Canadian Pacific Railway.

ACCIDENT INSURANCE COVERS MANY RISKS

THE cheapness of accident insurance, considering the variety of contingencies against which it provides, is pointed out in the September agents' letter issued by the Dominion of Canada Guarantee and Accident Insurance Co. "Such a policy," says the letter, "costs most insurers only a small percentage of what they pay per thousand for straight life insurance. True, only a certain percentage of accidents are fatal, but when it is borne in mind that life insurance is conditional upon the applicant passing a medical examination and that the amount payable at death is the only liability undertaken, it will readily be seen that after making due allowance for the numerous other payments provided for in an up-to-date accident policy—principal sum for loss of two limbs or both eyes (very frequently double liability claims), one-half such amount for loss of one limb or one eye, loss of time for a very extended period resulting from injuries that every man Jack of us is exposed to, operation fees, hospital indemnity, etc.—the cost for what (unfortunately) many men regard as the 'remote' accidental death contingency is infinitesimal.

"Is it a 'remote' contingency? Here are some figures recently published by one of the largest insurance companies on this continent; figures of such importance as to be worth carrying in the wallet of every accident insurance agent. The figures quoted are for the 12 years, 1907 to 1918, both inclusive. The accidental deaths included are cases where the risk is common to all men, regardless of occupation. War and epidemic claims are excluded. Out of the total death claims paid year by year the annual ratio of accidental deaths varies from 7.9 to 13.2 per cent., but the percentage is steadily increasing! The following are the figures quoted for the 12 years: Total death claims, 12,665; accidental deaths, 1,357; ratio (average for 12 years), 10.7 per cent.

"Ten out of every hundred death claims paid by this company are accidental death! To us these look like figures that ought to carry great weight with thousands of men who may never have had this aspect of accident insurance placed before them."

THE GRAND TRUNK PROPOSALS

AFTER a brief flurry of opposition, chiefly from Quebec province, it is now expected that the government's plan for the purchase of the stock of the Grand Trunk Railway will be approved with little or no change. It is still more certain that it will meet with the approval of the shareholders, who have a good chance of receiving a substantial payment for their stock, while the holders of all the bonds and of the four per cent. guaranteed stock will have securities equivalent to bonds of the Dominion of Canada.

The government has taken this step in preference to letting the Grand Trunk go into liquidation, on the grounds that its inclusion in the national railway system will improve the latter. Unquestionably the national railways did lack branch lines and terminals in the east, which facilities are possessed by the Grand Trunk. If the government policy is sound, therefore, it may be expected that the whole system will in a few years, provided prosperity and immigration continue, become self-supporting as regards operating expenses and fixed charges, and possibly show a return on the money invested. If this does not happen, then it would have been better if the Canadian people had not shouldered the additional burden, but rather have left it in the hands of the present owners for use or discard as they saw fit, or for sale to the successful Canadian Pacific.

SOME FACTORS IN STREET RAILWAY COSTS

DEFICITS from municipally owned utilities have become so common that civic officials have given up seeking excuses for them. Thomas F. Murphine, who is superintendent of the Seattle street railway, comes forward with some real points, which would seem to indicate that certain items of transportation cost should not be thrown on the shoulders of a street railway system, whether publicly or privately owned. He says:—

"If there is any system of reason or logic that justified the practice of making the street car rider pay the cost of transporting policemen, firemen, mail carriers, city officials, etc., we are not familiar with it. Neither do we think that a street car system should be used as an adjunct to the taxing machinery of the state, and consequently no additional burdens should be placed upon the car rider in order to pay into the city treasury any profits or any percentage of the gross receipts of street railways. Pavement between the tracks is not necessary so far as the street car is concerned, and there is no logic in requiring the street car rider to pay for it."

SOLDIERS' CIVIL RE-ESTABLISHMENT REPORT

THE report of the parliamentary committee on Soldiers' Civil Re-establishment is now being printed. It provides for an estimated additional expenditure of $35,000,000. No general scheme is recommended, but on the other hand a multitude of proposals are suggested which will likely be considered as of no value, and at the same time may constitute loopholes for the disbursement of public funds far in excess of the estimate. However, the fact that the subject has been thoroughly investigated should end the continual discussions which are taking place on the subject.

Among some of the suggestions are the following: Extension of vocational training, with additional allowances; equalization of gratuities for Imperial troops; investigation into possibilities of insurance for disabled men; loans not exceeding $500 for disabled men vocationally trained; investigation of possibilities for small land holdings; and the abolition of private employment agencies.

The English banks have decided to include women employees on their permanent staff. The Bank of England alone has over two hundred. The attitude of the other clerks is not hostile, but they maintain that there should be no difference in the wage scale.

* * * * *

Great Britain, the United States, and Canada are all spending too freely. This is the conclusion of Sir John Aird, general manager of the Canadian Bank of Commerce, who has been visiting France, Belgium and Holland. Some of the European countries, on the other hand, are devoting their entire energies to production, and we will be sure to feel the effects of their competition.

* * * * *

It is curious that practically all so-called "reconstruction" proposals require the expenditure of public funds. Any business, or any class of people, could unquestionably be made prosperous by being subsidized, but no proposal is really constructive at the present time unless it admits of our huge budget being reduced rather than enlarged. What we need is industries and individuals who will contribute to the nation rather than be a drain upon it.

BANK BRANCH NOTES

Three Branches Closed—Merchants Bank to Have New Regina Office

The following is a list of branches of Canadian banks recently opened:—

Thamesville, Ont.	Molsons Bank
Thamesville, Ont.	Dominion Bank
Williams Lake, B.C.	Canadian Bank of Commerce
*Vilna, Alta. (Bellis)	Canadian Bank of Commerce
Perth, Ont.	Royal Bank of Canada
Blenheim, Ont.	Union Bank of Canada

---

*Sub-agency.

The office of the Bank of Montreal at Clinton, B.C., formerly sub-agency to Ashcroft, has been established as an independent branch of the bank.

The following branches have been closed:—

Sioux Lookout, Ont.	Bank of Montreal
Toronto, Ont. (Exhibition Camp)	Bank of Montreal
Phoenix, B.C.	Canadian Bank of Commerce

New Regina Office for Merchants Bank

A fine new building is to be erected by the Merchants Bank of Canada between Scarth and Cornwall Streets, Regina, Sask., at the cost of over $75,000. The property was acquired from the Franco-Canadian Co., of Vancouver, B.C., for a consideration of $78,000. The plans are being hurried through, and it is expected that the premises will be ready for occupancy early in the spring.

The Dominion Bank has purchased the north-west corner of Kennedy Street and Portage Ave., Winnipeg, Man., and next spring will proceed with the erection of a new bank building to be used as a city branch office.

The Bank of Nova Scotia has purchased the Clarence Hotel property at Douglas and Yates Streets, Victoria, B.C., at the price of $77,500.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended October 30th, 1919, compared with the corresponding week last year:—

	Week ending Oct. 30, '19.	Week ending Oct. 31, '18.		Changes.
Montreal	$134,179,180	$101,269,365	+	$32,909,815
Toronto	92,906,762	60,699,089	+	32,207,673
Winnipeg	68,758,319	69,550,008	—	791,689
Vancouver	15,521,230	9,832,008	+	5,689,222
Ottawa	8,046,645	8,328,573	—	281,928
Calgary	10,503,563	7,582,398	+	2,921,165

"WHERE THIEVES BREAK THROUGH"

Clause for Protection of Company is Strictly Interpreted in Courts of Law

By M. L. Hayward, B.C.L.

INSURANCE against burglary is a comparatively recent form, but is a subject of increasing importance in these degenerate days when the art of the "yegg" has kept pretty even pace with the advance of science. In this connection the case of Blank vs. National Surety Company is worthy of attention, for, while it lays down a rule now well established by the American courts, it involves a point that is apparently a new one as far as Canadian decisions are concerned.

In this case the Surety Company issued a burglary policy insuring Blank against "direct loss by burglary from the safe described in the schedule, located on the premises of the assured, by any person or persons who shall have made entry into such safe by the use of tools or explosives directly thereupon."

It might appear at first glance that the above clause was intended merely to protect the Surety Company in case Blank carelessly left the safe door unlocked, but one night he locked the safe as usual and went home. Burglars entered the building by breaking the glass in the transom of the door, opened the insured safe by skilfully manipulating the combination, broke off the ends of the small wooden drawers in the interior of the safe, and "got away" with $462.84 of Blank's hard and honest cash.

Blank then sued the Surety Company on the policy; the latter defended on the ground that the part of the policy quoted above exempted them from liability, and the Supreme Court of Iowa decided in their favor—on the ground that the safe was not opened "by the use of tools or explosives directly thereupon" as provided by the policy.

Clause Protects Company

"There is no apparent ambiguity in the language of the policy," said the court. "The language of the clause above quoted excludes the idea suggested by counsel. The indemnity provided is against loss resulting from an entry made into the safe by the use of tools or explosives directly thereupon. This necessarily means the door or outer part thereof. The risk assumed by the insurer contemplates that the door of the safe shall be securely locked, and entrance therein can be made only by the use of tools or explosives for that purpose. This secures the insurer against loss resulting from carelessness in leaving the safe door unlocked by persons having access thereto. The policy is not a general policy providing indemnity against all losses resulting from burglary, but only such loss as results from means employed according to the terms of the policy. The language of the policy certainly does not contemplate indemnity in a case where access is gained to the inner chamber of the safe without the use of tools and explosives, nor against loss resulting from breaking or destroying a wooden drawer, which would offer but indifferent resistance to the simplest tools after the outer door has been opened by working the combination to the lock thereon. The policy does not purport to cover all losses resulting from a burglarious entry of the building in which the safe is kept, but only losses resulting from an entry made into the safe by the use of tools or explosives directly thereupon. To give the policy the meaning contended for by counsel would deprive the language used of its usual and ordinary meaning and distort the provision above quoted to mean something evidently not intended by the parties to the contract."

ROYAL INSURANCE MAKES NEW PURCHASE

A special cable to the "New York Journal of Commerce," dated October 28th, states that the Royal Insurance proposes to absorb the Liverpool and London and Globe Insurance Company. One Royal 5-pound share, having 1 pound 5 shillings called, and 1 pound called are to be given for one Liverpool and London and Globe share.

DOMINION'S WORK ON FIRE PREVENTION DAY

The Dominion Fire Commissioner, J. Grove Smith, has issued a statement describing the activities of his office in connection with fire prevention day, October 9th. "Following the publication of the royal proclamation issued by his Excellency the Governor-General," he says, " a special letter accompanied by copies of the proclamation and the amended criminal code was sent to every mayor and municipal clerk in Canada. Similar matter, with the addition of leaflets for distribution, was supplied to all fire departments, boards of trade, chambers of commerce and community clubs. Through the co-operation of the Canadian Manufacturers' Association and the Retail Merchants' Association of Canada, suitable leaflets were distributed to their members. All public and private schools and colleges were provided with copies of the proclamation and a special circular outlining a programme for fire prevention day. Letters, circulars, special self-inspection forms and leaflets for enclosure in pay envelopes were supplied to all factories and wholesale houses. Copies of all literature issued, together with editorial matter, was sent to every newspaper in the Dominion. Altogether, this office in the two weeks preceding fire prevention day prepared and distributed over 520,000 letters and pieces of literature in English and French, and this was, of course, supplemented by the splendid work of the fire marshals in their respective provinces.

"As the result of the joint efforts of all organizations, fire prevention day, 1919, was observed in about 26,000 schools. Demonstrations, clean-up campaigns and other effective methods were employed by over 300 fire chiefs; 79 municipal councils passed resolutions approving the official observance of the day; special inspections on forms supplied by this office were conducted in over 6,000 factories, warehouses and large properties and suitable literature was distributed to the employees of these concerns; 785 newspapers carried matter issued by this office and by the provincial fire marshal departments, 423 made editorial mention of the campaign and 64 dailies in the larger cities and towns of each province gave a full page spread on October 8th. Up to date, 735 factories have signified their intention of instituting a permanent monthly inspection system under our direction and 405 have undertaken to use our leaflets in all employees' pay envelopes during the next twelve months.

"While the tide is at the flood, it is deemed advisable to give some definite direction to the general interest awakened by fire prevention day. To this end it is the intention to visit all the larger cities in Canada and with the co-operation of the provincial fire marshals, hold conventions and organize local committees to carry on the work. An itinerary is being arranged to commence at Victoria, B.C., on November 10th and conclude in the maritime provinces about the middle of December."

WINNIPEG LIFE UNDERWRITERS MEET

The first meeting for 1919-20 of the Winnipeg Life Underwriters Association was held on October 25th, with the president, J. H. Baird, of the Aetna Life, in the chair. The speaker of the evening was Henry Detchon, general manager of the Canadian Credit Men's Trust Association, who fully explained the new Bankruptcy Act passed at the last session of parliament. He said that large numbers of inquiries were being received with reference to the Act, which was conceded to be as fair as any that had been prepared by any legislature in the world. It had been reviewed previous to its passage by the various classes in the commercial and legal community, and was acceptable to all. Further light would, however, be thrown on the subject in future years and amendments would be asked for.

D. C. Heath, fire commissioner of Manitoba, has recommended that investigation of fires in that province be conducted by the provincial police.

INSURANCE MEN TO MEET IN PETERBORO

Life underwriters of Peterboro, Ont.; have arranged for an educational meeting on November 6th and 7th, at which several hundred insurance men from central Ontario are expected to be present, as well as head office representatives. Among the speakers on the program are H. C. Cox, president of the Canada Life, J. E. Kavanagh, 3rd vice-president of the Metropolitan Life, and E. J. L'Esperance, well-known agent for the Imperial Life in Montreal. A. E. Dawson, representative of the Imperial Life in Peterboro, is in charge of the arrangements.

INCORPORATE TO AVOID DOUBLE TAX

The heavy income taxes now in force both in Canada and the United States is making United States firms, with branches here, secure separate Canadian charters for the latter. "The effect of this arrangement," says a circular of the Guaranty Trust Co., "is to render the profits of the business liable only to Canadian taxation. Dividends paid to the parent company in the states are, of course, subject to double taxation, but many firms have adopted the policy of using at least part of their earnings in developing and enlarging the Canadian business In lines that have a market abroad the manufacturers will be able to take advantage of the British preference to Canadian-made goods."

HYDRO INVESTMENT TO BE TREBLED

At a meeting in Windsor, Ont., on October 25th, Sir Adam Beck stated that within the next five years the total investment of the Hydro in Ontario would probably total $285,000,000. The present investment is $98,000,000. The larger total would include $20,000,000 in Chippawa development, Nipigon $6,000,000, St. Lawrence $25,000,000, Saugeen $2,000,000. $45,000,000 for development of the existing system, and $50,000,000 for radials.

The meeting was held in connection with the proposed purchase of the Detroit United Radial lines in the Windsor district. These, said Sir Adam, could be purchased for about $2,029,000. The Commission has taken over 86 corporations and companies in Ontario, and this is the last one west of Brantford. Payment in 40-year 4½ per cent. Hydro bonds would, he said, be satisfactory to the owners.

WESTERN CANADA FLOUR MILLS CO.

Profits of the Western Canada Flour Mills Co., Ltd., for the year ended August 30th, 1919, were $437,986, as against $543,844 the previous year. Both the flour milling profit and the profit from other sources, which were $229,355 and $208,631, respectively, showed decreases compared with 1918. Bond interest required $83,555 and dividends $250,000; a balance of $712,865 is carried forward into the current year, compared with $858,434 brought forward from 1918. The balance sheet shows the following changes in the more important items:—

	1918.	1919.
Stock issued	$2,340,100	$2,449,588
Bonds	1,439,926	1,371,552
Current liabilities	1,025,018	1,101,626
Profit and loss	858,434	712,865
Capital assets	3,727,730	3,525,461
Current assets	1,935,748	2,110,172
Total assets	5,663,479	5,635,633

Among the current assets, inventory of stock-in-trade, etc., shows an increase of $428,000, and cash an increase of $16,000. The other important items have been reduced substantially.

PERSONAL NOTES

Mr. E. H. Minnion, fire manager of the London Guarantee and Accident Company of London, Eng., is in Canada at present.

Mr. J. F. Paige, general manager of the Port Arthur Shipbuilding Company, has resigned to take charge of the Halifax shipyards.

Mr. H. Spence Thomas, one of Wales' largest coal and iron operators, is in Canada. He is at present looking over industrial possibilities in Alberta.

Lieut. J. D. Tompkins, formerly of the Vancouver Daily Sun staff, has recently accepted the position of advertising and publicity manager for the firm of Burdick Bros. and Brett, stock and bond brokers of that city.

Mr. Geo. W. Taylor, assistant Deputy Minister of Inland Revenue, Ottawa, has been appointed as assistant commissioner of customs, to succeed Mr. R. R. Farrow, who was recently named commissioner of customs.

Mr. J. L. Englehart, chairman of the Timiskaming and Northern Ontario Railway, has resigned owing to ill-health. He has held the position for fourteen years. Before entering the service of the government as chairman of the T. & N. O. Railway Commission in 1905, he had had many years' valuable experience in commercial life. Born in Cleveland, Ohio, in 1847, Mr. Englehart was educated in that city. In 1870, he came to Canada, and engaged in producing, refining and exporting Canadian petroleum and its products, and thus at the age of twenty-three he was doing business at London and Hamilton. In 1881, he went to Petrolia to operate the Imperial Oil Company, in which his former interests were incorporated, and was made a vice-president. He is president of the Crown Savings and Loan Association, Petrolia; vice-president, London and Western Trust Company; and a director of the Bank of Toronto.

Mr. E. Bayley has been appointed deputy attorney-general, for the province of Ontario, to succeed the late Deputy Attorney Cartwright. Mr. A. N. Middleton becomes legal secretary of the department and solicitor to the attorney-general, in succession to Mr. Bayley.

Mr. Raymond Allan has been appointed secretary to the firm of Greenshields and Company, Montreal, Mr. T. S. McGovern as manager, and Lt.-Col. F. H. Wallis, M.C., as assistant manager. Lt.-Col. Wallis has been connected with Greenshields and Company since 1910 as manager of the firm's London, England, office.

Mr. John Macdonald and Mr. Richard Southam, of Toronto, have been appointed directors of the Toronto branch of the Scottish Union and National Insurance Company. Both the new directors are well known in business circles, the former as a wholesale drygoods merchant and the latter as managing director of the Southam Press, Limited.

Mr. Joseph Anderson has been appointed eastern inspector of the Union Bank of Canada, resident in Toronto. Mr. Anderson comes to Toronto immediately from Winnipeg, where he was in the head office. Entering the bank's service at Hastings, Ont., where his father was for many years a private banker, 23 years ago, Mr. Anderson has been manager at Calgary, Vancouver, Montreal, Moosomin and Moose Jaw. This appointment follows upon the opening of many new branches this year, the Union Bank having a total of 380 at present. Last week it celebrated its fifty-fourth anniversary, having been first incorporated by an Act of the provincial parliament of Canada, in 1865, under the name of the Union Bank of Lower Canada, with head office in Quebec City. It was one of the first banks to enter the western field, and 270 of its branches are now located there. Because of its extensive operations there, the head office was moved to Winnipeg a few years ago.

Mr. W. M. O'Connor has been appointed estates manager of the National Trust Co., Toronto. He has been treasurer of the company, and succeeds the late Mr. George H. D. Lee and will be associated, as heretofore, with the head office. Mr. O'Connor entered the service of the National Trust Company in 1899, and has been identified with the estates branch of the company's work for a number of years.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first three weeks of October:—

Canadian Pacific Railway.

	1919.	1918.		Inc. or dec.
October 7	$3,965,000	$3,458,000	+	$ 507,000
October 14	4,029,000	3,524,000	+	505,000
October 21	4,241,000	3,509,000	+	732,000

Grand Trunk Railway.

October 7	$1,611,553	$1,460,738	+	$ 150,815
October 14	1,619,110	1,433,788	+	185,322
October 21	1,486,851	1,296,165	+	190,686

Canadian National Railways.

October 7	$2,102,281	$1,789,180	+	$ 313,101
October 14	1,974,750	1,745,665	+	229,085
October 21	2,129,180	1,915,606	+	213,574

A deputation of men interested in the lumber and pulp industry in Quebec met the provincial Minister of Lands and Forests on October 15th to discuss regulations for the protection and development of the forest resources of the province.

AIRCRAFT INSURANCE AS A CASUALTY LINE

Possibilities Depend Entirely Upon Standardization in Manufacture, and Provision of Equipment at Terminals

THE development of aerial navigation for commercial and pleasure purposes may offer a new field for insurance in various lines, including life, accident, compensation, public liability, property damage, collision, fire, marine, and general transportation hazards. These possibilities are discussed in the September issue of the "Travelers Standard." "At the present moment," says the article, "the development in commercial and pleasure aircraft has not been sufficient to furnish substantial volume nor any dependable promise of stability. The aircraft available for private or commercial uses are largely of the training type, and these machines are not fitted nor intended for long-distance flights. Aircraft of this description are in use in considerable numbers about the country for short flights and exhibition work, either upon private fields or in connection with fairs and other public gatherings where they serve as an attraction. Strange as it may appear, the large majority of the aircraft now available for private ownership are much more safe when used reasonably for exhibition, including so-called trick or 'stunt' flying, than they would be for long distance flights, as a general rule. Of course, a limited number of manufacturers are developing new types, and with that development comes the insurance risk involved in their demonstration, in teaching their prospective owners to fly, and, to a limited extent, their actual use in private or commercial lines. Many things have contributed to a delay in the development of aircraft.

Both Life and Casualty Risks

"The most difficult feature of the insurance proposition is that which involves the life and casualty lines. As yet but one company has undertaken such risks, and that is the Travelers Insurance Company, which as might be expected, is in this line, as it has been in other lines, a pioneer. The Travelers Insurance Company realized that in a large majority of our states there are compensation laws absolutely requiring insurance for employees. In the development of the aircraft employees are required to fly, and insurance as required by law must be available to their employers. It therefore rather becomes the duty of an insurance company writing other compensation lines to undertake this one also. When The Travelers Insurance Company entered this line it was well aware of the fact that development to create a real insurance field was a prospect rather than an accomplishment, but having concluded that it was its duty to provide protection for employers so that they might comply with the law, the company concluded to take on other lines as well, and this resulted in an announcement that the company was prepared to write a special form of life insurance for a one-year non-renewable term, a special form of accident insurance for the customary one-year term, and a special form of short-term accident insurance, somewhat analogous to the railroad ticket practice, to cover passengers during a definite period or during a given flight. The company also writes compensation insurance for aviators, and public liability and property damage insurance for aircraft. This latter form is in some respects analogous to automobile public liability and property damage, as the premium is based upon the number of aircraft to be covered, with a premium charge for each, but it differs materially in one respect, which is that it does not cover injuries to passengers in the aircraft.

"Although the word 'aircraft' fairly includes both lighter-than-air and heavier-than-air machines, the foregoing references are entirely limited to the heavier-than-air class. The Travelers have written no insurance upon balloons in any form. The main trouble here, from a life and casualty standpoint, is that the gas used is not satisfactory. A large majority of balloons use highly combustible or explosive gas. There is really only one gas known which is incombustible and non-explosive and which would serve the purpose, and that gas is helium. The cost of helium, however, is practically prohibitive. Recent serious disasters in Chicago and on the Texas fields, involving the explosion of the gas containers, afford sufficient evidence that this type of aircraft is not yet in the insurable class.

"The development of aircraft for private and commercial purposes to a point presenting conditions fairly capable of insurance will require certain things which ought to be easily obtained, but apparently will not be. Among these things we may mention legal regulation of landing fields, whether public or private, particularly with respect to properly restraining visitors who come to the field, either intending to try a short flight or simply for the purpose of seeing others do it. Our recent experience indicates that visitors are permitted to roam all about the field, and that they are frequently exposed to the dangers (which are little appreciated) due to the landing and taking-off of aircraft. Bystanders do not appreciate the size of the craft nor the power or danger of its propeller when in motion. A number of accidents have resulted which could have been avoided if suitable requirements were made by law for the equipment of landing-fields to which the public is admitted, involving a certain sufficient space for landing, and a certain other definite and guarded space for the public which visits the field. Another important legal requirement is the proper control of flights, to eliminate so far as possible unnecessary flights over the centres of cities. Under all ordinary circumstances those occupying the air should be required to pass around cities, and landing-fields should be limited to suburbs where there is no dense population. Prohibited air channels have long been known in England, and probably in France. It is absolutely necessary that the hazard of flying over cities, especially for exhibition purposes and at low altitudes, should be eliminated by process of law.

Aviator is the Important Factor

"We might mention a number of other more or less important requirements which must precede the safe establishment of aircraft upon an insurable basis, but we shall mention only one of them, which is probably the most important of all. By far the greatest element involved in the aircraft risk, both from the life and casualty standpoint and from the fire standpoint, is the aviator himself. The safest and best constructed aircraft in the world becomes unsafe and highly dangerous unless the aviator in control is physically, mentally, and morally fit, and in every way competent. The control of this situation at present is exceedingly uncertain. There is no well-established system for examining and licensing aviators. The government had attempted some such thing, but it is rather a formality than an effective system. Either state laws or federal laws are required, which subject aviators to frequent examinations as to physical, mental, and moral fitness, and if found fit they should be licensed as aviators for a comparatively short period, subject to a further examination at its end, and no aviator should be permitted to take a machine into the air until he has such a license. When these things are reached by suitable laws it can be said for the first time that a proper start has been made toward the establishment of aircraft as a means of private transportation. Every important city in the country should proceed at the earliest possible moment to prepare suitable landing fields, with due and careful protection for the public, particularly during these days when this method of transportation is looked upon as a curiosity. States should pass laws protecting the innocent population from an unknown exposure due to unnecessary flights over dense centres of population, and particularly due to exhibition work and 'stunting' under conditions which are so terribly unsafe that the revolver which isn't loaded constitutes a trivial exposure in comparison.

"The hazard of flying as it affects the person on the street, in his workplace, or in his home, is far greater than is generally understood. We hear of accidents once in a while, but they do not impress themselves upon us. We hear of things being dropped from airplanes. We hear of injuries to buildings, trees, crops, animals and persons, without paying much attention to them, unless the affair amounts to a catastrophe; but it is an absolute fact that every man over whose head an aircraft passes is momentarily in danger; and although that danger cannot be wholly avoided, it can be materially lessened by sane and reasonable legislation.

which will be helpful in the development of aircraft and welcomed as a measure of safety by the people.

"Whether licensing aviators with frequent examinations should be conducted by the states or by the federal government is a question upon which different views will be held, but whichever is the better way this is the one important thing to be accomplished with the least possible delay. When these things have been accomplished, and when the manufacturers of aircraft have succeeded in overcoming the difficulties in which they have been placed by conditions over which they have no control, the aircraft will undoubtedly take its place in our daily lives as an efficient and practical means for rapid and reasonably safe transportation; but until that time insurance companies must handle the situation in a limited way and through most carefully guarded underwriting practices."

GOOD CROPS IN WESTERN MANITOBA

"Business in the Brandon district is good," says at telegram received from our western representative. "Thrashing is completed, and would average fourteen bushels to the acre. Wholesale and business men report collections considerably improved. There is not much demand for farm loans, but some demand for city loans. The housing situation in Brandon is acute as elsewhere, and there has been comparatively little building done this year."

BUREAUS OF MUNICIPAL RESEARCH

The value of municipal reasearch bureaus in civic life was emphasized by Horace L. Brittain, director of the Toronto Bureau of Municipal Research, in an address before the Calgary Board of Trade on October 15th. There was room for an organization of this kind in a city the size of Calgary, he said. Such a bureau must have education as its basis. He pointed out that this is the first and foremost matter to be considered, for unless the people are educated up to a system of true citizenship, they will never assist in improving conditions which, in the end, will be of a material benefit to the community at large. He said that our troubles to-day are both social and economic, and if the people will accept education they will manage to tide over the critical times. Inefficient control of public expenditures causes great waste and the proper results are not obtained. This waste may be combated in order to preserve the funds for development purposes, but so long as the system is at fault and this waste is allowed to continue, there will always be trouble.

ENEMY SHARES TRANSFERRED TO CANADA

Shares in Canadian companies, totalling about $1,000,000 in par value, formerly owned by enemy aliens in the United States, have been transferred to the Canadian Minister of Finance as Canadian custodian. This transfer was made upon application of the Department of the Secretary of State, and *The Monetary Times* is advised by this department that the disposition of the securities has not yet been decided. Among the securities are shares in the following companies: Bell Telephone Co. of Canada, Canada Cement Co., Ltd., Canada Iron Corporation, Ltd., Canadian Car and Foundry Co., Canadian Lowe Coke and Gas Co., Ltd., Canadian Pacific Railway, City Central Real Estate Co., Ltd., Crown Reserve Mining Co., Dominion Iron and Steel, Ltd., Grand Trunk Railway Co. of Canada, Lake of the Woods Milling Co., Ltd., La Rose Mines, Ltd., La Rose Consolidated Mines Co., Laurentide Co., Ltd., Marconi Wireless Telegraph Co., Ltd., Canada, Mexican Light and Power Co., Ltd., Montreal Light, Heat and Power Co., Montreal Tramways Co., Ogilvie Flour Mills Co., Ltd., Prince Rupert Coal Fields, Ltd., Royal Bank of Canada, St. Maurice Power Co., Ltd., Canada, Sherwin-Williams Co., Canada.

DOMINION WILL BACK ALBERTA PROJECTS

Negotiations are now under way for the acquisition of the Edmonton, Dunvegan and British Columbia Railway by the Dominion government. Following a recent visit to Ottawa, Premier Stewart, of Alberta, intimated that the road might soon be added to the government lines. It was a project of J. D. McArthur, and its bonds to the amount of about $11,000,000 have been guaranteed by the province.

The irrigation plans for Alberta were also discussed, and it is understood that the Dominion will be responsible for the surveys and engineering, while the local districts will bear the cost of the actual work, issuing bonds to be guaranteed by the province.

MANUFACTURERS ASK TARIFF VIEWS

The Canadian Manufacturers' Association has issued a circular to its members asking for views on proposed changes in the Canadian tariff. The changes referred to are, the suggestions made by the finance minister in his budget speech last June; the platform of the Canadian Council of Agriculture; the tariff resolution adopted at the Liberal convention in Ottawa on August 6th; the resolution passed at the C.M.A. annual meeting in June, and also the resolution dealing with tariff preference within the Empire. Members are requested to prepare a statement showing how the proposed readjustments would affect their business, and are also asked to gather information as to their tariff requirements.

CONSUMERS' GAS CO.'S REPORT

Details of the annual statement of the Consumers' Gas Co., which was submitted at the meeting held on October 27th, are given elsewhere in this issue. The profit and loss statement shows an adverse balance of $127,064, which amount was transferred from the reserve fund, in order to meet interest, dividends and appropriations for the plant and buildings renewal fund. In his address to the shareholders the president, A. W. Austin, pointed out that the recent increase in the price of gas was effective during only one month of the period covered by the statement. The directors did not feel warranted in increasing the rate charged to gas consumers until such time as it could be definitely shown that an increase was necessary. The company's act of incorporation provides that any sum drawn from the reserve fund to meet the requirements of the company will be restored from time to time out of earnings and it is anticipated, said Mr. Austin, that the earnings during the current year will be sufficient to restore the reserve fund by the amount withdrawn.

That the business of the company continues to increase in spite of the competition of electricity, is shown by the fact that there was an increase of 4,011 in the number of meters used, and of $206,872 in gas sales. The costs of production have of course, increased heavily, the present unit prices of the three items of coal, oil and operating wages representing a total increase for the year of $1,114,677 upon pre-war figures. A comparison of the balance sheet with that of last year shows that total assets have increased by $2,000,000, principally in the investment of real estate, plant and equipment.

On the liabilities side the reserve fund now stands at $278,791, compared with $405,856 last year. This reserve is, of course, in addition to the reserve of $2,840,877 against the premium on stock issued under the Act of 1904. Advances from the bank increased by $339,000, corresponding with the increase in assets and the reduction in reserve.

The directors were re-elected as follows: A. W. Austin, A. H. Campbell, Wellington Francis, F. LeM. Grasett, John Hoskin, H. Langlois, Thos. Long, J. F. Michie and Sir Edmund Osler. At a meeting held subsequently Mr. A. W. Austin and Mr. Wellington Francis were re-elected president and vice-president, respectively.

DENIES C.P.R. WANTS GRAND TRUNK

President Beatty Opposes Government Acquisition, but Pledges Support of Victory Loan by Canadian Pacific

IN Montreal, on October 23rd, a meeting of outstanding importance was held in connection with the Victory Loan. Among those present were E. W. Beatty, president of the C.P.R., Sir Henry Drayton, J. W. McConnell, P. P. Cowans, John W. Ross, Sir Frederick Williams-Taylor, Sir Vincent Meredith, and E. L. Pease. The finance minister presented the case for the Victory Loan, requesting the support of all present. The Grand Trunk proposal, he said, had nothing to do with the Victory Loan, and not a cent of the money raised would or could go towards the acquisition of the Grand Trunk.

Mr. Beatty, outlining his position on both questions, said:—

"The minister of finance and myself are not entire strangers. I knew him first as corporation counsel for the city of Toronto, and I admired him as an adroit counsel, and a sound lawyer. I knew him again as chairman of the railway board, and I marvelled at times at his utter disregard of legal principles. I know him now as minister of finance, whose first work is the successful prosecution of this loan, but who has, I think a very sincere appreciation of the necessity for national economy and prudence in official expenditure for the next few years if Canada is to reach the high place of prosperity to which it is entitled. I have also known the minister in roles which did not secure my unqualified commendation—he was a fine lawyer, an able judge, and will be, I feel sure, a national asset as finance minister, but his literary efforts are not all that I could wish. Some time ago, when he was a little younger, and, therefore, more prone to make mistakes —he wrote a book. He wrote the book as chairman of the Royal Commission, appointed to inquire into the railway situation in Canada, and the book was called, and will go down into history as 'The Drayton-Acworth Report.' I read all of it with a great deal of interest, and some of it with a great deal of appreciation. In it he said some very nice things about the C.P.R. and then he suggested that the government of Canada might own all the other railways and operate them under a system which he outlined. I have always wondered how a man could be so right and so wrong in the same book. In consequence of this, what the minister, no doubt, regarded as his magnum opus, railways were acquired and still others are designed to be acquired and the support of those advocating these acquisitions has already been found in this transportation epistle known as 'the Drayton-Acworth report.'

Attitude on Grand Trunk

"The minister has appealed to us all to give our wholehearted support to this loan, and the purpose of my being here is to frankly explain to you what the position of the company I have the honor to represent will be. The government have recently announced to parliament and the people their intention to acquire the Grand Trunk and the Grand Trunk Pacific Railways, and there is great difference of opinion on that. Their proposals have come before the people at the same time that the support of the people to the Victory Loan is being strongly urged. There exists in Canada a strong sentiment among a great many people that the proposed action is unnecessary and unwise and will impose upon the people a heavy burden.

"In this connection, and as one of the grounds on which parliament is urged to support the proposals, it is said that if they are not confirmed and the roads are not acquired by the government they will—to use the expressive phraseology of the minister of railways—be 'gobbled up by the C.P.R.' I can imagine several things worse than that. It is only right that I should point out to you that there exist certain objections to this course which render the possibility of it ever taking place almost ridiculously remote. In the first place, I may be pardoned for calling your attention to the fact that there exists by statute an absolute prohibition against any arrangement by way of amalgamation or joining of earnings between the Canadian Pacific and the Grand Trunk or any branch lines of the Grand Trunk or leased by it or under its control. In the second place, the Grand Trunk duplicates, in many respects, the existing facilities of the Canadian Pacific in eastern Canada, which would render its acquisition by the C.P.R. both unnecessary and unwise. In the third place, the Grand Trunk cannot be divorced from the Grand Trunk Pacific with its enormous liabilities; liabilities which, I imagine, no corporation in Canada would think of assuming, even though they were able to do so.

"Lastly, the acquisition of the Grand Trunk or any portion of it has never been suggested to the Canadian Pacific or by the Canadian Pacific, and has never been considered or contemplated in any way or by any means direct or indirect. The suggestion is the old familiar bogy, which has been raised on previous occasions, and which is only raised in fulfilment of the time-honored practice in the purchase of property, namely, that of securing an imaginary second purchaser in order to make the purchase more attractive to those who have some doubt as to whether or not they want to effect a purchase.

"The position of the Canadian Pacific is the position of every other taxpayer in Canada, the position of looking with grave apprehension upon the assumption of these enormous obligations under a system of administration which we do not believe to be effective. From a purely competitive transportation standpoint, the company has not yet reached the stage when it can contemplate with serious apprehension the assumption of enormous liabilities by its competitors.

Will Support Loan

"It is perhaps not necessary for me to explain my own views on the subject of government ownership and operation of railways, but it is I think, desirable that I should explain to you why I can hold one view on this subject and still an independent view on the subject of the Victory Loan. You are familiar with the objects of the loan; they are stated officially to be 'To pay indebtedness incurred and to meet expenditures to be made in connection with demobilization, including the authorized war service gratuity to our soldiers, land settlement, loans and other purposes connected with their re-establishment into civil life, for the capital outlay for shipbuilding and other national undertakings and for the establishment of any necessary credits for the purchase of grain, foodstuffs, timber and other products and will be spent wholly in Canada.' This official statement is further supplemented by the minister's own statement to-night that no portion of these moneys will be diverted to the acquisition of the Grand Trunk or the payment of such obligations as will be incurred by such acquisition; in other words, this loan is in its essence a loan to support Canada's credit, to repay the moneys which it owes (largely to its own people), to pay its just debts to its soldiers and to further its trade and commercial expansion. Any one or all of these reasons is sufficient to warrant the support of the loan. This is not a loan to any government of Canada, but a loan for Canada initiated by the government of the day. There is a distinction in my mind between the support of government and the support of our own country, and if this money is required for the latter purpose—and it is irrefutable that this is the case—then no support which would otherwise be given to it should, I think, be withheld because of a difference of opinion in respect of proposed railway policies.

"The Canadian Pacific is a Canadian enterprise, its prosperity depends upon the prosperity of Canada. At no time before the war or since the war has it, I think, been suggested that the company did not realize and fulfil to the best of its ability the obligations which it owed this country. So I am at liberty to say to you that, notwithstanding my inability to support a railway policy which I consider unjustified and unwarranted (and I think I am perhaps in a position to appreciate some of the objections to such a policy and what the results will be), the support of this loan by the Canadian Pacific Company and the amount of subscription of the company to the loan, will be exactly the same as it would have been had not this question of the future of other railways been interjected into the campaign at this time."

PROFIT-SHARING WITH RESERVE AGAINST DEPRESSION

Plan Submitted to Manufacturers Seeks to Overcome Principal Objection to Profit-Sharing

At the meeting held in Montreal on October 16th for the purpose of organizing the Quebec division of the Canadian Manufacturers' Association, a profit-sharing plan was introduced by F. W. Stuart, of the Cluett, Peabody Co., and was referred to the incoming executive for submission to the Industrial Relations Committee. The plan is as follows:—

"The weak point of all profit-sharing plans which I haxe examined, is the condition created by the non-distribution of profits during periods when there are no profits to distribute. Possibly 75 per cent. to 85 per cent. of wage earners live up to their incomes, whether such incomes are straight wages, or wages and bonus, or wages and share of profits. When shares of profits are received over a term of prosperous years, and a period of depression is reached, and the distribution of a share of profits is discontinued, many employees, anticipating their share of profits, and having possibly undertaken obligations which they figured upon liquidating with their share of profits, are placed in a very undesirable and serious position, in not being able to meet these obligations. Dissatisfaction, suspicion and discontent is therefore created, to the detriment of the industry in which this condition has been brought about. So far as I can learn, the wage-earner with a family or dependents to support, wishes a plan or a system which will assure him or her a regular income from year to year, no matter what the economic conditions may be. It is, therefore, desirable to devise a plan which will enable this to be done, without being too great a charge on the resources of the industry concerned, or increase the fixed charges to too great an extent.

Create Employees' Fund

"Having this in mind, I submit the following as a basis, or plan, to work upon, to perfect a system which would be fair and in the interests of employers and employees alike. First, a fair wage, commensurate with the cost of living, must be paid. A per cent. of the total amount of wages paid, equivalent to the per cent. of dividend paid on preferred stock, be placed in a fund and invested in government or similar securities; this fund to be the property of the employers, and admininstered by a committee comprised of members of the executive of the company and of the employees. If seven per cent. is paid on preferred stock, seven per cent. of wages would be a fixed charge on the business and placed semi-annually or annually in this fund. If the wages of a company totalled $1,000,000, the annual contribution to the fund would be $70,000. The interest, say five per cent., on this amount would give an additional revenue of $3,500. This amount added to the fund covering a period of, say five to ten years, could reasonably be assumed to serve its purpose during a period of depression, of say two to three years.

"The object of the fund would be to take care of such conditions, or others, as follows: During times of depression, if the factory is running on short time, the difference between short running time and regular running time would be paid from the fund. If the plant is closed for repairs, vacation, or any other reason, partial or full wages would be paid from the fund. The fund would be used for paying accident and sickness insurance—the latter possibly to include illness of any member of an employee's family, who may be too young or too old to earn a wage. A fixed amount would be paid for every birth or death in the family of an employee. The fund could also act as a pension found, assuring an income to retired aged employees.

"The big problems which face the average wage earner, are the periods of unemployment, working on short time, illness in the family with its additional expense, the closing down of the plant for repairs, vacation, or other reasons, and cutting off his income for periods which run him into debt, which means months or years of saving to wipe out. The plan, which, in my opinion, will do away with the anxieties, troubles and conditions which are created during periods such as these, will be the one which will tend to go far towards making living conditions of the average family satisfactory to them, and bring happiness and contentment to employees in factories, offices, and warehouses. Assure a regular wage from year to year with provision for illness, accident, old age, etc., and I believe there will be very few industrial disturbances amongst employees. I am sure that such a plan as I have outlined, carefully worked out, and covering all the good and bad features which might arise, will be acceptable to employees generally, and do away with the weak features of weekly, monthly, or annual cash or stock distribution of profits, which are usually spent as received and no provision made for the meeting of unusual or extraordinary conditions, over which the wage earner has no control."

NEW REGINA FINANCIAL FIRM

L. E. Curran and Co. have opened an office in Regina as financial agents and industrial brokers. It is the intention of the new firm to develop their business selling department, and already extensive arrangements have been made with wholesale interests in all parts of western Canada. They will arrange partnerships, handle reorganizations of existing businesses, etc. They will also handle farm lands in Saskatchewan, particularly in the Regina district. The principal of the firm has been in Regina since 1911.

INTERALLIED TRADE & BANKING CORPORATION

A community of interests has been established between Messrs. H. and W. Greer, Ltd., and the Interallied Trade and Banking Corporation, Ltd. Messrs. H. and W. Greer, Ltd., are increasing their capital to £600,000 fully paid, of which part will be subscribed by the Interallied Trade and Banking Corporation, Ltd. On the other hand, Messrs. H. and W. Greer, Ltd., will acquire from present holders a substantial amount of shares in the Interallied Trade and Banking Corporation, Ltd. The two companies will continue as separate concerns, but Mr. E. L. Walter, of Messrs. H. and W. Greer, Ltd., will act as managing director of both companies.

Sir John Field Beale, K.B.E., chairman of the Interallied Trade and Banking Corporation, Ltd., Messrs. I. C. Geddes and Leon Rueff will join the board of Messrs. H. and W. Greer, Ltd., and Messrs. Harry Greer, M.P., chairman of the latter, W. J. Greer and L. Rueff, will join the board of the Interallied Trade and Banking Corporation, Ltd.

COAL STATEMENT FOR AUGUST

The Dominion Bureau of Statistics has issued a monthly bulletin as a survey of the output of coal in Canada for July, 1919, and August, 1919, as compared with August, 1918. In addition the imports of bituminous coal for August, 1919, were 1,526,735, whereas August, 1918, shows 2,116,437. The imports of anthracite coal for August, 1919 were 586,570 and August, 1918, 461,651. The other figures, in tons, are as follows:—

Districts	Output for July, 1919.	Output for Aug., 1918.	Output for Aug., 1919.
Nova Scotia	446,205	507,446	468,522
New Brunswick	12,700	28,435	15,193
Saskatchewan	18,332	22,146	18,564
Alberta anthracite	726	10,308	2,504
Alberta bituminous	4,974	275,368	31,610
Alberta lignite	46,214	293,918	104,467
Total for Alberta	51,887	579,594	138,581
British Columbia	152,303	266,577	162,884
Yukon	......	600	......
Grand total for Canada	681,427	1,404,798	803,744

Western Canada Flour Mills Company, Limited

"Makers of Purity Flour"

ANNUAL STATEMENT for the Year Ending August 30th, 1919

HEAD OFFICE: TORONTO

MILLS: Goderich, Ont., Brandon, Man., Winnipeg, Man., Calgary, Alta., South Edmonton, Alta.

Andrew Kelly, President — **D. B. Hanna, Vice-President**
J. E. Macfarlane, General Manager — **G. K. Stratford, Secretary-Treasurer**

The Directors have pleasure in presenting to the Shareholders the Balance Sheet and Profit and Loss Account of the Company for the fiscal year ending 30th August, 1919.

The Profit and Loss Account carried forward from last year was		$ 858,434.39
Victory Bond Dividend, 28th October, 1918		250,000.00
		$ 608,434.39
The Net Profit for the year, after making provision for depreciation for bad and doubtful debts and for taxes, amounted to		437,986.57
Flour Milling Profit	$229,355.62	
Profit from Other Sources and Investment Income	208,630.95	
		$1,046,420.96
This amount has been applied as follows:—		
Bond Interest for the year		$ 83,555.21
Dividends at the rate of 8% per annum and 2% Bonus		250,000.00
Balance carried forward		712,865.75
		$1,046,420.96

No extensions were made in the company's plants during the fiscal year. All properties, machinery and equipment, however, have been well maintained and are in a high state of efficiency.

The decrease in profits as compared with the previous year is largely due to strikes and labor troubles beyond the Company's control, which necessitated the shutting down of some of the mills for a considerable period and resulted in loss of business. Apart from this feature the results are satisfactory.

The quality of this year's crop is not as profitable for milling purposes as last year. Provided sales can be made and production kept up, the Company should be able to operate with favorable results to the Shareholders.

The Directors have much pleasure in testifying to the faithfulness and efficiency of the Officers and Employees. All members of the staff who have returned from serving the Empire overseas have been reinstated in their old positions, or offered other positions with the Company.

A. KELLY,
President.

Toronto, 10th day of October, 1919.

BALANCE SHEET, 30th August, 1919

ASSETS

CAPITAL ASSETS:		
Real Estate, Buildings, Machinery and Equipment	$2,521,201.48	
Share and other Investments	1,004,259.10

		333,555.21	
Balance 30th August, 1919			$ 712,865.75
INDIRECT LIABILITIES:			
Customers' Paper under discount	$1,321,228.47		
			$5,635,633.57

We have audited the above Balance Sheet with the books and records of the Western Canada Flour Mills Company, Limited, kept at the Head Office, and Branches, and certify that in our opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the Company's affairs as at the 30th August, 1919, according to the best of our information and explanations given us and as shown by the books of the Company.

Inventories have been certified as to quantities by the Company's officials at the various points and have been valued on a conservative basis and after making provision for abnormal market conditions.

Provision has been made in respect of Doubtful Accounts and Bills Receivable.

All our requirements as auditors have been complied with.

10th October, 1919

GEORGE A. TOUCHE & COMPANY, Chartered Accountants.

Railway Plan To Be Opposed in Senate

Passage Through Upper House May Be More Difficult Than Through Commons—Extra Parliamentary Session Is a Long One—Finances of Grand Trunk Explained

(Special to *The Monetary Times.*)

WHAT started off as a three weeks' session of parliament is rapidly stretching into a three months' session. The House has been sitting now two months and the end is not in sight. What was heralded as a joke session—an indemnity session—has developed into one of the most vital and important sessions for years. In addition to the Grand Trunk bill, which is the biggest financial problem parliament has considered since the Grand Trunk Pacific measure, there is the report of the Soldiers' Civil Re-establishment committee which was tabled this week and that ever controversial question, prohibition. The House may still be sitting when December first rolls round.

The Grand Trunk bill is still far from out of the woods. The government expected that it would have the bill ready for the Senate by Tuesday of this week and a special meeting of the Senate was called for Tuesday night to take up the measure. Tuesday came and the Senators had to devote themselves to other questions. The second reading carried with but three dissenters from the government side, but the bill has been in committee all week and the government will be lucky if the measure reaches the Upper House by next Monday. The fate of the bill in the Senate is uncertain. There are two groups of opponents in the Red Chamber. First, there are the uncompromising opponents of the whole principle of public ownership and second, there are those who are ready to accept the purchase of the Grand Trunk as a general policy but do not like the present terms.

Amendments are Possible

A government caucus of its Senate supporters was held on Wednesday to size up the situation. Uncompromising opposition was expressed by a number of Senators, while others expressed doubt and suggested a number of amendments. Senators are much more independent of government influence than Commoners and are less inclined to hearken to the crack of the government whip and it is admittedly very difficult to size up the situation. Sir James Lougheed, Senate leader, himself stated afterwards that the vote would be close. Several amendments will undoubtedly be submitted and some of them may carry. The two most important proposed are that the arbitration award should later be reviewed by parliament and that all stocks, guaranteed as well as preferred and common, should be referred to the arbitration judges.

While the chances are that the government will have a majority of from five to ten it is admitted that the ultimate fate of the measure is uncertain. What would happen if the bill should be defeated in the Senate is already being discussed. The government has been holding out threats of a general election and an appeal to the country on the issue. However, in view of the recent Ontario elections and the federal by-elections, the government will think twice before it trusts its fate to the electors in their present mood.

The only thing to do would be to hold over the bill until after the New Year. In the meantime, as the Grand Trunk Railway is liable for the Grand Trunk Pacific liabilities and apparently has not the money available to meet bonded interest it would either have to go into the hands of a receiver or else the government would have to foot the bills temporarily amounting to some seven and a half million dollars for bond interest.

Some interesting figures as to the equipment of the Grand Trunk was given to the House by Hon. J. D. Reid. The figures are given at the foot of this page.

Ex-Finance Minister Criticizes Terms

There have been some pretty duels in the House between Hon. W. S. Fielding, ex-minister of finance and Hon. Arthur Meighen. The chief criticism of Mr. Fielding is that the government by guaranteeing the interest on the guaranteed stock makes a present to the shareholders of many millions. He pointed out that the stock has recently been selling at 45 and since the announcement or previously it had gone up to over seventy and might go as high as eighty or ninety. This meant a clear gift in his opinion of twenty-five million dollars. His argument is that the stockholders should have been offered the market value or a little better. If they refused to sell then they could be told to keep their stock and if there were any earnings coming to them they would get a dividend.

Mr. Meighen's objection to this scheme was in the first place that it was impossible for the government to deal with all the thousands of stockholders. If they refused to sell they would still be stockholders and part proprietors with the government. Any partnership plan would be undesirable and would be seriously objected to by the country. To run the road the shareholders would have to be continually consulted and the situation would prove an impossible one.

Mr. Meighen also emphatically denied statements which have been made in the House that there has been considerable "stock-jobbing" in connection with the transaction. "It is altogether unfair," he declared, "altogether erroneous and I think worse, to allege that the stock has changed

ANNUAL REPORT of the Directors of

COCKSHUTT PLOW COMPANY, LIMITED

YEAR ENDING JUNE 30th, 1919

To the Shareholders:

Your Directors present herewith the Financial Statements of the Company for the year ended June 30th, 1919, duly audited, and confidently hope that same will be considered satisfactory.

The Plant of the Company has been operated continuously during the twelve months under review, and we have had an increased output over that of any previous period in the history of the Company. Our product is well thought of, is of high quality and holds its own in every field, both at home and abroad.

The position of the Company has materially improved. Collections have been fairly well met and your Directors have been able to declare and pay four quarterly dividends of 1% each on the Preference Capital. We expect to continue such payments until conditions become more settled, and further hope to declare and pay at an early date a dividend of 3½% on account of deferred dividends on our Preference Stock, provided collections from the proceeds of the 1919 crop warrant it.

Your Company, in common with all other manufacturing concerns in Canada, has passed through a very trying period and, now that Peace has been declared, the general state of business is in a readjustment condition. It is therefore necessary that commercial caution be used in meeting the changing conditions and in anticipating future requirements.

The employees of the Company have been very loyal, and while there has been considerable unrest, your Company, on the whole, has reason to be satisfied. We have naturally increased wages, and reduced the working time to 8 hours per day. All returned soldiers, previously in the employ of the Company and who wished to return to work, have been taken back and every consideration shown them.

In Canada, at the present time, there is a good deal of restlessness and uncertainty in the implement trade, caused by the unreasonable criticism of certain elements in the community. It is contended that goods are sold at too high a price and that the Customs duty on implements accrues altogether to the benefit of the Manufacturer, when, as a matter of fact, the raw products that go into the construction of an implement, are subject, generally speaking, to a higher rate of duty than is charged on the finished product.

The price of all raw materials continues to rule very high. It is essential that adequate stocks of material should be on hand to supply our customers' demands; while, on the other hand, constant care is necessary to avoid overstocking in the event of a sharp recession in price.

Your Directors and Management have at all times encouraged co-operation among all classes of the Company's employees, and every effort will be made in the future, as in the past, to better working conditions.

We greatly regret the loss by death of Mr. Geo. E. Drummond, of Montreal, an esteemed Director of the Company for many years.

Mr. F. Perry, a Director for some years, found it necessary to resign his place on the board during the year.

All of which is respectfully submitted.

Brantford, September 13th, 1919.
H. COCKSHUTT, President.

		$16,136,044.53

To the Shareholders,
COCKSHUTT PLOW COMPANY, LIMITED:

We have examined the foregoing Balance Sheet as at 30th June, 1919, and the accompanying Profit and Loss Account for the year ended at that date with the books of the Company and the certified accounts and returns from the Company's Branches, and we have obtained all the information and explanations we have required. In our opinion, the above Balance Sheet and the Profit and Loss Account are properly drawn up so as to show a true and correct view of the state of the Company's affairs as at 30th June, 1919, and the results of the Company's operations for the year ended at that date, according to the best of our information and the explanations given to us and as shown by the books of the Company and the accounts and returns from the Company's Branches.

(Sgd) ARTHUR K. BUNNELL,
(Sgd) DELOITTE, PLENDER, GRIFFITHS & CO.,
Auditors.

Brantford, Ontario, 2nd September, 1919.
Montreal, Quebec, 2nd September, 1919.

PROFIT AND LOSS ACCOUNT for the Year Ended June 30th, 1919

To Dividends Amounting to 4% on Cumulative Preference Shares	$258,600.00
To Balance as per Balance Sheet	399,387.85
	$657,987.85
By Balance at Credit 1st July, 1918	$ 86,401.32
By Net Profit from Operations, after providing for Depreciation	571,686.53
	$657,987.86

Total Bank Deposits Nearly Two Billion

September Report Shows Jump of $66,000,000 in Demand, and of $81,000,000 in Savings Deposits— Security Holdings Indicate Large Advances to Dominion Government — Further Increase in Circulation

	September, 1918.	August, 1919.	September, 1919.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$ 588,940,119	$ 581,300,855	$ 650,743,015	+ 10.5	+ 11.3
Deposits after notice	1,037,498,920	1,196,632,931	1,277,137,715	+ 23.1	+ 6.8
Current loans in Canada	942,802,018	1,011,785,424	1,058,572,202	+ 12.3	+ 4.6
Current loans elsewhere	109,850,161	146,964,315	151,814,511	+ 38.5	+ 3.4
Loans to municipalities	47,977,472	57,536,867	57,033,309	+ 21.3	— .9
Call loans in Canada	74,137,860	95,899,836	96,912,709	+ 29.7	+ 1.05
Call loans elsewhere	159,680,810	174,176,578	169,532,489	+ 6.3	— 2.9
Circulation	213,066,909	223,454,556	229,532,356	+ 7.5	+ 2.7

The above are the principal changes shown by the return of the chartered banks to the Dominion government as at September 30th, 1919, compared with August, 1919, and with September, 1918. Probably the most important changes are the substantial increases in current loans and in both classes of deposits. Increases for the year are large in every case.

The return is given in full in this issue. A comparison with the August statement shows that there has been no change in authorized capital; subscribed and paid-up capital and reserves have increased as follows:—

	Capital subscribed.	Capital paid up.	Reserve.
Molsons	....	....	$200,000
Merchants	$ 800	$ 21,277	....
Provinciale	....	8,255	....
Union	484,800	507,185	304,325
Royal	452,000	659,530	454,765
Hamilton	....	18,870	9,435
Home	....	93	....
Sterling	....	106	....
	$937,600	$1,215,316	$968,525

No change took place in the dividend rate in any case during the month.

The maximum circulation, it will be observed, shows a substantial increase. At the end of the month the notes outstanding totalled $225,907,997, compared with $222,461,915 on August 30th. Balance due to the Dominion and to the Provincial governments show increases of approximately $9,500,000 and $500,000 respectively. The increase in all classes of deposits is unusually large; those outside of Canada are $255,274,256, compared with $238,363,859 on August 30th. The following comparison shows the changes in those in Canada over a period of one year:—

	Deposits payable on demand.	Deposits payable after notice.
1918—September	$588,940,119	$1,037,498,920
October	644,220,998	1,076,514,627
November	666,366,359	939,329,271
December	711,034,060	958,473,557
1919—January	623,919,410	990,000,085
February	566,775,434	1,018,184,512
March	566,797,268	1,037,851,766
April	571,412,857	1,070,985,080
May	568,730,118	1,107,983,072
June	605,927,027	1,139,569,570
July	584,176,765	1,175,092,155
August	584,300,855	1,196,632,931
September	650,743,015	1,277,437,715

The course of the deposits account during the past six years is shown in the following table: —

Sept.	On demand.	After notice.	Total.
1914	$348,284,206	$ 658,401,501	$1,006,685,707
1915	359,315,280	693,339,851	1,052,655,131
1916	45,4148,049	$ 816,374,171	$1,270,522,220
1917	451,749,532	966,393,541	1,417,143,073
1918	588,940,119	1,037,498,920	1,626,439,039
1919	650,743,015	1,277,437,715	1,928,180,730

Deposits by and balances due to other banks in Canada are up by $800,000, while amounts due to banks and banking correspondents in the United Kingdom are almost $1,000,000 less; amounts due to banks and banking correspondents elsewhere are increased by $1,500,000. Other liabilities show changes as follows:—Bills payable, increase, $483,203; acceptances under letters of credit, increase, $4,113,663; miscellaneous liabilities, decrease, $812,433.

Turning to the assets statement, we find the following changes in the holdings of coin and Dominion notes:—

Gold and sub. coin in Canada	+	$ 630,686
“ “ elsewhere	+	86,656
“ “ Total	+	735,343
Dominion notes in Canada	—	4,000,540
“ “ elsewhere	—	1,848
“ “ Total	—	4,002,388

The deposits with the Minister of Finance for the security of note circulation show a slight increase, while deposits in the central gold reserve are $115,100,000 compared with $106,400,000 at the end of August. Notes and cheques of other banks show additions of $1,113,735 and $22,848,445 respectively. Deposits made with and balances due from other banks in Canada show a decrease of over $200,000, while amounts due from banks and correspondents in the United Kingdom and elsewhere, are increased by $1,664,376, and $1,769,502, respectively.

Among the larger items in the assets statement, holdings of Dominion and Provincial government securities are $323,781,953, as against $273,332,930 at the end of August, most of which increase is probably represented by financing of the Dominion in anticipation of the Victory loan. Holdings of municipal, railway and other securities show small additions. In the loan accounts, current loans and discounts outside of Canada are $151,814,511 compared with $146,964,315 on August 30th. The following table shows the call loans abroad over a period of four calendar years:—

	1916. $	1917. $	1918. $	1919. $
January	134,248,552	155,747,476	132,687,066	140,819,656

Service to Merchants and Manufacturers

THE success of a merchant's or manufacturer's business may depend, in a considerable degree, upon the co-operation and service given by his bank.

The Guaranty Trust Company is an organization of forty-one specialized departments rendering service in every branch of financial activity. Such an organization can be of valuable assistance to its customers in many different ways.

In Domestic Business

We render every commercial banking service; extend credit; pay interest on daily balances and on certificates of deposit; and offer the credit and other facilities afforded by our membership in the Federal Reserve System.

In Foreign Business

Our *Foreign Department* offers a *direct* and comprehensive foreign banking service for trade with all countries.

Our *Foreign Trade Bureau* furnishes information regarding foreign trade; it helps the merchant and manufacturer to find new markets; furnishes names of buyers and credit data; supplies information regarding export methods, foreign customs tariffs, etc.

We shall be pleased to discuss how the strength and equipment of this Company, and the personal interest taken in our customers' transactions, may be a co-operative force in advancing your business. Our service is available to Canadian clients upon the same basis as to our American customers.

Loans to the Provincial governments have increased from $4,846,194 to $6,667,116, but those to municipalities are about $500,000 less. Other items among the assets show slight changes, apart from an increase of over $4,000,000 in acceptances under letters of credit.

M. J. Walsh and Son, Montreal, have been appointed chief agents for Quebec province for the Firemen's Insurance Co., of Newark, N.J. The company has a Dominion license, the head office for Canada being in Winnipeg.

Permanent Agencies, Ltd., Montreal, have been appointed general agents in Quebec province for the Girard Fire and Marine Insurance Co., of Philadelphia. The general manager of Permanent Agencies, Ltd., is H. M. Brown.

SEVENTY-FIRST ANNUAL REPORT

OF THE

CONSUMERS' GAS COMPANY OF TORONTO

YEAR ENDING 30th SEPTEMBER, 1919

THE Directors submit the Report and Financial Statements of the Company's operations for the fiscal year ended September 30th, 1919.

Considering the exceptional difficulties under which the working of the Company was carried on during the year, the results shown cannot be regarded as other than satisfactory.

While the Profit and Loss Statement shows an adverse balance of $127,064.41, after payment of interest charges and dividends, and after making the statutory provision for the Plant and Buildings Renewal Fund, it must be borne in mind that the recent increase in the price of gas has been effective during only one month of the period covered by the statement now presented. The Directors did not feel warranted in increasing the rate charged to gas consumers until such time as it could be definitely shown that an increase was necessary.

The Company's Act of Incorporation provides that any sum or sums drawn from the Rest or Reserve Fund to meet the requirements of the Company shall be restored from time to time out of the earnings of the Company, and it is confidently anticipated that the earnings during the current year will be quite sufficient to enable the Directors to restore to the Reserve Fund the amount above referred to.

The present unit prices of the three items of coal, oil and operating wages represent a total increase for the year of $1,114,677.00 upon pre-war figures.

The manufacturing plant and distribution system have been maintained in a high state of operating efficiency, thus insuring the best results in the quality of gas and reliability of service.

More than four thousand new customers have been added to the list of gas consumers during the year.

The Commercial Department has satisfactorily fulfilled its function, that of supplying the consumer with the most modern, attractive and efficient gas-burning appliances at the lowest cost possible, and providing a system of maintenance whereby consumers may have their appliances kept in good condition at slight cost.

During the year there were sold by the Gas Company alone 2,904 Gas Water Heaters, 2,111 Gas Cooking Ranges, 864 Gas Fires, 942 Gas Irons, 278 Hot Plates and Laundry Stoves, a large number of lighting fixtures and miscellaneous appliances, in addition to the substantial sales made by local dealers in gas stoves and other gas-consuming merchandise.

These results cannot but have a most beneficial effect upon the sale of gas, and are also an indication that the householders of Toronto are realizing more and more the advantages and usefulness of gas in the home.

The Shareholders will be gratified to learn that, while the use of gas for the manufacture of war munitions has been discontinued, many large and important installations of Furnaces, Steam Boilers, Crucibles, Ovens, etc., using gas as fuel, have been made in establishments engaged in peacetime industries, and that the increase in the consumption of gas for these purposes is very large.

The Directors are proud of the record made by the Company's employees in the war, and are gratified to know that the financial provision made by the Company for the wives and families of enlisted men has been appreciated. Of the 414 employees on military service overseas, 51 have been reported killed or have died. The Directors desire to pay their tribute of respect to the memory of these brave men. Opportunity has been afforded every returned man who was in the Company's employ at the time of his enlistment to re-enter the service. At the present time 279 of the Company's employees are returned soldiers.

The Shareholders are asked to confirm the following subscriptions and special allowances made during the past year:—

January, 1919	Salvation Army Fund	$ 500.00
April, 1919	Citizens' Repatriation League	400.00
June, 1919	Repatriation Campaign ("Big 4")	1,000.00
Payments to wives and families of men enlisted for active military service overseas		10,521.75

The following statement for the past, as compared with the preceding year, shows:—

	Meters.	Gas Sales.
Year ended 30th September, 1919	117,033	$4,018,259.52
“ “ “ “ 1918	113,022	3,811,386.89
Increase	4,011	$ 206,872.63

All of which is respectfully submitted.

A. W. AUSTIN, President.

We beg to report the completion of the audit of the books and vouchers of the Consumers' Gas Company of Toronto for the year ending 30th September, 1919, and certify to their correctness.

(Signed) W. E. SAMPSON,
EDMOND GUNN, F.C.A.,
Auditors.

Toronto, 22nd October, 1919.

PRESIDENT'S ADDRESS.

In moving the adoption of the report on behalf of the Board of Directors, I have the honor to submit the seventy-first report, covering the operation of your properties for the year ending 30th September, 1919. I can add but little to the comprehensive report, but may emphasize one or two points.

We are still suffering from high prices. The exorbitant prices paid for coal by foreign countries has kept up the price for same, and has made it difficult for us to obtain a constant supply, even under contract. When the war was over, it is estimated that about forty thousand coal miners in the United States returned to their native lands, thus cutting down the output. However, this Company is fortunate in not having to depend solely upon coal for the manufacture of gas, and it has been very convenient at times of coal shortage to make use of oil, which, while perhaps more expensive, has been easier to obtain. Whenever possible we have built up large reserve stocks of both commodities.

The smaller output of coal in the United States, with a greater foreign demand than ever before, should cause our Government to wake up and make further search for coal and oil in our own country.

You will notice in the report that we have had an increase of over four thousand customers, and could have had many more had we had the facilities to take care of new business.

The item, $10,521.75, being payment to dependents of our employees, who enlisted, is the final payment. It was given only while the war lasted.

It will be necessary in the near future to consider the enlargement of our plant and the extension of mains in order to keep up with the constantly increasing demand for gas.

Incorporated in 1848, the Company has a record of uninterrupted growth and prosperity. While the dividend is limited, the payment of that dividend is a fixed charge upon the earnings, and the price of gas is regulated by the accumulation of surplus earnings after the full dividend has been paid. Whenever the revenue is insufficient to meet the requirements of the Company, including the dividend, the price of gas must be adjusted accordingly. This is what has happened in the past year. The continued rise in the price of materials and labor has rendered necessary an increase in the price of gas. With this increase the revenue will be raised to a point where all the Company's obligations will be covered, and will provide as well for the small adverse balance of the past year. Let me remind the Shareholders that even the increased price of gas in Toronto is lower than that prevailing in most American cities, notwithstanding the fact that in Toronto, oil, coal and other raw materials, being subject to import duty and extra freight rates, are much higher.

The staff and employees have had a most arduous task in conducting the affairs of the Company during the year, and I take pleasure in expressing our appreciation of their faithful and efficient services.

In conclusion, permit me to direct your attention to the Roll of Honor on the wall of this room. This is a great record of numerous employees, some of whom have given their lives in the service of their country in the world-war, now so happily closed.

The following gentlemen were elected Directors for the ensuing year: A. W. Austin, Esq., A. H. Campbell, Esq., Wellington Francis, Esq., K.C., F. LeM. Grasett, Esq., M.D., John Hoskin, Esq., K.C., LL.D., D.C.L., H. Langlois, Esq., Thos. Long, Esq., Lieut.-Col. J. F. Ritchie, Sir Edmund Osler.

At a meeting held subsequently, Mr. A. W. Austin and Mr. Wellington Francis, K.C., were unanimously re-elected President and Vice-President, respectively.

Richmond Agencies, Ltd., of Toronto, have opened an office in the Union Trust Building, Winnipeg, under the management of Arthur W. Woodhouse, who was formerly with Black and Armstrong. Richmond Agencies, Ltd., conducts a general insurance business, the general manager being W. J. Blackburn, of Toronto.

MEDICAL SELECTION OF INSURANCE RISKS

Why Many Applicants Must be "Rated Up," Because of Extra Risk of Mortality

THE close connection between the financial standing of a life company, and the strictness of its physical tests, is pointed out in the November issue of the Excelsior Life "Banner," by John Ferguson, medical referee of the company. "One of the first suggestions to be offered," he says, "is that in cases of doubt as to whether or not an application should be written up on a certain person, and the said person examined, it would be well in most instances were the agent to write to the head office setting forth the salient features of the case; and, in this way, finding out in advance what would be the best plan on which to fill out the form. In this way it might often be possible to avoid the rather difficult task of going back to the applicant with the object of having him consent to a change in the plan; or to agree to a lien, a cash option, or an extra premium. Such a practice would, in the end, often prevent delay in disposing of the case, or needless expense for examination fees. Much adjustment by anticipation might thus be effected.

"Another thought that should be kept in the minds of all is that all companies are really mutual. It is the policyholders who yield the main portion of the revenue, and constitute the largest personal element of every life insurance company. Careful selection of those to whom policies may be issued lies at the very foundation of the success and strength of all companies. A low death rate is a strong feature, and could be used by the agents to satisfy the public that the affairs of the company have been well managed. While the rejection of doubtful and bad risks, and the adjustment of some others might for the moment appear a hardship to the agents, yet in the end it would prove a boon to them, as they could always say 'that the good risks were not called upon to put up for the poor ones.' It is a good argument to be able to say 'that every one must pay fully for what he gets; and that each one must bear his extra risk, if such there be.' A good mortality record assists the agents very greatly.

Mortality Tables

"There are many mortality experiences or tables, and, while they differ from each other a little, yet they are sufficiently close to each other as to confirm the whole science of life insurance. While the basis of the business is that of dealing in probabilities, nevertheless the average result will be good, when care is taken. Our knowledge of the probabilities of living and dying constitutes a sure foundation upon which premiums are to be calculated and policies issued.

"One often hears the term 'extra mortality' employed. Let us take the Om. Experience, and make a practical application by way of illustration. Suppose the occupation, or build of the applicant, or his family history, is of such a kind as to yield an extra mortality of 40 per cent. At age 20 on the table just named the rate per 1,000 is 6.52; and 40 per cent. of this would be 2.61, which means that the death rate would be 9.13 per 1,000, instead of 6.52. If one passes on to age 40 where the normal rate is 12 per 1,000 and add 40 per cent. to this, we have 16.80. Take age 70 with its usual mortality rate of 62.19 per 1,000 and add 40 per cent. and the increase is 24.87, or a total death rate of 87.06. These few examples will show how very important it is to keep down the mortality by careful selection; and especially when it is borne in mind that on the basis of policies of $1,000, each extra death means the payment of this sum by the company. In the case of the example at age 70 just given, it would mean on 1,000 insured lives the paying in one year of $24,870 more than what would be required to meet the claims on the same number of standard lives.

"Every company selects some well-known mortality experience on which to estimate what its death losses will be, and from which to calculate the premiums it must charge to meet these losses.

"To give an example let us take the Om. (5) on which most of the life insurance business of this country is based. At 20 the death rate is 6.52 per 1,000, at 25 it is 6.89, at 30 it is 7.47, at 35 it is 8.37, at 40 it is 9.78, at 45 it is 12.00, at 50 it is 15.45, at 55 it is 20.83, at 60 it is 29.21, at 65 it is 42.21, at 70 it is 62.17, at 75 it is 92.63, at 80 it is 138.44, and at 85 it is up to 205.68. In other words, when a company is long enough in business to have 1,000 policyholders who are 85 years of age, it will have 205 deaths that year in this group, and must make provision in advance to meet these claims.

Occupation

"The subject of occupations has received much study at the hands of life offices. It is very important, as it is well known that the death rate varies very much in different occupations. For example, some years ago it was shown that in Great Britain when on a given number of persons of a certain age engaged otherwise than in the liquor traffic there were 1,000 deaths, there would be 1,800 deaths on a similar number of persons of similar ages engaged in the liquor traffic. If each one was insured for $1,000 this would mean $800,000 more paid in claims in the latter group than in the former. Companies now possess much data that enable them to fix such extra amount to the premium as will meet the added risk arising from occupations where the rate of death is about the normal standard. This aspect of the work of life insurance companies is now assuming fairly definite shape, so that when an extra is charged the agent and the applicant may feel that it is a just surtax on the ordinary premium.

"Some occupations increase the death rate because of accidents, such as bridge building, making explosives, brakesmen on trains, diving, aviation, underground mining and steel construction work. There are a number of occupations that raise the rate of mortality by causing ill-health, among which might be mentioned working in lead factories, manufacturing poisonous and irritating chemicals, file makers, glass grinders, stone cutters, pottery workers, underground workers and generally occupations of a dusty character, where the dust is of a hard, irritating nature, or likely to carry any injurious material. Then there are occupations that are liable to cause bad habits, and thus increase the mortality; such as the liquor business, making narcotics, dancers, actors, poolroom keepers, circus people, and so on.

"Some of these occupations call for a substantial extra to the premium, rating the applicant up in years, or fixing the plan as a short endowment; and, in not a few instances, rejection outright. It is quite apparent that persons following unfavorable occupations cannot be accorded the same terms as would be granted to standard applicants. Here, again, the sound rule comes in that the person must pay for the extra hazard he imposes upon the company."

1919 INCOME TAX EXPLAINED

A useful booklet explaining and illustrating the new income tax law has been issued by the Royal Securities Corporation. A comprehensive table is included showing at a glance the real position of any taxpayer under the law. The booklet is entitled "The Income Tax and the Average Man." Another feature of the Royal Securities Corporation's service was the publication a few days ago of a special edition, for the United Kingdom, of "Investment Items," dealing thoroughly with our relations with the old country in the investment field.

STANDARD RELIANCE INVESTIGATION RESUMED

The inquiry into the affairs of the Standard Reliance Mortgage Corporation was resumed on October 30th. The new company, Standard Reliance Assets, Ltd., has now received its charter, with directorate as follows: T. W. Ralph, of North Augusta, to represent creditors in Brockville and vicinity; Thomas Hall, of Ayr; J. A. Walker, K.C., and A. S. Maynard, of Chatham; Edward Merner, of New Hamburg; F. C. Meyer, of Elmira; and G. T. Clarkson, the liquidator. There remain two directors from the Toronto district to be chosen.

When You are Old

Who'll provide the money to keep you? Will you then be compelled to keep on working the same as some old men you know? Or will you be able to enjoy an old age of comfort and independence?

A moderate annual saving now—when you can spare the money—invested in an Imperial Endowment Policy will secure you a regular income in your old age; or it will provide for your family should death call you early.

Assurance Company of Canada
HEAD OFFICE - TORONTO

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

(Continued from page 26)

hands as the result of anything that has gone on in this country. I have endeavored to find out the amount that has changed hands, and it is very, very small. There necessarily are quotations because some little stock changes hands, but the stock in the main is held just where it has been for the last ten, twenty, thirty or even forty years. That is the information from the directors of the company."

Municipal Revenue Not Affected

Municipalities throughout Canada have been alarmed lest they would lose their taxation on Grand Trunk and Grand Trunk Pacific properties when it became government owned and have been pouring in protests on that score to Ottawa. Hon. Dr. Reid, however, assured the house this week that the Grand Trunk would continue to pay its taxes as in the past, and as the Canadian National does now. The taxes paid now by the Grand Trunk are $799,377, by the G.T.P. $49,963, and by the G.T.P. branch lines $23,794. The Canadian Northern last year paid taxes to the amount of $434,488.

Representations are to be made to Ottawa by the United States government with a view to reaching an agreement to prevent evasion of the income tax by persons going abroad.

A provincial board of trade may be formed shortly in British Columbia. A delegation from the Vancouver Board of Trade recently returned from a tour of the interior, and a convention is to be called to discuss such a plan.

DECLARES TRADE COMMISSIONERS USELESS

Trade commissioners sent by Canada to China and Siberia are not assisting Canadian trade, according to Lt.-Col. J. W. Warden, who has returned to this country after an extended stay in the Far East. In an address before the Vancouver Board of Trade on October 23rd, Mr. Warden described at length the Japanese invasion of the eastern markets. There should be good openings for Canada, however, as the Japanese products are generally of poor quality and the Japanese themselves are unpopular in China. "There is an enormous amount of trade available in China," he said. "China imports almost everything Canada has to export. Their methods of manufacture are crude. They do the work by hand. It is neat, but crude. Their communications are by river and by a very few railroads. There is an opening for firms supplying material for the building of railways. They also need farm implements. There is also a great opportunity for opening up steamboat facilities in China. One firm operating steamboats in China last year carried five million passengers. They packed them in like sheep. Great Britain is not keeping her share of the trade, and Japan has a scheme for squeezing British and American trade out. If nobody goes in to compete with them they will squeeze other countries out. Japan has 100,000 soldiers in there. China has asked Japan to take them away, but they are still there. China is paying good prices for the stuff she gets from Japan. If you would send live agents to report on the different lines of trade which you can promote, you would be astonished. You can get it if you go after it.

"As for Siberia, that country is very thickly populated. The people are agriculturists, but just now they are not doing very much. There is no way of getting their produce out, but lines of lorries could move it. The great Russian works have gone to ruin, and there will be a great opportunity in that country for machinery. They have plenty of timber there, but they need machinery to work it. You can get Canadian trade going there, and this will make Vancouver a great export city. Vancouver is closer to Siberia than any other port, and it is the logical export and import city."

INLAND REVENUE

The following is a statement of Inland Revenue accrued during the month of September, 1919:—

SOURCE OF REVENUE	Amounts.	Total.
EXCISE.	$ cts.	$ cts.
Spirits	542,115 32

LAND TAXATION IN SASKATCHEWAN

Privy Council Decides that Lands of Hudson's Bay Co. Are Liable to Municipal Taxation

ON August 1st, 1919, the Judicial Committee of the Privy Council handed down a judgment in an appeal from a judgment of the Saskatchewan Court of Appeal in Hudson's Bay Co. vs. Rural Municipality of Bratt's Lake and others.

This decision has already been mentioned in these columns. The details of the case are as follows:—

The territory of the Hudson's Bay Co. was given to the Dominion by the Act of Surrender, in 1870, Clause 11 of the Act being that: "The company is to be at liberty to carry on its trade without hindrance in its corporate capacity, and *no exceptional tax* is to be placed upon the company's land, trade or servants, nor any import duty on goods introduced by the said company previously to such acceptance of the said Surrender." The Rural Municipality Act (R.S.S. 1909, c. 87) by sections 250A and 296 gives municipalities power to assess and tax lands within their boundaries up to one per cent. of their assessed value each year; section 323B gives them power to assess, levy and collect a surtax of 6¼ cents per acre on all lands within the municipality which are not cultivated nor resided upon, and those which exceed 1,920 acres. The Hudson's Bay Co. in 1914, was assessed for taxes on 1,778,844 acres lying in various parts of Saskatchewan.

Judgment of Privy Council

The chief question argued was whether the Hudson's Bay Co. was exempted from the surtax under the terms of Clause 11 of the Deed of Surrender of 1870. It was claimed that the tax was exceptional in its nature or in its incidence or both in its nature and incidence. It was further claimed that the surtax was neither uniform nor equal and that consequently it was an exceptional tax and could not be levied on the Hudson's Bay Co. In the words of their Lordships: "The real complaint appears to be to any system of taxation not based on assessed values, and in which the principle of discrimination is sanctioned, but their Lordships are of opinion that such a system of taxation is within the powers and discretion of the councils of the rural municipalities, and that if such a system is adopted and applied generally, the appellants cannot claim to be entitled to special exemption under the terms of the deed. Different considerations would arise if it could be said that the appellants had been singled out to bear a special burden of taxation from which other members of the community in a similar position are exempt, but the surtax in question is not open to this criticism and no such case has been established. Their Lordships are of opinion that the appellants have not established the case that the surtax in question is an exceptional tax from which they are exempt under the terms of the Deed of Surrender."

In the second place, it was claimed that the surtax was not validly imposed as there was no application or appropriation of the moneys to be levied and further that the moneys were not required for municipal purposes, as all the requirements of each municipality were or should be met by moneys levied by ordinary municipal assessment and taxation under Part VII. of the Rural Municipality Act (R.S.S. 1907, c. 87). Their Lordships held that the surtax was levied in the same manner as the ordinary municipal taxes and therefore could be deemed to be included in the general municipal tax roll. The tax on assessed land values is intended to be supplemented by the flat rate surtax in order that the moneys received from both sets of taxes may equal the estimates prepared for the year. By section 323B of the Municipality Act it is a duty laid on municipalities to collect the surtax annually and hence this contention of the Hudson's Bay Co. in its appeal failed.

Thus the Hudson's Bay Co. has to bear the surtax on its lands in Saskatchewan, because those lands are held like the lands of private persons and in no way can be deemed to be the object of exceptional taxation.

THE FUNCTIONS OF A BANK

Dealer in Short-Term Credits, and Must Have Continued Repayments in Order to Meet Possible Withdrawals

By A. B. Barker

CONTRARY to general belief, a bank is not primarily a dealer in money. It is a dealer in credit, and in the course of its business uses money. A bank buys and sells credit as a merchant buys and sells goods, and, just as the merchant's profit depends on the amount of his turnover of goods, so the bank's profit depends on the volume of its turnover of credit. The bank buys credit when it takes in a deposit, and sells it when it makes a loan, negotiates a bill of exchange, or when it cashes a cheque on a bank in another town for its customer. This latter transaction is in effect a short-term loan, as until the cheque has been paid and settlement actually received by the bank, the money is advanced by the bank to the payee of the cheque. The price at which the bank sells credit is represented by the discount charged on the bill negotiated, but the price which the bank pays for the credit in which it deals is not always appreciated. When a bank credits a customer's account with a deposit it buys the credit from him and pays for it by creating a credit in his favor in its books. If this is in the form of a savings deposit it pays interest, and in the case of the ordinary business account, it pays by the service it renders in connection with the usual checking privileges. This credit in the books of the bank, available to the owner at all times, on demand through the medium of cheques, is a service of such value that without it, the ordinary business of the country would be handicapped to a degree which only those who have had dealings with a district poorly supplied with banking facilities can rightly appreciate. As part of the price at which a bank buys the merchandise in which it deals, that is credit, is that the funds must be ready on demand, it follows that in making sales of credit the principles of merchandising must be observed by the bank just as they must be by the merchant, if success is to be obtained. When a merchant buys his goods at short date he must in turn sell on moderate dating, and be prompt in collecting his accounts. In the case of bank advances or sales of credit, the same principles hold good. Frequent renewals by retailers of their accounts with the wholesaler tie up the working capital of the latter to the extent of the renewals, and in the same way renewals of bank advances tie up a bank's working capital to the extent of the renewals, and by so doing restrict the bank's ability to furnish credit to its other customers.

Bank loans are not intended to finance transactions of a class likely to be long in completion. Funds for these should come from the resources of the owner of the business or be arranged by long-term borrowings, leaving bank advances to fulfil their rightful mission, that of supplementing the working capital of their customers. In other words, the purpose of bank advances is to facilitate trade, by assisting the mercantile and trading community to keep their stocks moving, and to make the manufacturers turn their raw material into manufactured products, and dispose of them.

This is the reason why, when a loan is sought, the banker wants to know what the advance is for, and when and from what source, payment is to come. When a wholesaler sells a bill of goods to a retailer on time, it is on the understanding that they will be disposed of in the usual course of trade, and the account paid from the proceeds; and with each sale the wholesaler estimates whether his customer will be able to carry out this understanding within the time agreed, his credit to the retailer being based on this estimate. So with the bank, when it makes an advance, that is, sells credit, there must be a clear understanding of how and when payment is to be made, and the banker must weigh the probabilities of his customer carrying out the terms of the agreement; as, on the fulfilment of their undertakings by its customers will depend the bank's ability to discharge its own obligations to those who have supplied it with credit, on its agreement to repay on demand.

HAIL INSURANCE VEXES SASKATCHEWAN MUNICIPALITIES

The directors of the Saskatchewan Municipal Hail Insurance Association have decided to call a meeting of representatives of all municipalities concerned, in Regina on November 12th. The heavy losses this year necessitate an excess seeded acreage levy. In the interim, a statement is to be sent out to the municipal officials showing the amount of the loss and other figures in connection with the financial situation and a list of questions which the delegates will be expected to be prepared to answer at the general meeting.

The meeting will be asked to decide whether they are still in favor of the imposition of an excess seeded acreage levy and whether a limit should be placed on the amount, which may be levied in the act itself, or power to limit the rate delegated to some board or person. Another question to be considered is that of providing for cancellation of part of the insurance premium, where crops have been destroyed by some cause other than hail, a provision which is adopted by some of the line companies. The meeting will also be asked to decide whether the withdrawal privilege should not remain in force until such time as the farmer insuring asks to be reinstated, instead of the existing provision, which requires him to make application annually for the withdrawal privilege.

Geoffrion, Geoffrion and Prudhomme, attorneys-at-law, of Montreal, will apply to the Quebec Legislature at its next session for the incorporation of an association of accountants under the firm name of the General Association of Accountants of the Province of Quebec. Last year a similar measure was introduced before the House, but it was killed.

Leading Industrial Events of the Week

Mining Situation in Northern Ontario—Dominion Steel Outlook in Maritime Provinces—New Brunswick Lumber Trade Dull—Numerous Plant Extensions in Ontario

ACCORDING to a statement by Fred W. Field, British trade commissioner in Ontario, to *The Monetary Times*. this week, conditions in the northern mining districts are promising, both as to the production of ore, and as to the demand for machinery and equipment for the development of the mines. Mr. Field has just completed an official visit to Cobalt, Haileybury, Swastika, Kirkland Lake, Timmins, Schumacher and Porcupine, and speaks favorably of the outlook from many viewpoints. He said:—

"The strikes during the past summer in the Northern Ontario camps have materially delayed development. According to the mine managers, many of the strikers have claims staked in the north, and their action in striking prevented in many instances these claims being sold. Development was retarded, production was practically stopped in several mines, and capital did not flow into the newer camps as expected. These circumstances have lessened the immediate demand for mining machinery, equipment and supplies, a matter of interest to the manufacturers of these lines. The halt, however, is only temporary and the prospects are excellent now that the labor troubles have apparently been settled.

"Northern Ontario is a large purchaser of mining materials and machinery. Naturally, there is a desire to purchase in Canada whatever is possible, but after that the sentiment is strongly in favor of purchasing in the United Kingdom and other parts of the empire.

"The Cobalt district, although it has been operating since 1903, is still producing silver at the rate of 1¾ tons per working day. The camp has produced over 2 tons of pure silver for every working day since it was discovered in 1903. In the Porcupine Lake district, gold production started in 1910, with a value of $35,000 and had increased to nearly $8,000,000 by 1918."

Expansion Continues in Ontario

Boards of trade and chambers of commerce throughout Ontario are working actively to establish new industries in their communities. The Ottawa Board of Trade has outlined a progressive policy for the coming winter. Discussions will take place, and addresses will be given on subjects relative to the community's progress. The Guelph Chamber of Commerce is engaging in a program for the establishing of new industries in the city. Of the concerns approached, four have intimated their readiness to build plants at Guelph, providing the city is prepared to meet their offers.

An advertising campaign is being prepared by the board of trade of Amherstburg to bring manufacturers into the town, particularly from the United States. The town is conveniently situated on the great lakes, particularly for the shipping of manufactured goods to Europe by way of the Welland Canal. The industrial committee of the board of trade of Kitchener has before it at present three important proposals from industries looking to the city. One is from a United States spinning company which is about to locate a fabric mill in Canada for the manufacture of tire fabrics. This concern will employ 800 to 1,000 hands the first year, with a possible increase to 2,000 hands. The company has a capitalization of about $5,000,000. One reason assigned for this concern considering Kitchener is that they are large employers of female labor, 75 per cent. of their employees being women and girls. Another is from a United States manufacturer of auto jacks and hardware specialties, which is shortly coming to Ontario with a branch of that industry.

The Nash Motor Co., Kenosha, Wis., is considering the establishment of a plant at Whitby to manufacture Nash motors, not only for Canada, but for countries throughout the world. This industry will be comparable with the McLaughlin and Chevrolet industries in Oshawa. The Exchange Orange Products Co., of Los Angeles, Cal., have established manufacturing headquarters at Woodstock, and are already turning out large quantities of Sunkist orange marmalade. The Shredded Wheat Co., which has plants on the Canadian side as well as the American side at Niagara Falls, is to spend about $750,000 for further plant enlargements. Cheese manufacturers of the county of Peterboro will incorporate and take over all the cheese factories in central Ontario. The company will be capitalized at $1,000,000 or more, and will run about 150 factories the first year. The Clinton Knitting Co., of Clinton, has decided to establish a branch at Owen Sound. Negotiations which have been on the way for some time with Wilson and Co., packers, of Chicago, have been completed, and arrangements have been made for the taking over of the Chatham Packing Co.'s plant, Chatham, with a view to operating it continuously to capacity.

Pulp and Paper Industry

Reference has been made from time to time in these columns to changes taking place in the pulp and paper industry. Almost all the companies, in fact, are extending in some direction. The Laurentide Co. have ordered two mammoth newsprint machines, which will be installed next year; Price Bros. and Co. are putting an additional unit in their Kenogami mill; the Wayagamack Pulp and Paper Co., at Three Rivers, Que., have ordered additional equipment costing several millions; the Abitibi Power and Paper Co. have three new machines on order, the Interlake Tissue Mills are building to accommodate another machine. The Kipawa Fibre Co.'s plant on Lake Timiskaming is nearing completion, as is the plant of the Canadian Vegetable Parchment Co., at Merritton, Ont. Clarke Bros.' new pulp mill at Bear River, N.S., is in process of erection, and plans are ready for a new mill for the Nashwaak Pulp and Paper Co., in New Brunswick.

Good Future for Dominion Steel

The Dominion Iron and Steel Co. is destined to play an important role in the industrial life of the maritime provinces in the future, according to statements made by Mark Workman, president, regarding the extensive construction program being completed by the company. He stated that the surplus of the company had not been allowed to accumulate in the form of cash, but has been used to improve the properties and promote efficiency.

"Since the beginning of 1916," he said, "many millions of dollars have been spent in Sydney. Our coke oven plant alone, which is one of the finest units on the continent, was built at a cost of five million dollars. In connection with the ovens we have installed a coal washer at an expenditure of nearly half a million dollars. The additions to our electric power apparatus required another million and a quarter, the rebuilding of one of the blast furnaces involved the expenditure of three-quarters of a million, and it is proposed to treat a second furnace in the same manner.

"Our ship plate mill is undoubtedly destined to play a most important role in the future industrial life of the province of Nova Scotia which with its long coast line indented with safe navigable harbors is the logical home of shipbuilding. Indeed the numerous wooden ship erecting plants which the province boasted many years ago are eloquent testimony to the adaptability of Nova Scotia's resources of men and material to the art of shipbuilding.

"We cannot always hope to make extensive additions and improvements such as I have indicated out of earnings,

Life Insurance as Protection
The motive that prompted the inventors of Life Insurance was the desire to furnish protection. Savings and investment are invaluable accompaniments but the feature that sells Life Insurance is protection. That company confers the greatest benefit upon its members that gives "the greatest amount of genuine Life Insurance protection for the least possible outlay." This aim has ever been the guiding star of The Mutual Life Assurance Company. Following out the principle of co-operation as the Mutual has done means that the company allots the whole of its profit, from all sources whatsoever, to the policyholders thus reducing their expense for insurance to actual cost—the only Canadian Company operating on this principle. The experience of the Mutual has fully justified the hopes of its founders who fifty years ago planned the institution on the basis of

so that our policy must always be one that financial men will approve, and, again, the credit of the province is a factor that counts in a company so closely connected as we are with provincial affairs.

"I may say also that he have spent nearly a million and a half dollars in Newfoundland in order that our mines and quarries may properly balance our Cape Breton operations. It will, of course, be appreciated that all our activities are dependent one upon the other and prosperity in Nova Scotia immediately reflects prosperity in Newfoundland."

Lumber Trade in New Brunswick

According to reports from New Brunswick, the lumber trade is not very promising. A statement received says that there will not be nearly as large a cut of lumber in the province as was predicted. The reason is that the shippers who usually buy in advance are not eager to do so, but are discouraging those who come to them for advances. The American market has gone flat, and buyers there are waiting developments in regard to labor, and the English market is not interested in any but large sizes of lumber, and not eager about them. The export of lumber from St. John to the United States for the three months ended September 30 was valued at $909,824, compared with $652,697 in the corresponding period last year. The chief items were long lumber, $416,282, and pulp, $322,667.

Western Developments

D. J. McCarthy, of Toronto, the assistant sales manager, and H. W. Schultz, of Toronto, the western credit manager of the Goodyear Tire and Rubber Co. of Canada, are at the present time in Saskatoon, Sask., where they are completing the arrangements for the opening of a branch office. The Goodyear Co. in the United States is a hundred million dollar corporation and last year did a business of about $150,000,000. The Canadian company is a separate concern with assets of about ten million dollars. The sales of the Canadian company last year were about this amount, ten millions. The plants in Canada are located at Bowmanville and New Toronto, Ont. At the latter there is capacity of 3,000 tires per day.

Edmonton and Calgary, Alta., will share between them the industrial benefits of a new manufacturing enterprise that is expected to be doing business by the first of November under the registered firm name of the Ormiston Auto Light Reflector Co. J. J. Murray, of Edmonton, is president of the company, and Edmonton will be its head office, but the manufacturing is to be done for the present in Calgary. A reflector for automobile headlights, the invention of John Ormiston, of Calgary, is to be the product of the new concern.

A general fur trading business will be carried on by the Sigler and Richardson Fur Co., newly incorporated at $50,000. Philip Sigler, Henry Sigler and John Richardson, all of Vegreville, Alta., are the incorporators, but the headquarters of the company will be in Edmonton. The charter of the new concern provides for the trapping, buying, marketing and manufacturing of furs of all kinds.

The Cut-to-Fit Buildings Co., of Vancouver, B.C., has purchased 60 acres of land on the Fraser River, near the old Liverpool wharf, about a mile above the Fraser River bridge, with a frontage of 800 ft. on the river, and through which the Canadian National Railway passes. It is the intention of the company to erect a factory and mill for the manufacture of cut-to-fit houses, and by the end of January next, the plant is expected to be in producing condition with a capacity of five houses per day.

The city of Montreal West will petition the Quebec Legislature at its next session for permission to have a commission form of government. Instead of having the city divided into three wards for election purposes, the desire is that a mayor and four commissioners should be elected by the city as a whole.

15-year Bonds due November 1st, 1934

Principal payable without charge at the Office of the Minister of Finance and Receiver General at Ottawa, or at the Office of the Assistant Receiver General at Halifax, St. John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary and Victoria.

Bonds may be registered as to principal or as to principal and interest, as hereinafter provided, at any of the above-mentioned offices.

Interest payable, without charge, half-yearly, May 1st and November 1st, at any branch in Canada of any Chartered Bank.

Principal and Interest payable in Gold.

Denominations: $50, $100, $500, and $1,000

ISSUE PRICE: 100 AND ACCRUED INTEREST, INCOME RETURN 5½% PER ANNUM

The proceeds of the Loan will be used to pay indebtedness incurred, and to meet expenditures to be made in connection with demobilization (including the authorized war service gratuity to our soldiers, land settlement loans, and other purposes connected with their re-establishment into civil life), for capital outlay upon shipbuilding, and other national undertakings forming part of Canada's industrial reconstruction programme, and for the establishment of any necessary credits for the purchaes of grain, foodstuffs, timber and other products, and will be spent wholly in Canada.

Payment to be made as follows:

10% on application;
20% December 9th, 1919;
20% January 9th, 1920;
20% February 10th, 1920;
31.21% March 9th, 1920.

The last payment of 31.21% covers 30% balance of principal and 1.21% representing accrued interest at 5½% from November 1st to due dates of the respective instalments.

A full half-year's interest will be paid on May 1st, 1920, making the cost of the bonds 100 and interest.

Subscriptions may be paid in full at the time of application at 100 without interest, or on any instalment due date thereafter, together with accrued interest at the rate of 5½% per annum.

This Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge upon the Consolidated Revenue Fund.

The amount of this issue is $300,000,000, exclusive of the amount (if any) paid for by the surrender of bonds of previous issues. The Minister of Finance, however, reserves the right to allot the whole or any part of the amount subscribed in excess of $300,000,000.

Payments

All cheques, drafts, etc., covering instalments are to be made payable to the Credit of the Minister of Finance. Failure to pay any instalment when due will render previous payments liable to forfeiture, and the allotment to cancellation. Subscriptions other than those paid in full on application must be accompanied by a deposit of 10% of the amount subscribed. Official Canvassers will forward subscriptions or any branch in Canada of any Chartered Bank will accept subscriptions and issue receipts.

Subscriptions may be paid in full at time of application at 100 without interest, or on any instalment due date thereafter, together with accrued interest to time of making payment in full. Under this provision, payment of subscriptions may be made as follows:—

If paid in full on or before November 15th, 1919, par without interest or 100%.
If remaining instalments paid on Dec. 9th, 1919, balance of 90% and interest ($90.52 per $100).
If remaining instalments paid on Jan. 9th, 1290, balance of 70% and interest ($70.84 per $100).
If remaining instalments paid on Feb. 10th, 1920, balance of 50% and interest ($51.08 per $100).
If remaining instalments paid on Mar. 9th, 1920, balance of 30% and interest ($31.21 per $100).

Payment of instalments or payment in full after November 15th, 1919, can be made only on an instalment due date.

Denomination and Registration

Bearer bonds, with coupons, will be issued in denomination of $50, $100, $500, and $1,000, and may be registered as to principal. The first coupon attached to these bonds will be due on May 1st, 1920.

Fully registered bonds, the interest on which is paid direct to the owner by Government cheque, will be issued in denominations of $500, $1,000, $5,000, $10,000, $25,000, $50,000, $100,000, or any multiple of $100,000.

Payment of Interest

A full half-year's interest at the rate of 5½% per annum will be paid May 1st, 1920.

Form of Bond and Delivery

Subscribers must indicate on their applications the form of bond and the denominations required, and the securities so indicated will be delivered by the bank upon payment of subscriptions in full.

Bearer bonds of this issue will be available for delivery at the time of application to subscribers desirous of making payment in full. Bonds registered as to principal only, or fully registered as to principal and interest, will be delivered to subscribers making payment in full, as soon as the required registration can be made.

Payment of all instalments must be made at the bank originally named by the subscriber.

Non-negotiable receipts will be furnished to all subscribers who desire to pay by instalments. Those receipts will be exchangeable at subscriber's bank for bonds on any instalment date when subscription is paid in full. All receipts must be exchanged before 1st June, 1920.

Form of Bonds Interchangeable

Subject to the payment of 25 cents for each new bond issued, holders of fully registered bonds without coupons will have the right to convert into bonds with coupons, and holders of bonds with coupons will have the right to convert into fully registered bonds without coupons, at any time, on application to the Minister of Finance or any Assistant Receiver General.

Forms of application may be obtained from any Official Canvasser, from any Victory Loan Committee, or member thereof, or from any branch in Canada of any Chartered Bank.

Subscription Lists will close on or before November 15th, 1919

COBALT ORE SHIPMENTS

The following is a statement of shipments of ore, in pounds, from Cobalt station for the week ended October 25th, 1919:—

Coniagas Mines, 65,611; Dominion Red., 65,000; La Rose, 60,000; Penn. Canadian, 60,000; Nipissing, 149,637; Buffalo, 175,965; total, 576,213.

The total since January 1st, is 20,561,717 pounds, or 10,280,858 tons.

GOVERNMENT AND MUNICIPAL BONDS

Large Blocks of Toronto Harbor and Montreal City Bonds Sold in Philadelphia—Saskatchewan School Debentures

Although the New York Exchange rate has dropped to some extent, the movement of Canadian securities to the United States continues, and large Victory loan subscriptions are being entered from the other side. This week sales of $100,000 of Toronto Harbor bonds and of a similar amount of city of Montreal bonds, in Philadelphia, are reported. These are not new issues, however. Subscriptions to the United Kingdom issue of $250,000,000 5½ per cent. 10-year convertible gold bonds and 5½ per cent. 3-year notes, being offered in New York, are reported as being satisfactory, although figures are not yet available.

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97⅛	97¼
United Kingdom 5½% (Nov. 1, 1919) ..	99⅞	100
United Kingdom 5½% (Nov. 1, 1921) .	97¼	97½
United Kingdom 5½% (Feb. 1, 1937) ..	92⅞	93⅛
Canadian Pacific 6% (Mar. 2, 1924)	99⅝	99⅞
Dominion of Canada 5½% (Aug. 1, 1921)	99⅜	99⅝
Dominion of Canada 5½% (Aug. 1, 1929)	97⅜	97⅝
City of Paris 6% (Oct. 15, 1921)	96	96½
Russian Govt. Ext. 5½% (Dec. 1, 1921)	43	46
Russian Govt. Ext. 6½% (July 10, 1919)	45	48
Swedish Govt. 6% (June 15, 1939).....	97½	98

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Bridgeburg, Ont. ...	$ 50,000	6	......	Nov. 3
Renfrew, Ont.	17,500	6	30-years	Nov. 24
Lindsay, Ont.	95,000	5½	......	......

Bridgeburg, Ont.—Tenders will be received until November 3 for the purchase of $50,000 6 per cent. school debentures.

Saskatoon, Sask.—The city has decided to build an incinerator at the cost of $100,000. This will necessitate an issue of debentures.

Chatham, Ont.—The city will issue debentures to the amount of $75,000 providing for construction of permanent roads throughout the city.

Galt, Ont.—A by-law to raise $80,000 for a central heating plant at the hospital grounds, will be submitted to the ratepayers at the January elections.

Halifax, N.S.—The school commission is making application to the city to issue bonds to the amount of $972,429.50 to pay for the erection of new schools.

Toronto, Ont.—City council endorsed the recommendation of the Board of Control to apply to the legislature for authority to issue debentures for $160,000 for the Bloor St. car line without the assent of the ratepayers.

Brandon, Man.—A request has been received from the School Board asking for the submission of a money by-law for the issuance of debentures to the amount of $150,000 for new schools. The debentures would be for 30 years, and the interest rate at 5½ per cent.

York Township, Ont.—By-laws which were passed some time ago authorizing the issuance of more than $200,000 school debentures, have been shelved until after the Victory loan. It was mentioned in these columns that a small block of debentures to the amount of $15,000 had been sold, and in addition to this the township council will borrow $40,000 from the bank in order that the sites may be purchased for the schools.

Saskatoon, Sask.—The city has effected a sale of war bonds to the amount of $430,000 through the Bank of Montreal, netting a profit of $17,052. The proceeds of the sale, together with cash in the sinking fund, will enable the city to purchase $540,000 worth of Victory bonds. The bonds

VICTORY LOAN 1919

represents probably the last opportunity to secure Canada's Bonds so favorably.

sold included $108,000 of 1927 maturity, sold at 102; and $322,000 of 1937 maturity, sold at 104⅝. Until the proceeds of the sale can be reinvested in the 1919 loan, they will be invested in treasury bills at 5½ per cent. This procedure will save transferring the money from Montreal to Saskatoon.

Point Grey, B.C.—At the January elections the ratepayers will be asked to ratify the proposal to purchase the Dunbar property for a park and bathing beach. The property under consideration has been offered by Bayfield and Harvey, barristers, on behalf of the mortgagees, the sum asked being $90,000, which they have offered to accept in 5½ per cent. bonds of the municipality. These bonds will be repayable in 40 years, and the contention of the advocates of the plan is that the cost to the district will be met long before that period expires by the income accruing from the park and bathing beach.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from September 29th to October 4th, 1919:—

School Districts.—For 10 years not exceeding 8 per cent.: Pembroke, $10,000; Renfrew, $3,900; *Dublin, $1,000; Llanwenarth, $3,800; *Root, $2,000; *Honora, $3,300; Avebury, $2,800; Ackerman, $2,800; Probizna, $1,200. Crimea, $2,900; Brancepeth, $4,000; Lister, $3,600; Petersville, $1,500; Riverstone, $1,000, Wolff Valley, $2,000; Fransfield, $2,400; Lake Lilian, $2,500; Amherst, $1,500; Melville View, $5,000. For 10 years not exceeding 7 per cent.: Meadowville, $3,000; Lewiswyn, $5,000. Fairdale, $11,000 20-years 8 per cent. instalment; Souris Flat, $5,000 20-years 7 per cent. instalment; Saskatoon, $175,000 30-years 5½ per cent. instalment.

Rural Telephones.—For 15 years not exceeding 8 per cent. annuity: Malvern, $32,350; Twin Valley, $16,000; Flett Springs, $15,000; Rhein, $7,700; Pleasant Dale, $16,750; Redpath, $5,500; Sylhurn, $5,000; Raymore, $1,950; South Maymont, $20,540; Quinton, $8,550; Westbrook-Gladwin, $14,200; Springside, $2,700; Hoey, $17,000; Radville, $22,000; Red Cross, $13,000; Tribune, $22,300; Weskanaw, $2,350; Bertdale, $3,400; Tullis, $14,200; Laurie, $12,275; Gilead, $2,850; Riceton, $1,800; Riceton, $1,800.

Villages.—Kinistino, $1,000 5-years 8 per cent. instalment; Salvador, $2,000 10-years 8 per cent. instalment; Success, $2,000 10-years 7 per cent. instalment; Cadillac, $3,000 10-years 8 per cent. instalment.

The following is a list of debentures reported sold from September 29th to October 4th, 1919:—

NEWS OF MUNICIPAL FINANCE

Montreal Realty Tax Collections High—Windsor and Kitchener Assessments—Sherbrooke and Charlottetown Finances

Hamilton, Ont.—At a meeting of the city council this week further indiscriminate grants of money were opposed for fear of an overdraft of $300,000 at the end of the current year.

Kitchener, Ont.—The total assessment for 1919 is $11,807,202, an increase of $2,201,136. The increase is largely due to the readjustment of the assessment on industries of the city, all of which are now on an equalized basis. The following figures are interesting: Value of real property, $5,131,340; value of buildings, $8,557,232; total real property, $13,688,572; taxable property, $12,186,040; exempt from taxation, $1,502,532; business assessment, $2,076,213; taxable income $545,029.

Windsor, Ont.—According to figures compiled by the assessment department, assessment increased nearly $7,500,000 since last year. Assessor Black states that much of the property is still under-assessed. A summary prepared by the assessment department follows:—

Land	$16,193,580	+ $3,934,680
Buildings	18,850,389	+ 2,636,525
Business	2,435,425	+ 672,735
Income	850,300	+ 211,125
Total	$38,329,694	+ $7,455,065

Vancouver, B.C.—So far this year there has been received more than $4,000,000 in tax payments alone. It is expected that somewhere in the neighborhood of another $200,000 or more will be collected before the 7½ per cent. rebate period expires. Although something more than $5,000,000 in tax arrears remained outstanding at the beginning of the year, this has since been greatly reduced, owing to several causes. One has been the return to peace conditions, which, combined with an improvement in business conditions and increased rentals for many properties, enabled many property owners who were in arrears to take advantage of the instalment plan and thereby save their property from tax sale. Fully one-third of the property in arrears is also protected by the provisions of the Moratorium Act, so that the actual number of parcels offered at the coming tax sale will not be anywhere near as numerous as was expected earlier in the year.

Sherbrooke, Que.—The financial statement of the city for the year ended December 31, 1918, shows receipts of $748,525, and expenditures of $742,050. Cash on hand totalled $2,033, compared with $6,536 at the end of 1917. Tax collections netted the sum of $254,870. Taxable real estate amounted to $12,192,274. The rate was, municipal 12½ mills, Catholic school 6 mills and Protestant school 7 mills. The balance sheet shows a surplus of $1,001,868, total assets being $4,244,982 and total liabilities $3,243,114. The principal items are: Cash on hand and in bank, $39,465; accounts receivable, $333,711; sinking fund, $297,231; bonds pledged to La Banque Nationale, $224,000; property, $340,935; public utilities, $2,307,275. The bonded debt is $2,511,400. Arrears of taxes totalled $134,117.

Charlottetown, P.E.I.—The city accounts for the year ended December 31, 1918, show receipts of $147,338 and expenditure of $147,118. Included among the receipts were $42,000 from the sale of debentures, and the amount of debentures redeemed, $31,000, is also included in the expenditure. The real estate tax yielded $50,838, and the personal property tax, $22,684. The balance at the credit of the city's account in the Royal Bank, on December 31 last, was $6,866, compared with $6,646 for the year previous.

The balance sheet shows assets totalling $1,162,563, the principal items being: Water works construction account, $302,000; sewerage construction account, $159,000; real estate, $534,305; plant and movable property, $47,269; sinking fund investments, $94,622. Assets exceeded liabilities by $141,925. The debenture debt totals $712,000, against which there are sinking funds as above. The assessment for 1918 totalled $3,553,205, the tax rate 1½ per cent., the levy $53,298 and collections $50,838. The assessments for personal property tax totalled $1,509,915, the rate 1½ per cent., the levy $22,648 and collections $21,794. The total arrears of all taxes for the years 1914-18 amounted to only $5,822.

Montreal, Que.—The collection of realty taxes this year, with over two months more to elapse before the year closes, almost equals the total for the whole of the year 1919, according to figures given out by Assistant City Treasurer Collins. The total collections in realty taxes in 1918, without including the arrears of realty taxes for preceding years, amounted to $7,855,083, while the amount collected this year in realty taxes is $7,825,705. The greater part of this amount was collected this month, when the sum of $4,954,423 was taken in. The amount received in September was $2,870,107. To these amounts should be added the small sum collected previously to September amounting to $1,174.

The assistant treasurer attributed this showing to the greater circulation of money, further remarking that houses were renting better, and that the new interest rate must also be included, and that the increase in school taxes this year was also a factor in the increased revenue. As regards the interest rate of 6 per cent. after October 1 and 7 per cent. after December 1, the assistant treasurer said that, although the rate was in force last year, this year the people had begun to see better the economy they effected by paying their taxes on time.

Moose Jaw, Sask.—At a meeting of the city council last week the proposed assessment of improvements at the rate of 60 per cent., an increase of 15 per cent., was discussed, but the question was held over. Commissioner Mackie gave a very clear statement of the cases, for and against the increase, in which he said that the borrowing powers of the city had to be increased, but that this could not be done on land, as the land was already assessed to the limit. The total assessment of the city, Mr. Mackie said, is $21,400,000, which gives a borrowing power of $4,200,000 under the Cities Act, by which the municipality is allowed to borrow up to 20 per cent. of the assessment. The city of Moose Jaw already has the highest assessment of Saskatchewan cities, but a great deal of this assessment is on vacant land. The city has plenty of vacant land, but land will not give any more borrowing power than at present, principally on account of its being already assessed to the limit. If the city wants to borrow any more money its borrowing power must be increased. If the assessment of improvements were increased by 15 per cent., it would give an increase of some $400,000, which, with the business tax yielding $200,000, would increase the assessment—that is, the borrowing power by $600,000.

Ottawa, Ont.—According to a statement of S. M. Genest, chairman of the Separate School Board, as a result of the recent Privy Council decision, the separate schools of the capital now face financial difficulties, which can end only in their being declared bankrupt and seized for debt, unless some relief is forthcoming. Mr. Genest said:—

"The judgment of the Privy Council as published, places the School Board in the extraordinary position of having to meet a note for $70,000 which it never gave, in favor of the Bank of Ottawa, before it can recover its sinking fund of $40,000, which it had placed in the bank to protect its debenture holders and which was taken without its consent. The Bank of Ottawa and primarily the defunct government school commission, have taken from our jurisdiction something which we were merely keeping in trust for others. It is a question in my mind if our debenture holders can recover from the Separate School Board under the circumstances, and may provide interesting litigation. It is a certainty that the financial condition of the board, which is not even sufficiently large enough to enable us to carry on the schools much longer, will not permit us meeting the note for $70,000 at the Bank of Ottawa. Any attempt which we might have made to finance the situation through has been effectually defeated by the persistence of the Mackell injunction, from which we recently asked release and which was refused us."

INVESTMENTS AND THE MARKET

National Steel Car to Reorganize—New Record for Canadian Pacific Earnings—Lake of the Woods Company to Increase Capital

Moose Jaw Street Railway Co.—Six-cent fares, which went into effect on October 19th, were stopped on the following day, and will not be continued until the new franchise agreement is sealed and ratified by the city. This is not possible until two weeks after the voting, when the council may give the agreement the third reading. It may be delayed by the city, if such is desired, for not more than four weeks after the voting. The present fare is five cents, or six tickets for a quarter.

Lake of the Woods Milling Co.—Authorization has been given to the company to increase its common share capital from $2,500,000 to $4,000,000. The application for such permission was made following the approval given by the shareholders of the milling enterprise to the proposal of the board of directors at a special meeting held in Montreal on October 1st last. Of the former authorized capitalization of $2,500,000 common, there is outstanding at the present time $2,100,000, so that at the new and increased figure there will be available for issue $1,900,000.

National Steel Car Co.—At a meeting of the directors of the company on October 25th in Hamilton, Ont., it was decided to recommend to the shareholders that a proposal made by a syndicate of American capitalists, headed by R. J. Magor, for the reorganization of the corporation be accepted. The details of the proposal will be given in a circular letter to be sent to the shareholders at once, and a general meeting of the company will be held on November 12th to deal with the matter. The syndicate proposes to put up ample capital to operate the plant to capacity, and to introduce more aggressive management.

Canada Steamship Lines, Ltd.—It is stated that important extensions to the ocean service of the company are now under consideration. At the present time the Canada Steamship Lines, through its subsidiary, La Compagnie Canadienne Transatlantique, is operating a passenger and freight service from Canadian to French ports. The amount of traffic that has been booked from Canada and the demand for shipments to other European countries will now, it is understood, result in additional arrangements being made. According to present plans, these arrangements will all be completed well before the opening of the next season of navigation on the St. Lawrence.

Nova Scotia Steel and Coal Co.—According to a report from Sydney, N.S., an agreement is being arranged between the Scotia Co. and the Dominion Coal Co. in regard to the disputed coal region opposite the Scotia property. Several engineering officials of the Dominion Coal Co., C. M. Odell, Walter Hurd and Mr. Tarkinson, visited the Scotia new mine at Pointaconi last week and inspected operations there. It is confidently expected that as a result of their visit the difficulties that have existed between the two companies would be ended. These areas were the subject of investigation some years ago at the time of the famous trial between the coal and steel companies. Acquisition of the unleased strip by Scotia will connect the land and sea areas of the company.

Eldon Mining Co.—According to reports from the company's mine on the east slope of the Rockies, successful development is taking place. Carloads of copper and zinc which have been shipped to the smelter at Trail, B.C., are bringing in an average of $800 per car. A number of carload shipments have been sent to the Consolidated Mining and Smelting Co. of Canada, Ltd., Trail, B.C., which shipments averaged 40 per cent. zinc and 7.2 per cent. copper.

The officers of the company are: Frank M. Harvey, president; J. H. Goodwin, vice-president and managing director; E. G. Pescod, J. A. Robertson, directors, and Hardie Turnbull, secretary-treasurer; W. A. Davidson, M.Sc.M.E., consulting engineer. W. Brown has been manager of the work on the crosscut this year.

Canadian Pacific Railway Co.—Gross earnings of the company for September have made a new record, totalling $17,513,690, the highest in the company's history, and an increase of nearly $4,000,000 over September, 1918, or about 30 per cent. Net earnings amounted to $4,091,919, an increase of $970,000, or about 30 per cent.

For the nine-month period ending with September, gross earnings aggregated $124,239,974, an increase of $13,000,000 over the earnings for the corresponding period a year ago. On the other hand, net earnings show a slight decline for the period, this year's net amount to $23,053,260, being exceeded by every year since 1910. In that year, gross amounted to $72,000,000 and net to $24,000,000, or one-third of the gross. This year gross amounted to $124,000,000 and net to $23,000,000, or about one-sixth of the gross. Even in 1916, when the nine months' period produced earnings amounting to only $69,000,000, the net came to $24,000,000, more than a million above this year's.

British Columbia Electric Railway.—The minimum wage of the motormen and conductors employed by the company has been increased from 40 cents to 45 cents an hour, and the maximum from 51 cents to 56 cents. Increases granted employees in the other departments of the company's work range to five cents an hour, and increases to those paid on a monthly basis are from $10 to $15. These increases were set by the Conciliation Board at Vancouver this week.

The report is received from Vancouver that Hon. J. W. de B. Farris, Attorney-General, has asserted that the Dominion government has refused to amend its railway legislation so as to place the British Columbia Electric Railway once more under the control of the Public Utilities Commission of British Columbia.

Brompton Pulp and Paper Co., Ltd.—Announcement has been made from Montreal in connection with new interests associating themselves in the affairs of the company. Following a recent thorough inspection of the Brompton plants and pulpwood limits, a group identified with another pulp and paper concern reached the decision to associate themselves with the Brompton company and to take an extensive financial interest in the enterprise. In addition to this, a substantial volume of the stock of the company has been acquired for a prominent English-Canadian financier, who has been seeking for some time to secure a more extensive interest in the pulp and paper industry of Canada. Both these developments resulted in the taking off the market of a considerable quantity of the floating supply of stock available. It is stated that the new interests in the company will not result in any changes in the operating executive of the Brompton concern. Nothing more definite has yet been disclosed.

Winnipeg Street Railway.—An action has been filed by the company in the Court of King's Bench against the city of Winnipeg for damages caused by the action of City Solicitor Hunt in gaining an injunction against the Winnipeg Electric Railway Co., restraining them from collecting increased fares.

Mr. Hunt, after losing three actions against the company, was reproved by Commissioner Macdonald, Judge Galt and Chief Justice Perdue for methods he had used in gaining the injunction and for introducing extraneous matter into the evidence given by him, will have to defend another case arising out of his attempt to gain an injunction against the company when the counter-claim is tried.

For five days the company was, by reason of the interim injunction obtained by Mr. Hunt, restrained from collecting the increased fares, and the company is seeking to make good the losses Mr. Hunt agreed would be made good if the company won. The amount of damages is not stated, but it is understood that the figure is a large one.

Montreal and Southern Counties Railway Co.—At the hearing before the Board of Railway Commissioners for Canada recently for the increase of fares from 3.45 to 4 cents per mile, judgment was given, authorizing such an increase, providing the increased fare does not become effective until the company has complied with the requirements of Section 334 of the Railway Act, 1919. A large amount of statistical detail was submitted. A statement of the investment in the road and equipment submitted by the railway as of September 30th, 1918, gives a total of $7,554,656, being made up of investment in the road, $5,634,602, and investment in equipment, $1,920,003. The whole story of the condition of the company's finances is practically contained in the following table:—

	1913.	1914.	1915.	1916.	1917.	1918.
Operating revenues ..	$406,467	$397,632	$349,669	$429,928	$561,990	$786,129
Operating expenses—						
(a) Operating expenses	490,372	473,416	460,540	474,464	597,919	787,264
(b) Taxes	8,316	7,874	8,513	7,996	9,024	8,263
Deficit	$92,221	$83,658	$119,383	$62,532	$44,953	$9,398

The result is a deficit on operating revenue amounting to $402,145 for the period in question, or an average annual deficit of $37,000.

WILL APPEAL MANITOBA DECISION

The case of the province of Manitoba vs. Thomas Kelly and Sons, contractors, which was decided in favor of the province in the Manitoba Court of King's Bench recently, will be carried to the Court of Appeals. It is stated that the decision may be carried to the Privy Council by way of the Supreme Court of Canada. The appeal is based largely upon the inclusion of an item of $615,000 against Kelly for the cost of prospective repair work to the caisson foundation under the new building.

FUNDS FOR TECHNICAL EDUCATION

The Ontario Department of Education has announced a plan for the expenditure of its share of the $10,000,000 provided for technical education by the Dominion government. The Dominion Technical Education Act provides that $10,000,000 will be annually set aside, for a period of ten years, for promoting and assisting technical education. The act is administered through the federal minister of labor. Assurances must be given that all payments will be applied and used for technical education according to the agreement between the governments.

In Ontario grants are to be paid to municipalities to the extent of 50 per cent. of the cost of buldings and equipment for technical classes. There will also be a grant on account of salaries, calculated as follows: (1) 75 per cent. of the expenditure where such total expenditure does not exceed $2,000; (2) 66⅔ per cent. of the expenditure where such total expenditure is above $2,000 and does not exceed $5,000; (3) 50 per cent. of the expenditure where such total expenditure is above $5,000 and does not exceed $10,000; (4) 33⅓ per cent. of the expenditure where such total expenditure is above $10,000 and does not exceed $15,000; (5) 25 per cent. of the expenditure above $15,000.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance: 50 per cent extra if charged.

ADVERTISER seeks position, any part of Canada; 16 years' experience with English, Continental and Canadian Banks, including 12 years in Western Canada. Barrister, Solicitor and Notary Public in British Columbia. Three years in France with C.E.F. Moderate salary. Apply Box 241, *The Monetary Times*, Toronto.

ADDITIONAL INFORMATION CONCERNING FIRES

Courtland, Ont.—Barn and contents of C. W. Graydon was destroyed last month. Estimated loss, $7,000. Insurance was carried to the amount of $1,000 in the London Mutual Fire Insurance Co.

Vancouver, B.C.—October 15—Insurance was carried to the amount of $116,600 by the British Columbia Fir and Cedar Co., when their plant was destroyed with the loss of $250,000. The following companies are interested: Insurance Co. of North America, $7,500; Scottish Union and National, $5,900; Mechanics and Traders, $4,800; Royal Exchange, $1,000; Home Insurance, New York, $500; London Guarantee, $2,500; Niagara Fire, $3,500; Norwich Union, $2,500; Philadelphia Underwriters, $1,600; Queensland, $2,650; British Crown, $2,500; Guardian, $3,750; Britannic Underwriters, $1,500; Merchants, New York, $5,500; London Guarantee, $2,500; Union of Canton, $1,500; Alliance of Philadelphia, $5,000; Dominion Fire, $2,500; London Mutual, $2,000; Mount Royal, $5,000; Quebec Fire, $1,000; Westchester, $14,000; Palatine, $9,500; Providence, Washington, $2,500; Car and General, $8,000; North Empire, $1,750; Continental, $5,000; Century, $2,500; American Alliance, $2,500; Union of Paris, $1,500; St. Paul, $1,650; Eagle, Star, $2,500; General of Paris, $5,000.

INSURANCE LICENSES ISSUED

The following companies have been authorized to transact business in the province of Quebec:—

The Northwestern Mutual Fire Association has been licensed to transact in the province of British Columbia the business of automobile insurance, excluding insurance against loss by reason of bodily injury to the person, in addition to fire insurance in the province of British Columbia for which it is already licensed.

The Union Marine Insurance Co., Ltd., Liverpool; England, to transact the business of fire insurance, inland transportation insurance and automobile insurance (excluding insurance against loss by reason of injury to the person).

The American Equitable Assurance Co. of New York, has been licensed to transact the business of fire insurance throughout Canada. The chief agent is J. E. Clement, with office at Montreal.

DO COMPANIES ACCEPT MORAL HAZARDS?

Fire insurance companies do not knowingly insure "moral hazards," says Charles Dickens, Vancouver agent of the Phœnix Fire Insurance Co., of Paris, writing to the Vancouver Sun with reference to an editorial which had appeared in that paper. No rate short of 100 per cent. would, he says, justify such risks. "It is quite apparent," writes Mr. Dickens, "that no system of rating can be devised to 'cover' the moral hazard, and it is up to each underwriter to judge of this hazard when considering the writing of a risk. The fire insurance companies are constantly refusing to write or are cancelling policies covering risks wherein a moral hazard exists. And rightly so, too, for the losses paid by fire insurance companies, from the very nature of the business, must be distributed over all their policyholders. It must be obvious also that rates and premiums are largely influenced by the loss records of various classes of risks, and in this regard it is possible that the moral hazard is an indirect factor bearing upon rates and premiums, but scarcely to the extent which your editorial suggests.

"Moral hazards do not necessarily imply that owners intend 'to burn their property sooner or later,' but often, in the case of non-paying businesses or industries there is a tendency on the part of owners to become careless, without any criminal intent, by permitting fire-breeding conditions to exist, which would normally be eliminated."

WANT EVIDENCE ON TELEGRAPH RATES

Sessions of the Board of Railway Commissioners are to be held throughout Canada to obtain views on the subject of telegraph rates, according to the following statement issued from the Board's office a few days ago:—

"The Board of Railway Commissioners have decided to hold an extended series of sittings over different portions of Canada for the purpose of obtaining the views of the public on the application of the telegraph companies for an increase of practically 20 per cent. in the present telegraph rates.

"The board will sit in Ottawa on Tuesday and Wednesday, November 11 and 12, at which sitting representatives will be heard from the provinces of Quebec and Ontario. They will be in Winnipeg on Saturday, Monday and Tuesday, the 15th, 17th and 18th days of November; at Vancouver on Saturday and Monday the 22nd and 24th days of November, and at Victoria on Tuesday, the 25th. On the return trip sittings will be held at different points in the western provinces, the exact dates of which will be made public within a very short time. It is also their intention to proceed to the maritime provinces after returning from the west, where sittings will be held at one or more points, of which due notice will be given.

All Provinces Show Good Results

Subscriptions of $232,504,527 Reported up to Close of Wednesday—Ontario Credited with Over Half of Total—Comparison with Last Year's Totals—Some Figures for Cities—List of Large Subscriptions

THE Victory Loan campaign has now passed half-time, and there is evidence that it is gathering momentum as it proceeds, in the rural districts at least. Totals as reported at Dominion headquarters, up to the close of Wednesday, were as follows:—

British Columbia	$ 10,688,177
Alberta	5,398,750
Saskatchewan	4,404,900
Manitoba	13,681,500
Ontario	131,727,600
Montreal	49,132,700
Quebec	7,566,350
New Brunswick	3,787,400
Nova Scotia	5,680,150
Prince Edward Island	437,000
	$232,504,527

The above totals represent reports as follows:—British Columbia, Alberta, Saskatchewan, Manitoba, Montreal, Quebec, New Brunswick and Prince Edward Island up to Tuesday night; Nova Scotia up to Monday night, Ontario up to Wednesday night. Some of the city totals, up to Tuesday night, were as follows:—

Victoria	$2,270,100
Vancouver	5,270,850
New Westminster	507,677
Edmonton	1,043,150
Calgary	2,655,850
Lethbridge	300,800
Medicine Hat	365,000
Charlottetown	198,000
Regina (up to Monday night)	935,400
Halifax (up to Monday night)	2,570,950

1918 Victory Loan Figures

The provincial totals last year, and the official objectives, were as follows:—

	Objective.	Result.
British Columbia	$ 19,000,000	$ 35,396,667
Alberta	15,000,000	18,189,600
Saskatchewan	20,000,000	23,889,000
Manitoba	33,000,000	43,639,900
Toronto	80,000,000	144,946,100
Ontario	125,000,000	184,736,850
Montreal	80,000,000	143,433,050
Quebec	16,000,000	32,324,200
Nova Scotia	20,000,000	30,102,500
New Brunswick	11,000,000	16,500,000
Prince Edward Island	2,500,000	2,900,000

Large Subscriptions

The following is a list, compiled by *The Monetary Times*, of subscriptions of $5,000 and over:—

Life Insurance Companies

Imperial Life Insurance Co., Toronto	$2,000,000
Excelsior Life, Toronto	1,000,000
London and Lancashire Life, Montreal	500,000
Gresham Life, Montreal	100,000

Fire and Miscellaneous Insurance Companies

Guardian Insurance Company of Canada, Montreal	120,000
Guarantee Co. of North America, Montreal	100,000
North British and Mercantile Insurance Co., Montreal	100,000

ASSOCIATION OF LIFE AGENCY OFFICERS

The third annual meeting of the Association of Life Agency Officers will be held in Chicago, November 11th and 12th. Among the Canadian delegates will be G. H. Hunt, of the Imperial Life, and T. G. McConkey, of the Canada Life.

LONDON LIFE UNDERWRITERS MEET

Life agents of London, Ont., and the surrounding district, had the opportunity of hearing a series of addresses on salesmanship, by A. F. Sheldon, of Chicago, on October 29th to 31st. About 500 attended each meeting. The arrangements were made by the London Life Underwriters' Association and the London Advertising Club, the talks being beneficial to all engaged in selling. This is London's second effort at holding an educational conference, a similar meeting having taken place earlier this year.

Grand Trunk Negotiations Through Commons

Senate Now Discussing Measure—Grand Trunk Stocks and Their Market Value — How U.S. Lines Will Be Handled — Report of Parliamentary Committee on Soldiers' Civil Re-establishment

(Special to *The Monetary Times.*)

AFTER a stormy two weeks' passage in the Commons, the Grand Trunk bill is now having an equally turbulent time in the Upper Chamber. By the time this is in print, the fate of the measure will likely be known. For the past two weeks the Upper Chamber has been the scene of the most intense lobbying. There has been lobbying by the powerful interests which are opposed to the measure, and equally strong wire-pulling on the part of the government to keep its followers in line. Threats were made of an appeal to the country and of the appointment of new Senators to force the bill through. In addition, there were intimations of drastic Senate reform if the bill was killed. Incidentally there is good reason to believe that the government has under consideration the question of Senate reform next session.

The chief weakness of the attacks on the government's proposals have been the lack of any alternatives. Mr. Frank Cahill, member for Pontiac, who poses as the Opposition's railway critic, made an interesting proposal as a counter alternative. He submitted three tables. The first showed the entire capital stock, guaranteed, preference and common, par value of $241,257,658, listed on the London Stock Exchange as quoted on the day the agreement for arbitration was made, October 10. This showed a market value of $58,391,971. The price of the common stock was 9, the guaranteed 46 and the three preference stocks 50, 37½ and 20. He proposed that the government should pay the price for that day. This would mean that the government would pay $2,441,361 less than the value of the guaranteed stock, which is $60,833,322 for the whole system. The weakness of the proposal is that the Grand Trunk would never have voluntarily submitted to such a plan, and the government to prevent liquidation, which it did not want, had to proceed by negotiations.

The appointment of Sir Walter Cassels as the third arbitrator and the inclusion of his name in the bill, helped considerably to smooth the way for the passage of the measure, as far as the government supporters were concerned, both in the House and the Senate. Everyone at Ottawa has the utmost confidence in the integrity and the fairness of the chief justice of the Exchequer Court. It is felt that, after all, the final award will largely depend upon the decision of the third arbitrator, and there was considerable uneasiness even among the government's most faithful followers over the bill as it was first drafted, with the chief arbitrator unnamed. With no maximum in the bill and no review by Parliament, it was felt that too much power was being left in the hands of one unknown man. Upon his decision would mean the possible payment of millions.

The question of the position of Canada towards the United States after it has acquired the Grand Trunk, occupied considerable time of the House. There is no doubt there will be an anomalous situation as King George will be the owner of a vast railway system with magnificent terminals in a foreign country. The harbor at Portland, Maine, will be almost a Canadian port. The Grand Trunk has magnificent terminals in Portland, with three immense elevators. The Opposition even made an issue of the question and moved an amendment on the third reading. However, it met the fate of all the Opposition amendments.

Hon. Charles Murphy, ex-secretary of state, said that he had written to Washington on the subject and had obtained an official view of the American attitude. Apparently, the United States will not object to a Canadian railway being operated by the Dominion government in the United States, provided it abides by American regulations. He said he had been informed that if the United States continues to operate the railways the Canadian government would have to obtain operation permission. If the government hands back the lines there will be inaugurated a "zoning" system, whereby certain groups of railways will be restricted to operation within certain defined zones having some large centre of population as the pivotal point within the zone. The Canadian government would have to conform to this proposed system.

National Finances and the Gratuity

The Grand Trunk bill out of the way the Commons will pass to the report of the Committee on Soldiers' Civil Re-establishment. This promises to be as controversial as the railway bill, although there is no doubt the report will be sustained. Both government and Opposition members of the committee united in turning down all forms of gratuities on the ground that it was financially impossible. The only rider of the Opposition was the obvious political play of adding a clause that the reason the proposals were financially impossible was the gross extravagance of the government. It looks as if there will be at least two amendmends to the report of the committee. Col. J. A. Currie, North Simcoe, who has been championing the Calgary gratuity plan *in toto*, will likely move its adoption, while Major Andrews, D.S.O., Centre Winnipeg, who is a member of the executive of the Great War Veterans, will undoubtedly move that the plan submitted to the committee by that body be accepted.

The government and its supporters must be at least given credit for courage. As one newspaper remarked, "they were dying game." In view of the overwhelming feeling among the soldiers of the country as to the plans proposed by the committee the government is apparently sealing its doom by so flatly rejecting all plans suggested by the veterans. The House members will, of course, emphasize the financial position of the country in defending the report and it must be admitted some imposing figures were included in the document laid on the table of the house.

The report contains an appendix containing comprehensive statistics as to the state of the national finances. These statements show that the net national debt has increased from $335,996,000 in 1914 to approximately $1,950,000,000 in 1919; that the ordinary expenditures of the government have increased during the same period from $127,384,472 to an estimate of $270,000,000 for this year; that approximately thirty million dollars will be expended annually hereafter for pensions; that the estimated interest on the national debt for the fiscal year ending March, 1920, amounts to $102,767,000 and there will be a further large increase in this item next year.

In a statement submitted to the committee by the Deputy Minister of Finance, it is shown that the commitments of Canada for the year 1919-20, for which money must be borrowed on capital account, as shown by the estimates voted at the last session of Parliament, amount to $529,122,445. This statement embraces expenditure on public buildings, soldiers' land settlement and demobilization. To the total of these there must also be added necessary expenditures in connection with the Grand Trunk Pacific, provision for credits to Great Britain and allied countries, Halifax relief and loans to provinces for housing, $170,000,000, making a total for the present fiscal year of $699,122,445. In so far as capital expenditures for the year are concerned, the deputy minister intimated that, in his opinion, these would not likely be less than $210,000,000. In addition it was pointed out that if the recommendations made by the committee are put into effect a further expenditure of $50,-

000,000 would be involved during the years 1919-20 and 1920-21.

In summing up all these figures the committee expressed the view that including the present Victory Loan, Canada, within the next twelve or eighteen months, would be compelled to raise by borrowing, sums of money aggregating $700,000,000 to $850,000,000, to provide for expenditures to which the country now is or will be committed.

Supplementary Estimates

Supplementary estimates for the current fiscal year were tabled in the Commons this afternoon to the amount of $62,346,000. Forty millions to carry out the recommendations of the report of the committee on Soldiers' Civil Re-establishment is the biggest vote submitted to the House, while $20,000,000 is provided for advances to soldiers settling upon the land and cost of administering the Soldiers' Settlement Act. Sixty thousand dollars is provided for the department of labor as follows: Additional amount required to defray expenses of a director of coal operations and staff in Alberta, $25,000; amount required to defray expenses of Canadian delegates to International Labor Conference at Washington, $25,000; further amount required to defray expenses of National Labor Conference, $5,000; and further amount for Industrial Relations Commission, $5,000. The sum of $276,000 is included to reorganize the printing bureau, and there is a further provision of $10,000 for sessional indemnities.

GOLD PAN MINES, LIMITED

Following upon the recent discovery of gold in the Rice Lake District, Manitoba, developments are now under way with a view to mining in commercial quantities. The Gold Pan Mines, Limited, Winnipeg, have acquired properties known as "Gold Seal" and "Gold Pan" properties, situated in this district, and 200,000 shares of 8 per cent. preferred stock are being offered at par. The directorate is composed of well-known Winnipeg men, including Jas. H. Ashdown, president of the J. H. Ashdown Hardware Co., Ltd., and E. F. Hutchings, of the Great-West Saddlery Co., Ltd. The stock is being offered by the Manitoba Finance Corporation, Ltd.

The services of J. B. Tyrell, one of the best-known mining engineers in Canada, have been engaged by the company, and Mr. Tyrell has just completed an examination of the property. In an interview with *The Monetary Times*, he stated that the company's properties have gold ore in considerable quantities, and that the money raised will be spent under his direction for development purposes. Whether or not the ore can be mined on a profitable basis remains, of course, to be seen. The offering unfortunately does not contain a statement of the capitalization; this information should be obtained by prospective shareholders. The plan is, however, that $400,000 of 8 per cent. preferred stock will be sold and the proceeds used for the erection of a mill and other developments.

FIREMAN'S FUND TO INCREASE CAPITAL

A special meeting of the stockholders of the Fireman's Fund Insurance Company has been called for December 10th to consider and vote upon the recommendation of the board of directors to increase the capital stock from $1,500,000 to $3,000,000, divided into 30,000 shares of the par value of $100 The call for the meeting was issued by the directors October 9th. The additional stock, if authorized, is to be offered at $150 per share to all stockholders share for share according to their respective holdings at the close of business on October 20th.

The head office of the Fireman's Fund Insurance Co. is in San Francisco, Cal. It operates in Canada under a Dominion license, the chief agent being G. T. McMurrich, Toronto.

MOLSONS BANK STATEMENT

The increase of almost $17,000,000, or 22 per cent., in the total assets of the Molsons Bank during the year ended September 30th, 1919, indicates the increase in its business for the year. Comparing some of the principal items in the balance sheet, the position of the principal accounts on September 30th, 1918 and 1919, is as follows:—

	1918.	1919.
Capital paid up	$ 4,000,000	$ 4,000,000
Reserve	4,800,000	5,000,000
Profit and loss	248,029	275,435
Circulation	7,796,679	7,015,344
Balance due Dominion government	7,857,097	12,423,185
Demand deposits	9,218,017	11,830,422
Savings deposits	42,194,559	51,689,483
Coin and Dominion notes	7,127,141	5,855,108
Depreciation in central gold reserve	3,000,000	2.500,000
Cheques on other banks	3,171,246	4,346,475
Balance due by banks and correspondents outside of Canada	2,455,730	2,106,679
Dominion and Provincial government securities	7,536,517	13,562,072
Canadian municipal securities, etc.	9,635,863	9,781,573
Railway and other bonds and stocks	752,606	1,054,532
Call and short loans	4,148,353	7,618,187
Total quick assets	38,608,203	47,706,038
Other current loans	36,185,566	43,848,428
Bank premises	2,325,000	2,525,000
Total assets	77,638,029	46,807,064

As already pointed out in these columns, profits were $818,802 compared with $712,485 for the previous year. The dividend rate for the first quarter was 11 per cent., after which it was raised to 12 per cent. Dividends absorbed $470,000, and $200,000 was transferred to reserve. Contributions were also made to the officers' pension fund and to patriotic funds, and $85,000 set aside for Dominion government taxes. The balance carried forward in profit and loss is $248,029, compared with $151,826 brought forward.

INDUSTRIAL CONDITIONS IN BRITAIN

"No one can do business in Britain at the present time," says E. F. Hutchings, president of the Great-West Saddlery Co., of Winnipeg, who returned recently from a trip to the old country. In an interview a few days ago he said: "England is in the condition of a man struck dumb. It is paralyzed. Everything is tied up and nothing can be done. We were anxious to place orders for goods used in our plants and nowhere could I find manufacturers who could undertake to make delivery. They were willing to book orders, but could not promise that the goods could come forward. Under these circumstances it is impossible to proceed. A great and obvious opportunity is presented to the working people of Great Britain. It is the opportunity to secure the trade or a portion of the trade which was formerly carried on by Germany, Austria and some other countries of continental Europe. The labor men of Britain are not availing themselves of these possibilities.

"With reference to the future range of prices, I am satisfied that there is to be a change. The law of gravity is still operating. Everything must eventually find a level. If prices are high at one time they will be low at another, and the higher they go at one time the lower they will fall at another. I got my experience in the school of hard knocks. Real estate was at one time pushed very high in this city, and then it went so low that people would not pay the taxes on it, which is where it is now. The present high prices will eventually be succeeded by low prices. I think that the peak of high prices has been reached. With reference to organized labor I think that it has done all that it can do. The public will not stand for any more. Labor is now being beaten every time, and it will be beaten every time, because the public is not sympathetic. Wages are high and the conditions of labor have been improved, but wages cannot now be pushed higher."

DIVERGENT VIEWS ON RAILWAY NATIONALIZATION

OPINIONS as to the advisability of acquiring the Grand Trunk Railway seem to be as varied as those on public ownership as a theory. Montreal, the leading commercial city of Canada, is strongly opposed; Toronto, our second city, and a close competitor for business, is in favor, if a resolution passed at a meeting of the Board of Trade on November 4th may be taken as representative. Toronto hopes to be the headquarters of the great national railway system, and Montreal also has good arguments to advance. The Boards of Trade of both Montreal and Quebec have gone on record as strongly against the purchase, and representatives have been sent to Ottawa to emphasize their views to the government. In contrast to this, the Toronto Board, after Hon. J. D. Reid had described the government's position, passed the following resolutions:—

"Whereas this meeting has heard and considered the statement of the Hon. Dr. Reid, Minister of Railways and Canals, of the position of the several railway systems of Canada;

"And whereas it is manifest the present Canadian Government Railway System, owing to its having no feeders in Ontario and Quebec, must either take over the Grand Trunk Railway System or incur large expenditures for terminals and connections, thus paralleling the present lines and increasing the cost of operation, which in the end must be borne by the public;

"And whereas it has been made quite clear that the taking over of the Grand Trunk will save such expenditure and keep in the hands of the public the protection in the future of our freight and passenger transportation;

"Therefore be it resolved that, in the opinion of this board, the government should absolutely refuse to release the Grand Trunk System from its guarantees and liabilities in connection with the Grand Trunk Pacific, and that the policy of the government to compel the Grand Trunk to join up with its Government Railway System be concurred in;

"And that a deputation from this board be sent to Ottawa to urge these views and give assurances to the government of our loyal and unswerving support of the policy proposed."

DEPRESSION NOT TO BE FEARED

WHATEVER may happen after Ontario's Premier-elect, E. C. Drury, assumes office, he has at least impressed the people of the province favorably by his speech at Barrie, Ont., on November 3rd. It is already evident that Mr. Drury does not belong to the school which aims to achieve success by keeping up continuous optimistic propaganda. Possibly he is sufficiently far-sighted to create an atmosphere of gloom, so that whatever favorable developments may take place will, by way of contrast, reflect credit on the farmers' administration. In any case, however, continual citation of figures of Canada's great progress grow wearisome when it is well known that such figures must be considerably adjusted before they reflect accurately our economic condition.

Appealing for support of the Victory Loan, Mr. Drury said:—

"I am not going to appeal to you from a patriotic standpoint, for your patriotism, I know, is there. Patriotism at the present time is not a matter of sentiment and heroics. That time has all gone past. Patriotism at the present time simply means good business sense. That is what is needed to carry this country through the trying days ahead. Certain national crises are ahead of us from an economic standpoint. The people who put self last during the titanic struggle are going to put country first to-day. I want you to bear in mind that there is inevitably coming a time of deflation of prices. In the second place, I want you to realize that the only thing we need to fear in the future is an economic condition where it takes too large a share of our products to pay our foreign interest. There is nothing to fear about the amount of money we owe ourselves at home. The thing we have to fear is our foreign borrowings and the interest on them. Our foreign indebtedness is not so great that it in any way affects the stability of Canada; and Canada, with her immense amount of natural resources within her own borders and her industries, and, I am happy to say, a sober people, because that will help, has nothing to fear.

"Work on our natural resources will pull us through. We could raise a foreign loan in the United States; but what happens? We are committed to pay interest to that country and our credit is affected, and the value of the Canadian dollar goes down. But if we raise it at home, the money does not come out of the business already invested. We do not expect men to take money out of their farms or their factories to invest in Victory bonds. They could not do it, and it would not be sound business.

"This loan is in the nature of an insurance policy of spreading loss over a large number of people until it becomes negligible. It is an investment not backed by any single industry of the nation. One per cent. of the industries may fail, 10 per cent. of the industries could fail, and still the investment would be gilt-edged. A dollar invested by you in Victory bonds to-day will be worth two, possibly three, dollars in a few years. There is no doubt in the world we are on the edge of a time of depression, and for this depression no government will be responsible. I speak feelingly now, because you know the position I am in at the present moment, and you know the tendency to blame hard times on the government. The time will come, not very far off, when wages will have dropped and the value of a bushel of wheat will have dropped to one-half the value it is now. In that day your bonds will be twice the value.

"There is one feature about this issue of Victory bonds which commends itself most highly to me, and that is that they are taxable. Every bond we issued should have been taxable, because it is to be feared that former issues of non-taxable bonds are drifting into the hands of men with big incomes who wish to avoid taxation. This non-taxability feature was not needed, because the small consumer, the man who invested his savings, did not need a tax remittal to get him to invest. I give to you my sincere conviction that the best thing we can do at present for ourselves and for our country is to lend our money to the nation. It is urgently needed; the government must have it."

GROUP INSURANCE IN CANADA

At least two insurance companies have announced their readiness to write group insurance in Canada. There has been no change in Dominion legislation nor in the application of the law regarding group insurance, and companies which write group contracts do so by adjustments in the form of their policies. This class of insurance is, in fact, not expressly prohibited by the Insurance Act, but a clause in the Act prohibits any discrimination as between individuals. In spite of the fact that the risks are not physically examined when an ordinary group contract is written, such insurance can be written more cheaply than individual contracts because of the saving in selling expenses and in collections. If a company, therefore, chooses to quote rates for group insurance below its usual rates, it must accept individual contracts on the same basis.

Section 87 of the Insurance Act, 1917, says:—

"No such life insurance company shall make or permit any distinction or discrimination in favor of individuals between the insured of the same class and equal expectation of life in the amount of premiums charged or in the dividends payable on the policy, nor shall any agent of such company assume to make any contract of insurance, or agreement as to such contract, whether in respect of the premium to be paid or otherwise, other than as plainly expressed in the policy issued; nor shall any such company or any officer, agent, solicitor or representative thereof pay, allow or give, or offer to pay, allow or give, directly or indirectly, as inducement to insure any rebate of premium payable on the policy, or any special favor or advantage in the dividends or other benefits to accrue thereon, or any advantage by way of local or advisory directorship where actual service is not bona fide performed, or any paid employment or contract for services of any kind, or any inducement whatever intended to be in the nature of a rebate of premium; nor shall any person knowingly receive as such inducement any such rebate of premium or other such special favor, advantage, benefit, consideration or inducement; nor shall any such company or any officer, agent, solicitor or representative thereof give, sell or purchase as such inducement, or in connection with such insurance, any stocks, bonds or other securities of any insurance company or other corporation, association or partnership.

"Each company shall deposit and keep deposited with the superintendent a copy of its established rates for all plans of insurance, such rates in the ordinary branch, as distinguished from the industrial branch, being based upon an insurance of one thousand dollars, and shall be applicable to insurance for that amount and pro rata for greater amounts.

"This section shall not apply to reinsurance contracts or to acts done in pursuance of agreements made relative to policies issued prior to the passing of this Act."

ADJUSTING INCOME TO LIVING COSTS

A DISPATCH from New South Wales states that the government there has introduced a system of relief for large families which are dependent upon a small income for support. Details of the scheme are lacking, but it is stated that the payments are in proportion to the number of children, and that they decrease in proportion as the income increases. This legislation is the most radical of the kind yet reported, but partial reforms in the same direction have already been put in force in many countries, states and provinces. One of these is a system of mothers' pensions, such as is operated in Manitoba, where a service to the state is recognized and rewarded, and a certain amount of responsibility delegated to the parent or guardian of the future citizen.

While at first sight this may seem to be a fair enough proposition, it is, on the other hand, not in accord with certain principles which have been followed in the settlement of industrial disputes on this continent. In such disputes the cost of living is continually referred to as a proper basis for determining the wages of unskilled workers, although there is always uncertainty as to what constitutes the cost of living, and no one has shown that it is not the worker's production rather than his cost of living which must finally determine his reward. If we fix the income of the unskilled worker at an amount sufficient to maintain him at a standard of living, which is, after all, quite arbitrary, there is no guarantee that he will produce this amount, and if he does not, he is certain to be unemployed, unless a beneficent government chooses to maintain him by appropriating the surplus of workers who do produce more than they consume.

The "family budget" of the Canadian Department of Labor is based on the cost of living of a family of five. It is obviously impossible to take the largest family as a basis, so a number which is average, or a little more than average, is taken. The fact that those who are single, or who have smaller families, do not require as much is recognized by adjusting income taxes, so that they will bear more heavily upon them. In this way those who have large obligations pay less, and those who have small obligations pay more, than their proportionate share of taxation, if income alone is taken as the basis for determining this share.

This accomplishes the same purpose as the bonus system adopted in New South Wales, and as it involves the handling of less funds on the part of the government, and as it is the method already adopted here, it is the more desirable of the two. Nevertheless, our Canadian taxation is in need of still further changes in order that the burden of the high cost of living may fall less heavily upon those with large obligations. Large increases in wages have barely enabled the large family to maintain its standard of living, if it has been able to do so at all, while they have enabled the single and the childless to indulge still further in those luxuries the display of which has been an important factor in stimulating discontent.

YOKOHAMA

The Liverpool of Japan

JAPAN has need of Canadian products, and Canada can use with advantage many articles produced by Japan.

Thus, there is a ready market in Japan for the Canadian exporter and importer.

And these goods, to and from the countries, will flow through Yokohama, chief seaport of the land of the Cherry Blossom. Yokohama may be said to be the centre of Japanese foreign trade. Located on Tokyo Bay, but sixteen miles from Tokyo, the Capital of Japan, its importance to those engaged in foreign trade may readily be appreciated.

The Park-Union Foreign Banking Corporation has branches in Yokohama, Japan; Shanghai, China; Paris, France; and New York, San Francisco and Seattle in the United States. We have our own New York Agency and two branches in London, England.

With Branches at such strategic points, we extend to Canadian importers and exporters every banking facility for the extension of foreign business throughout the world, and offer first-hand advice on trade conditions, based on reports from our branches.

We invite correspondence from those considering foreign trade.

UNION BANK OF CANADA

Park-Union Foreign Banking Corporation jointly owned and controlled by National Park Bank of New York and Union Bank of Canada.

38

EXPORT TRADE

The extensive foreign connections of this Bank enable us to place at the disposal of our customers the best existing world-wide banking facilities.

Our local Manager is in a position to give you both assistance and advice.

PERSONAL NOTES

Mr. Walter Chrysler, vice-president and general manager of the General Motors Company, has resigned.

Mr. James Hamilton, general manager of the Yorkshire Insurance Company, of England, sailed from New York last week for home.

Mr. Gordon D. Ritchie, manager of the Fort William branch of the Imperial Bank of Canada, has been appointed assistant western superintendent.

Mr. J. B. Johnson, treasurer of the Imperial Canadian Trust Company, at Winnipeg, has resigned his post to represent the Equitable Life Assurance Society.

Mr. J. S. Douglas, for some years past business manager of the Mail and Empire, Toronto, has been appointed general manager, succeeding the late Mr. W. J. Douglas.

Mr. C. R. Drayton, manager for Canada of the Union Insurance Society of Canton, has returned from a business trip to the British West Indies, in the interest of the company.

Sir Thomas White was elected to the directorate of the National Trust Company, at a meeting held in Toronto on November 5th. On the following day he was elected to the directorate of the Steel Company of Canada, Hamilton.

Mr. F. G. Wallace, president and managing director of the Canadian Locomotive Company, who tendered his resignation this week, has been persuaded to remain in his position, and has been given six months' leave of absence.

Sir George Bury sailed last week from Vancouver for China, in the interests of the pulp trade between the Orient and British Columbia. He expects to remain there until the end of January or early in February.

Mr. S. A. Bennett, of London, England, assistant general manager of the Eagle, Star and British Dominions Insurance Company, Limited, is at present in Toronto and is leaving for the coast accompanied by Mr. J. H. Riddel, manager for Canada.

Sir John Aird, general manager of the Canadian Bank of Commerce, has returned from a short visit to Great Britain. He was accompanied by Mr. A. R. Phipps, assistant manager of the bank's London, Eng., office, who will be in Canada for a few weeks.

Mr. J. A. C. Kemp has been appointed chief inspector of the Canadian Bank of Commerce. He was at one time assistant manager of the bank in Montreal, later assistant inspector for the Eastern Townships division, and until recently has acted as second agent for the bank in New York.

Mr. Arthur T. Little of Robinson, Little and Company, has been chosen to succeed the late Mr. George S. Gibbons as president of the London and Western Trusts Company. Mr. Duncan McArthur of the Canada Trust Company, who has been real estate manager for the concern, was named assistant manager of the London and Western Trusts Company.

Mr. Wm. Hanson, of Hanson Bros., Montreal, has been elected to fill the vacancy on the board of the Canadian Woollens, Limited, caused by the death of President J. B. Ferguson. Mr. A. O. Dawson, who has been vice-president and general manager, was elected president, and Mr. W. K. George of Toronto, first vice-president and chairman of the board.

Montreal interests, with whom is associated Messrs. Campbell and Fairburn, former leaseholders of the Foster Mine, are negotiating for control for the old Drummond property in the Kerr Lake section of the Cobalt camp.

STANDARD RELIANCE ASSETS, LIMITED

G. T. Clarkson, liquidator of the Standard Reliance Mortgage Corporation, announced on November 1st that it was expected that all the properties of the old company would be transferred in a few days to the Standard Reliance Assets, Ltd., which was incorporated for the purpose of taking over all the assets of the old company, and to realize on them for the benefit of the creditors. Mr. Clarkson also announced that in accordance with the approval of the creditors the deposits taken in by the company since June 1st would be paid back immediately with interest. The amount is upwards of $100,000.

As stated in *The Monetary Times* last week, the government investigation was resumed on October 30th. On October 31st evidence was given to the effect that the directors of the Sun and Hastings Loan Co. received a gift of $30,000 when it was taken over by the Standard Reliance. This statement was made by W. Vandusen, who was president of the Sun and Hastings; he stated that his share was $4,280, in addition to which he received a special gift of $5,000 as compensation for loss of his position as president, in which capacity he had received a salary of $1,500 per year. These payments, so far as he knew, were unknown to the shareholders, and so far as he knew the other directors did not know of the $5,000 extra which he had received. The directors also received, of course, remuneration for their holdings of stock, on the same basis as the other shareholders.

The inquiry into the affairs of the company was continued on November 6th at Osgoode Hall, Toronto, before the Master of Chambers, Mr. J. A. C. Cameron. An objection was made to the investigation of the affairs of the company previous to 1913 and 1914, when the audits showed the company to have a surplus of $1,400,000. Col. W. S. Dinnick was the only witness examined during the day. On examination by Mr. George Kilmer, K.C., for the liquidators, Mr. Dinnick stated that he first became connected with the old Standard Loan Company in 1899 as its manager, and he continued in this capacity until it was taken over by the Standard Reliance Mortgage Corporation, when he became vice-president and director of the latter company, positions which he held until the end of June, 1917, when he resigned. The Dovercourt Land and Savings Company, according to the witness, was acquired by the Standard Loan Company in 1903 or 1904 by purchase of Dovercourt stock. His interest in the Dovercourt Land Company came to an end in 1914.

YIELDS ON INVESTMENTS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. Morrow & Jellett, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

Nov. 5th 1919.

GOVERNMENT OF A MUNICIPALITY BY COUNCIL AND MANAGER*

Mayor and Council Could Not Cope With Increased Business—Committee System Faulty and Superseded by Council and Manager

By J. J. Carment,
City Manager, Kamloops, B.C.

During the past decade the subject of municipal management has been under intensive consideration by civic authorities and trained publicists, with the result that there has been a decided trend towards radical changes in the system at present obtaining. That under which the great majority of municipalities operate filled all the purposes for which it was formulated just so long as it remains sufficiently elastic to bear the strain of civic development. The mayor, as executive officer, with the council in its legislative and advisory capacity, could well attend to all the business requiring attention under conditions as they were when the municipal system was adopted and during the gradual changes which took place prior to the opening of the present century.

Present-day ideas on civic development, however, have so far outdistanced the system that the latter is now absolutely unable to deal effectively with the situation in any but the most elemental of civic communities. Modern municipalities are not content with caring for the welfare of the citizen in the old way. The ratepayer does not content himself with candles or kerosene for light, nor draw his water from the ancient well. He has electric light and gas and water, telephones and sewers and pavements, parks and playgrounds and cemeteries, all provided by the municipality, and paid for by the rates if the service is not a revenue producer, and very often paid for by the rates when they should be self-supporting and producing a proportion of the general rates as well.

To meet the diversified demands upon the time and intelligence of the council, demands which, added to the purely executive and legislative functions hitherto constituting the chief municipal activities, made some change absolutely necessary, the committee system was adopted. The burden of management was divided, and one group of aldermen looked after one branch of the civic service, another took charge of a second part of the municipal work, and every item of business was brought before the council board, where it gave rise to more or less discussion between the councillors, and caused more or less controversy between men who, after all, were more or less strangers to the particular line of business under discussion.

Committee System Unsatisfactory

The weakness of this system becomes more apparent as the municipal activities become more diversified, and the advisability of some change in the administration of municipal affairs in general is now generally admitted by all who have given the subject any study. Every municipality of any size in the country is taking over the supply of some of the public utilities formerly provided for by private corporation, and the tendency is to add to the list of municipally owned utilities rather than to decrease it. This in spite of the fact that private ownership of public utilities has in the past been more successful in Canada than has public ownership. This condition is, however, not the fault of the principle of municipal ownership, but the fault of the system under which the various services are operated.

The present system of handling the business of the community through departments controlled by a committee of aldermen has been generally recognized as making for inefficiency, waste and inadequate service. Some way by which the methods of successful private corporation may be adopted and applied to the working of the municipal corporation has been sought, but as yet the result of the search is indeterminate. At present we cannot do better than adopt the methods of the best business concerns of to-day and be ready to improve on them as experience suggests. As the shareholders of our joint stock companies appoint directors and these in turn engage managers who select their staffs with the object of most efficient service, so in civic affairs the citizens as shareholders cannot do better than follow their lead. The immediate advantages to be gained by adopting such a system are obvious:—

Advantages of City Manager

(a) The aldermen are freed from the consideration of petty details, and are thus enabled to give a much greater portion of their time to the larger affairs of civic administration, which more properly belongs to them as legislators.

(b) The holding of one man responsible for the administration of the various departments tends to a thoroughness which cannot be expected from committees of aldermen, who are changing their personnel from year to year.

(c) Lack of continuity of policy, owing to the changing personnel of these committees, is thus obviated.

(d) The control of municipal employees is much more satisfactory under the managerial system when the right man is secured.

(e) The placing of all departments under a permanent official assures efficiency and economy which cannot be obtained under the system of committees.

In general, upon looking fully into the whole question, the managerial system retains the best features of the aldermanic system of civic government and eliminates its weak points by adopting the methods of the most successful public utility undertakings.

---

*An address before the Convention of the Union of British Columbia Municipalities, October 7th to 9th, 1919.

OCTOBER BANK CLEARINGS

The following are the bank clearings for the month of October, compared with the same month last year:—

	Oct., 1919.	Oct., 1918.	Changes.

The Bank of Liverpool and Martin's Bank, which amalgamated last year, are now absorbing the Halifax Commerical Bank, giving four shares, quoted roughly at seven pounds, for each share of the Halifax Bank. The deposits of the Liverpool and Martin's institution aggregate £68,000,000, the paid-up capital £2,046,000 and the reserves £1,518,000. The Halifax Bank has deposits of £3,200,000 and its capital is £200,000. The reserves amount to £120,000.

BANK BRANCH NOTES

Merchants Bank to Build in Vancouver—Many Appointments Announced

The following is a list of branches of Canadian banks recently opened:—

Graytown, Sask.	Bank of Toronto
Belleville, Ont	Royal Bank of Canada
London, Ont. (Richmond and Piccadilly)	Royal Bank of Canada
*Brantford, Ont. (Huron and Port)	Bank of Hamilton
Hamilton, Ont. (1107 Main)	Merchants Bank of Canada
Harrow, Ont.	Dominion Bank
*St. James, Man. (Winnipeg office)	Home Bank of Canada

---

*Sub-agency.

The branch of the Bank of Montreal, Trafalgar Square, 24 Cockspur Street, London, England, has been closed, and the business transferred to the office at 9 Waterloo Place, Pall Mall, S.W. 1.

Coming Branches

Arrangements are being made by the Bank of Montreal for the opening of a new branch at Marysville, N.B., in the near future.

Mr. D. W. Harper, maritime supervisor of the Provincial Bank of Canada, has been to Sackville, N.B., looking over the business prospects there. It is understood that his decision is for a new branch.

The Merchants Bank of Canada has purchased 50 feet of property on the west side of Granville Street, south of Robson, Vancouver, B.C. It is the intention of the bank to take possession as soon as the lease expires, early next year, and a new building for a city branch will be erected.

Appointments are announced by the Bank of Montreal as follows: Cainsville, Ont., Mr. R. W. Hall, acting manager at Sioux Lookout, appointed acting manager at Cainsville; Greenspond, Nfld., Mr. R. C. Michell appointed acting manager; Hull, Que., Mr. R. L. Curphey appointed acting manager.

Bank Branches in September

The total number of branches opened by Canadian banks in September, 1919, was 104, according to Houston's Bank Directory. Of this number, 42 were sub-agencies. Seven branches were closed, four being sub-agencies. The Royal Bank of Canada is the first on the list with a total opened of 16, the Bank of Hochelaga second with 15, and the Merchants Bank of Canada third with 14. Out of the 104 branches, 56 were opened in the western provinces, 42 in Ontario and Quebec, 4 in the Maritimes and 2 in Cuba. The following table shows the number of branches opened by each bank for the month:—

Royal Bank of Canada	16
Bank of Hochelaga	15
Merchants Bank of Canada	14
Imperial Bank of Canada	11
Union Bank of Canada	10
Bank of Montreal	8
Standard Bank of Canada	6
Canadian Bank of Commerce	5
The Bank of Hamilton	3
Molsons Bank	3
Provinciale Bank	3
Dominion Bank	2
Bank of Toronto	2
Home Bank of Canada	2
Bank Nationale	2
Bank of Nova Scotia	1
Sterling Bank of Canada	1
Total	104

The branches closed were:—

Cessford, Alta.	Union Bank of Canada.
*Eastwood, Ont.	Merchants Bank of Canada.
*Ebenezer, Sask.	Royal Bank of Canada.
*Fisher Branch, Man.	Bank of Hochelaga.
Leeds Village, Que.	Bank of Hochelaga.
*Merna, Alta.	Merchants Bank of Canada.
Valley Junction, Que.	Bank of Hochelaga.

---

*Sub-agency.

MONEY MARKETS

Rates in New York, sterling demand, $4.15¾.
Bank of England rate, 5 per cent.

MANITOBA WILL KEEP AMUSEMENT TAX

Manitoba will retain the amusement tax as a permanent source of revenue, according to a statement of Hon. Edward Brown. During the present year, he said, the provincial government had realized $300,000 from the tax. Out of this sum, however, about $40,000 had been refunded to proprietors of places of amusement as compensation for the period during which they were closed as a result of the influenza epidemic. Mr. Brown said that the amount of the gross earnings of the poolrooms in the province would reach $500,000 for the year. An amendment would be introduced to the Amusement Taxation Act at the next session to bring the poolrooms directly under the law. In the present statute poolrooms are not specifically designated. An amendment would also be introduced withdrawing the clause governing boxing bouts. At present the tax on boxing bouts, except when staged under the auspices of the returned soldiers, was 50 cents for every admission. This would be changed so that the usual tax only would be paid.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended November 7, 1919, compared with the corresponding week last year:—

	Week ended Nov. 6, '19.	Week ended Nov. 7, '18.		Changes.

"Trading with Australasia" is the title of an interesting booklet just issued by the Guaranty Trust Co., describing economic conditions and trade opportunities in Australia, New Zealand and Tasmania. Australia alone, it is pointed out, is larger than the United States without Alaska. The booklet also states that Australian business houses lately have been seeking agencies for combinations of American manufacturers organized under the Webb Law.

Alberta Recovering From Poor Crops

Victory Loan Subscriptions Indicate Financial Ability—Irrigation and Mixed Farming Beneficial— Irrigation Scheme Will Require Capital Expenditures— Some Errors in Crop Reports

(Special to *The Monetary Times*)

Calgary, Alta., Nov. 1st. 1919.

THERE was considerable apprehension two or three months ago about the feed situation in certain parts of Southern Alberta and steps were taken to transfer and sell the stock from many farms and ranges. Not a great deal of this, however, was done, as the feed situation improved considerably in these areas. The term "Southern Alberta" covers such an immense area, that it is not correct to say that this whole area had a crop failure and shortage of feed.

In the territory immediately adjacent to Calgary, conditions are greatly improved over what was at first expected. In certain areas conditions are bad, and government aid has been arranged for those who will require it. It is significant, however, to note that the first town in Alberta to reach its allotment on the Victory Loan campaign, was Rockyford in Southern Alberta, over $60,000 being raised in the first two days, the quota for the town being $50,000. In discussing the outlook with *The Monetary Times*, Wm. Toole, president of the Calgary Board of Trade and manager of the Loan and Investment Department for Alberta, of the Canada Life Assurance Co., stated that he was well satisfied with the prospects, and with the way Alberta, and more particularly the Calgary district was showing up this fall. Mr. Toole states that collections are quite satisfactory in Calgary and wholesale and retail houses are doing a better business than a year ago. There are no vacant warehouses in Calgary, and houses are almost impossible to get, especially for rental.

Calgary this last year or two is getting into the large city class and it is quite noticeable, that even with the two bad years of short crops, business, and the tone of things generally do not seem to feel the crop shortage anything like it would have done a few years ago. Calgary is getting to be more and more a very important financial and distributing centre. It is in the centre of one of the finest districts in Canada, and distributes over a large territory. It is also quite noticeable that where a year or two ago there was a great deal of vacant space in office buildings in Calgary, practically every building is now filled. The Lancaster Building on 8th Ave., which stood for two or three years a gaunt skeleton of steel, has just been completed. This building is owned by J. S. Mackie, an old-time Calgarian, and ex-mayor of the city. Mr. Mackie experienced difficulty in financing, but the building has now been entirely completed by the Canada Life Assurance Co., and the whole nine stories are fully occupied. The post office occupies the whole ground floor; the Grain Exchange and many of the leading grain firms occupy these floors, including the Alberta Pacific Grain Co., which has the eighth floor. Other floors are occupied by the Government Civil Re-establishment offices, etc., and the Canadian Credit Mens' Trust Association occupies nearly one floor. Calgary has many fine office buildings, including the Herald Building, the Canada Life Building, the Lougheed Building, and many others, and all are well occupied. The supply of natural gas for domestic use and heating is reported to be getting short, and large plants and buildings are returning to the use of coal for the time being.

Lethbridge, Alta., Nov. 2nd, 1919.

Outside of irrigated land a large part of southern Alberta had very little crop this fall, and the same conditions prevailed last fall. Despite this fact the most southerly city of Alberta is not downhearted, and the writer found business quite active. Lethbridge has a good live Board of Trade, which is doing a great deal in co-operation with the farmers of the surrounding district. Wrong impressions have gone out regarding southern Alberta, things are bad but not so bad as first reports would indicate. The Board of Trade furnished *The Monetary Times* with the following report:—

"Conditions in southern Alberta are not as good as they were this time last year, but they are a great deal better than press indications would lead the public to believe. The following is a tabulated list of the grain situation and the figures used for this year are the result of conservative estimate at all shipping points in the south:—

	1916	1917	1918	1919
Wheat	27,993,609	16,675,215	6,084,456	1,956,000
Other grain ..	8,894,731	3,200,465	791,573	600,000
	36,888,340	19,875,680	6,876,029	2,556,000

"It is worthy of note here that this ratio does not represent the ratio of bushels per acre as 1919 shows an eight per cent. increase in acreage over 1918 which in turn had more acres under cultivation than the preceding year, (the actual percentage not being available) but notwithstanding the adverse conditions experienced this year, there can be brought under cultivation, a arlge majority of which is now ready for seeding, five per cent. more acreage than was under crop in 1919.

RAINFALL

	1916	1917	1918	1919
May	3.77	0.95	0.58	1.75
June	3.54	1.42	0.75	0.56
July	3.53	1.37	0.85	1.06
August	2.97	2.00	1.23	1.05
	13.81	5.74	3.41	4.42

"It will be noticed that there is a direct ratio between the moisture available and the outturns of the crop. An analysis of the rainfall for a lengthy period shows that the last year or two were abnormally low. With the introduction of greater irrigated areas, such as are now actually under construction or contemplation, the heaviest yield per acre record will become an assured fact each year bringing with it a stability of industrial enterprise not now enjoyed. The hay crop of non-irrigated lands will yield 10 per cent. less tonnage than last year, but, with increased acreage under hay in irrigable land and a much heavier yield than any preceding year, we will produce 25 per cent. more tonnage of irrigated hay.

"After careful investigation, we find that the cattle in southern Alberta, numerically, are as great at date as they were at the same period last year. Notwithstanding what appeared to be a very heavy export of cattle, other than the natural supply to the abattoirs from the west, there has been but little exportation in cattle or sheep, although isolated cases of individuals shipping their entire herd, which at greatest were very few, are to be found. We find that the movement to points outside the province for feed or slaughter was small. The usual movement of sheep to mountain range occurred but arrangements have been perfected whereby, as in previous years, provision is made for taking care of the wintering of these flocks within our own domains.

"The mining industry for the past three months has been tied up on account of labor conditions, resulting in a strike which has now been satisfactorily settled. There was little or no inconvenience or hardship occasioned by this strike, but as the conserved resources of this industry have been depleted, very active engagement in the industry will now ensue and the output of the coal will be the largest in the history of southern Alberta in the coming winter and will only be governed by the amount of labor that can be secured to fully operate the mines. Although for a few months during the summer there was a surplus of labor, at the time of writing there is a much greater de-

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

Write for free specimen copies

THE BOND BUYER
67 Pearl Street New York, N.Y

mand for labor than can be supplied and this condition will continue until the spring.

"The condition of the people in southern Alberta, financially, is demonstrated by the fact that the wholesale houses only show a small decrease in their business as compared with the period up to the present for the calendar year as compared with a similar period of last year, while the retail merchants show an industrial situation from an equal business to a 25 per cent. increase. It is remarkable to note that the automobile industry, retail furniture and such concerns which might first be imagined to show a drop in the industrial barometer, are doing as well as, if not better than, an equivalent period of the year previous."

Finance and Irrigation

Mayor Hardie informed *The Monetary Times* that Lethbridge was not contemplating any new financing and that considering conditions of crops in the district in the past two years the city is in very good shape. He also stated that the city and sinking fund committee contemplate taking practically half of Lethbridge's quota of the present Victory Loan. This will be a great help to Lethbridge in going well over the top in the present campaign.

Important Irrigation Plans

The Lethbridge Northern Irrigation District has now taken definite shape and just recently the following trustees were formally voted on and elected: T. W. Crofts, W. F. Lever, George Chew, Thos. Nolan, H. E. Miebach, and G. W. Pearson. An engineer has also been appointed who is now checking up surveys, etc., after which a bond issue will be made, which in all likelihood will have the guarantee of the provincial government. This project is intended to reclaim a large tract of 208,000 acres and the plan is for the farmers to bond their land for the amount required to construct the system. It is planned to irrigate a tract of 100,000 acres first, at a cost of $40 an acre, so that the financing required would be in the neighborhood of $4,000,000. Messrs. Sheppard, Dunlop and Rice, of Lethbridge are solicitors for the district.

As previously mentioned in these columns, plans are going ahead for a new and greater industrial congress in 1920. The organizer is M. A. Brown, who is mayor of Medicine Hat, not of Lethbridge, as stated last week.

CANADA REPRESENTED AT CHEMICAL EXPOSITION

The importance and magnitude of our chemical industries form an instructive chapter in the industrial history of Canada. Development followed development during the war with amazing rapidity and still continues. Some idea of the progress made may be gathered from the fact that up to a few months prior to the end of the war all synthetic nitrates for explosives produced on this continent, were of Canadian origin. Our production of acetone was equally phenomenal. Canada occupied an important position at the National Chemical Exposition recently held at Chicago, admitted to be the greatest industrial event in the history of that city. In addition to the large attendance from Chicago, over twenty thousand members of various scientific societies, universities, manufacturing concerns and others interested in commercial and scientific development, attended the exposition. These included the American Institute, Mining and Metallurgical Engineers, American Electro-Chemical Society, Technical Association of Pulp and Paper Industry and others.

The government of Canada and the province of Ontario, realizing the importance of this opportunity of telling abroad the story of our resources were represented by exhibits, and by some of their best men. The Canadian National Railways had an exhibit illustrating the mineral, forest wealth, water powers and raw materials of the country. During the Exposition two addresses were delivered by C. Price-Green, Commissioner, Industrial and Resources Department, Canadian National Railways, on "Canadian National Resources" and "The great field afforded in Canada for enterprise and investment of capital," which were widely reported in the American press and many scientific publications.

INDEX NUMBER OF COMMODITIES FOR SEPTEMBER

The most important changes in prices for September, 1919, were seasonal or the result of abnormal crop conditions, but there were also advances in building materials, furniture and raw furs, according to the "Labor Gazette" for October. Grain, livestock, meats and fish were lower, as well as some vegetables. Fruit prices were high. In hides some lines were up while others were down, and some lines of leather and boots advanced. In wholesale prices the index number, based on the average prices of 272 commodities during the decade 1890-1899, showed very little change in the general level, being 301.4 for September as compared with 301.1 for August, 285.3 for September, 1918, and 134.4 for September, 1913. Increases in fruits, dairy products, sugar, hides, leathers and boots, metals, building materials, fuel, furniture and raw furs were nearly offset by decreases in grain, livestock, meats and fish.

FINANCIAL POSITION OF ALBERTA

Total Debt Over Thirty Million—Railway Guarantees Forty-five Million—1918 Revenue Exceeded Expenditure

THE public accounts of the province of Alberta for the year 1918 have just been issued. The more important features were dealt with by the treasurer in his budget speech on March 17th, which was reported in these columns. In a statement accompanying the public accounts, the public debt of the province as at December 31st, 1918, is summarized as follows:—

4 %	Debentures, due 1938, issued for purchase of telephone system	$ 2,000,200
4 %	Debentures, due 1922 (convertible into 30-year stock), four-fifths for telephone expenditure and one-fifth for public expenditure	4,804,373
4 %	Debentures, due 1922, four-fifths for telephone expenditure, and one-fifth for public expenditure	133,333
4 %	Registered stock (converted), four-fifths for telephone expenditure, and one-fifth for public expenditure	62,293
4½%	Registered stock, due 1943, two-fifths for telephone expenditure, and three-fifths for public expenditure	4,866,666
4½%	Debentures, due 1943, two-fifths for telephone expenditure, and three-fifths for public expenditure	133,333
4½%	Debentures, due 1923, eight-eighteenths for public expenditure, five-eighteenths for telephone expenditure, and five-eighteenths for elevator expenditure	3,600,000
4½%	Debentures, due 1924, for public expenditure	7,400,000
5 %	Debentures, due 1925, for public expenditure and telephones	4,000,000
5 %	Debentures, due 1926, for public expenditure	2,000,000
5 %	Debentures, due 1922 (August 1st) for public expenditure	1,500,000
5 %	Debentures, due 1922 (December 1st) for public expenditure	175,000
6 %	Debentures, due 1928, for public expenditure and telephones	825,000
		$31,500,200
	Less sinking fund	754,050
	Net debt as of December 31st, 1918	$30,746,149

Of the above debt there is practically $14,500,000 represented in remunerative investments on which the province does not have to provide interest. An annual sinking fund of at least one-half of one per cent. has been provided and will be provided on all stock and debentures issued by the province. Sinking fund may be invested in securities of the province, or as otherwise provided, all such securities so purchased to be kept alive and not cancelled.

Provincial Assets

The assets of the province as of December 31st, 1918, amounted to $135,952,458, made up as follows: —

Public buildings (including stock advance)	$ 7,634,510
Bridges	2,514,521
Trunk roads and bridges thereon	3,445,961
Roads, district and local	32,054
Demonstration farms	340,664
Telephone plant, stock, tools, etc.	9,762,330
Ferries	91,829
Loans to creameries	5,563
Loans to Alberta Farmers' Co-operative Elevator Company, Limited	1,081,213
Advances to school districts	26,557
Re advance to Central Canada Railway Company—amount due	2,000,000
Advances re vendors of liquor stores	17,000
Taxes on forfeited lands	17,572
Stock (King's printer and public libraries)	41,784
Lacombe and Blindman Valley Electric Railway, loan, etc.	157,862
Lacombe and Blindman Valley Electric Railway shares	1,687
Provincial police—buildings and equipment	43,642
Cash in bank	1,117,191
University of Alberta—loan	2,500
Miscellaneous	995,245
Deferred Revenue	3,546,482
	$ 32,876,173
Deposit (in lieu of debt) in hands of Dominion government	8,107,500
Deposit (school lands fund)	4,171,094
Deferred and overdue payments of principal on school lands	7,884,291
Unsold lands 6,909,450 acres at $12 per acre	82,913,400
Total	$135,952,458

The province has the power to levy through legislative enactment against all taxable property within the province such taxes as may be necessary to meet expenditures, or to provide payment of principal and interest, or sinking fund on all debentures or other outstanding obligations.

Revenue and Expenditure

A detailed statement of revenues and expenditures of the various provincial departments for the years ended December 31st, 1917 and 1918 is as follows:—

RECEIPTS	1917.	1918.

Total	$ 6,752,502	$ 8,303,806

The above statements do not include proceeds from sale of securities or expenditures made from capital account.

Railway Guarantees

In addition to the actual debt, there are also guarantees of railway bonds, which are summarized in the statement, as follows:—

The building of railways within the borders of the province has been facilitated in the past by guaranteeing the bond issues of the railway companies in respect to such lines. These railways open for settlement a vast amount of valuable acreage and natural resources heretofore without facilities. Below is a statement giving particulars of these guarantees as at December 31st, 1918.

	Authorized Mileage par value	Mileage	Executed Mileage par value (guaranteed)	Mileage
Can. Nor. and Can. Nor. West. Railways	$36,066,000	2,292.4	$22,244,250	1,437.37
Grand Trunk Pacific Railway	4,182,500	259.5	4,182,500	259.5
McArthur lines ...	19,100,000	935.	18,820,000	921.
Lacombe and Blindman Valley Railway	273,700	39.1	273,700	39.1
Additional light railways	1,126,300	160.9	....	....
	$60,748,500	3,686.9	$45,520,450	2,656.97

Note—With the taking over of the Canadian Northern Railway and the Canadian Northern Western Railway by the Dominion government the contingent liability of the province will be modified considerably.

The procedure with respect to guaranteed bonds is as follows: The debentures are secured by a first mortgage upon the lines of railway guaranteed and upon the rolling stock and equipment in connection therewith. The proceeds of the guaranteed securities are paid by the purchaser into a chartered bank to the credit of the provincial treasurer and are disbursed by him as construction work progresses, upon the presentation of certificates of an engineer appointed by the provincial government.

The province has therefore not only the security of the railway company, but also the actually constructed railway or the money in the bank as security against its guarantees. As the money deposited in the bank is expended, from time to time, the railway is thus completed to that extent, and, as stated above, the mortgage securing the debentures covers the railway and the money in the bank.

MANITOBA ASSESSMENT AND TAXATION

The Manitoba Assessment and Taxation Commission has for several months been making an investigation at different points in the province. On October 28th it adjourned in order to prepare its report for submission not later than December 5th. One of the members, W. H. Gardner, of Oldfield, Kirby & Gardner, took the view that the commission had not finished its work. The chairman, E. M. Wood, pointed out, however, that the evidence had all been secured; he intimated that, in his view, the provincial succession duties are too low. Mr. Gardner thought that the commission should take up such matters as the corporation, amusement, and railway taxes, licenses, mail order taxes and other sources of revenue.

FINANCE MINISTER WILL ADDRESS INSURANCE MEN

The international aspect of the program for the thirteenth annual convention of the Association of Life Insurance Presidents, at the Hotel Astor, New York, on December fourth and fifth, is emphasized by the announcement that Sir Henry Drayton, the new Canadian Minister of Finance, has accepted an invitation to be present and make an address. His topic will be in harmony with the general theme of the convention, which will deal with various postwar problems. He probably will speak along the line of "Some Canadian Reconstruction Problems." As is customary, the executives of all of the Canadian life insurance companies have been invited to be present at the meeting and, from the acceptances already received, it is evident that Canada will be well represented.

The convention will give due consideration to the subject of the unprecedented demand for life insurance on the part of the American public during the current year. The significance of this remarkable increase will be discussed from the actual experience of the companies. The housing problem, with its ramifications in nearly every town and city, will be another important subject receiving attention from the convention. The companies are now contributing up-to-date statistics as to how the investments of life insurance companies have been, and are, associated with meeting this problem. The increasing contribution of life insurance toward meeting the readjustment problems of financing agriculture, will have a prominent place on the program. As with city mortgage loans, the companies are contributing their latest collective data as to farm mortgage loans, the significance of these loans being presented in connection with the discussion of this subject. The investor's side of the pending steam railroad situation, of deep concern to the policyholders of life insurance companies, will be presented, with n discussion which will comprehend the various remedies sugested for this vital reconstruction problem.

While the program is not complete, it has progressed to a point where the names of a number of the speakers and, in most cases, their respective subjects, can be given. These follow:—Theme of the meeting, "The Part of Life Insurance in the Problems of Reconstruction. "Mental vs. Material Reconstruction," Nicholas Murray Butler, LL.D., president, Columbia University, New York. "Some Canadian Reconstruction Problems," Sir Henry Drayton, Minister of Finance, Dominion of Canada, Ottawa. Address (topic to be announced later), Hon. Atlee Pomerene, United States Senate, Washington, D.C. "The Railroad Problem," Mr. Howard Elliott, president, Northern Pacific Railway Company, New York. "The Significance of the Increasing Volume of Life Insurance," Hon. William A. Day, president, Equitable Life Assurance Society, New York.. "The Problem of Housing the American People," Mr. Frederick H. Ecker, vice-president, Metropolitan Life Insurance Company, New York. "Policyholders' Contribution to Agricultural Readjustment," Mr. Louis Breiling, treasurer, Union Central Life Insurance Company, Cincinnati, O. Address (title to be announced later), Hon. Joseph G. Brown, Insurance Commissioner of Vermont, and president, National Convention of Insurance Commissioners, Montpelier, Vt. "Protecting the Public by Informing the Investor," Hon. Huston Thompson, Federal Trade Commissioner, Washington, D.C.

OBJECT TO MOTION-PICTURE TAX

Protests against the federal tax on motion-picture films and the methods of collection were registered at the fourth annual convention of the Motion-picture Exhibitors' League of the maritime provinces, which opened in St. John, N.B., on October 29th. The convention decided to urge upon the government a more equitable plan for collecting this tax. A memorial praying for exemption from all film taxes for theatres in towns of 5,000 or less will be forwarded to the government.

A CALL FOR LEADERSHIP!

The Privilege, Duty and Opportunity of Canada's Financiers

It is a great privilege that you enjoy—you financial men of Canada—the privilege of being financial advisers to over eight millions of people.

It is a great duty that is imposed upon you—you financial men of Canada—the duty of advising your fellow-citizens wisely and well in the investment of their money.

It is a great opportunity that is presented to you—you financial men of Canada—the opportunity to direct trust and estate funds into the finest of investments; to encourage the timid to buy bonds that are absolutely secured by the entire wealth of their country; to encourage the small investor, the wage earner and the salaried man and woman to buy Canada's Victory Bonds 1919 on the installment plan,—creating thrift, permanent satisfaction and happiness.

Spread the gospel of sound investments!
Spread the gospel of thrift!
Spread the gospel of Canada's Victory Bonds 1919!

VICTORY BONDS 1919

in co-operation with the Minister of Finance
of the Dominion of Canada.

The Molsons Bank

Proceedings at the Sixty-fourth Annual General Meeting of The Molsons Bank, Held at Their Banking House in Montreal, Monday, November 3rd, 1919.

The Sixty-fourth Annual General Meeting of the Shareholders of The Molsons Bank was held in the Board Room of their Banking House, 200 St. James Street, Montreal, Monday, November 3rd, 1919, at 3 o'clock.

The President, Mr. William Molson Macpherson, took the chair, and there were also present the Vice-President, Mr. S. H. Ewing, and Messrs. F. W. Molson, Wm. M. Birks, W. A. Black, John W. Ross, J. M. McIntyre, Walter Molson, A. D. Anderson, W. R. Miller, C. E. Spragge, George Durnford, S. M. Baylis, Alfred Piddington, J. W. Loud, J. M. Rea, H. J. Tellier, S. W. Ewing, P. R. Gault, and others.

The President, having called the meeting to order, requested Mr. E. W. Waud to act as Secretary, and after that gentleman had read the advertisement calling the meeting, and stated that notice of the meeting had been mailed to each Shareholder, in accordance with the requirements of the Bank Act, the President named Messrs. C. E. Spragge and Alfred Piddington to act as Scrutineers.

The minutes of the last Annual Meeting were taken as read, and adopted.

The President then called upon the General Manager, Mr. Edward C. Pratt, to read the Annual Report, as follows:—

THE ANNUAL REPORT

Montreal, 3rd Nov., 1919.

To the Shareholders of The Molsons Bank:—

Gentlemen,—Your Directors have the pleasure to submit the Balance Sheet for the year ending 30th September, 1919, and to report that the net profits after making provision for bad and doubtful debts and for the rebate of discount on current loans is $818,802.25, which with the amount brought forward from last year, $248,029.41, in all $1,066,831.66, has been appropriated as follows:—

Dividends	$ 470,000.00
Contribution to Officers' Pension Fund	21,396.00
Patriotic and Relief Funds	15,000.00
To provide for Dominion Government Taxes	85,000.00
Transferred to Reserve Fund	200,000.00
Leaving at credit of Profit and Loss Account, 30th September, 1919	275,435.66
	$1,066,831.66

Dating from 1st January, 1919, the rate of dividend paid on the shares of this Bank was increased to 12 p.c. per annum.

As usual all the branches of the Bank have been carefully inspected during the year, and we have pleasure in testifying to the zeal and efficiency of our staff.

During the year, 19 Branches and Sub-Agencies were opened in the following places: —

ONTARIO.—Bridgeport, Brinston, St. Agatha (Sub-Agency to Waterloo), Ayr, Thedford, Aultsville (Sub-Agency to Morrisburg), Hamilton, Barton St. East (Rosslyn Ave.), Windsor, Courtland (Sub-Agency to Delhi), Glanworth (Sub-Agency to London), Centralia (Sub-Agency to Exeter), Walters Falls, Bridgeburg, St. Clair Ave., Toronto (Sub-Agency to West Toronto), London St., Windsor (Sub-Agency to Windsor), Londesborough (Sub-Agency to Clinton).

QUEBEC.—St. Denis and Mt. Royal Ave. (Montreal), Verdun, Little Metis (Sub-Agency to Mont-Joli).

Changes in your Board of Directors have taken place during the year, caused first by the absence of Mr. E. J. Chamberlin from the city, and then by the sudden passing away of the late Mr. George E. Drummond. These vacancies were filled by the appointment of Mr. John W. Ross, of Messrs. P. S. Ross & Sons, and Mr. J. M. McIntyre, of Messrs. McIntyre Son & Company, Limited.

The Auditors, Messrs. George Creak, Lemuel Cushing and Charles A. Hodgson, whose report is appended to our Balance Sheet, offer themselves for re-election.

EDWARD C. PRATT, General Manager.
W. M. MACPHERSON, President.

GENERAL STATEMENT

Of the Affairs of The Molsons Bank on the 30th September, 1919

LIABILITIES.

Capital Stock paid in	$ 4,000,000.00	
Reserve Fund	5,000,000.00	
Profit and Loss Account	275,435.66	
		$ 9,275,435.66
156th Dividend for ¼ year at 12% per annum	120,000.00	
Dividends unpaid	2,371.20	
Notes of the Bank in circulation	7,015,344.00	
Balance due to Dominion Government	12,423,185,08	
Deposits not bearing interest	11,830,422.05	
Deposits bearing interest, including interest accrued to date of statement	51,689,483.48	
Balances due to other Banks in Canada	484,775.07	
Balances due to Banks and Banking Correspondents in the United Kingdom and Foreign Countries	1,375,206.47

			46,807,064.15
			$94,513,102.48

PROFIT AND LOSS ACCOUNT

Statement of the result of the business of the Bank for the year ending 30th September, 1919:—

Balance at credit of Profit and Loss Account, 30th September, 1918	$ 248,029.41
Net profits for the year after deducting expenses of management, reservation for interest accrued on deposits, exchange, and provision for bad and doubtful debts	818,802.25
	$ 1,066,831.66
This has been appropriated as follows:—	
153rd Dividend at rate of 11%	$ 110,000.00
154th Dividend at rate of 12%	120,000.00
155th Dividend at rate of 12%	120,000.00
156th Dividend at rate of 12%	120,000.00
Contribution to Officers' Pension Fund	21,396.00
Patriotic and Relief Funds	15,000.00
To provide for Dominion Government Taxes	85,000.00
Transferred to Reserve Fund	200,000.00
	$ 791,396.00
Leaving at credit of Profit and Loss Account 30th September, 1919	275,435.66
	$ 1,066,831.66

WM. MOLSON MACPHERSON, President.
EDWARD C. PRATT, General Manager.

AUDITORS' REPORT TO SHAREHOLDERS.

We have checked and verified the Cash, Investments and Securities of The Molsons Bank at the Chief Office in Montreal on 30th September last, and also at another time, as required by the Bank Act, and we have at different times during the year checked and verified the Cash and Securities held at other important Branches of the Bank.

We have compared the Certified Returns from all the Branches with the entries in the Books at the Chief Office of the Bank as at 30th September, 1919, and find that they agree therewith; and all the transactions which have come under our notice have been, in our opinion, within the powers of the Bank.

We have obtained all the information and explanations we have required, and we certify that, in our opinion, the above Statement is so drawn up as to exhibit a true and correct view of the Bank's affairs at the close of business on 30th September, 1919, according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

GEORGE CREAK,
LEMUEL CUSHING, } Auditors.
CHAS. A. HODGSON,
Chartered Accountants.

Montreal, 18th October, 1919.

THE PRESIDENT'S ADDRESS

The President, Mr. William Molson Macpherson, then delivered the Annual Address, from which we quote:—

It can well be said that, since our last meeting, Canada has entered into a new era, and one which will radically differ from any that have preceded it. Though now freed from the incubus of the war, we are not without anxiety in the face of the many fresh problems which have arisen in recent years. The question of labor has been and will be very much to the fore. In Canada we have, so far, had less trouble in strikes than other countries. Let us hope that labor can be made to see the futility of increasing its demands without calculating the effect upon the industry involved. The high cost of living is a question very difficult to deal with. Higher wages, shorter hours, leading to increased cost of production, will only aggravate the present situation. If we desire to see the cost of living lowered we must all, employers and employees, do as much honest work as we are capable of. The increased production that this would bring would very quickly result in lower prices, which would benefit each one of us far more than any increase of wages that can be obtained. Living conditions have forced the authorities in all countries to make investigations as to how to deal with the high cost of commodities, but their work will be useless unless all workers strive for increased production. We do not need more money, we need more goods, and to get a surplus of them every one must turn out all he can and waste nothing. Production and thrift are the things most needed to restore normal conditions.

The general business outlook is good. The signing of the Peace Treaty has brought within sight the abolition of many restrictions which have been hampering commerce and industry for so long. Commercial failures have been far less numerous thus far during 1919, compared with last year. There is doubtless a great deal of delayed construction work in Canada which must be attended to ere long and as it becomes apparent that the cost of materials is not likely in the near future to go down, we can reasonably look for greater activity in the building trades.

The deposits in the chartered banks have increased by $268,000,000 during the year. The deposits in this Bank have increased by over $12,000,000 since last we met, which is about double any previous annual increase. A large proportion of this increase comes from branches in agricultural districts. Our farmers all over the Dominion have had a splendid market for all their products during the past few years, not only in European countries suffering from the devastation of war, but in our own cities where the laboring men having full employment at large wages have purchased freely. While we look for a continuation of the good demand for foodstuffs from Europe, still it is a great safety to the farmer to have the steady demand from the home cities for any produce he can raise, and this can be counted on while the factories are kept running at full capacity.

In speaking to you last year I strongly recommended investment in Victory Loan Bonds then being issued. I would again ask you to support the present Dominion Government Loan. The country needs the money to meet its war obligations, and to extend the trade of the country, and the security is the best that can be had.

We regret to see the Government have made up their minds to take over the Grand Trunk Railway, as the results of Government operation of railways in England and in the United States have been most expensive for the people. Our own experience of Government operation is not such that we wish to see it extended.

The recent elections in Ontario and the by-elections for the Dominion Parliament show us that the farmer intends to take a more active interest in politics than formerly. We are very glad to see this as the farmers' particular virtues of thrift and economy are what are needed in Canada at this time, and we have no misgivings as to the future of this country under their guidance.

Our new Directors appointed by the Board since our last Annual Meeting, Messrs. J. W. Ross and J. M. McIntyre, are well-known to all Montrealers, and the Bank is fortunate in securing men of such sound judgment to act on its Board.

We regret the removal of Mr. Chamberlin from Montreal. We trust that he will enjoy a long rest after the very active life he had while in charge of the Grand Trunk Railway. We also regret the loss we sustained through the death of Mr. Geo. E. Drummond, who served on this Board for 12 years. The Directors mourn the loss of a very dear friend and colleague.

During the year we have opened nineteen new offices, renewing our policy of reasonable yearly expansion which was interrupted by the war.

About 250 of our officers went to the war, 26 of whom made the supreme sacrifice. The bulk of those who returned are now at work. It is the intention of the Board to place a Bronze Honour Roll in a prominent place in the Montreal office and this, I feel sure, will have your approval.

The President then invited discussion, but there being none, he moved the adoption of the Annual Report, which was seconded by the Vice-President, Mr. S. H. Ewing, and unanimously adopted.

It was then moved by Mr. J. M. McIntyre, seconded by Mr. W. A. Black, and resolved, that Messrs. George Creak, Lemuel Cushing and Charles A. Hodgson, be continued in their office as Auditors of the Bank for another year. This was unanimously adopted.

It was moved by Mr. S. W. Ewing, seconded by Mr. George Durnford, and resolved, that the Secretary be instructed to cast one ballot for the re-election of the Directors, which was unanimously carried.

Messrs. C. E. Spragge and Alfred Piddington then presented the report of the Scrutineers, as follows:—

Montreal, November 3rd, 1919.

To the General Manager, The Molsons Bank:—

Sir,—We have the honour to report that at the Annual Meeting of the Shareholders of The Molsons Bank, held this day, the following gentlemen were re-elected to the Board of Directors: Wm. M. Birks, W. A. Black, F. W. Molson, John W. Ross, S. H. Ewing, Wm. Molson Macpherson, J. M. McIntyre.

At a subsequent meeting of the Directors, Mr. William Molson Macpherson was re-elected President, and Mr. S. H. Ewing Vice-President for the ensuing year.

TAXATION OF RAILWAY LANDS IN B.C.

Public Must Get Present or Future Benefit if Railway is to Get Exemption

ON August 6, 1919, the Judicial Committee of the Privy Council handed down a judgment in the case of the City of Armstrong vs. the Canadian Northern Pacific Railway Co., on appeal from the British Columbia courts. Action was commenced by the company in April, 1916, when the city of Armstrong attempted to tax certain lands belonging to the company, which it was claimed were exempt by reason of an agreement between the British Columbia legislature and the company, drawn up in 1910. The clause of the agreement in question was as follows: "The Pacific company and its capital, stock, franchise, income, tolls and all properties and assets which form part of or are used in connection with the operation of its railway shall, until July 1, 1924, be exempt from all taxation whatsoever or however imposed by, with or under the authority of the legislature of the province of British Columbia or by any municipal or school organization in the province." The company in 1912 was authorized to build the railway and as required by law deposited with the minister of railways a plan of the proposed line, which the minister sanctioned. Construction was commenced on the line but by August 21, 1915, when the railway was to have been completed, the tracks had been only partly laid and the company had consequently failed to perform its part of the covenant.

The company claimed that the taxed lands formed part of its right-of-way and hence properly could be considered as part of their railway, to be used in its operation and, consequently, exempt. Their lordships' judgment was delivered in the following words:—

Railway Not Put in Operation

"The words of the clause relating to things forming part of the railway or used in working it are, it is observed, in the present tense; and the word 'railway,' it is said, is used as denoting a physical thing, something of which something else can form part and one which can be 'operated.' It may be added that as applied to the undertaking authorized by the Act of 1912, it means the railway or railways constructed under the authority given by that statute. This is not to say that as regards lands alleged to form part of the railway the stipulated exemption only comes into force in respect of lands upon which the railway is completely constructed and in operation; but, on the other hand, their lordships in the judgment referred to, observe that the consideration for the remission of taxation is 'the benefit to the public from the railway,' and that the reason for the subsidy does not arise where 'the public are neither getting the actual railway, nor having it already in process of construction for their benefit.'

"In their lordships' opinion, effect would not be given to these considerations by adopting the rule that the approval of the plan given by the minister under the Railway Act is in itself sufficient to bring within the sweep of the exemption all lands designated as part of the railway upon that plan when there is nothing in the uses to which the lands are devoted or in the circumstances of their occupation to mark them in a physical sense as part of a railway constructed or in process of construction."

The appeal was dismissed with costs.

CERTAIN DEFICIT ON MUNICIPAL ROAD

The Guelph Radial Railway cannot be made to pay for many years to come, according to a report of the Hydro-Electric Power Commission. The report stated that to put the road in fair running condition would require an expenditure of $150,000, and an annual deficit of from $5,000 to $17,000 is estimated. Sir Adam Beck, chairman of the Ontario Hydro Commission was present when the report was discussed in Guelph, and stated that the Commission was prepared to operate the railway in conjunction with its other lines, but the city must assume the financial responsibility.

EMPLOYMENT CONDITIONS IN CANADA

Increase in Payrolls Notwithstanding Strike Conditions

THE last report from the Dominion headquarters of the Employment Service of Canada, Department of Labor, Ottawa, on employment conditions throughout the Dominion shows that, disregarding unemployment due to strikes, a further increase in the volume of employment was registered during the week ended October 18th. Returns were compiled from the reports of 4,672 firms, of which firms 2,062 were in Ontario, 1,080 were in Quebec, 477 in the maritime provinces, 648 in the prairie provinces and 405 in British Columbia. These firms reported 674,032 persons on payroll, as compared with 672,134 persons on payroll during the preceding week—an increase of 1,898 persons, or .3 per cent. An increase of 2,165 persons, or .3 per cent. was anticipated for the week ending October 25th.

The plus industries—those that registered net increases in the number of persons employed—with their respective percentage increases, were: Commercial and mercantile, 1.2 per cent.; clay, glass and stone products, 1.3 per cent.; chemicals, .2 per cent.; food, drink and tobacco, .4 per cent.; metals, .3 per cent.; pulp, paper and printing, .4 per cent.; textiles, .6 per cent.; vehicles, .2 per cent.; quarrying and mining, 1.0 per cent.; and miscellaneous, .1 per cent. Metals, textiles, and quarrying and mining thus maintained the gains which they have made during preceding weeks and made substantial increases in addition. Commercial and mercantile also registered a substantial gain. With the exception of food, drink and tobacco, pulp, paper and printing and vehicles, all groups anticipated further gains during the week ending October 25th.

The minus industries—those that registered net decreases in the number of persons employed—with their respective percentage decreases, were: Building and construction, .4 per cent.; lumbering, 1.7 per cent.; leather and leather goods, .2 per cent.; woodworking, .2 per cent.; railway construction, 1.1 per cent.; and railway operation, .1 per cent. Lumbering and railway construction thus registered the most appreciable decreases, the reduction in lumbering being due to the close of the sawing season, while bush operations are not thoroughly under way, and in railway construction to the irregular nature of the work in that group. All groups anticipated compensating increases during the week ending October 25th.

DOMINION LOAN AND SECURITIES CO.

The annual meeting of the shareholders of the Dominion Loan and Securities Company was held in Winnipeg last week. Among the visitors to attend were F. E. Frisbee, the president of the First National Bank of Sheldon, Iowa; John H. Archer, the president of the Bank of Archer, and L. F. Button, land and financial agent of Outlook, Sask. Local directors of the company include Isaac Pitblado, K.C.; W. P. Riley, J. S. Loudon, of the Central Grain Company; C. I. Hall and others. The president and manager is E. E. Hall.

The Dominion Loan and Securities has a paid capital of $715,500 and a reserve of $200,000. A dividend of seven per cent. was declared. The method of doing business is similar to that used in the United States. When a loan is made, two mortgages are taken, a first and a second. The first mortgage is sold to investors, and the second is held by the managing company to cover the costs of operation, etc. Mr. Hall states that in future years his company may sell debentures since some investors in the United States prefer this form of security. In that case the entire mortgage will be held by the company of management, and will constitute the chief security for the debenture.

The Whalen Pulp and Paper Mills record an important increase in production. For the week ending October 11th. pulp production amounted to 1,129 tons, consisting of 236 tons of bleached, and 893 of unbleached sulphite pulp. Lumber production totalled 429,000 feet; shingles, 1,550,000 pieces and box shooks, 29,000.

INDUSTRIAL EVENTS OF THE WEEK

Pulp and Paper Possibilities in the West—Expansion Continues in Ontario—Trade With the Orient

NEW developments in the pulp and paper industry are occurring every day. An announcement has been made by H. H. Elliot, of the White Shore Chemical Co., Regina, Sask., that active work would soon be started on the development of the sodium sulphite deposits at Lake White Shore, Sask. This is the largest deposit in the Dominion, according to Mr. Elliot, and its use will revolutionize the pulp-making industry in Canada. It will increase the output of by-products of the pulp mills more than 200 per cent., the most important of these being artificial silk which can be manufactured from the pulp.

As yet the west has been untouched as far as this industry is concerned, with the exception of the western part of British Columbia. Practically all the new developments this year have taken place in the east. In commenting on the opportunities for the development of the pulp and paper industry, the "Medicine Hat News" said a few days ago:—

"In the interior and eastern parts of British Columbia, and more especially along the lines of the Canadian Pacific Railway through the Crow's Nest Pass, as well as in the central parts of Alberta, Saskatchewan and Manitoba, there are large areas of suitable timber available. In addition to this there are nearby water powers and railway transport to make easily obtainable suitable locations for mills and economic methods of handling both the raw material and the finished product.

"Western Canada has the wood and the water powers, it also has the rivers and streams for driving the logs, and means of transportation by rail is getting more efficient and easy of access year by year. Pulp and paper can be produced as economically in the west as in any other part of the Dominion. It is an industry which will stand the fullest investigation. The market's demand is incessant and growing yearly by leaps The Canadian capitalist must hasten the development of paper mills in the west, and take advantage of the great home market there is there for paper products.

"In Western Canada there are over 550 daily and weekly newspapers and magazines published with a daily, weekly and monthly circulation of over 1,000,000 copies. The construction of new railroad lines continues at the rate of 1,000 miles or more per annum (branch and main lines), and new towns are opened up at the rate of 150 to 200 each year. The larger proportion of these towns grow into the newspaper stage at a very early date. The demand for paper of all kinds within the next ten years will be enormous, and should be the means of supporting a large number of paper mills, as well as building up thriving communities."

Foreign Firms Anxious for Trade

A communication from the Canadian Department of Trade and Commerce gives the names of firms in foreign countries which are anxious to handle Canadian products. Cuba at the present time is anxious for shipments from Canada and has several firms wanting consignments. The names of the firms and their requirements are given as follows:—Sauchez and Co., Havana, Cuba, desire to represent exporting firms from Canada in white oats, Canadian hay, potatoes in bags and barrels. Marcelino Garcia, commission agent, Havana, Cuba, could handle large consignments of potatoes. Barcelo, Campo and Co., Havana, Cuba, want to get in touch with producers of canned fruits and vegetables. J. Richard Chauvin, Bordeaux, France, is interested in canned goods of all kinds, alimentary pastes, lard, hams, meats. Junior Army and Navy Stores, London, are in a position to place orders for canned goods and food stuffs. Augustin Balcells, Santiago, Cuba, asks quotations on canned fruits and vegetables, especially tomatoes and beans, hard wheat flour and potatoes.

The commissariat-general of Paris, is in a position to buy large quantities of wheat flour, haricot beans, dehydrated vegetables.

Dominion Coal Expansion

Developments by the Dominion Coal Co., subsidiary of the Dominion Steel Corporation, are being carried on at Bonar Point, N.S., in connection with the production of coal. The company has there 100 acres of land sufficient to provide for the sites of the 200 dwellings to be occupied by the miners in the new workings. The new shaft will be sunk within two miles of the Canadian National Railway tracks, with which connection will be made, in order to transport the coal to the steel works. The workings will underlie the Lloyds' cove seam; the main seam itself, where submarine operations are contemplated, is over five feet in thickness and 20,000,000 tons of coal are available and planned for. The underground equipment will be electric, and of the most modern character. The pumping plant will be of a similar character; and so, too, the compressors. Other plans in connection with the "lay out" are being developed with due regard to the physical conditions as revealed by a study of the surroundings. The sum of $2,000,000 will be spent on this new enterprise.

Branch Plants in Ontario

A record is being maintained in the establishment of new industries and branch plants in the province of Ontario. The Ford Motor Company of Canada, Ltd., has purchased the properties of the Dominion Forge and Stamping Co., located at Ford City, involving an investment of $700,000 to $800,000. The Brunswick Canada Products Co., Ltd., Chicago, Ill., manufacturers of phonographs and records, will establish the office and manufacturing headquarters at Woodstock. Through the efforts of the Border Chamber of Commerce the Hiram Walker Cooperage building on Walker Road has been leased for five years to a large metal stamping concern, which will move in in the near future. The Dere Machine shop on the Walker Road also by the efforts of the chamber of commerce has been sold to a firm which manufactures auto binding gimps. Another deal resulting from the same source was the disposal of the Cotlap factory on the Argyle Road, Walkerville, to a firm engaged in the manufacture of brakes and clutches. The price paid in this instance was $40,000. The new firm will commence operating within the next thirty days.

A new lumber firm, under the name of Carl Sorensen and Co., will begin operations within a few days. Material for the establishment of camps has already been shipped to Fort Frances, where Mr. Sorensen has a large block of timber lands. The lands are adjacent to the Canadian National Railway and a saw mill will be installed at a convenient point on the railway, for the purpose of cutting the logs into lumber, which will be shipped to Fort William. Hamilton has practically secured another big industry. The Jenckes Company of Pawtucket, R.I., has decided to build a plant here that will employ 1,000 hands. Its decision, however, is contingent upon the ratepayers of Barton Township. Another new industry that will employ at least 2,000 hands has designated its intention of locating in Windsor, the Burroughs Adding Machine Co., the parent plant of which is located in Detroit. The Seaman Kent Co., of Toronto, with factories at Toronto and Meaford, has purchased the Wagon Company buildings and property, West Lorne, and will open a branch of their business there as soon as possible. They are manufacturers of oak veneer goods. The village of Winchester has a new industry in its selection as the site of a plant for the treating of milk to be erected by the Guaranteed Pure Milk Co., Montreal. Several acres have been purchased near the C.P.R. station for the erection of the plant. The latest infant industry to begin operations in Kitchener is the Kitchener Envelope and Stationery Co., which is located in the Pequegnat Block on Frederick Street.

Higher Inducements From Smaller Municipalities

Requests have been received from three Toronto concerns by the Railways and Manufacturers' Committee, Guelph, for loans, in order to permit them to erect factory buildings there. One of these concerns has been established in Toronto for twenty-five years, and the others for fifteen and seventeen years respectively. On account of labor con-

ditions in Toronto they are inclined to seek quarters elsewhere. They would employ in all about 500 persons, and the annual pay roll would amount to about $600,000. The three concerns are capitalized at an aggregate of $750,000. The total amount of the loans asked for is $95,000. No action was taken, owing to the opinion being expressed that because they are already established in Ontario no municipality can make them a loan.

In a letter to the mayor on the subject, Mr. E. L. Cousins, industrial commissioner for Toronto, says: "Many of the smaller municipalities of the province are offering all kinds of inducements. Porritt & Spencer Co., of Bury, Eng., felt manufacturers, chose Hamilton as against Toronto, because of the 6¼ cents per thousand gallons difference in water rates. Real estate values are higher in Toronto than in any other city, and many industries are able to do without the facilities which Toronto affords, and go to smaller places, where, in some instances, sites are given free, or for a very nominal rental, coupled in many cases with guarantee of bonds. In many cases there is tax exemption. Personally, I feel very strongly that it is wrong for a municipality to bonus industries."

Western Developments

Plans are now being prepared for the establishment of a plant of the Ford Motor Company at Regina, Sask., to take care of the business in that province, which averages $6,000,000 annually. The aldermen of Regina have decided to recommed to the city council to adopt a policy of securing stiffer terms in the sale of city property for industrial purposes.

A new concern known as the Western Film Manufacturing Co., will establish in Winnipeg, Man., and contemplates taking over the entire building recently occupied by the Schmidt foundry, on Albert St. Heretofore all motion pictures taken in the west had to be shipped to the east for developing. With the establishment of the factory, the new business aims to handle all work of this class between Winnipeg and the coast, and also a portion of the eastern business.

Owing to the numerous orders of late, the Preston Planing Mills, Medicine Hat, Alta., will be extended. Additional machinery and more driving power will be installed.

Planning Trade With China

Interest is growing on the British Columbia coast in the possibilities of developing a big trade with the Orient. Mr W. A. Gilchrist, Vancouver, who has just returned from a trip to China, appeared before the board of trade and urged the commissioners to get into touch with all the Canadian manufacturers who are contemplating trading with the Orient and help them in every possible way. While in China he attended the convention of the Chinese Overseas Merchants' Association at Shanghai, and he said he found the members anxious to extend their trade with Canada.

DEFINITION OF A MARINE RISK

Liability of Insurance Company Does Not Extend to all Accidents Which May Happen to Property at Sea

IN a recent appeal from the British Columbia Court of Appeal to the Judicial Committee of the Privy Council, the latter body examined closely the meaning of marine insurance. The case in question was Grant Smith and Co. and McDonnell, Ltd. vs. Seattle Construction and Drydock Co., on which judgment was issued by the committee on July 24th last.

The cause of action consisted in the leasing of a drydock by the appellants, the lease containing a number of conditions, the most important of which was clause 3, by which "the lessee agrees to have said drydock insured for the benefit of said lessor in some company or companies satisfactory to the lessor, in the sum of not less than $75,000, against both marine and fire risks, and to pay the premiums on such insurance and keep the same in full force during the term of this lease, or of any extensions thereof." On its first submergence the dock collapsed beyond hope of repair and the Seattle company brought action for the recovery of rental and damages or damages for breach of contract, obtaining rental due under the lease and nominal damages for the loss of the dock. The Grant Smith Co. had agreed to insure the dock by the terms of the above clause, but had failed to do so, and in defence claimed, first, that the requirements of the clause had been impossible of performance and secondly, that if insurance had been effected, it would not have covered the loss.

With regard to the first—impossibility of performance—it was shown that the Grant Smith Co. had attempted to obtain a policy of insurance, but had failed to do so, largely owing to the fact that they had built additions to the dock which had caused the insurance company to refuse to issue a policy to cover the risk, but they were unable to show any reasons why higher premiums, if they had been offered, would not have secured the insurance required. The covenant contained no limitation suggesting that insurance was only to be obtained at current premiums; consequently, the defence of impossibility of performance was ruled out.

In the second place—that the insurance required by the contract would not have covered the loss—it was claimed in defence that the policy if secured was only to have covered any journeyings of the dock by sea, not to cover the risks of day-to-day usage. Their lordships held that from the general intention of the lease it could be clearly seen that the insurance was to be that of an ordinary policy applicable to such a structure both in course of transit and in course of use. Its purpose was to have been the insurance of the dock against marine risk. At the time the dock collapsed, in the words of their lordships, "the harbor was peculiarly quiet and it is plain that no conditions of wind or wave caused the dock to capsize. It was destroyed because of its own inherent unfitness for the use to which it was put."

Limitation of Marine Risk

This meant that even if the dock had been insured according to clause 3 of the lease against marine risk, the insurance would not have been collectable for the loss was not caused by any marine disturbance beyond the foresight of man. In explanation their lordships state what can be held to be "marine risks," which they put, shortly, as the "hazards of the sea." As further explanation, they quote part of Lord Herschel's judgment in Wilson vs. the Owners of the Cargo per the Xantho [1887] 12 App. Cas. 503: "I think it clear that the term 'perils of the sea,' does not cover every accident or casualty which may happen to the subject-matter of the insurance on the sea. It must be a peril *of* the sea. . . . There must be some casualty, something which could not be foreseen as one of the necessary incidents of the adventure." It was also pointed out that the phrase has no different meaning, whether it occurs in the insurance of the ship or of the goods carried. In another case quoted (E. D. Sassoon and Co. vs. Western Assurance Co. [1912] A.C. 561), a cargo of goods was spoiled through the percolation of water through a leak caused by the rottenness of the hull. In this case, no insurance was collectable, even though the boat had been properly inspected, because the loss was due, not "to perils of the sea and all other perils," but to natural causes.

Thus in the present case, their lordships held that even though insurance had been obtained by the Grant Smith Co., they would not have been able to recover on the policy, for the loss of the dock was not due to "marine risk" (clause 3) or "hazards of the sea," but to the inherent unfitness of the dock for the purposes to which it was put.

SUCCESSION DUTY AND PROPERTY OUTSIDE PROVINCE

British Columbia Court of Appeal Decides Rate Must be Calculated Only on Basis of Property Situated Within Province

THE estate of the late Sir William Van Horne, who died some time ago, included property to a value of $300,000 situated in the province of British Columbia, in addition to large amounts situated elsewhere. In calculating the succession duty which would be required under the provincial Act, the British Columbia department of finance took the view that while the duty could be collected only on the property within the province, yet the total estate should be taken as the basis to determine what rate should be levied. This point was introduced into the courts of the province, and on July 15th last the Court of Appeal upheld a judgment of the chief justice of the province, to the effect that the department of finance misconstrued the wording of the Act. *The Monetary Times* is informed that the province will appeal this decision. The part of the Act in question is as follows:—

"7. When the net value of the property of the deceased exceeds twenty-five thousand dollars and passes under a will, intestacy, or otherwise, either in whole or in part to or for the use of the father, mother, husband, wife, child, daughter-in-law or son-in-law of the deceased, all property situate within the province or so much thereof as so passes (as the case may be) shall be subject to duty as follows:—

"(a) Not applicable.

"(b) Where the net value exceeds one hundred thousand dollars, but does not exceed two hundred thousand dollars, at the rate of one dollar and fifty cents for every one hundred dollars of the first one hundred thousand dollars, and two dollars and fifty cents for every one hundred dollars above the one hundred thousand dollars.

"(c) Where the net value exceeds two hundred thousand dollars, at the rate of one dollar and fifty cents for every one hundred dollars of the first one hundred thousand dollars, two dollars and fifty cents for every one hundred dollars of the second one hundred thousand dollars, and five dollars for every one hundred dollars above the two hundred thousand dollars."

In giving judgment, the chief justice of the Court of Appeal said, referring to the extract given above: "The phrase 'net value' in the first line thereof may be assumed to refer to the net value of the whole estate wherever situate (see definition in s. 2), but 'net value' as used in ss. (b) and (c) which are applicable to this case, refers to the estate situate within the province. It is 'all property within the province' which 'shall be subject to duty as follows.' "

Another justice, expressing the same opinion, said: "I think the more reasonable construction is that where the deceased has property both inside and without the province, and the property inside would otherwise be exempt from taxation, then for bringing such inside property within the ambit of taxation the outside property may be looked to, but the taxation shall only be on the actual value of such inside property."

Two out of the five justices were, however, of a different opinion, holding that the entire estate should be taken into consideration in determining the rate of duty.

THE SECRET OF SUCCESSFUL SALESMANSHIP

If the salesman has unlimited confidence in the company he represents and in the goods he is offering, it will not take long to communicate that confidence to the prospect. And this applies to Life Insurance more than to any other article. Agents of the Mutual Life of Canada meet with extraordinary success for that simple reason—they devoutly believe in Life Insurance and above all in "Mutual" Life Insurance. The Mutual Life has been conducted for fifty years exclusively in the interests of its policy-holders. The result is an unprecedented demand to-day for Mutual Life Policies. With the Mutual "the secret of successful salesmanship" is simplicity itself—the Agent knows that he has the Company and the Policy that the prospect NEEDS. The rest soon follows.

BE A MUTUALIST.

TO GUARD THE HOME

At the root of all true prosperity lies the security of the home. There can be no real sense of well-being without the certain assurance that loved ones will be well provided for when the breadwinner is taken away from them.

To guard the home of the home-folk is the province of Life Insurance. There is no other way so sure, and under a Great-West Policy the way is altogether easy. Plans are available to meet every need and circumstance. The cost is low, and this cost is made still lower by the high profit returns paid to Policyholders.

Let us explain the best Policy for YOUR needs. State age and ask for the leaflet, "OUR SAVINGS."

NEW BRUNSWICK CASE ON CONFLICT OF LAWS

Rule that Domicile of Owner Determines Law to Apply, is Not Always Applicable

By M. L. Hayward, B.C.L.

In the present day and generation, and with the increasing importance of international business, cases are frequently arising involving disputes as to what laws will govern; for instance, the case of Moore vs. Black, decided by the New Brunswick Supreme Court on a rather interesting state of facts.

In this case it appeared by the evidence that one, Cherry Moore, died in the province of New Brunswick leaving a will executed in that province by which she directed that a certain share of the income of her estate, which estate was in Ireland, should be paid by her executor, who resided in the province of New Brunswick, to Thomas E. Moore, who resided in the state of Massachusetts. Thomas E. Moore then assigned to a trustee, living in Massachusetts, all his interest in the income from the Cherry Moore estate, in trust to maintain Thomas E. Moore and his family and to pay his creditors a certain proportion. Before the assignment was executed, however, Thomas E. Moore became indebted to Black, a resident of the province of New Brunswick, and Black started suit against Thomas E. Moore and the Massachusetts trustee to set aside the assignment to the latter on the ground that it was a fraud upon the creditors of Thomas E. Moore.

As will be seen from the foregoing brief statement, the facts were beautifully involved from a legal standpoint, and the very first question which arose was whether the validity of the Massachusetts assignment was to be determined by the laws of the province of New Brunswick, or by the laws of Massachusetts. If the laws of the province of New Brunswick governed, the assignment was void as against Black and the other creditors of Thomas E. Moore. If the Massachusetts law applied the assignment was good under the rule in that state permitting so-called "spendthrift trusts."

Judgment According to New Brunswick Law

The New Brunswick Court decided that the assignment was void and that the New Brunswick law applied.

It was strongly argued that as the assignment was made in a foreign country between persons domiciled there, its validity should be determined by the law of their domicile, and that as personal property follows the person, if the assignment was good in Massachusetts where it was made, which would be the case, it must necessarily be good in the province of New Brunswick as to personal property coming from Ireland into the hands of the New Brunswick executor in trust for Thomas E. Moore, the Massachusetts assignor, but the New Brunswick Court disposed of this argument in the following words:—

"While it is quite true that the general rule is as stated, it has many exceptions. The theory is that the voluntary transfer of personal property is to be governed everywhere by the law of the owner's domicile, and the theory proceeds on the fiction of law that the domicile of the owner draws to it the personal estate which he owns wherever it may happen to be located. But this friction is by no means of universal application, and yields whenever it is necessary for the purpose of justice that the actual *situs* of the property should be examined. There is no absolute right to have such transfer respected; it is only a principle of comity that it is ever allowed, and that the principle always yields when the laws and policy of the country where the property is prescribe a different rule of transfer from that of the country where the owners live.

"The provisions of the law," the Court went on to say, "as to transfers made with intent to defeat, hinder and delay creditors have been substantially adopted by every English-speaking country, and it can scarcely be said to be in accordance with either the law or the policy of this province that the assignment made by Thomas E. Moore should be held good as against creditors, when if made here it would be held void as against creditors. I should be prepared to hold the transfer void as against creditors so far as it relates to personal property within this province, even assuming that it is perfectly good as against creditors by the law of Massachusetts."

The New Brunswick Court also referred to an Ontario case, River Stafe Co. vs. Sill, where the company, incorporated in Michigan, gave a Michigan creditor a mortgage on Ontario chattels, which mortgage was void under the Ontario law, and the argument was set up that as the company giving the mortgage and the mortgagee to whom it was given were both domiciled in Michigan and the mortgage was valid according to the Michigan law, it could not be affected by the Ontario law although the personal property mortgaged was situated within that province, but where the Ontario Courts held that the law of their own province prevailed and that the mortgage was, consequently, void as against Ontario creditors.

TEARING DOWN BUILDINGS TO STOP FIRE

Insurance Company is Liable, and Municipal Corporation Which has Compensated Owner May Collect from It

Cases where insured property is burned or destroyed and the insurance money is demanded from the company by some third party, occasionally arise, for instance, the case of the Town of Chicoutimi vs. the Guardian Assurance Co. In this case it appeared that town corporations by Quebec law are empowered "to authorize certain persons to cause to be blown up, pulled down or demolished such buildings as may appear necessary in order to arrest the progress of any fire, saving all damages and indemnity payable by the corporation to the proprietors of such buildings, to an amount agreed upon between the parties, or, on contestation, to an amount settled by arbitrators.

"In the absence of any by-law under this article, the mayor may, during the course of any fire, exercise this power by giving a special authorization."

In the town of Chicoutimi no by-law was passed under the above provision, and, a fire breaking out in the town, the mayor ordered a certain house to be blown up with dynamite in order to check the progress of the fire.

In blowing up the house in question an adjoining house, owned by Mme. Claveau, was destroyed as well, and the Claveau house was insured with the Guardian Assurance Co. for $4,700.

The town afterwards settled with Mme. Claveau and paid her $5,500 in full settlement for the destruction of the house, and she then assigned to the town all her rights against the Guardian Co. under the insurance policy. The town then sued the Guardian Co. on the policy, and the Supreme Court of Canada decided that the company was bound to pay.

"Mme. Claveau would have a right," said the Chief Justice, "to collect these insurance moneys from the company and to recover from the town any further sum necessary to indemnify her for the destruction of her property. The town having paid the whole damage sustained by her, is, I think, entitled to proceed against the company for the value of the policy of insurance."

BRANCH OF CHINESE BANK AT COAST

As previously mentioned in these columns, a Chinese bank is being formed in the United States which is to open a branch at Vancouver and probably at Montreal also. It will be called the American Industrial Bank of China; one-half of the capital is to be subscribed by Americans and the other half by Chinese. Hsu Un Yuen, formerly president of the Bank of China, is organizing the new institution, and has just left for China after an extensive visit here.

Manitoba Finance Corporation, Limited

OFFERS SUBJECT TO PRIOR SALE

200,000 Preference Shares

GOLD PAN MINES, LIMITED

8% PREFERENCE SHARES, ONE DOLLAR ($1.00) EACH AT PAR NON-ASSESSABLE.

These Shares are first charge against the earnings of the Company and will be repaid from the first profits, thus ensuring the return of the investment with interest.

When fully repaid the preference shareholders will then participate in the future profits of the Company on the basis of three parts as against one to the Common Shareholders.

There has already been expended over $100,000 on the Gold Pan properties.

This work has shown up a rich body of ore down to the 265-foot level—the bottom of the main shaft.

The proceeds from the sale of this preferred issue is to be used to instal new and more extensive equipment, to carry on further exploration work underground, and also to erect a mill which is required immediately.

DIRECTORS
Of Gold Pan Mines, Limited

NEWS OF MUNICIPAL FINANCE

Edmonton Revenue and Expenditure for Nine Months—Ontario Municipalities Record Increases in Assessment

Galt, Ont.—Assessment of the city totals $10,805,612, an increase of $57,701 over last year.

Winnipeg, Man.—Over $375,436 has been paid to date in business taxes, leaving an unpaid balance of $30,000.

Moose Jaw, Sask.—The motion to increase the assessment from 45 per cent. to 60 per cent., has been withdrawn.

Sandwich, Ont.—The total assessment of the town is $3,956,800, compared with $3,857,395 last year, an increase of $9,405.

Walkerville, Ont.—Assessment for this year totals $7,706,052, compared with $6,558,750 for 1918, an increase of $1,147,302.

Ford, Ont.—Assessment has increased nearly $1,000,000, according to figures by Assessor Maisonville. The total assessment this year is $2,758,760, as against $1,762,889 last year.

Vancouver, B.C.—Tax receipts have reached the sum of $4,700,504, which is about $750,000 better than the aggregate tax receipts at this time last year. Alderman Kirk, chairman of the civic finance committee, has announced that $176,154 of property would go to the tax sale to be held in December. This is a comparatively small amount.

Saskatoon, Sask.—The annual report of the municipality for the year ended December 31, 1918, shows a cash balance of $34,450. Taxes collected for the year amounted to $45,956. Receipts were $73,731, against expenditures of $39,331. The revenue account shows a balance of $17,966. Assets exceeded liabilities by $20,057. Tax arrears for the year totalled $5,517.

Bridgeburg, Ont.—The placing of the assessment value of $600,000 on the property of the International Bridge Co. by the Ontario Railway and Municipal Board settles the assessment dispute that has been fought by the company. The previous assessment was $300,000. The dispute was caused by the local assessor, who increased the assessment to $1,200,000.

Simcoe County, Ont.—Receipts of $691,134 are recorded in the financial statement of the county for the year ended December 31, 1918, against payments of $685,733. Cash on hand totals $5,401. Assets amount to $257,116, and liabilities $140,624, leaving a balance of $116,492. Current assets total $119,816, and liabilities $71,680, leaving a surplus of $48,136. Arrears of taxes amount to $85,481, and debentures outstanding $68,943.

Edmonton, Alta.—A statement of the city's utilities for the nine months ending September 30th last shows that the gross earnings were $1,481,440.11, while operation and maintenance amounted to $803,904.83, showing a surplus on operation of $677,535.28 as against $583,552.59 for the same period of last year, and after deducting capital and depreciation charges there is a net surplus on all the utilities, inclusive of the deficit on the street railway, for the nine months of $106,451.39 as compared with $16,958.43 for the corresponding period of 1918.

Oxford County, Ont.—The assessment roll of the county for the year ended December 31, 1918, shows that the total assessment amounted to $27,420,243. The value of real property totalled $26,983,390, including buildings as assessed, and the value of buildings as assessed was $9,588,404. Business assessment amounted to $351,996, and taxable income $84,857. Receipts for the year amounted to $304,970, and expenditures $289,995. The balance in the bank was $14,975, compared with $6,523 for the previous year. The balance sheet revealed excess liabilities over assets of $57,342, assets totalling $244,693, and liabilities $302,035. The principal items were: Debentures, $293,203; tax arrears, $255; cash in bank, as above; county buildings, $190,000.

Edmonton, Alta.—City Comptroller Mitchell in submitting the report of revenue and expenditure for the nine months ended September 30, 1919, said: "Sundry revenue, including departmental fees, for the period, amounted to $149,855.11, as compared with $104,516 for the nine months of last year, or an increase of $45,339.11. Current taxes (including business and income) have been collected amounting to $1,314,028.39, as against $14,561.55 during the same period of 1918, this condition being the result of special discount inducements. On account of tax arrears, there has been collected $685,553.15, compared with $1,154,010.48 for the nine months of last year. The aggregate amount of both current taxes and arrears, amounting to $1,999,581.54, represents an increase in tax collections for the period over that of 1918, of $831,009.51. General administration expenditures (otherwise termed controllable) for the nine months amounted to $611,147.54 contrasted with $486,979.12 for the corresponding period of last year, showing an increase of $124,168.42, the departments principally responsible for such being the fire, police and streets and scavenging. There is a notable reduction in charges for interest on current loans which is partly due to the payment of current taxes in advance already referred to (as well as arrears), the interest being $341,401.86, as compared with $392,870.18 last year, or $51,468.32 less. The current expenditures so far, have been maintained well within the estimates of council on a proportionate basis."

Regina, Sask.—The general taxes of the city next year will benefit to the extent of approximately $25,000, which represents the estimated surplus earnings of the sinking fund for 1919 over the 4 per cent. earnings which the fund is required to make under the Act, according to City Commissioner Thornton. Some three years ago the Saskatchewan government enacted legislation empowering the cities to make use of surplus earnings in any one year for the reduction of the subsequent year's tax levy, instead of allowing the additional funds to remain idle to the credit of the fund. The city of Regina immediately took advantage of the new legislation and surpluses of $18,000 were made in 1917 and again in 1918, the taxes for 1918 and 1919 being reduced by that amount. This year, it is estimated that the surplus will be in the neighborhood of $25,000, or $7,000 more than last year, and this applied on the taxes for next year will be equivalent to a reduction of approximately two-thirds of a mill. It is pointed out by the city commissioner that the sinking fund investments average about 15 years' duration and that even if no further investments were made the city would benefit to the extent of $25,000 a year for the next fifteen years. With the additional investments, however, of further appropriations the surplus earnings will materially increase.

The aldermen will recommend to the city council that stiffer terms in the sale of city property for industrial purposes be secured. The report showed that during the current year the city has disposed of 1,125 feet frontage to seven new industries, the buildings to be erected on these properties totalling in value $175,000. The assessed value of the property totals $55,630 and the sale price totals $35,841, or 64½ per cent. of the assessed valuation.

NEW BRUNSWICK WANTS MONEY BACK

The sum of $200,000 is claimed by the province of New Brunswick in an amended statement for which permission is sought in the case of the King vs. W. B. Tennant. The amendment is based on evidence placed at the Royal Commission inquiry into the patriotic shipment of potatoes, and it is alleged that the amount mentioned is the loss sustained by the province by the award of the contract for the construction of the St. John Valley Railway to the company represented by Mr. Tennant, instead of to competing companies, and that the contract was so awarded as a result of Mr. Tennant's promise to pay the loss sustained on the potato transactions, which amount and other sums which it had been shown he had paid.

Maturing Obligations of Vancouver to be Paid Threefold—Capreol Sells Issues Privately

BOND prices on the New York market have ranged about the same this week. Canadian issues were slightly lower if anything, and prices of the Russian external bonds fell off considerably. Some of the United Kingdom notes fell due on November 1st, and no doubt were redeemed from the proceeds of the British loan recently floated in the United States, subscription books for which closed on November 3rd. The notes issued by the cities of Lyons, Marseilles and Bordeaux matured on the same date, and a refunding issue of 15-year 6 per cent. bonds has just been announced. The issue, which is underwritten by a syndicate headed by Kuhn, Loeb and Co., is for a total of $45,000,000, and is offered at 92.50, New York payment.

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97	97¼
United Kingdom 5½% (Nov. 1, 1921) ..	97½	97¾
United Kingdom 5½% (Nov. 1, 1922) ..	97¾	98
United Kingdom 5½% (Aug. 1, 1929) ..	96	96¼
United Kingdom 5½% (Feb. 1, 1937) ..	92	92½
Canadian Pacific 6% (Mar. 2, 1924)	99½	99¾
Dominion of Canada 5½% (Aug. 1, 1921)	99⅛	99½
Dominion of Canada 5½% (Aug. 1, 1929)	97½	97⅝
City of Paris 6% (Oct. 15, 1921)	96	96½
Russian Govt. Ext. 5½% (Dec. 1, 1921)	40	43
Russian Govt. Ext. 6½% (July 10, 1919)	45	47
Swedish Govt. 6% (June 15, 1939).....	97½	98

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Swan River, Man. ..	$ 50,000	6	30-instal.	Nov. 10
Renfrew, Ont.	17,500	6	30-years	Nov. 24
Peterborough County, Ont.	14,000	5½	20-years	Nov. 25

Swan River, Man.—Tenders will be received until November 10, 1919, for the purchase of $50,000 6 per cent. 30-instalment good roads debentures.

Peterborough County, Ont.—Tenders will be received until November 25, 1919, for the purchase of $14,000 20-year 5½ per cent. debentures. (See notice elsewhere in this issue.)

New Brunswick.—Tenders are being called until November 25, 1919, for the purchase of $2,282,000 10-year 5½ per cent. gold bonds, to be dated December 1, 1919. For the purpose of refunding issue of 1914. (See notice elsewhere in this issue.)

Debenture Notes

Acton, Ont.—Debentures will be raised to the amount of $40,000 for waterworks purposes.

Hamilton, Ont.—The Board of Control has decided issue debentures for $35,000 to cover the cost of a nurses' home.

Kenora, Ont.—At the next council meeting, a by-law to issue debentures to the amount of $25,000 for public improvements will be submitted.

West Kildonan R.M., Man.—A by-law authorizing the issuance of $50,000 6 per cent. 30-year debentures, will be submitted to ratepayers on November 28, 1919.

De Salaberry R.M., Man.—A by-law will be submitted to the ratepayers of the municipality on November 15, 1919, authorizing the issuance of $102,674 debentures for the purpose of redeeming certain drainage debentures.

St. Thomas, Ont.—On December 1, electors will vote on a by-law authorizing the issuance of $25,000 in debentures for the purpose of purchasing the defunct London and Lake Erie Traction Co's barns and property.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board, from October 18, to October 25, 1919:—

School Districts.—For 10 years, not exceeding 8 per cent. annuity: Eagle Valley, $4,100; *Rush Lake, $1,000; *Eldred, $2,000; Wall Lalla, $4,000. Roseneath, $3,200; *Jackson, $900; *Suffield, $3,800; Hay Meadow, $3,200. Ten years, not exceeding 7 per cent. annuity: Sunny Knoll, $2,950. Ten years, not exceeding 8 per cent. instalment: Corofin, $500. Five years, not exceeding 6 per cent. annuity.

Rural Municipality.—Sasman, $12,500 20-years 7 per cent. instalment, for Union Hospital.

---

*Being sold by the Local Government Board.

Bond Sales

Capreol, Ont.—The municipality has disposed privately of 6 per cent. debentures as follows: $2,000, 10-years, for market building; $8,000, 20-years, for fire hall; $22,821, 20-years, school.

Saskatchewan.—The following is a list of debentures reported sold from October 18 to 25, 1919:—

School Districts.—Pembroke, $10,000, Renfrew, $3,900, Liverpool, $3,300, Llanwernarth, $3,800, Coulee Hill, $3,500; Waterman-Waterbury Manufacturing Co., Regina. Central Butte, $20,000, Passchendaele, $9,000, Thorncliffe, $3,000; Regina Sinking Fund Trustees. Buffers Lake, $1,000, Golden Hill, $2,700; Saskatchewan Life Insurance Co. Springside, $20,000; Harris, Read and Co. Willow Vale, $2,500; W. S. Middlebro, Owen Sound, Ont.

To Retire Treasury Notes

Vancouver, B.C.—Formal approval has been given by the civic finance committee to the plan proposed by Ald. Kirk, chairman, to pay Spitzer, Rorick and Co., January 1, $900,000 on the city's maturing treasury notes, instead of $300,000 due on that date. In explaining his plan, Alderman Kirk said:—

"In the first place it should be understood that these funds which the city is to remit to Spitzer, Rorick and Co., are trust funds, set aside for the purpose of redeeming these treasury notes and they cannot be used for any other purpose. These funds, while remaining in trust with a local bank, earn 4 per cent. interest, while the treasury notes outstanding carry interest at the rate of 6 per cent. While the city's obligation only calls for the retirement of $300,000 of these notes on January 1, and moneys to cover same must be remitted irrespective of existing conditions of exchange, the balance of $600,000, which the city is calling under its option, if retained on deposit locally, would only earn 4 per cent., thereby representing a loss to the city of 2 per cent. net. Against this the question of exchange naturally arises. Exchange now stands at 3½ per cent. Had the city deferred exercising its option to repay this $600,000, it would have been more or less of a gamble on the probability of exchange falling to less than 2 per cent. before the next dates of maturity. Rather than do this, and also in order to establish a good credit of the city in the eyes of the world, the city's finance administration decided that it was in the best interests of the city to call in the outstanding notes to the extent already indicated—$600,000. It is generally regarded in financial circles that the beginning of the year is the most favorable time as to conditions of exchange, and it is confidently expected that by January 1 exchange may drop considerably, with the hope of the city in any case, securing an invaluable asset in the matter of establishing its credit in financial circles. Another factor which favors the city in the immediate retirement of these treasury notes, is that all of them are payable at option, in Toronto or Vancouver, as well as in New York. A considerable proportion, representing the investment of Canadians may be expected to be presented for redemption on the Canadian side, where the disadvantage of exchange will be eliminated."

INVESTMENTS AND THE MARKET

Vancouver to Oppose Increase in Civic Railway Fares—Ottawa Gas Company to Increase Rates—Canadian Wm. A. Rogers Report

Toronto Street Railway.—Receipts of the company for October amounted to $650,913, compared with $475,544 for the same month last year. The city's share is $57,919, compared with $38,987 last year.

Gunns, Ltd.—The statement is made that Morris and Co., Chicago, are negotiating with the Toronto packing firm for entry into the Canadian field, presumably to make a way for export business within the British Empire under the most favorable terms.

Winnipeg Electric Railway.—The statement is made by City Solicitor Hunt that the company will make three times as much money under the increased fare award as it will take to meet the additional wage outlay. This statement has been denied by General Manager McLimont, of the Street Railway.

Twin City Rapid Transit Co.—A substantial increase is shown in the earnings of the company for the nine months ended September 30th last. The following is the summary:—

	1919.	1918.
Gross earnings	$8,240,600	$7,299,515
Net earnings	2,348,198	2,074,946
Surplus after charges and tax	823,186	632,650

Acadia Sugar Refining Co.—A meeting of the shareholders of the company was called last week to consider the issuing of $3,000,000 of 7 per cent. debentures and a proportionate amount of ordinary and preferred shares. It had to be postponed because of the non-arrival of the proxies of the shareholders in Glasgow, the delay in this preventing the requisite representation of shareholders to make the action proposed legal. An adjournment was accordingly made until November 11th, the date at which the action to have been taken recently would have come up for ratification. At that meeting a further adjournment will be taken.

Brazilian Traction, Light and Power Co.—Net earnings for the month of September showed an increase of 144,000 milreis, compard with the same month last year. The following is the statement of earnings in milreis:—

September.	1919.	1918.	Increase.
Total gross earnings	9,792,000	9,081,000	711,000

Aggregate gross earnings from January 1st	83,559,000	77,730,000	5,829,000
Aggregate net earnings from January 1st	43,633,000	39,840,000	3,793,000

Ottawa Gas Co.—The company has sent out a circular announcing an increase of rates from November 1st. The gross rate for gas will advance to $1.35 per 1,000 cubic feet. At present the net rate is $1.21½ per 1,000 cubic feet. The company points out that the prompt payment of accounts carries the advantage of a 10 per cent. discount to customers using gas only, but to customers using both gas and electricity supplied by the same company, a special discount of 15 per cent. is given, so that the net increase will be from 8½ to 9 cents. The reason for the advance is given by the company as due to the increase in the cost of coal and all materials used in the manufacture of gas, together with increased wages.

British Columbia Electric Railway.—W. D. Power, general freight and passenger agent for the company, is in Ottawa in connection with the tariffs of the company on its various lines. Before the British Columbia Electric Co. was taken from the jurisdiction of the provincial commission and placed under the federal body by recent federal legislation, it was necessary for the company to file the tariffs of only the Lulu Island and Burnaby Lake lines, as these were the only branches under Dominion charter, but, in view of the amendment to the Act, all the tariffs of the company will have to be approved in Ottawa.

An order has been made by the Federal Board of Railway Commissioners, approving of the six-cent fares charged by the British Columbia Electric Railway in Vancouver. This was made on application of the company, and will be opposed by the civic authorities.

Canadian Wm. A. Rogers, Ltd.—The annual financial statement of the company for the year ended June 30th, 1919, submitted at the annual meeting on November 3rd last, shows that profits for the year amounted to $42,885, but from this $19,217 was transferred to provide for depreciation in plant, etc. The balance at the debit of the profits and loss account was $100,786, compared with $124,454 last year.

The balance sheet reveals total assets of $1,504,322, including real estate and buildings, $178,000; investments, $54,092; stock-in-trade, $223,675; bills receivable, $134,288; cash, $11,718. Debts payable, including all accrued wages and charges, amount to $420,072, less $8,750 in respect of agreement of March, 1913, to repay amounts advanced by Wm. A. Rogers, Ltd. Owing to the fact that the profits were chiefly earned in the latter months of the fiscal year, the full amount of the guarantee was claimed for the guarantee year ending March 31st, 1919.

President S. J. Moore, in his report to shareholders, said: "Since the signing of the armistice we have been able to increase steadily the volume of business. Raw materials have been available in satisfactory quantities, but costs of production have continued to rise, and as a result we have been obliged to increase our selling prices several times during the year. Notwithstanding the high prices, however, the volume of orders received has been greater than our capacity, and we are now realizing profits that promise a fair return upon the capital employed."

Trethewey Mining Co.—At a meeting of shareholders in Toronto to-day, various propositions arising out of the company's endeavors to locate the Miller Lake-O'Brien's ore body on the Castle property in the Gowganda field will be laid before them. The Trethewey had originally an option to buy 500,000 shares of the Castle out of $1,500,000 in the treasury at 20 cents a share, and 265,000 more of the owners' stock at the same price, giving them 51 per cent. of the Castle capitalization. A new deal is now proposed, cancelling all the old contracts and providing that Trethewey give 500,000 shares of its treasury stock for the million shares it does not own of the Castle on the basis of one share of Trethewey for two of Castle, that the $53,000 which the Trethewey was to pay be postponed indefinitely until the Castle property produces it, although it will remain a debt in case of liquidation.

Where the Trethewey did most of their work on the Castle, physical conditions underground indicate that the big O'Brien vein swings more to the north. The Trethewey, therefore, got an option on the Major property for $75,000, upon which a payment of approximately $8,500 is due around the first of the year, by which time it is expected to be definitely demonstrated whether the big O'Brien vein enters the property. Should the Major develop into a mine, the Trethewey is to give 400,000 shares of stock to acquire ownership in addition to the $75,000 option. In addition, it is proposed to give 100,000 shares of stock for the ground underlying Miller Lake.

LENNOX ESTATE TAKING LEGAL ACTION

The executors of the John Lennox estate, Hamilton, have started suit against the insurance companies which carried accident risks on the late Mr. Lennox. A list of the companies was given in *The Monetary Times* recently. The medical evidence was not clear as to whether the death was accidental or not.

CANADIAN BOND SALES IN OCTOBER

Market at a Standstill—Bank Loans to Municipalities Reach High Level—Activity Anticipated After Victory Loan

A REVIEW of provincial, municipal and industrial financing for October, 1919, shows that the market was practically at a standstill. The Victory Loan campaign claimed the attention of almost all bond selling organizations in the Dominion, and outside of a few school district debentures in the west, no sales were effected.

Saskatchewan school bonds were disposed of to the amount of $166,200, and small blocks of village debentures were disposed of as follows: Scotsguard, $3,000; Verwood, $2,500; Loreburn, $2,000; Richlea, $2,500; Riverhurst, $3,000. The greater part of these securities was taken over by insurance, manufacturing and other concerns outside of the Bond Dealers' Association. A block of York Township, Ont., $15,000 6 per cent. 25-year bonds was also sold, the Toronto Mortgage Co. being the purchaser, paying a price of 100.50

The issue of Spanish River Pulp and Paper Mills, Ltd., $3,500,000 6 per cent., mortgage lien, serial gold bonds, purchased by Messrs. Peabody, Houghteling and Co., Chicago, Ill., in September, is now being offered. The bonds mature at the rate of $195,000 each September 1, until 1928, and on September 1, 1929, the balance of $1,745,000 matures.

New Issues After Loan

After the loan, a period of activity is expected. Municipalities which offered their bonds during September and October without success, postponed the sale of their securities until the termination of the campaign and many offerings are anticipated at the end of this month. Two provincial issues, Alberta and New Brunswick, are coming and the $1,750,000 Donnacona Paper issue purchased by the Royal Securities Corporation in August, is also due for offering.

Bank Loans to Municipalities

Bank loans to municipalities have reached a new high level for this time of the year. The total for the month of September was $57,033,309, compared with $47,977,472 for the same month last year, an increase of over $9,000,000. This is due to the closing of the usual borrowing channels, caused by the Victory Loan. The following is a statement of bank loans since January, 1916:—

	1916.	1917.	1918.	1919.
January ...	$32,015,371	$24,487,272	$40,015,466	$32,640,198
February .	35,149,915	26,121,324	43,535,628	36,830,183

COBALT ORE SHIPMENTS

The following is a statement of shipments of ore, in pounds, from Cobalt station for the week ended October 31st, 1919:—

Hudson Bay, 61,382; Buffalo Line, 263,945; McKinley Darr, 189,354; Mining Corporation, 217,176; total, 731,857.

The total since January 1st is 21,293,574 pounds, or 10,646,787 tons.

At a meeting of the Ontario Railway and Municipal Board in Stratford on November 5th, permission was given to the North Easthope Telephone Co. to issue debentures to the amount of $3,350.

REASONS FOR BUSINESS INSURANCE

Business Insurance was the subject of an address by H. O. Leach, manager for British Columbia for the Sun Life Assurance Company, at a meeting of the Vancouver Electrical Club, on October 24th. The speaker favored group insurance, as a plan of insuring a group of employees by the company, which would tend to promote more friendly relations between employers and men.

There were two other classes of business insurance, corporation and partnership insurance. In corporations business insurance was particularly essential where the stock was held by a few men. It acted as a safeguard against the holdings of a deceased associate falling into unfavorable ownership. Partnership life insurance was most frequently taken for the purpose of satisfying the demands of the heirs of a deceased associate of the firm without impairment of its capital. Many small corporations and partnerships ignored the opportunities of carrying business insurance protection said Mr. Leach, on the mistaken ground that these firms were too small. As a matter of fact, the smaller the firm the more necessary business insurance became.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance. 50 per cent extra if charged

ADVERTISER seeks position, any part of Canada; 16 years' experience with English, Continental and Canadian Banks, including 12 years in Western Canada. Barrister, Solicitor and Notary Public in British Columbia. Three years in France with C.E.F. Moderate salary. Apply Box 241, *The Monetary Times*, Toronto.

Vancouver, B.C.—October 15—The adjusted loss on the plant of the British Columbia Fir and Lumber Co. is $160,000. Insurance, particulars of which were given in these columns last week, was carried to the amount of $116,000.

LOAN PAYMENTS BEING KEPT UP

There is a good demand for farm loans in the west, according to W. T. Alexander, of Winnipeg, who returned a few days ago after spending a considerable part of the summer in inspection work. Mr. Alexander is managing director of the Great-West Permanent Loan Co., of the Canada National Fire Insurance Co., and of the Imperial Canadian Trust. He says:—

"All the mortgage companies have found conditions very much improved this year. Payments have been well met and there has been a very large amount of favorable readjustment by all financial corporations. In Saskatchewan and Alberta it is a puzzle to tell where the money has come from. They had a rotten crop, as everybody who has travelled through these provinces extensively knows. Nevertheless, they have made very large payments on account, and are in a good position. The policy of the Union government in connection with the settlement of soldiers has had good effect in these provinces. I do not wish to speak too highly of the Ottawa administration, but in this regard the benefit in these provinces is obvious.

"Conditions have greatly improved in a number of the western towns and cities, especially in Regina, Saskatoon and Calgary. In Regina there are hundreds of families, I am informed, looking for homes. We had a good many properties on our hands during the war in that city. At the present time we have not one. Every piece has been sold at satisfactory prices. The same thing is practically true of the city of Calgary, although the last of our properties in that city have not yet been disposed of. In Saskatoon we were interested, as a mortgage company, in the Canada Building, a million-dollar structure, and the best office edifice in western Canada. As an indication of conditions in Saskatoon, it was reported to me by our manager there that he had a waiting list of twenty-four names for accommodation in the building. The structure is now making, after paying all charges, a satisfactory return to the owner. The demand for mortgage money has not been large for the past few years, but the condition is now changed and the number of applications has been greatly increased. The cost of money remains unchanged."

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the month of October:—

Canadian Pacific Railway.

	1919.	1918.	Inc. or dec.
October 7	$3,965,000	$3,458,000	+ $ 507,000
October 14	4,029,000	3,524,000	+ 505,000
October 21	4,241,000	3,509,000	+ 732,000
October 31	5,878,000	5,023,000	+ 855,000
Totals	$18,113,000	$15,514,000	+ $2,599,000

Grand Trunk Railway.

	1919.	1918.	Inc. or dec.
October 7	$1,611,553	$1,460,738	+ $ 150,815
October 14	1,619,110	1,433,788	+ 185,322
October 21	1,486,851	1,296,165	+ 190,686
October 31	2,418,862	2,157,396	+ 261,466
Totals	$7,136,376	$6,348,087	+ $ 788,289

Canadian National Railways.

	1919.	1918.	Inc. or dec.

Victory Loan Success Assured

Total Subscriptions Now Over Four Hundred Million — Half Billion Will Probably be Reached—Success Again Due to Large Subscriptions — List of Subscriptions of $5,000 and Over

Up to midnight on Wednesday, November 12th, subscriptions to the amount of $406,383,888 had been reported to Dominion Business headquarters in Toronto. Ontario, which subscribed about half the total last year, is credited with almost 60 per cent. of the subscriptions so far this year. The list by provinces is as follows:—

Ontario (including Toronto)	$232,699,750
British Columbia	19,244,348
Alberta	8,936,290
Saskatchewan	7,835,050
Manitoba	21,364,800
Montreal	77,283,900
Quebec	19,063,950
New Brunswick	6,320,650
Nova Scotia	12,466,100
Prince Edward Island	1,169,050
Total for Dominion	$406,383,888

The above totals represent reports from New Brunswick up to Saturday night; from British Columbia, Alberta, Saskatchewan, Manitoba and Nova Scotia up to Monday night; from the city of Montreal, the province of Quebec, Prince Edward Island up to Tuesday night; and from Ontario up to Wednesday night. Ontario's showing is therefore better than is really the case.

The amazing success of the 1918 Victory Loan was due in part to the signing of the armistice on November 11th, early in the last week of the campaign. Up to about Monday of this week the figures have been ahead of last year, and while there will, no doubt, be a lot of delayed subscriptions come in during the last few days, yet the rush which was experienced last year is not anticipated. The following list, showing the totals as at midnight Wednesday of the second week, midnight Wednesday of the third week, and the final totals, of the 1918 loan, illustrate how the armistice boosted the subscriptions:—

	Second week.	Third week.	Total.
British Columbia	$ 12,175,950	$ 20,251,650	$ 35,396,667
Alberta	7,544,850	11,724,650	18,189,600
Saskatchewan	6,034,950	10,761,450	23,889,000
Manitoba	16,405,300	27,785,900	43,639,900
Ontario	128,917,650	222,796,150	329,682,950
Quebec	49,769,000	100,013,550	175,757,250
New Brunswick	5,537,100	11,328,600	30,102,500
Nova Scotia	12,752,850	19,229,450	16,500,000
Prince Edward Island	644,650	1,552,200	2,900,000
	$239,782,300	$425,443,600	$676,057,867

It had been anticipated that more small subscriptions would be received this year, while the securing of large subscriptions would be more difficult because of the issue being taxable. Large subscriptions have come in very well, though there may not be the increases produced by the armistice last year. On the other hand it is not certain whether the number of subscribers will be as large as it was in 1918.

List of Large Subscriptions

The following is a list of additional subscriptions of $5,000 and over, compiled by *The Monetary Times*:—

Life Insurance

London Life Insurance Co., London	$1,000,000

Benefits of State Health Insurance*

Value of Health in Economic Life— Compulsory Insurance Adopted in Europe — Brings About Better Industrial Relations — Similar to Workmen's Compensation

By E. S. H. WINN

THE prosperity and progress of a community depends, and depends vitally, on that community's health standard. Just as a man with sickness in his family experiences difficulty in paying his bills, so does the community find that preventable diseases act as a brake on the progress of business in that community. Health insurance can therefore be truly said to be an essential factor in the productiveness, prosperity and happiness, and hence in the advance of civilization.

David Lloyd George has said that to be thoroughly equipped to face any emergency of either peace or war, the state must take a more constant and intelligent interest in the health and fitness of the people. If strong bodies are necessary for victory in battles of occasional wars, then they are as necessary for success in the increasing battles of peace-time existence.

The war has resurrected throughout the English speaking world an ideal of physical perfection and the realization of dominance of health and strength. What problems are there that are of more vital interest than that of conservation of health? We believe that the public at large has only a very faint conception of the extent to which sickness and physical disability saps the energy and impairs the efficiency of the nation. A broad constructive program for dealing with this problem is an immediate need. Thus far legislative attention has been directed largely to compensation for wage loss suffered by disability of industrial workers rather than to accident prevention. The desirability of preventing sickness and its attendant losses is obvious. Can it not be said that of the many fundamental problems which the war has pressed into prominence, none offers richer returns to the nations through its solution, than does the problem of sickness.

It is undoubtedly true that the nation's success, both in peace and war, depends upon the strength and vitality of its citizens, yet sickness is prevalent among them and the incomes, especially of the workers, are, in the majority of causes so small, considering the high cost of living, that the wage-earning family cannot afford to pay for adequate medical attention or set aside sufficient to meet the wage loss due to disability. It is believed that health insurance will provide a partial remedy.

Insurance has been defined as a method of co-operation among members of a group subjected to a risk whose frequency can be calculated with a large degree of certainty. The group as such assumes and distributes the risk, thereby reducing the risk for each member. Insurance has now assumed the secondary function of reducing losses by reduction of the hazard. For example—in fire insurance the insurance companies require the installation of a sprinkling system; the Workmen's Compensation Boards required the employer to install safety devices. Prevention, or reduction of hazard, is, therefore, an advantage both to the injured as well as to the Workmen's Compensation Board.

Health insurance may be defined as a method by which economic loss occasioned by illness is distributed among a group of persons, periodical payments being made by the different members of the group. It may further be defined as merely a scientific extension of the accepted principles of insurance, for distributing the cost of sickness which now falls with crushing weight upon those least able to bear it alone.

In Force in European Countries

Health insurance is not new. At the present time Canada and the United States have the unenviable distinction of being the only two great industrial nations without compulsory health insurance. For a considerable period the industrial nations of Europe have, one after another, discussed the idea and followed the discussion by adoption. Health insurance has constituted an important part of the policy and career of some of Europe's greatest statesmen, including Bismarck and Lloyd George. Germany paved the way in 1883, under the leadership of Bismarck. Her wonderful industrial progress since that time, her comparative freedom from poverty, reduction in the death rate, advancement in hygiene, and the physical preparedness of her soldiery, are due to this legislation. Following Germany health insurance was adopted by Austria, Hungary, Luxemburg, Norway, Serbia, Great Britain, Russia, Rumania and Holland, and other countries have adopted a subsidized voluntary system, viz.: France, Belgium, Sweden, Denmark, Switzerland and Iceland.

The need for health insurance is twofold. There is the need of indemnification against loss and the diminishing of loss itself. Indemnification is the essence of the insurance principles. It spreads the loss of each person over a large number. The well to do have long made use of fire insurance, marine insurance, life insurance, fidelity insurance, plate glass insurance, steam and boiler insurance, and to some extent, health and accident insurance. The capitalist has long endeavored to eliminate, or at least to reduce every determinable risk, but the curious and unfortunate fact is that outside of workmen's compensation the workers in this country have received as yet very little benefits from the application of the insurance principles, yet it is the poor whose need of health insurance is the greatest, and for two reasons. One is that the worker is more likely to lose his health than the capitalist, for it is well known from several lines of research that the death rate, and therefore the sickness rate, prevailing among the workers is from two to three times that prevailing among the well-to-do. The other is that the loss from sickness is a far more vital matter to the poor than to the rich. The worker who loses his health loses his chief asset. That the low paid working man seldom insures against illness, is unquestioned. It is true that millions of working men in Canada and the United States cannot at the present avail themselves of the necessary medical, surgical and nursing aid.

One of the great reasons why diseases which are mild in the beginning become chronic and incurable, is that in a large number of cases the worker will refuse to stay at home because he must earn up to the highest point in order to insure his family the means of a decent existence. The number of sick and ailing employees remaining at work despite their disability, for fear of losing the earnings necessary for their sustenance, is so large and their productiveness during their physical impairment, is so reduced, that in numerous cases the employer is paying one hundred per cent wages and getting only forty per cent efficiency.

Because they found that society had made no proper provision for the unexpected, the workers added to their union and fraternal constitutions sections which permitted payment of sick benefits and in some cases, medical expenses. Many of the large plants on the Atlantic coast and in the interior of the United States, recognizing the influence of health and home conditions on the efficiency of the workman, have established a health department in charge of competent physicians to care for the requirements of the workman and his family. The fact that this is rapidly extending and particularly at that age when competition is at its peak, is the best possible evidence that from a financial standpoint the service is justified.

---

*An address before the Vancouver Board of Trade, October 4th. A similar address was delivered by Mr. Winn before the British Columbia Manufacturers' Association on October 28th. As stated in these columns already, the former body endorsed his suggestions. The Manufacturer's Association referred the matter to their executive for consideration.

In our own province some of our employers, realizing the need of better health conditions and a species of health insurance, have inaugurated various systems among their employees. For this thoughtful consideration they will ultimately find themselves well repaid. The worker will naturally realize that his welfare is receiving consideration at the hands of his employer. He will be drawn closer to that employer and it will mean that a better and mutual understanding will grow into their business transactions. Such a "get together" principle cannot help but get results.

Briefly summarizing, a workman is at his maximum of efficiency when in good health and when not depressed by fears arising from home conditions that he is unable to cope with.

One of the greatest items of waste in modern society is the time lost and the reduction in physical standard caused by disease that could either have been prevented or at least limited by efficient medical service. Another factor is the loss sustained by a family when its support is either withdrawn by death or a long siege of illness.

There would seem to be no way to meet the awful problems of misery and poverty except by health insurance. It is well known that there are thousands of deaths yearly from preventable diseases such as typhoid fever, etc. A celebrated German authority on health insurance, Dr. Zakor, reported in 1914, that by reason of health insurance the workman's period of productiveness had been increased by twelve years. Dr. Pasteur has convinced us that it is within the power of man to rid himself of every parasitic disease, and his successor, Metchnicoff, went far to show that the normal life span for future generations is much beyond the century mark.

Relation to Workmen's Compensation

Health insurance might truly be said to be a sister to workmen's compensation—health insurance carrying on where workmen's compensation ends. Prior to workmen's compensation legislation coming into effect, accident prevention measures were particularly limited. Since that time, for example, factory inspection, boiler inspection, metalliferous mines inspection, coal mines inspection, electrical energies inspection, and railway and tram inspection have been organized, and the work so co-ordinated that the workmen's compensation offices became a clearing house for accident prevention. First aid services were put into being with the result that thousands of severe injuries have either been eliminated or so reduced that thousands of dollars have been saved to the industries of this province. At the present time we have inspection of schools, particularly of the lungs and teeth of the pupils, inspection of camps and hotels, vaccination and quarantine regulations, and other efforts made at sickness prevention. These to-day are in exactly the same position as were the old accident prevention measures prior to the Workmen's Compensation Act coming into effect. It has been truly said that the accident prevention measures in all states and provinces prior to workmen's compensation legislation, were wholly inefficient and unsuccessful until workmen's compensation legislation became effective. In the same way it is believed that sickness prevention will not be efficient until the work is conducted through some clearing house, the clearing house being authorized to enforce regulations and being in control of a body untrammeled by politics.

Practically every state federation of labor which has considered health insurance, has endorsed it; a large number of medical associations and some of the larger employers have expressed themselves as in its favor. It is believed that under compulsory health insurance both employer and employee would co-operate with the general public in securing better water supply, better sewerage, better milk, better meat and food regullations, better school hygiene, etc. It will help to stimulate a more general scientific study of disease and its prevention. It will indirectly and powerfully tend to reduce poverty. Without health insurance a vast number sooner or later exhaust whatever margin they have and sink into poverty. A workman without health insurance is gambling with his livelihood and in many cases is sure to be thrown out of the game. It is definitely known that sickness causes the great bulk of destitution. Health insurance is needed to tide the worker over the grave emergencies incidental to illness as well as reduce illness itself, lengthen life, improve the working power and diminish the causes of industrial discontent.

It is believed that the employer will get back a great deal more than he puts in, in greater efficiency, more steady employment, greater loyalty and other indirect benefits, as well as turning out a better article. It is well known that workers running into debt on account of sickness, are worried and depressed, and this necessarily reduces the quality and quantity of their work, and thereby increases their own liability to sickness and accident.

In general, business men should quickly revise their ideas regarding methods of handling labor, if the movement toward radicalism generally described in a loose and incorrect way as Bolshevism, is to be offset in this country. In general, the government and most of the employers on the British Island, are agreed that the spirit of co-operation between the worker and the capitalist is highly desirable as is the spirit of conciliation, and in England they are going the limit to bring that situation about. It is quite frequently argued that health insurance will do more toward allaying the present unrest and bringing capital and labor into contact, than any other form of legislation.

PETERBOROUGH LIFE UNDERWRITERS' CONGRESS

Third Meeting of the Kind in Canada—Agents Hear Many Points on Selling Insurance

A SUCCESSFUL congress was held in Peterborough, Ont., November 6th and 7th, by the Central Ontario Life Underwriters' Association. About one hundred were present, including agents from surrounding towns and representatives from the head offices of several companies. This is the third gathering of the kind in Canada, apart from the annual and semi-annual meetings of the Life Underwriters' Association and monthly gatherings of local underwriters' associations in the principal cities. London, Ont., took the lead with a meeting last June, and a second one during the last week in October, both of which have been mentioned in these columns. They are being held in order that the agents may benefit by the exchange of experiences, and that a sufficient number may be brought together to make it worth while to bring in outside speakers.

After an address of welcome by A. J. McClellan, president of the Central Ontario Life Underwriters' Association and an introduction by A. E. Dawson, chairman of the congress, an address on "The Broad Principles of Life Insurance" was given by W. Lyle Reid, of Ottawa, a past-president of the Life Underwriters' Association of Canada. Mr. Reid dealt with the importance of life insurance in the community, pointing out the vast field of service still open to agents. E. J. L'Esperance, of Montreal, in a lecture on salesmanship, gave practical demonstrations of how the need for insurance could be driven home to all classes of people. A lecture on field work was given by J. E. Kavanagh, third vice-president of the Metropolitan Life, New York, and one on head office and field co-operation by A. N. Mitchell, of the Canada Life, Toronto. One point which was emphasized by both these speakers was that the disparaging of other companies was no longer part of the agent's work, and that the Life Underwriters' Association had played a useful part in bringing about this improvement. The microscope had some time ago been applied to all the companies doing business in Canada, said Mr. Kavanagh, and the agent could be assured that if he lived up to his duties, the company would do its part. Mr. Mitchell, as evidence of the better spirit now prevailing in the field, stated that fifteen years ago such a meeting of agents of different companies for mutual assistance would have been quite impossible.

THE STOCK MARKET DECLINE

JUST one year after the signing of the armistice the New York stock market is experiencing its heaviest decline since 1916. Call money rates rose to a high record of 30 per cent. on Wednesday last, after reaching 23 per cent. on Tuesday and 14 per cent. on Monday. Substantial declines in several stocks in the market on Tuesday had presaged a general downward movement, but when it did come it was greater than had been anticipated. Speculative issues, especially industrial stocks, suffered most, declines of 25 to 60 points being common. The downward movement is not confined to speculative issues, however, but includes, in lesser degree, investment stocks and bonds. On Thursday, however, the market recovered, and call money rates returned to nearly normal.

This movement in New York is accompanied by corresponding changes in London. The Bank of England rate has been advanced to six per cent., and a further advance to seven per cent. is possible. All classes of securities have weakened considerably on the London Stock Exchange, although there have been no breaks such as have occurred in New York.

Coincident with these changes, sterling exchange reached the new low level of $4.10¾ in New York on Wednesday, and new low records of 9.50 and 12.82, respectively, were reached by French and Italian bills.

The course of prices on the New York exchange is significant because of the fact that stock exchange quotations are the most sensitive indices of business conditions, preceding bank clearings, railroad earnings and other guides by several weeks and months. The New York exchange is the most speculative on this continent, and prices on the other exchanges usually follow those in New York. As an indication of a possible depression in general business, therefore, the New York declines are all-important.

During the year which has elapsed since the armistice was signed substantial advances have been registered by most of the stocks listed on the Toronto and Montreal exchanges. Quotations in the case of a list selected at random, as at November 6th, 1918, and November 5th, 1919, are as follows: Atlantic Sugar common, 14, 77; Atlantic Sugar preferred, 50, 122; Brompton, 60½, 79½; Canada Steamships common, 46, 72½; Canada Steamships preferred, 76½, 86; Dominion Steel common, 62, 70⅞; Dominion Steel preferred, 64¾, 100; Maple Leaf common, 120¼, 200; Maple Leaf preferred, 98, 103; Steel of Canada common, 63¾, 75¼; Steel of Canada preferred, 97¾, 100; Bank of Commerce, 185½, 198; Canada Permanent, 168, 170.

CANADIAN BANKERS' ASSOCIATION ANNUAL

THE annual general meeting of the Canadian Bankers' Association was held in Montreal on November 13th. In addition to the reading of minutes and financial statement reports were received from the secretary, editing committee (Canadian Bankers' Journal), committee on minor profits, thrift committee, committee on branch banks, and also reports on educational work and reports from subsections.

After the president's address was delivered, the following questions were taken up:—

Overseas credits.

Amendments to the by-laws, including provision for an inquiry by a committee into clearing house differences.

Consideration of Winnipeg clearing House committee's report on a centralized collection system.

Consideration memorandum prepared by the Editor Canada Newspaper Company of London, England.

Royal Loan and Savings Company's (Brantford) letter re complaint of banks as to company's proposed Saturday evening hours.

Embossing cheques: Shall banks at a date to be determined use these cheques only? (Circular No. 9—A, July, 1919.)

C. A Bogert, general manager of the Dominion Bank, and formerly vice-president of the association, was elected president in succession to E. L. Pease. Mr. Pease, who is managing director of the Royal Bank, had been president of the association since 1914. The following were elected vice-presidents: Sir Frederick Williams-Taylor, general manager of the Bank of Montreal; H. A. Richardson, general manager of the Bank of Nova Scotia; Sir John Aird, general manager of the Canadian Bank of Commerce, and C. E. Neill, general manager of the Royal Bank of Canada. The president and vice-presidents, together with Edward C. Pratt, general manager of the Molsons Bank, and J. P. Bell, general manager of the Bank of Hamilton, constitute the Executive Committee of the association.

BETTER MUNICIPAL UNION NEEDED

RECENT conventions of the Union of Canadian Municipalities have been failures. Reorganization of the union is proposed, but it is hopeless to expect to bring together enough delegates to make the meetings really representative, because the number of subjects of common interest to municipalities throughout Canada is small. Nevertheless there are questions of this kind, for action on which some kind of a municipal meeting is desirable. In an interview a few days ago with a *Monetary Times* representative, Mayor W. D. L. Hardie of Lethbridge, who was one of the western delegates at the 1919 convention, said:—

"For the past several years there has been a rather poor attendance at the annual convention of the Union of Canadian Municipalities. When the convention is in the east there is a very poor representation from the west, and when it is held in the west there is a very poor attendance from the east. This would indicate that the extreme east and west of Canada are too far apart to get even a fair attendance at a reasonably central point in an Ontario city. At the last convention in Kingston there were only three western city representatives. If it had not been for the Liberal convention in Ottawa just a few days before there would have been fewer from the west, and at least one other city that was represented would not have been, if it had not been for the exceptional circumstance. I refer to myself and my own city.

"This convention should really be the cities' parliament and each city should be represented, but the loss of time to the members from the distant points and the cost of travel, which is getting worse each year, makes attendance at any of the extreme points prohibitive. Western members also find that when the convention is in the east the eastern members feel themselves so busy that they rush through and hike off home before the convention is half through. These members do not stop to think that one night's journey has lost them really no daytime, while western members have to give up from five to six whole days in travel alone, not to mention the time at the convention.

"With this rush there seems to be very little accomplished worth while to offset the very large expense. In fact nothing of benefit to the cities has happened or resulted at any one of the last several conventions. Western cities have practically decided to drop out altogether unless some alteration is made in the constitution. They have been trying at the last three conventions for amendments which were always side-tracked by referring them to the incoming executive. These live so far apart that they never get together long enough to do anything recommended, so that we have practically the same old constitution which is destroying the association and its usefulness. Unless something is done there will be even fewer western cities represented at the next convention than were at the Kingston one.

"There is not likely to be much done because there is a feeling in the east that it will be better to sacrifice members in the west than make them concessions. Last year only one-fifth of the income was derived from the west and especially one leading executive thought it better to get a big membership from the east than to try to get an increase from the west by concessions to the west by amendments to the constitution. As it stands now the institution that should be of the greatest benefit to the city is practically dead, and it is very likely that, if nothing is done soon to harmonize the differences, the western cities will have to protect themselves by organizing a union of western Canadian municipalities. Both the fact that the Union of Canadian Municipalities as it stands now is practically dead and that the western cities are not satisfied with the present constitution can be easily mended by constituting a western and an eastern branch of the Union of Canadian Municipalities and centralizing the executive office at Fort William or Winnipeg. Will the east accept this program? It has refused it so far."

In commenting upon the 1919 convention, a suggestion was put forth that the Dominion meeting should be purely a business one, attended by representatives of provincial unions rather than of individual municipalities. Two or three delegates could be sent by each province, armed with such mandates as would be considered advisable, and some results might be expected from a meeting of this kind. The provincial conventions could then be devoted to a wider range of subjects, including those of peculiar interest to the respective provinces, and every municipality, however small, by being represented at the provincial convention, could influence the Union of Canadian Municipalities. Any division as between east and west is not desirable, and though eastern and western conventions would no doubt be better attended than the Dominion one, yet the range of subjects which could be dealt with would scarcely be larger.

RECENT LABOR DEVELOPMENTS

THREE recent events in the industrial field in the United States have been watched with interest by Canadians because of their indirect importance to this country. The first was the industrial conference held early in October; this conference was similar in form to that held in Ottawa in August, but the results were widely different. The Canadian conference agreed on a few questions of lesser importance, but side-tracked the crucial issues. The United States conference attempted to decide them, but the eight-hour day proved to be a barrier which finally split the conference, the labor delegates withdrawing entirely.

The second event was the great strike of coal miners, who demanded a thirty-hour week and an increase of sixty per cent. in wages. This strike is now over, after having been declared illegal by the federal government. Substantial advances had already been granted the miners since 1914; and the fact that if the demands were to be granted the price of coal would be very nearly doubled, definitely alienated public sympathy. Coal is a commodity consumed by all classes, and the intimate relation between the wage scale and the cost of living in this case was widely appreciated. The strike of steel workers, which immediately preceded the coal strike, did not arouse nearly so wide interest, because its effects on the average citizen were not so apparent.

The third event is the international labor conference, provided for in the peace treaty, which was called at the instance of the United States government. The Canadian government, Canadian labor and Canadian employers are represented at this conference. Here again the eight-hour day was again the chief issue, but after keen discussion the forty-eight-hour week was agreed upon as a suitable standard, where practicable, the distribution of these hours being left to individual industries or firms. The fact that wages and other conditions of industry took a secondary place would indicate that the importance of hours of labor in determining the volume of production is fully recognized, and that wages must ultimately depend upon the amount produced by each worker.

The attention of the industrial world has therefore been turned towards the United States during the past few weeks. Previous to that it was directed towards the great railway strike in Great Britain, and it is not long since the Winnipeg general strike placed Canada temporarily in the limelight. The effect of this featuring of industrial disputes is that certain fundamental truths have, by a vast process of education, been driven home to citizens in all industrial countries, and the controversy has narrowed down to questions of detail. The revolutionary is out of favor for some time to come. It is only a few months since a radical opinion was the only safe one to express; but the disease provided its own cure, for the radical theories, containing no sound constructive element, fell down in proportion as they approached realization.

Lands to the extent of 701,543 acres, belonging to the late F. A Heinze, have reverted to the British Columbia government. Fifty-five thousand dollars was due in taxes and the lands were not redeemed at the 1918 tax sale.

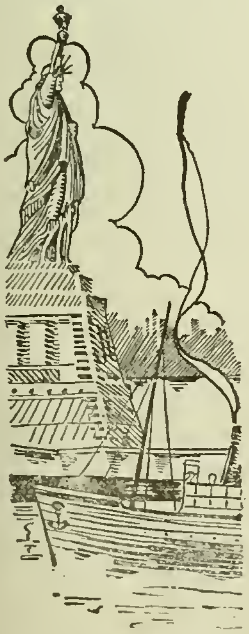
NEW YORK

The Financial Centre of the United States.



NEW YORK is the centre of America's banking and finance — the great clearing house in her domestic and foreign business.

We are represented there by our own New York Agency (at 49 Wall Street) and by the chief executive office of the Park-Union Foreign Banking Corporation, thus being in an exceptional position to extend to Canadian exporters and importers direct banking facilities for expansion of growing business relations with the U.S.

Officers at all our 380 branches will gladly advise Canadian exporters and importers doing business with the U.S., France, Great Britain, Japan and China.

UNION BANK OF CANADA

Park-Union Foreign Banking Corporation jointly owned and controlled by National Park Bank of New York and Union Bank of Canada.

385

REAL BANKING SERVICE

All branches of this Bank are in a position to give the most comprehensive Banking service.

Government and Municipal Securities are dealt in. Foreign Exchange bought and sold.

Money Orders and Letters of Credit issued. Collections made on all points in Canada or overseas.

IMPERIAL BANK OF CANADA

"INDEMNITY SESSION" NOW FINISHED

Some Business of Greatest Importance Transacted in Extra Session, Called to Ratify Peace Treaty

(Special to *The Monetary Times.*)

PARLIAMENT is over. The members have scattered to their constituencies to explain as best they can their position on various issues to the embattled farmers and the angry soldiers. Judging by the wires which have been recently pouring into Ottawa the majority of the members would prefer to spend the parliamentary recess on the balmy shores of the Bermudas, as they are promised a lively time when they arrive back home. Several members have been asked for their resignations, while others will find mass meetings of veterans ready to greet them, when they will be asked for an explanation of their stand on the question of soldiers' civil re-establishment.

The session was primarily called for the purpose of ratifying the peace treaties with Germany and Austria, and it was not expected it would last more than a few weeks. It was jokingly termed "the indemnity session," but the joke session before it prorogued, proved to be one of the most important for years. From the standpoint of the business and financial world there has not been a session of such importance for a decade. While the session was in progress, the long-drawn-out negotiations between the Grand Trunk and the government came to a head for the purchase of the system and the proposals were immediately laid before parliament for ratification.

The opposition to the bill was strong and determined, and finally only passed the Senate by the slim majority of four. The opposition came under two heads: First, those who were opposed to the whole principle of government ownership; and, secondly, those who disagreed with the terms of purchase. The chief weakness of the attack on the government's proposal was, perhaps, the lack of a constructive alternative proposal. Two amendments passed during the course of the debate perhaps strengthen the weak points in the bargain. One was the naming of Sir Walter Cassels, Chief Justice of the Exchequer Court, as the third of the three arbitrators. Sir Walter has a splendid reputation as a public servant of integrity and the very fact that he is the deciding arbitrator means that there will be no "cooked" deal. The second amendment provided for a maximum amount to be paid—namely, an amount which will net interest to the stockholders—that is the holders of all stocks—at the rate of $5,000,000 annually. This is the most the Grand Trunk can get.

Soldiers' Re-establishment Committee

Next in importance to the Grand Trunk bill was the report of the committee of both sides of the house appointed to look into the question of soldiers' civil re-establishment, colloquially known as the "gratuities question." While the report provided for the expenditure further in putting the soldiers back into civil life of some fifty odd million dollars, it was dead against any of the various gratuity schemes presented to the committee. The committee, as well as the government, must at least be given credit for courage. Politically, the easy thing for the members of the committee would have been to recommend the demands of the soldiers. It took backbone to take the opposite stand. But members of both sides were so impressed with the financial situation, particularly as it was presented by Sir Thomas White, that they could not see their way clear otherwise than turn down the soldiers' proposals.

There was a strong party on the government side, mainly returned soldiers, who believed that some further gratuities should be granted, and they fought strenuously for it. Their fight might have proved troublesome for the government, because Hon. J. A. Calder, who was chairman of the committee report, declared that the government proposed to stand or fall by it. How they were swung back into line is another story. If the truth be told their antagonism to Hon. Mackenzie King and the announcement of Col. J. A. Currie, whose support of the Flynn movement makes him unpopular, even among the soldier members, that he would support the Liberal leader in a motion to refer the matter back, were responsible. When the vote came, everyone was in line, and the government had the largest majority of the session.

The session which has come to a close has brought no new figures into the limelight. The farmers' movement has received a great impetus through the country, but their recognized federal leader, Hon. T. A. Crerar, did not take a prominent part in debate. Mr. Crerar has most estimable and admirable qualities, but he has never shown signs of strong parliamentary skill. None of the other cross-benchers were in the limelight. Hon. Arthur Meighen, as the chief pilot of the Grand Trunk bill, was a leading figure in the house. But Mr. Meighen has long since won his spurs as one of the ablest and cleverest men in public life. Of the private members, a man who does not push himself to the front, but who is steadily winning the solid respect of parliament, is Hume Cronyn, of London, general manager of the Huron and Erie Mortgage Co. Mr. Cronyn is an experienced financier, who is a close student of economic subjects; he does not speak frequently, but when he does, he is listened to with the most careful attention. He looks like possible cabinet timber for the future. Another member, who would seem to be slated in time for promotion, is Thomas Tweedie, the genial member for Calgary. He is developing real parliamentary talent. If a vote were taken as to the most popular member of the House of Commons, George Allan, member for South Winnipeg and prominent in financial circles in western Canada would likely head the ballot. He is the best host in the House of Commons. As an evidence of his popularity, western members this session presented him with a gold-headed cane.

Hon. C. C. Ballantyne is back on the job and is laying plans for a further extension of his shipbuilding program. This is a pet hobby of Mr. Ballantyne, and, despite much adverse criticism, he intends to develop it. Next session will see an announcement of a development of the policy. Mr. Ballantyne believes that only by the extension of foreign trade can Canada pay her national debt. Foreign trade can only be developed by means of ships, and it is his policy to place lines of government-owned steamers on every route where there is promise of trade. He looks particularly to a great development of Pacific Ocean trade, and as soon as the ships are available lines will be established to the Orient and Australia and New Zealand in competition with the Canadian Pacific Railway. Incidentally, Mr. Ballantyne made the interesting announcement this week that he would call for tenders shortly for two new vessels to run on the triangular route between Vancouver, Victoria and Seattle in competition with the Canadian Pacific Railway and in conjunction with the National Railway system. The vessels will be fifty feet longer than the Canadian Pacific Railway vessels and several knots faster.

PERSONAL NOTES

Sir Thomas White, who was last week elected to the directorates of the Steel Company of Canada, Hamilton, and the National Trust Company, Toronto, has been made a director of the Canadian Bank of Commerce.

Mr. C. E. Corbold has been appointed manager of the fire department for Canada, of the Scottish Metropolitan Assurance Company, Limited. Mr. Corbold gained his fire insurance experience in the Canadian branch of the Lancashire Insurance Company, under the late S. C. Duncan-Clark, entering that office as a junior. When the fire companies decided to adopt the system now in use, of specific ratings, he was attached to the staff formed to try out the new system for Canada. Subsequently, Mr. Corbold joined the Ottawa Fire Insurance Company in the capacity of assistant manager, later becoming manager. For the past seven years he has been branch manager for Ontario of the Canada National Fire Insurance Company.

Bank of Hamilton

Dividend Notice

NOTICE is hereby given that a Dividend of Three Per Cent. (Twelve per cent. per annum) on the paid up capital of the Bank, for the quarter ending 30th November, has this day been declared, and that the same will be payable at the Bank and its branches on 1st December next, to shareholders of record at close of business November 20th.

By order of the Board,
J. P. Bell,
General Manager.

BUSINESS PROSPECTS AT THE COAST

Industrial Outlook is Fair, Though Shipbuilding is Dull—Insurance Interests Well Looked After

(Special to *The Monetary Times.*)

Vancouver, November 9, 1919.

THE outlook in Vancouver this fall is considerably better than it was a year ago. The Victory Loan campaign went with a swing and Vancouver was one of the first large cities in Canada to reach its quota and gain the Prince of Wales flag, which was presented to the local committee by Sir Henry Drayton, on the occasion of his recent visit to the coast. Prospects for the coming year are quite good. Lumbering and mining are sure to come into their own in a more marked way than for several years. Lumbering especially is likely to have a very brisk year, as almost every city and town in western Canada will be practically compelled to go in for a progressive program of building. Shipbuilding will in all probability be curtailed, although government orders for new ships have been placed this week. The salmon industry on the Fraser has had a setback from which it may not recover. The Skeena River, however, has come into prominence in this connection. Wholesale houses in Vancouver are doing a greatly increased business and collections are said to be good. Loan companies are resuming loaning in this field; some of them have not lent money in Vancouver for several years. New improvements in connection with dockage and shipping facilities are planned for the coming year, and are being strongly backed up by the Vancouver Board of Trade. Fire boats are urgently needed for this port to give adequate protection to the water front. Another indication of progress is the way office buildings have filled up in Vancouver this year; rents have advanced very materially in the last few months, and are now getting back to what they were before the war. It is almost impossible to get a house or a suite in Vancouver

Insurance Federation of British Columbia

This association was organized in 1916 for the purpose of uniting all branches of insurance and to assist in promoting the general welfare and education of the insurance fraternity. It is the only institution of its kind in Canada, although there are some fifty-four federations in the United States, under a supreme body known as the National Council. The British Columbia Association is affiliated with this National Council and is kept in touch with the insurance legislation and activities of the insurance fraternity over the line through a bulletin published by the National Council.

The British Columbia Federation has been actively engaged recently in educating the insuring public and their members by a series of lectures. The most recent of these lectures was delivered by John B. Laidlaw, manager for Canada, Norwich Union Fire Insurance Society, the subject being under two heads, "State Insurance" and "The Growth of the Fire Insurance Business in Canada." Owing to the importance of this lecture, delivered as it was by a man of such high authority on insurance matters, it has been widely distributed in pamphlet form throughout the Pacific coast. The president of the federation is Wm. Thompson, manager of the London and Lancashire Fire Insurance Co. at Vancouver, B.C., who is largely responsible for the success the association has attained thus far.

British Columbia Automobile Underwriters

An Assocation of Automobile Underwriters in British Columbia was formed in 1916 and established a stamping bureau in Vancouver, B.C., on April 1st of this year. Its success is already very marked in correcting old errors in the operation of the agencies and in laying plans to avoid new errors. It has resulted already in a much more friendly feeling among the agents. Some fifty companies doing business in British Columbia are all members of the British Columbia Automobile Underwriters' Association. The man at the helm for the fiscal year ending July 1st is Donald Cramer, provincial agent for the Imperial Guarantee and Accident Co. The establishment of the stamping bureau was under the supervision of Mr. Cramer, and it is believed that a very good start has been made, in materially improving conditions in British Columbia, tending to a cleaner business for the companies and a better service for those who are taking out insurance for automobiles.

The Vancouver Fire Agents' Association was formed in August of this year, and has upon its membership roll 103 persons, which represents every first and second agent doing the fire insurance business in Vancouver. Among the objects of the association is to maintain a code of ethics among the agents, and to exact fair dealing in the conduct of their business, under pain of moral reprisals. The president of the newly organized association is A. McC. Creery, representing H. Bell-Irving and Co.

MONTREAL INSURANCE ASSOCIATION

The annual meeting of the Montreal Insurance Association and the "Blue Goose" Association was held on November 5th in Montreal, with Lieut.-Col. Morris presiding. Reports were read of the association's activities during the past year, which, while showing a healthy growth in all departments, reflect especially the development along the lines of educational work. Publication of the first issue of the "Journal" showed a profit, and a start has been made to form a reference library.

The officers elected for the ensuing year are: President, G. E. Moberly, manager, Northern Assurance Co.; vice-presidents, W. S. Jopling, manager Commercial Union Assurance Co., and Lewis Laing, assistant manager Liverpool and London and Globe Insurance Co.; secretary, R. R. Martin, Atlas Assurance Co.; treasurer, C. S. Scott, Phœnix Assurance Co. of London. The series of weekly lectures will be resumed at an early date, and already papers have been promised by some eminent gentlemen on subjects of interest to fire insurance men.

BANK BRANCH NOTES

Many Branches Opened This Week—Merchants Bank Building New Toronto Office—Appointments Announced

The following is a list of branches of Canadian banks recently opened:—

Whitemouth, Man.	Royal Bank of Canada
Simcoe, Ont.	Royal Bank of Canada
Sault Ste. Marie, Ont. (Queen and Bruce)	Royal Bank of Canada
Harrow, Ont.	Molsons Bank
McGregor, Ont.	Molsons Bank
Sioux Lookout, Ont.	Imperial Bank of Canada
Hawkesbury, Ont.	Imperial Bank of Canada
Hearst, Ont.	Imperial Bank of Canada
Kingsville, Ont.	Bank of Montreal
St. George's, Nfld.	Bank of Montreal

Sub-agencies have been opened as follows: The Union Bank of Canada at Woodlawn, Ont., under the supervision of the Kinburn, Ont., branch.

The Canadian Bank of Commerce at Spruce Grove, Alta., under the supervision of the Stoney Plain manager.

A sub-agency of the Union Bank of Canada, to be operated by the Peterborough, Ont., branch, has been opened at Indian River, on Tuesdays and Fridays.

New Branches to be Erected

The Bank of Hamilton is opening a new head office in Montreal, Que., on St. James St. The general manager of the bank has made arrangements whereby the present quarters, now occupied by the Bank of Nova Scotia in the Canada Life Building, will be taken over when that bank moves to the Eastern Townships Bank Building early next year. The present branch of the Bank of Hamilton, on McGill Street, will be continued as before, giving the bank two Montreal branches.

The Merchants Bank of Canada has taken out a permit to build a four-story granite, limestone and brick building at 12 King St. W., Toronto, Ont., at a cost of $180,000.

Bank Appointments

Mr. R. T. Mussen, manager of the Stratford, Ont., branch of the Canadian Bank of Commerce, has retired from business life after forty years' service with the bank, seven of which have been spent in Stratford.

In keeping with the expansion of the various Canadian banks the following appointments have been announced:—

Mr. P. A. Moodie has been appointed manager of the new branch of the Bank of Toronto, at Graytown, Sask.

Mr. D. G. Lingley, of the St. John staff of the Bank of Nova Scotia, has been appointed acting manager of the bank's branch at Salisbury, N.B.

Mr. J. L. Claxton, who has been manager of the Canadian Bank of Commerce at Campbellton, N.B., for some years, has been appointed to take over the Shelburne, N.S., branch.

The following appointments are announced by the Sterling Bank of Canada: Mr. S. M. Wickens, manager at Sebringville, Ont., has been appointed manager at Hensall, Ont., filling the vacancy caused by the resignation of Mr. Ewen. Mr. H. P. Lyne is the new manager at Sebringville. Mr. T. A. Mitchell has been appointed acting manager at Jordan Station, Ont., taking over the duties of Manager E. L. Brown, who has been transferred to Toronto for other work. Mr. W. G. Gilfillan is now supervisor of the Uxbridge, Ont., district. The district has been extended, now including Beaverton, Keswick, Kirkfield, Myrtle Station, Uxbridge and Zephyr.

The Union Bank of Canada announces the following appointments. To be managers: Mr. T. B. George, Carstairs, Alta.; M. C. G. Webb, Waskada, Man., Crystal City, Man. To be acting managers: Mr. A. N. Gill, Kenogami, Que., Mr. L. L. Lewis, Angusville, Man., Mr. J. E. Macadam, Airdrie, Alta., Mr. J. N. Neilson, Westport, Ont., Mr. D. S. Wadleigh, Palmer, Sask.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended November 13th, 1919, compared with the corresponding week last year:—

	Week ended Nov. 13, '19.	Week ended Nov. 14, '18.	Changes.

BANKER'S INFLUENCE TOWARDS STABILITY

Manager Must Assume Responsibility—Influences Affecting Welfare of All Classes

IN an appeal to branch managers the October "Teller," issued by the Sterling Bank, points out some ways in which they can help to stabilize our economic system. The article says:—

"If a census could be taken of the thought uppermost in the minds of Canadians to-day it will probably be found, in ninety-nine cases out of one hundred to be—'What is going to happen to *my* business? How is peace going to affect my pay check?' We are all vitally concerned with the answer, because the way in which it is going to be answered will affect the health, comfort, progress, and happiness of millions of human beings. And we—*you* are going to have a part in shaping that answer.

"The first thing we want to know is, how we stand financially. Have we impaired our resources? Are we richer or poorer than before the war?

"Do you remember the gloomy predictions which were made when the war broke out? Many men said that the wealth which had been accumulated would be swept away, that the world would be set back a hundred years, that the billions which would be spent would be pure waste, and that we would have nothing but debts to show for it. Is it true that we have exhausted our wealth? Let us examine the situation.

Different Kinds of Wealth

"There are three kinds of wealth; First, there are our natural resources—the soil, forests, minerals, water power and so on; second, there is wealth in the form of production and distribution agencies—factories, equipment, railways, ships, terminals, warehouses, shops and so on; third, there is what is called 'consumable wealth,' in the form of goods on hand, such as food, clothing, and all things we use in living. The question is, how do we stand in these three classes of wealth?

"Canada's resources are more highly developed than ever. Our silver, gold iron, copper and nickel production has been increased. Food production has been stimulated, more land has been brought under cultivation, natural wealth has been developed in a manner which will permanently enlarge the flow of these and many other commodities to the markets.

"Of the second class of wealth—buildings, equipment, etc.—there is a balance on the credit side. It is true that construction work of some kinds has been curtailed, but there has been a great amount of factory and warehouse building which will be of a permanent value. Under the pressure of war needs, new ideas and methods have been introduced. The farm tractor is an example. Before farm help became scarce and the call for greater production went forth, the tractor was little used. Now thousands of Canadian farmers have greatly increased production and saved time and labor by the use of tractors.

"The third kind of wealth consists in stocks of goods on hand; and the pessimist lays emphasis upon the depreciation of these. It is true that some stocks have been heavily drawn upon; but this is a temporary and not a vital thing. It is not *the amount of goods on hand* that counts most in calculating a nation's wealth. It is *the ability to keep up a flow of goods.*

"Take any product as an example—locomotives, cotton goods, anything you name. Suppose these stocks are depleted, or even exhausted. If we have big, well-organized, well-equipped plants to produce more and more of them, therein lies wealth. And we have not lost our old factories, but have added new ones. Our power of production is greater than ever before. We are better equipped to turn out goods than ever before. We are more highly and efficiently organized. We have not only our great natural resources better developed and our manufacturing power increased, but we have also learned many lessons because of the war. Our knowledge is greater. And knowledge itself is wealth, because it produces wealth.

Interdependence of Workers

"The whole organization of the country is based on *mutual interest.* We are ourselves buyers and consumers as well as producers. Demand creates production by furnishing a market. Production creates buyers because it keeps labor busy and consequently supplied with money. The great need now is for efficient production, because efficient *production* means cheaper *products*—This is where the war has done us a good turn. In spite of the men who were drawn from agriculture, we produced greater crops than ever before. Notwithstanding the fact that hundreds of men were taken from the railways, a greater volume of traffic was handled than ever before. If labor is to be contented it must be well paid. But the vital point about wages is not the rate per day or per week, but the rate per unit of production. Efficient labor is *worth* high wages. But the man who demands high wages, without giving efficient production in return, injures himself and is unfaithful to the wage-earning masses. He adds to the cost of the necessaries and comforts which his fellows must buy. Suppose he is making hardware. If he gets high wages for *poor work* he increases the cost of hardware. The result is that the man who is working in a shoe factory must pay more for his stove, or tin pans. He will be forced to demand more for his labor. The price of footwear then goes up, and the hardware worker has to pay more for his shoes. If the shoeman, in addition to demanding high wages, does poor work, he still further raises the cost of his product. Since all wage-earners are indirectly supplying their own wants through the industrial organization, they all owe loyalty and honest service to each other.

"As for the employer, it is to his interest that employees should be well paid. The higher their purchasing power the better it is for business in general. We are not independent of one another. The honest prosperity of each one is beneficial to the rest of us. *That* is the secret of prosperity. Efficient workers, well-paid workers are essential. But they must realize their obligation to be efficient as well as their desire to be well paid.

Production and Prices

"Another point: Abnormal wages do not purchase more goods at abnormal prices than normal wages can buy at normal prices. And normal prices will especially benefit certain large classes—salaried people in particular—whose pay has not increased in proportion to wages. Many a man seems to think there are only so many jobs in the world and that if he does only half as much work as he can do, he makes a place for another man. For example, suppose it takes a thousand men to turn out ten automobiles a day. If, by economical and efficient management, five hundred men are enabled to produce the same number of cars a day, does it mean that the other five hundred will be out of a job? Not at all. The price of automobiles will be reduced, more people can afford to buy them and the demand for cars immediately goes up. The five hundred men who have done their work efficiently have not robbed other men of a job, but have created a demand for more labor, besides bringing the comforts and luxuries of life within the reach of more poeple.

"Bank managers have an unequalled chance to make business better in their community. A manufacturer may only come in contact with other men in his line. You are daily meeting men in every line and discussing their problems with them. You have the opportunity to make comparisons, size up a man's business and suggest a more efficient method to him. At the same time you can show him how necessary it is that every one be producing to the utmost if prices are to come down. There will always be a contest between leaders and organizers of society on the one hand and critics and agitators on the other. It is up to *you*, as the leader in your community, to recognize your responsibility and beat the agitator to it. It will take a little time and patience—but efficient leadership and workmanship always tell in the end. There is no reason why Canada should not speedily return to peace-time conditions, with the national wealth as great as before the war."

BANK'S INTEREST IN LIFE INSURANCE

Banker and Wholesaler, Who Finance the Merchant, Want to Know if They are Secured in Case of His Death

A. GORDON RAMSAY, assistant superintendent of the Canada Life Assurance Company, treats of life insurance from the viewpoint of the banker extending credits, in the November issue of the "Union Bank Monthly," which reached the members of the bank this week. "The corporations and partnerships of the nation are only beginning to awaken to the part which life insurance can be made to play in the affairs of not only the large but of the moderate and small-sized business as well," is the opinion of Mr. Ramsay, who continues:—

"Until a few years ago the protection of the family was the only function of life insurance generally recognized. One of Canada's foremost bankers in referring to the intimate relationship between commercial life insurance and extension of credit recently said:—

"'This bank always regards it as a favorable feature in a borrower's application when he is able to show that both his family and his business have been protected by life insurance against the contingency of his unexpected death. It often happens that the prosperity of a business is, in a large degree, dependent upon the continuance of a single life. In such a case it is more than usually important to cover by insurance the risk of disaster to the business through the unexpected death of that individual. The bank, moreover, is always glad to see the position of a firm fortified by partnership policies, especially where the capital is so moderate in proportion to the volume of the business that no portion of it could be withdrawn without embarrassment.'

"Commercial life insurance also interests the banker when he is passing on a credit risk from a moral standpoint. Of this, the president of the Chase National Bank of New York says: 'When a man comes to us to borrow, we want to know how much life insurance he carries, not so much because of its bearing on his financial power, but as an indication of his type of mind, for the type of mind that induces a man to insure his life, is the type of mind which makes for success in business.'

"Until lately business insurance has been considered mainly in connection with the affairs of the larger firms. It is, however, becoming recognized that this form of protection is just as necessary, if not more so, to the smaller corporation, partnership or business man. One need only look round the city corner or enter a village to discover a modest partnership, be it a grocery, butcher or dry goods store, or a general store, which at this moment needs a class of protection for its business and its credit which the life insurance company alone can provide.

"The banker and wholesaler feel they are vitally interested in how this partnership customer will be affected by the death of one of the partners. What funds will be available for the purchase of his interest or for the continuation of the business? There may not be available sufficient capital or borrowing power to enable the surviving partner to purchase the interest of the deceased. Another partner with capital is difficult to find, particularly in a hurry. Frequently it means a winding up of the business with loss to all concerned."

PACIFIC COAST FIRE INSURANCE CO.

The Pacific Coast Fire Insurance Co. have moved to their own office building at 325 Howe St., Vancouver. This was formerly the Welton Block, and is a ten-story reinforced concrete structure. The building was acquired by the company some time ago, and in future will be known as the Pacific Coast Fire Building. The head offices of the company are on the ground floor. The company is experiencing a very successful year, under the able management of T. W. Greer, and has taken $25,000 of the present Victory Loan, which makes a total of $192,000 war loan securities now held.

RAILWAY WAR BOARD PERMANENT

At a meeting held in Montreal on November 8th it was decided that the Canadian Railway War Board should be continued, but that from December 1st it should be called the Railway Association of Canada. The officers of the organization are: Lord Shaughnessy, chairman of the board; H. G. Kelley, chairman of the executive committee; A. H. Smith, D. B. Hanna, E. W. Beatty, and J. N. Beckley.

WANT CANADIAN EXCHANGE RATE

The practice of shipping companies in Montreal in applying the New York rate of exchange for determining freight charges collected in Britain on goods shipped from Canada has brought a protest from the Canadian Trade Commission. The Trade Commission points out that British importers naturally believe Canada should be independent of the United States in these matters, and has asked the shipping companies to apply the Canadian rate of exchange. This would mean a saving of about 16 cents in the pound sterling, representing the 4 per cent. premiums enjoyed by the United States currency in this country. The Canadian government merchant marine has already adopted the Canadian rate of exchange.

LONDON AND SCOTTISH ASSURANCE

Owing to the similarity of title of the London and Lancashire Life and General Assurance Association with that of the London and Lancashire Fire Insurance Co., which has in the past caused some confusion, the directors of the former have entered into an agreement with the London and Lancashire Fire Insurance Co. whereby the name of the London and Lancashire Life and General Assurance Association has been changed to the London and Scottish Assurance Corporation, Ltd. This name is a combination of its former title and that of its subsidiary company, now operating in Canada, the Scottish Metropolitan Assurance Co., Ltd. The new title is shorter and more convenient. The London and Scottish has, during the past several years, made substantial progress; the total assets now exceed $25,500,000. The directors have recently taken powers to carry on marine insurance, at the same time increasing the capital of the company to $5,000,000, $3,000,000 of which has been offered for subscription and duly subscribed for, $600,000 being paid up thereunder.

GROWTH OF FIRE AND ACCIDENT INSURANCE

A meeting of the Montreal Rotary Club on November 4th was addressed by Pemberton Smith, his subject being "Insurance." In outlining its origin and development he said that fire insurance was started in 44 B.C. in ancient Rome, but was abolished by the city fathers because the man who had the organized fire brigade owned something like a fifth of all the house property as a result of his operations and charges for combating fires. From then until A.D. 1435 the world did without insurance, and those were known as the Dark Ages. Then an association was formed in Barcelona, and in the sixteenth century marine insurance was begun. The fire insurance organizations came as a result of the great fire of London in 1666, but the first fire insurance company was actually chartered in 1696. The first charter on this side of the Atlantic was established in 1790 for "doing business in the United States, Canada and Nova Scotia." In the olden days each of the fire companies had their own brigades which put out the fires on properties that they had insured, and if a building burned that was not insured, the companies used to race to the scene of the fire, and the first one there got the job of putting the fire out and was paid for it by the Corporation of London.

WHEN SELLER IS EXCUSED FROM MAKING TITLE

Action of Purchaser Prevented Seller From Furnishing Good Title, and Purchaser Must Accept Loss

By M. L. Hayward, B.C.L.

IN the case of Meeker vs. Nicola Valley Lumber Company, a recent decision of the Supreme Court of Canada, the facts were that the Lumber Company agreed to sell to Meeker a tract of land in the province of British Columbia occupied and used by the Lumber Company as a sawmill site, comprising 108 acres, and also a number of timber licenses, for $25,000, under an agreement of sale providing that Meeker was to pay $10,000 in cash and take possession of the mill site and timber licenses and to pay the balance of $15,000 as soon as the Lumber Company obtained a grant from the Crown of the 108-acre mill site.

At the time of the sale the Lumber Company was operating a small temporary mill at the northern end of the mill site, but, acting on expert advice, Meeker built a new and permanent mill on the southern end, so far away from the former mill and so wholly disconnected from it, that the Crown refused to consider it as part of the mill site and, consequently, the Lumber Company could only obtain a title from the Crown to 27 acres of the original 108-acre mill site.

Meeker then refused to pay the balance of $15,000 on the ground that the Lumber Company had not obtained a title from the Crown to the whole 108 acres according to the agreement, but the Supreme Court of Canada decided in favor of the Lumber Company on the ground that Meeker, by his own conduct, in changing the location of the mill, had precluded himself from setting up the claim that the Lumber Company had not carried out its agreement in full in reference to the title, a defence which, under ordinary circumstances, he might have raised.

Assumed a Negative Obligation

"I concur with the opinion of the judges of the Court of Appeal for British Columbia," said Judge Duff, "that Meeker is precluded by his conduct from insisting upon exact fulfilment of the condition that the Lumber Company should make title to the parcel of 81 acres, which, by the terms of the contract, was attached to its right to require payment of the last instalment of $15,000. When the agreement was executed all parties contemplated that a title to this property should be acquired under the provisions of the law and the practice of the department governing the granting of the mill sites; and without going so far as to hold that by implication Meeker was bound actively to take all steps with regard to actual use of the property and the improvement of it as might prove to be necessary to enable the Lumber Company to comply with the conditions exacted by the department, there appears to be abundant ground for holding that Meeker, at least, assumed the onus of an obligation to do no act in relation to the property or by any communication with the departmental authorities, which should hinder or be calculated to hinder the Lumber Company in its efforts to obtain a grant of it for the purpose of a mill site.

"That must necessarily be so because as it would be the duty of the departmental officers to satisfy themselves upon the subject of the purpose for which the applicants intended to use the property, the conduct and the representations of the Lumber Company's assignee, if inconsistent with the Lumber Company's representations as to the destination of the property, might gravely compromise or entirely neutralize the Lumber Company's exertions. To apply the test often suggested by eminent judges, it is not possible—having regard to the dictates of common experience—to doubt that if the subject had been mentioned at the time the contract was entered into that Meeker would not have been left free to obstruct by his conduct and declarations the Lumber Company's application for a grant, while retaining in full literal force the condition that the grant should be produced in order to entitle the Lumber Company to receive the final instalment of the purchase money.

"This obligation assumed by Meeker was not fulfilled and in consequence, mainly if not entirely, of the non-fulfilment of it, it became impracticable to obtain a grant in the manner contemplated or without the expenditure of a sum of money so much greater than the expenditure that would have been required, if events had been allowed to pursue their normal course, as to make it impossible to require the exact performance of the condition without plainly defeating the intention of the parties."

CIVIC BUREAU OF INFORMATION

Montreal is to have a civic bureau of information, and Col. F. D. Gaudet, city commissioner of civil service, is to be in charge. The bureau, which was obtained through the work of the Chambre de Commerce, will commence operations in January. A delegation, in reporting to E. R. Decary, president of the Administrative Commission, pointed out the need for having a civic information bureau. The reply of Mr. Decary, as laid before the Chambre by the committee, is to the effect that such an organization is being completed at the city hall, and that the work of Col. Gaudet, in addition to the reorganization of the personnel of the city hall, also included the establishment of a bureau of information. Mr. Decary added that this bureau would be formed gradually because of the restrictions as to finance, but would be able to meet the demands for information and to call the attention of industries to Montreal.

UPWARD TENDENCY OF PAPER STOCKS

In a review of stock market conditions the latest number of "Investment Items," issued by the Royal Securities Corporation," says:—

"During the past few weeks the stock markets, both in Canada and in New York, have evidenced a strong upward tendency throughout practically all sections of the lists, a movement accompanied by a record volume of transactions. Though, as is inevitably the case in such movements, speculation has been carried to an excess in some directions, we are of the opinion that the rise has been predicated on an improvement in the labor situation and has been in the main a proper readjustment of market quotations to the greatly enhanced replacement value and earning power of sound corporation, and particularly industrial, securities. No class of securities in our Canadian markets has felt this upward impulse more strongly than the pulp and paper group, a fact that can scarcely cause surprise to readers of *Investment Items*. For we have repeatedly drawn attention to the almost phenomenal development and promising future of the Canadian pulp and paper industry, a condition which was bound to be reflected sooner or later not only in a broad market for the senior securities of the stronger Canadian pulp and paper corporations, but in a marked rise in the market values of the preferred and common shares of those companies. Though reasonable caution is advisable after a movement so pronounced, we are far from holding that present prices have discounted the full enhancement in the asset values or the earning capacity of the more representative Canadian pulp and paper companies. Authorities are in agreement that the Canadian pulp and paper industry is but in its infancy, and that further substantial profits still await real investors in both the senior and junior securities of carefully chosen Canadian pulp and paper corporations possessing adequate resources of wood and water-power. A large factor in the recent rise is the practical certainty of increased pulp and paper prices and the practically already effective settlement of the long-standing newsprint controversy between producers and publishers on terms which mean that the low prices previously allowed Canadian publishers for 10 per cent. of the Canadian output of newsprint will be increased, thereby also increasing both prices and profits derived from the remaining exportable 90 per cent."

EMPLOYMENT CONDITIONS IN CANADA

Most Industries Show Increase in Number of Employees—Many Casual Vacancies Filled

THE last report of the Employment Service of the Department of Labor on employment conditions in Canada for the week ended October 25th last shows an increase in placements as compared with the returns of the previous week. During the week the 92 offices reported that they had referred 8,117 persons to regular positions, and that 7,138 of these had received employment. This represents an increase of 1,118 as compared with the preceding week, when 6,020 persons were given employment, and more than covers the decline in last week's figures; due largely to the effect of the Thanksgiving holiday. In addition, 1,634 casual jobs were supplied as compared with 1,248 for the week ending October 18th. A summary of the work of the offices shows that the placements in regular work throughout Canada from March 1st to October 25th totalled 206,460, of which 13,078 were for women and 193,382 were for men. The number of casual jobs supplied during the same period totalled 25,256.

During the week 9,362 applicants were registered, of whom 657 were women and 8,705 were men. When compared with the 8,228 applicants registered during the previous week, these figures show an increase of 1,134 applications. The number of vacancies notified by employers during the week totalled 9,152, of which 741 were for women and 8,411 were for men. This represents an increase of 334 vacancies over the returns for last week, when 8,818 were reported. Of the placements in regular employment, 349 were women and 6,789 were men. The increased activity shown this week is noticed chiefly in Ontario and the three prairie provinces, the figures for eastern Canada remaining about the same. The number of soldiers reported as placed was 2,402, or 33.6 per cent. of the total placement.

Of the placements in regular employment, 16 were reported by Prince Edward Island, an increase of 2; 130 by Nova Scotia, an increase of 32; 257 by New Brunswick, a decrease of 41; 559 by Quebec, a decrease of 96 ; 2,049 by Ontario, an increase of 210; 1,778 by Manitoba, an increase of 929; 588 by Saskatchewan, a decrease of 56; 1,052 by Alberta, an increase of 190; and 709 by British Columbia, a decrease of 52.

General Employment Increase

Returns for the week ending October 25th were tabulated from the reports of 4,631 firms, of which 2,247 were in Ontario, 996 in Quebec, 437 in the maritime provinces, 588 in the prairie provinces and 363 in British Columbia. These firms had increased their staffs from 658,525 persons during the preceding week to 661,572 persons during the week in question, an increase of 3,047 persons, or .5 per cent. The same firms anticipated a further increase of 765 persons, or .1 per cent., during the week ending November 1st. Returns for the week ending October 18th were tabulated from the reports of 4,682 firms with 674,032 persons on payroll, which firms had increased their staffs by 1,898 persons, or .3 per cent., and anticipated an increase of 2,165 persons, or .3 per cen., during the week ending October 25th, which increase the returns for that week show to have been more than realized.

Plus industries— those that registered net increases in the number of persons employed—with their respective percentage increases, were: Building and construction, 1.7 per cent.; commercial and mercantile, 2.2 per cent.; lumbering, 1.1 per cent.; clay, glass and stone products, .5 per cent.; chemicals, 1.0 per cent.; food, drink and tobacco, .4 per cent.; leather and leather goods, .3 per cent.; metals, .4 per cent.; pulp, paper and printing, .4 per cent.; textiles, .5 per cent.; quarrying and mining, 1.2 per cent.; railway construction, .3 per cent.; railway operation, .4 per cent., and miscellaneous, .3 per cent. The most appreciable gains were thus registered by the same firms which registered the greatest gains during the preceding weeks. These included metals, textiles, quarrying and mining, and commercial and mercantile. Commercial and mercantile registered by far the greatest numerical gain, probably accounted for by the increase in staffs in anticipation of the holiday trade. The gain in lumbering is noticeable as well, this group during the preceding weeks having anticipated gains which were not realized, probably due to the difficulty of obtaining men for bush operations so early in the season. With the exception of commercial and mercantile, chemicals, pulp, paper and printing and railway construction, all groups anticipated substantial increases during the week ending November 1st. Lumbering, metals, textiles and quarrying and mining anticipated that their gains would be maintained. Railway construction was the only group which anticipated a more than nominal decrease.

The only minus industries—those that registered net decreases in the number of persons employed—with their respective percentage decreases, were: vehicles, .3 per cent., and woodworking, .2 per cent. A further decrease in the vehicle group was anticipated for the week ending November 1st, while woodworking anticipated a compensating increase.

HYDRO RADIAL PLAN IN ONTARIO

Sir Adam Beck, chairman of the Ontario Hydro-Electric Commission, explained the plan for a railway from Elmira to Hamilton at a meeting of municipal representatives in Galt on November 6th. The capital cost is estimated at $6,530,659, and the annual revenue at $971,247.

BRITISH CANADIAN TRUST, LTD.

In the ninth annual report of the British Canadian Trust, Ltd., for the year ended August 31st, 1919, a revenue of £32,519, principally from investments, is shown. Interest on borrowed money required £11,669, and income taxes £6,018; £2,000 was transferred to contingent fund and £2,000 to reserve fund. After paying dividends totalling £9,285, £3,015 was carried forward, compared with £3,187 brought forward from 1918.

The capital of the company is £250,000 and reserves and undivided profits total £25,047.

Debentures and deposits total £250,056. Assets, as at August 31st, 1919, were £526,438, compared with £504,666 the previous year. Investments total £510,131, made up of mortgage loans £316,044, real estate £23,573, bonds and stocks £150,595, and British government securities £19,918. The British Canadian Trust is an English company, the Royal Trust Co. being its agents in Canada.

MUNICIPAL SINKING FUNDS IN QUEBEC

In an address before the Sherbrooke Board of Trade on November 7th, Oscar Morin, deputy minister of municipal affairs in the province, described some of the changes brought about since that department was organized a short time ago. He also referred to the difficulties encountered under the present aldermanic system, where inexperienced men were expected to handle the important business of a municipality when only a small portion of their attention could be given to it. Mr. Morin mentioned some of the innovations introduced into the municipal affairs by the department, including the law giving the government control over the sinking funds destined to meet the loans contracted by the municipalities, thus giving the people seeking bond increases confidence in the bonds of the municipalities of the province, and assured the setting aside of ready money for the meeting of the obligations of each community. The security being good, the community might, on application to the government, deposit the bonds elsewhere, but as the sinking fund was to be carefully guarded, the advice of the department could be at any time obtained as to the placing of the bonds.

TELEGRAPH COMPANY'S LIABILITY TO TRANSMIT

THE Canadian Manufacturers' Association's application to the Board of Railway Commissioners for the imposition of penalties upon telegraph companies for non-delivery of messages was considered by the Board recently, and judgment issued on October 7th, dismissing the application. The judgment said, by way of review:—

"The whole wide question of the liabilities attaching to telegraph companies, involving the point complained of, was fully considered by the Board upon the application which resulted in the order above referred to (No. 162). The question was further, incidentally, considered by the Board on the application of the Great North Western Telegraph Company, the Canadian Pacific Railway Company's Telegraph, and the Grand Trunk Pacific Telegraph Company, for an order approving conditions varying those approved by the Board by Order No. 162, the object of such application being to vary the conditions so sanctioned in a manner which would more fully relieve the telegraph companies from liability, to sender or addressee, whether from negligence or otherwise, in respect of receipt, transmission, and delivery of messages.

"The application last referred to, was heard at Ottawa on April 17th, 1917, and, following a considered judgment of the then Chief Commissioner, dated July 14th, 1917, Order No. 26378 was made, dated July 26th, 1917, dismissing the application, but reserving to the applicants leave to apply for a stated case, in writing, for the opinion of the Supreme Court of Canada, upon the questions of law involved in the application.

Supreme Court's Opinion Asked

"A stated case has never been presented to the Supreme Court—has not been settled by the Board—but a draft case has been submitted to the applicants who have not yet concurred in it, although by written memorandum they, the applicants, have suggested that the case to be submitted for the opinion of the Supreme Court of Canada, should contain the following questions, namely:—

> "(1) Was the Board right in holding that a condition in the contract purporting to limit the company's liability to the addressee of a telegram is, under the law of the province of Quebec, ineffectual for that purpose?
>
> "(2) Has the Board power by regulation—independently of the contract—to limit the liability of the company to the addressee of a telegram?
>
> "(3) Would such a regulation be effectual for such purpose under the law of the province of Quebec?

"In the judgment of the late Chief Commissioner, upon the application above referred to, the law is fully discussed with regard to the applicability of the Civil Code of the province of Quebec, article 1053, as distinguishing liability affecting the transmission and delivery of telegraph messages from that settled by legal decisions of our courts, and of the English courts, referred to in the judgment of the late Chief Commissioner. It is open to some doubt, as the late Chief Commissioner concludes, as to whether (at any rate with regard to the conditions discussed in the previous application) the Civil Code of the province of Quebec referred to may not operate, or intervene, in a special manner to regulate and define liability upon these telegraph messages as between the company and the sender (possibly the addressee) in a manner different from that laid down by the courts, and, for the purpose of settling this important question and looking towards obtaining a decision which will secure uniformity, leave was reserved to state the case referred to for the opinion of the Supreme Court. Pending the submission of such a case and the answers of their Lordships of the Supreme Court of Canada thereupon, there must still remain the doubts expressed by the late Chief Commissioner with regard to the law, especially as regards the province of Quebec.

"In his written judgment, above referred to (page 4), the late Chief Commissioner says:—

> "In so far as the contracts under which telegrams are dispatched are concerned, it was admitted at the hearing that the contract settled by Mr. Scott throws a greater liability on the telegraph company, and of course increased the liability over that which previously existed in Canada."

"My view is that, the Board having settled conditions of transmission which contain, I think, reasonable and adequate provision to guard against errors and to insure correctness in the transmission and delivery of messages, and in view of the questions of law which are raised and which are standing for the opinion of the Supreme Court of Canada, and which, inferentially at least, affect the questions which we are now asked to decide, I think it would be extremely inadvisable for the Board to go any further in the sanctioning of additional conditions."

The judgment is signed by Commissioner Boyce, and concurred in by the other members.

TRADE FOR YEAR ENDED SEPTEMBER, 1919

A statement of Canada's trade for the twelve months ended September, 1919, shows a reduction both in imports and exports, as compared with the figure for the previous period. Compared with the 1917 figure a greater decline is shown. The statement shows that imports from the United States are decreasing and exports are increasing. Imports from the United Kingdom are increasing, while exports are on the decline. Exports to the British colonies are increasing largely. The following are the details:—

	Twelve Months ending September		
	1917	1918	1919
IMPORTS FOR CONSUMPTION	$	$	$
Dutiable Goods	544,212,417	514,219,510	550.516.656
Free Goods	461,092,232	384,332,374	335,617,387
Total imports (mdse.)	1,005,304,649	898,551,884	686,134,043
Duty collected	165,801 996	154,869.499	158,435.970
EXPORTS

OCTOBER FIRE LOSSES

Total for Month Lowest This Year—Decrease of Over $10,000,000 to Date

The Monetary Times' estimate of Canada's fire losses for the month of October, 1919, is $1,023,288, compared with $1,940,272 in September, and $5,119,145 in October a year ago. The following is the summary for October:—

Fires exceeding $10,000	$806,000
Small fires reported	83,816
Estimate of unreported fires	133,472
Total	$1,023,288

The Monetary Times' record of the past three years and this year to date shows the following monthly losses:—

Month.	1916.	1917.	1918.	1919.
January	$ 1,649,217	$ 1,918,660	$ 2,688,556	$ 3,915,290
February	3,275,600	2,009,953	2,243,762	1,091,834
March	1,406,501	2,050,650	1,682,286	2,154,095

Decrease of $10,000,000 For Year

As can be seen from the above table, there is a substantial decrease in the loss, both for the month and for the year. The total for October is the lowest on record this year. The loss for October, 1918, was $5,119,145, but to make a fair comparison with the total for the same month this year, a deduction of about $3,000,000 must be made, because of the unusual fire which occurred at the plant of the Imperial Munitions Board at Trenton, Ont. For the year to date, a decrease of over $10,000,000 is shown in fire losses in Canada, compared with the same period last year. While many large fires have occurred this year, last year was a record in this connection.

The largest fire last month occurred at the plant of the British Columbia Fir and Lumber Co., Vancouver, B.C., when a loss of $160,000 was recorded. A block of dwellings and stores was destroyed at St. Raphael de Bellechasse, Que., with a loss of $150,000. Seventeen other fires with a loss of over $10,000 were also reported.

$10,000 and Over

The following is a list of fires last month at which the loss amounted to $10,000 and over:—

Wiarton, Ont., October 1, chair factory of the Canada Furniture Mfg. Co., $75,000.

North Sydney, N.S., October 1, Western Union Telegraph Office and adjoining fruit store, $10,000.

St. Leonards, N.B., October 1, the Cyr Hotel, $30,000.

Pembroke, Ont., October 2, Windsor Hotel stables and residence, $13,000.

Montreal, Que., October 4, premises of the De Laval Co., $50,000.

Toronto, Ont., October 7, garage and contents in rear of Baldwin St., $10,000.

Quebec, Que., October 8, factory of Le Mesurier Tobacco Co., $17,000.

Simcoe, Ont., October 11, St. James' Methodist Church, $30,000.

Thornbury, Ont., October 12, Thornbury Grist Mill, and electric lighting plant, $30,000.

Stratford, Ont., October 16, premises of Stratford Flax Co., $19,000.

St. Raphael de Bellechasse, Que., October 14, twenty-five private dwellings, and four stores, $150,000.

Vancouver, B.C., October 15, plant of the British Columbia Fir and Lumber Co., $160,000.

Coaticook, Que., October 18, lumber plant of A. H. Cummings and Son, $10,000.

Fort Rouge, Man., October 19, warehouse at the Canadian National Railway shops, $100,000.

Cookshire, Que., October 21, residence of L. W. Smith, $10,000.

Winnipeg, Man., October 23, premises of M. Pasichnick and adjoining building of Ukrainian Publishers, $33,000.

Edmonton, Alta., October 23, McLure and Stewart grocery store building, $10,000.

Penetanguishene, Ont., October 28, sawmill of McGibbon Lumber Co., $39,000.

Spring Hill, Que., October 30, sawmill of N. Rosseau, $10,000.

Destroyed or Damaged

Among the structures damaged or destroyed last month were: Factories, 7; warehouses, 2; barns, 6; residences, 33; business buildings, 6; office, 1; stores, 9; stable, 1; hospital, 1; hotels, 4; garage, 1; lumber camp, 1; church, 1; plants, 3; printing plant, 1; lumber plants, 2; lumber mill, 1; sawmills, 2; apartment house, 1.

Among the causes reported were: Spontaneous combustion, 1; gasoline catching fire from lantern, 1; burning rubbish pile, 1; defective furnace pipe, 1; sparks from furnace, 1; incendiarism, 1; spark from picking machine, 1; boiler explosion, 1; boys smoking cigarettes, 1.

Many Fatalities

The following is a list of fires at which fatalities occurred:—

Oshawa, Ont., October 1, fire from bonfire	1
Vancouver, B.C., October 2, trapped in burning house	1
St. Henri, Que., October 3, putting kerosene on stove	2
Chatham, Ont., October 8, explosion of gasoline	1
Boakview, Ont., October 9, trapped in burning coach	1
Maple Ridge, B.C., October 9, clothing catching fire	1
Gore Bay, Ont., October 10, explosion of gasoline	1
West Oxford, Ont., October 15, explosion of coal oil stove.	1
Brigden, Ont., October 16, clothing catching fire from stove	1
Glace Bay, N.S., October 19, explosion of alcohol	1
Sunibend, Alta., October 17, clothing catching fire	1
Hornepayne, Ont., October 29, trapped in burning shack.	2
Swastika, Ont., October 30, trapped in burning house	1
Toronto, Ont., October 30, playing with matches	1
Total	16

The following table, compiled by *The Monetary Times* shows deaths caused by fire during the past seven years and this year to date:—

Month.	1912.	1913.	1914.	1915.	1916.	1917.	1918.	1919.

THE SECRET OF SUCCESSFUL SALESMANSHIP

If the salesman has unlimited confidence in the company he represents and in the goods he is offering, it will not take long to communicate that confidence to the prospect. And this applies to Life Insurance more than to any other article. Agents of the Mutual Life of Canada meet with extraordinary success for that simple reason—they devoutly believe in Life Insurance and above all in "Mutual" Life Insurance. The Mutual Life has been conducted for fifty years exclusively in the interests of its policy-holders. The result is an unprecedented demand to-day for Mutual Life Policies. With the Mutual "the secret of successful salesmanship" is simplicity itself—the Agent knows that he has the Company and the Policy that the prospect NEEDS. The rest soon follows.

BE A MUTUALIST.

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

COMPULSORY SAVING

How many of us, young people especially can systematically save money? It is so perilously easy to fritter away small sums.

Here is seen one of the most valuable functions of Life Insurance. A Life Policy compels systematic saving, or the benefit of previous payments is lost. It is well to recognize one's limitations, and if only for the sake of saving money to advantage, it is wisdom to insure.

The Great-West Life Policies provide Insurance on most attractive terms. Their wide popularity is based on the solid foundations of low premium rates and remarkably high profit returns to Policyholders. Details gladly given on request.

INDUSTRIAL EVENTS OF THE WEEK

New Pulp and Paper Mill for Port Arthur—Quebec Industries—British Interest in Canadian Iron and Coal

ANOTHER important step has been taken in connection with the development of the pulp and paper industry in the Dominion. Definite announcement has been made this week of the location of a $5,000,000 pulp and paper plant at Port Arthur, Ont. A new company has been formed under the name of the Great Lakes Paper Co., Ltd., with headquarters at that city. The men principally interested in the new enterprise are: Lewis Alsted, president of the Combined Locks Paper Company, of Combined Locks, Wisconsin; George Seaman, president of the Seaman Paper Company of Chicago; James Whalen, a director of the Whalen Pulp and Paper Company. Contracts for power have been signed, and everything is in readiness to proceed with the preliminaries of construction. The first unit of construction is to be a ground wood mill capable of turning out 30,000 tons annually, a sulphide mill to produce 7,500 tons annually and a newsprint mill to turn out between 33,000 and 35,000 tons per year. The plant will be built so that it can be extended from time to time as conditions warrant. The power to operate the plant is to be furnished by the Hydro-Electric Power Commission from the Nipigon River development. The company has signed contracts for a minimum of 12,000 horsepower and a maximum of 16,000 horsepower to be delivered at the plant at a cost of $17.50 per horsepower. The price of power is to be reduced as additional energy is taken by the company and, in the event of the price being reduced by outside consumers taking the power, the company is to enjoy the benefits of a reduction. It is understood the new company will use the Pic and Black Sturgeon pulpwood limits for supply of raw material.

The location of the mill at Port Arthur is the result of negotiations, dating back to the sale of the Pic and Black Sturgeon timber limits, purchased by tender by J. J. Carrick, of that city. Mr. Carrick entered into negotiations with a number of influential pulp and paper men in the United States and Canada and arrangements were made a year ago for the construction of the plant, but the uncertainty of securing a satisfactory contract with the Hydro-Electric Commission at that time forced the promoters to look to other fields. Fort William was considered on the grounds that a suitable supply of power could be obtained from the Kaministiquia Power Company, but this summer a number of business men conferred at Toronto and secured from Sir Adam Beck a promise of cheaper power, which would enable the company to locate in Port Arthur.

A further development of the paper industry will be started shortly in the province of Quebec, by the firm of Price Bros., and Co. The site for a new town is about three or four miles east of Chicoutimi, and will be called "Saguenay." Sir Wm. Price, president of the company in outlining the plans, said:—

"My board has definitely decided to start work without delay on a large new shipment mill in the Saguenay district, with a capacity of between four hundred to five hundred tons. When our new plant is operating, our total output of paper and board will be in the neighborhood of 800 tons per day."

Lack of Power for Baldwin Plant

Directors of the Baldwin Canadian Steel Corporation, who are proposing to operate the Ashbridges's Bay plant, Toronto, formerly occupied by the British Forgings, Ltd., were entertained by members of the Toronto city council this week. The two directors present were J. C. Davies, managing director of Baldwin's Swansea plant, and Roger Beck, chairman of the Swansea Harbour Board, and a director of Baldwin's. Mr. Davies said:—

"We hope to develop an industry that is going to add to the prosperity and revenue of the city. We want to operate the whole of the steel plant now idle at Ashbridge's Bay. Owing to the supply of power and the conditions of supplying, we will not be able to manufacture at that plant in the immediate future. This will place us under an obligation to the United States for the supply of steel, while we want to make our plant one self-contained unit and manufacture our own steel."

In explaining the power question, Mayor Church stated that at present, the Hydro could not supply sufficient power for the wants of the firm. The mayor further declared that Toronto was to-day shorter in power than during the war period. The reason was found in not only new firms opening up in the city but in industries that ceased work during the war, recommencing operations.

Other Developments in Ontario

Announcements have been received of the establishing other new industries in Ontario, and of the expansion of those existing. The Chatham Chamber of Commerce announces that the Gray-Dort Motors, Ltd., has taken over the building of the Gray-Sons-Campbell Co., giving a capacity for more than double the output of last year. The plant of the Dowsley Spring and Axle Co. is again in full operation and running twenty-four hours a day. The spring department was practically wiped out by fire some weeks ago, and in thirty days a new building of brick, concrete and steel, was erected and operations were beglun. This new building is larger and better than the one which was burned. The Canadian Fertilizer Co. is constructing quite an addition to their plant, and the T. H. Taylor Co. is also building an addition to their woollen mill.

W. M. German, industrial commissioner for Welland, in his report to the city council, states that there are excellent prospects of obtaining four large industries for the city. Three of the industries are American, and one of Toronto. McCaskey Systems, Ltd., Toronto, are looking for a location outside of that city. Messrs, Smith and Sons, of Buffalo, manufacturers of wire specialities, manufacturers of High Speed Tools at Albany, and an automobile concern, have been acquainted with Welland industrial prospects, and it is possible that those four industries will locate in the community.

The Canadian General Electric Co., has bought the factory formerly occupied by the Mooney Biscuit and Candy Co., Stratford, and just as soon as the necessary repairs can be made and equipment installed the industry will be in operation with probably 200 employees by the end of the year, and as high as 700 workers within a reasonable time. A subsidiary industry of the Canadian General Electric industry is already established there in the Canadian Allis-Chalmers plant, managed by William Preston.

Arrangements have been completed whereby the H. A. Wood Mfg. Co., have secured the large cannery building in Belleville, and will immediately commence installing machinery for the manufacture of automobile valves and other valves for high pressure work. This company owns the Canadian rights of the Wood Airtight Valve Co., Ltd., and is capitalized at $1,000,000. It is expected that three hundred employees will be engaged when the factory is going to its full capacity. The city council has fixed the assessment at $10,000 per annum for ten years.

The Fisher-Wilkie Foundry Co., which has an authorized capital of $500,000, proposes to build a $200,000 factory in Sandwich.

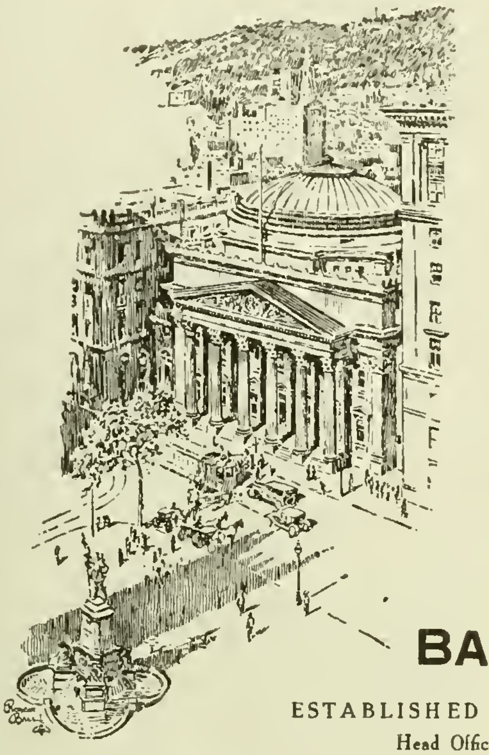
The Barrie Board of Trade has been dissolved as an organization, and the new Barrie Community Association, which will have in its field of work, a wider and broader scope of activities than has ever been held by the average board of trade and civic association combined, has been formed instead.

Quebec Industries

A visitor to Quebec city recently, suggested that an agricultural implement factory to manufacture the $5,000,000 worth of agricultural imports now coming into Canada, be established, and he mentioned the province of Quebec as a possible location. The utilization of the former Ross Rifle plant was suggested.

The Cluett-Peabody Co., will locate a branch at Sherbrooke. The industrial committee of the board of trade has been negotiating with the company for some time past.

FOREIGN TRADE



MANUFACTURERS, Exporters and Importers will find our Foreign Branches of greatest assistance in handling foreign business.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

and a branch plant is practically assured. A new factory for the weaving of woollen goods will be constructed in Matane, and will probably be ready by next spring. The wool will be purchased if possible in the district.

The H. W. Gossard Co., Inc., have decided to locate a Canadian plant at Drummondville. The labor market and power service were the ruling factors in the decision. As a consequence the company will remove the two Canadian plants from Toronto, where they have been operating for some time, and do all the work at Drummondville. The company operates a large plant at Chicago, and does a large Canadian export business.

British Interest in Iron and Coal

The report is received that the main purpose underlying the proposal of British interests to buy largely into the Dominion Steel Corporation with a view to controlling its policy, is the exploitation of the iron ore and coal deposits of the company on a large scale in the British and foreign markets. It is believed that both properties of the big Canadian industry can be worked on such a scale that their output can be laid down in the British market at a good profit, in view of the large increase in the cost of British coal and that iron ore can be placed on the market under existing circumstances which will be able to compete favorably as to price with any of the other producing countries in the same line.

The development of such an industry implies an important shipping policy. Shipping must be provided on a liberal scale to make the development of the business possible It is the general belief that a new company will be formed to provide ships suitable for the transatlantic iron ore and coal carrying trade.

Western Developments

A decision has been made by the Winnipeg Board of Trade to inaugurate a publicity campaign, and the city's resources, industries and general development will be made known to the public by the issuance of a number of booklets. The publicity bureau now has an extensive mailing list, covering several thousand manufacturing concerns and other institutions. A similar campaign has been discussed by the Regina Board of Trade, and the question has been submitted to the city council.

Other industrial developments have been reported from the west. The directors of the Imperial Oil, Ltd., have been looking over the prairie provinces. At a banquet held at Regina recently, President Stillman expressed the hope that the company would some day be able to develop one of the great resources of the western prairies instead of being dependent, as it is now, on sources of supply from foreign areas. Crude oil is being imported from the United States, Mexico and Peru.

The biggest deal in the history of the lumber business in Manitoba has just been negotiated, the Finger Lumber Co., having disposed of its 324 miles of timber limits in The Pas district for $1,500,000 to C. J. and D. N. Winton, of Minneapolis. This includes a large saw mill, planing plants and logging equipments. The deal becomes effective at once, and possession will be taken within a month.

After constructing 40,000 tons of wooden shipping during the last twenty-seven months, the Lyall shipyard in North Vancouver, B.C., is advertised for sale. During this period the shipyard used 22,000,000 ft. of Douglas fir and spent $2,500,000 in wages. The yard was originally started by the Wallace firm to build six auxiliary schooners for the Canada West Coast Navigation Co. At the peak of activities the yard employed 1,400 men.

At the twentieth annual meeting of the Royal Trust Co. in Montreal on November 11th the board of directors was re-elected. At a subsequent meeting of the board Sir Vincent Meredith was elected president and H. R. Drummond vice-president.

ONTARIO BOARDS OF TRADE

Daylight Saving, Fire Prevention, Tariff Investigation, and Subsidizing of Industry are Among Proposals to be Discussed

THE sixth annual meeting of the Ontario Associated Boards of Trade and Chambers of Commerce will be held in Toronto, November 20th and 21st. In accordance with the usual custom, resolutions have been prepared and sent in in advance. Toronto Board of Trade has submitted a resolution for daylight saving as a Dominion-wide measure. Goderich board is asking for a Royal Commission to examine the tariff. Other resolutions are as follows:—

By the Belleville Board of Trade: That provincial and Dominion governments publish an up-to-date report upon the minerals of Ontario, especially in regard to iron; that the taxes of departmental stores and mail order houses be apportioned among municipalities where the business is secured; that railway freight and express rates on coal, wood and food products be reduced to the minimum of cost on all nationally controlled lines in order to reduce the cost of living; that encouragement be given to the universal adoption of an empire trade mark and standard, and that immigration of British citizens be encouraged; that the aviation industry be subsidized for commercial and postal purposes.

By the Brantford Chamber of Commerce: That power be taken to place a prohibitive tax on foreign magazines of over 10,000 circulation in Canada which do not carry a Canadian section with proportionate rates to Canadian advertisers; that the highway between Brantford and Hamilton be concrete instead of bituminous macadam.

By the Guelph Chamber of Commerce: That a standard form of wording for customs invoices be adopted throughout the British Dominions.

By the Hamilton Board of Trade: That support be pledged to all measures of fire prevention.

By the Kingston Board of Trade: A shipbuilding bonus; the encouragement of good roads; that uniform rates for Hydro power be established; that an educational campaign for greater production be initiated.

By the Niagara Falls Chamber: That public utilities owned by the province be subject to municipal taxation.

By the Port Arthur Board of Trade: That the Dominion government erect a large blast furnace and steel plant at Port Arthur; that a bounty of fifty cents per ton be paid on all iron ore by the Dominion government for ten years.

By the St. Catharines Board of Trade: That the associated boards pledge themselves to work for social and industrial peace in Canada.

By the Toronto Board: That inquiry be made into the possibilities of a substitute for the present business tax; that the boards endorse the adoption by the Ontario government of a Canadianization policy providing for the education of native-born illiterates and foreigners in English and the principles of citizenship.

By the Kitchener Board: That Grand Trunk Railway branch lines be electrified by the Hydro-Electric Commission.

By the Hamilton Board: That all measures tending towards fire protection be encouraged.

RAILROAD EARNINGS

The following is a statement of the gross earnings of Canada's transcontinental railways for the first week of November:—

	1919.	1918.	Inc. or dec.
Canadian Pacific Railway

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Renfrew, Ont.	$ 17,500	6	30-years	Nov. 24
Peterborough County, Ont.	14,000	5½	20-years	Nov. 25
Toronto, Ont.	2,632,000	5½	1920-49	Nov. 27
Bridgeburg, Ont. ...	50,000	6	....	Dec. 1

Bridgeburg, Ont.—Tenders will be received until December 1, 1919, for the purchase of $50,000 6 per cent. debentures for additions to the public school.

Toronto, Ont.—Tenders will be received until November 27, 1919, for the purchase of $2,632,000 5½ per cent. serial gold bonds, due 1920-49. The issue is for various purposes. (See advertisement elsewhere in this issue.)

Bond Sales

Saskatchewan.—The following is a list of debentures reported sold from October 25th to November 1st, 1919:—

School Districts.—Lister, $3,600; Waterman-Waterbury Manufacturing Co., Regina. Toporoutz, $1,200; W. S. Middlebro, Owen Sound, Ont. Alandale, $3,000; Canada Landed and National, Winnipeg. New Insinger, $4,500, Pinto Creek, $4,000, Sewton, $3,500, Clow, $3,150; Geddie MacKay, Ltd., Regina. Rich Hill, $3,200; T. K. McCallum, Saskatoon. Rose River, $2,400; Bond and Debenture Corporation, Winnipeg. Green Farm, $1,000; C. M. Gripton, St. Catharines. Omega, $3,300; J. M. Hursch.

Rural Telephone Companies.—Ridpath, $5,500, Malvern, $32,350; Harris, Read and Co., Regina.

City.—Saskatoon, $1,000, $27,000, $2,976, $8,000, $34,000, $3,000, $3,250, $35,676, $36,477; Æmilius Jarvis and Co., Toronto.

Village.—Heward, $2,600; Geo. A. Ferguson.

Rural Municipality.—Gravelbourg No. 104, $5,000; Sask. Life Insurance Co., Regina.

Debenture Notes

Saskatoon, Sask.—The Local Government Board has consented to the expenditure of $350,000 in providing additional accommodation for the Collegiate Institute at Saskatoon.

Brantford, Ont.—A by-law will be submitted to the ratepayers at the January elections for the raising of $50,000 for a new grand stand.

St. John, N.B.—Debentures will be floated to the amount of $389,000 for various local improvements as follows: For waterworks, $318,500 5 per cent., 40-years; wharf repairs, $33,500 5½ per cent., 20-years; roads, $37,500 5½ per cent., 10-years.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from October 25th to November 1st, 1919:—

School Districts.—Woodlawn, $2,000 5-years 8 per cent. annuity. Whitfield, $3,400 10-years 6½ per cent. annuity.

Rural Telephones.—For 15-years 8 per cent. annuity, Montgomery, $3,630; Brampton, $1,050; Coleville, $2,700; Silton N.W., $2,450; Good Luck, $36,000; Tribune N.W., $13,900; Fielding, $1,100; Richburg, $7,700.

Portage la Prairie, Man.—A by-law has been passed authorizing the borrowing of $30,000 to meet the current expenditures of the year. On December 16 next, by-laws calling for the issuance of debentures will be submitted to the ratepayers as follows: City hall and community building, $100,000; waterworks, $12,000; electric light, $16,000.

Toronto, Ont.—Bonds to the amount of $4,000,000 will be issued by the Harbor Commission, the money to be spent for Toronto harbor development. The Harbor Commission will meet the debt charges on the whole amount, so that there will be no charge on the city's finances. The $4,000,000 will be available for expenditure next year, or as much of it as the commission may acquire. Finance Commissioner Bradshaw will be given a free hand as to the amount, time and manner in which the bonds will be issued. The last loan made by the Harbor Commission was last February, when bonds to the amount of $3,000,000, with interest at the rate of 4½ per cent., and maturing in 35 years, were sold to Messrs. Wood, Gundy and Co., Toronto, at 84.71.

CITY OF TORONTO

$2,632,000 SERIAL GOLD BONDS

Sealed tenders, endorsed "Tenders for City of Toronto Bonds," addressed to Thomas L. Church, Esq., Mayor and Chairman of the Board of Control, will be received by the undersigned until 12 o'clock noon, Thursday, 27th November, 1919, for the purchase of $2,632,000 bonds issued for various purposes, under several By-laws, and due 1920-1949 (approximate average maturity of the whole 14 years).

Full details as to the purposes for which the bonds are issued, and amounts maturing annually, together with financial statement of the City, will be furnished on application.

The legality of the issue has been approved by Mr. J. B. Clarke, K.C., of the legal firm of Clarke, Swabey & McLean, Toronto, and his favorable opinion will be engraved on each bond.

The bonds are an obligation of the City at large, are issued in coupon form, with provision for registration of principal, bear date September 1st, 1919, and are of the denomination of $1,000.

They are payable both as to principal and interest in gold in Toronto and New York, and carry interest at the rate of 5½% per annum, payable half-yearly on the 1st of March and September, the first half-yearly instalment of interest being due and payable on the 1st of March, 1920.

Engraved bonds will be ready for delivery upon acceptance of tender, but delivery must be taken and payment made not later than 4th December, 1919, with accrued interest from the 1st of September, 1919, to date of payment. Delivery and payment are to be made at the office of the undersigned, and in view of the premium on New York Funds, tenderers may submit two bids, one for payment in New York Funds, and the other for payment in Toronto Funds.

Tenders will be received for the bonds issued under any number, or all, of the By-laws, but not for a part of those issued under any one By-law.

A certified cheque, payable to the undersigned, for 2% of the par value of the bonds tendered, must accompany the tender.

Tenders specifying for bonds other than those herein described, or containing conditions varying from the above, will not be considered.

The right is reserved to reject any or all proposals.

T. BRADSHAW,
Commissioner of Finance.

NEWS OF MUNICIPAL FINANCE

Verdun Budget—Toronto Estimates Exceeded—Montreal Tax Collections Good

Edmonton, Alta.—The sum of $15,096 is claimed from the city by the Alliance Power Co., and the case has been carried to court. The amount is for power and steam supplies taken over by the city when the company suspended operations in September.

Lethbridge, Alta.—Collection of arrears of personal and business taxes owing the city has been placed in the hands of the R. C. Farris Agency at the rate of 5 per cent., with a minimum rate of $1 on each item collected. This has been considered necessary by the city council in that there is a large amount of arrears in business and personal taxes, and it is essential that these arrears should all be collected by December 31st.

Salmon Arm, B.C.—The financial statement of the city for the year ended December, 1918, shows that receipts totalled $11,116, and expenditures, $35,441. The balance of cash in the bank and on hand amounted to $5,675. Total assets for the year were $163,381, the principal items being: Taxes collected, $11,423; tax levy, $19,555; arrears of taxes, $5,829; sinking fund investment, $8,300. The total debenture liability at December 31, 1918, was $137,000.

Regina, Sask.—The 1919 taxes will be increased by about $1,593, this representing the amount of new business and additional income assessments added to the roll. During the full calendar year ended October 31, the total sum collected in taxes, including volunteer exemptions and discounts, was $1,612,080.84, as compared with a tax levy for 1919 of $1,643,606. The collections in the tax department, therefore, were only $35,000 short of the levy, but this shortage was more than made up by the redemptions paid in to the city treasurer's department on properties purchased by the city for arrears of taxes.

London, Ont.—The gross debt of the city is given at $7,574,000, of which $5,000,000 is recorded against the borrowing power of the city, which is placed at $5,819,570. The margin left to the city for borrowing purposes, according to City Treasurer Bell's last report, amounts to $803,744. The proposed debenture issues, which are mentioned elsewhere in this issue, will probably use up this margin if they are approved by the people. While more than a million dollars will probably be put before the people for their decision, some of the debentures, such as the building of new reservoirs, L. and P.S.R. and others, will not be charged against the borrowing powers of the city, as they are revenue producers. The city's revenue from all sources amounted to $1,669,901 last year. Assessment Commissioner Grant states that property assessment has advanced about 25 per cent. during the years of the war.

Nelson, B.C.—The city council has decided to invest $80,000 of its sinking funds in the new Victory Loan, bringing the total investment in the internal war loans to $245,000.

At the last meeting of the city council, the report of the city's finances up to October 31 last, was submitted. The report showed that the levy made for 1919 was $79,600 and that $70,800 had been collected, leaving a little less than $9,000 outstanding. The arrears of taxes had been reduced some $63,000, of which $20,000 was accounted for in the city's purchases of tax sale lots and the balance in cash, leaving a balance of some $30,000 in arrears to be collected. The collections for the nine months were some $100,000 more than in the same period last year. This year's levy for sinking fund and the arrears of taxes collected amounted to some $160,000, which has been placed to the credit of the sinking fund accounts. The gas company showed a deficit of $5,000 for the nine months, while for the corresponding period the street railway system had a deficit of some $3,000.

Verdun, Que.—The budget for the fiscal year November 1, 1919, to October 31, 1920, shows that the rate of general tax established for the fiscal year, apart from the special taxes that have been imposed by by-laws of the city now in force, is 7½ mills, that is to say, a rate of 75 cents per $100 on the valuation of the immovable taxable property of the city. A by-law was also authorized to impose upon all occupants or lessees of buildings an occupant and lighting tax to cover the expenditures which will be made by the city. This tax will be distributed as follows: Two and one-quarter per cent. of the rental value of the buildings located within the city for the cost incurred for the lighting system; 4 per cent. for police and fire protection; 2¾ per cent. for street service and 2 per cent. for sewage service, making a total of 11 per cent. on rental values. The budget passed after a brief discussion. As submitted, the budget report called for a general tax rate of 8 mills, and it was passed with an amendment, fixing the rate at 7½ mills. The total expenditure authorized and appropriated is as follows: Finance committee, No. 1, under which head comes the bond interest, sinking fund charges, charges of the provincial government and charities of the city, $220,860; finance committee, No. 2, $33,600; works committee, $46,900; police and fire, $46,700; recorder's court, $1,450; health, $14,500; city hall, $3,600; parks, $4,200; contingencies, $6,050; waterworks, $48,850; electric light, $38,750.

Toronto, Ont.—The list of capital expenditures provided for in the estimates for the year has already been exceeded by nearly 50 per cent., and the city's debt of $104,000,000 will shortly be increased substantially. There will be a still further increase if certain projects laid before the board of control are undertaken. While war expenditures were in part responsible for the striking increase in the tax rate during the past five years, heavier debt charges have been the cause of a large proportion of this increase. As an illustration of this, debt charges constituted roughly one-third of the estimated total expenditures for the current year. War found the city face to face with capital commitments which approximated thirty million dollars, and were only completely financed at the close of 1918, and with temporary loans amounting to millions more, all of which have been liquidated. Since the signing of the armistice, however, demands for the commencement of a large number of public works and the claim that they must at once be undertaken have been encountered. Estimates brought down in March totalled $4,732,000. Further additions which have since been carried through raised the total for the first ten months to $6,882,000. There are still possible further additions of $7,850,000.

Montreal, Que.—The administrative commission has issued instructions to the city law department to proceed against three municipalities and two private corporations for the collection of accounts alleged due to the city of Montreal. The amount involved exceeds $300,000. According to information given out, the sum of $255,672 is said to be the amount the Montreal Tramways Co. owes the city in excess of the company's counter claims against the city. The amount is made up of charges for snow removal, repairs to pavements, etc. The accounts with St. Michel de Laval, St. Leonard de Port Maurice and the Ville de Montreal Nord are for water supply. As regards the Canada Securities Corporation, Ltd., it is stated that the said company in 1914 bought city bonds for the amount of $720,000. But as the company took delivery of but $106,000, this left a balance of $624,000 for the city to dispose of. These bonds were later sold by tender, and the city's bid being the highest, they were converted to the sinking fund account. The amount to be sued for represents the city's loss in the transaction, said to be about $50,000. The figures supplied by the administrative commission of the amounts owed the corporation of Montreal were the following: Montreal Tramways, $255,672; St. Michel de Laval, $24,093; Ville de Montreal Nord, $2,000; St. Leonard de Port Maurice, $1,749.

The revenue received from realty taxes for the ten months of this year shows an increase of $124,000 over the amount collected for the whole of last year. According to Assistant Treasurer Collins, up to November 1, the collections on current year's water and business taxes amounted to $2,272,546, in comparison with the same period of last year, when the amount of $2,163,304 was received, making an increase of $109,241.

INVESTMENTS AND THE MARKET

Dominion Park Co. Statement—International Nickel Co.—Algoma Steel Receiving Sufficient Orders—British Columbia Electric Railway Controversy

Chatham Gas Co.—The Public Utilities Commission of Chatham is taking over the electrical business of the company. This will practically double the number of hydro users in the city.

London Street Railway Co.—There will be no second strike of the company's employees. At a conference between the management and the union officials, President Chas. Currie, of the company acceded to the proposal of the men that the existing scale of fares remain in effect, until the present negotiations for the purchase of the system by the city develop.

Buffalo Mines, Ltd.—A further reduction of capital stock of the company will be made. A special meeting of shareholders has been called for November 20, to authorize a decrease in the capital from $500,000 in one million shares of 50 shares each to $150,000 in one million shares of 15 cents each. Last year the Buffalo made a 50-cent return of capital, reducing par from $1 to 50 cents, and now proposes a further reduction to 15 cents par with a 35-cent distribution.

Algoma Steel Co.—It has been announced from Sault Ste. Marie that sufficient orders for rails and structural steel have been received by the company, which is a subsidiary of the Lake Superior Corporation, to keep the mill going all winter, or for six months. Several good orders for rails have been received lately from Canadian railways, being part of the work of replacement and repair so long delayed by the war. On October 21 the structural mill, recently completed as an addition to the rail mill, commenced operations, making structural shapes up to 15 inches, where formerly six inches had been the limit in Canada. Since then orders have been coming in rapidly. The manufacture of alloy steel for the first time in Canada has also been begun, and it is expected that this product will find its main market among the automobile factories of Ontario.

International Nickel Co.—The report of the company for the six months ended September 30 last, shows that the surplus, after charges, federal taxes and preferred dividends was $510,602, equivalent to 30 cents a share ($25 par) on the $41,834,600 common stock, as compared with $3,415,905, or $2.04 per share in the corresponding period of 1918. Consolidated general profit and loss statement for six months ended September 30, 1919, compares as follows:—

	1919.	1918.
Earnings	$2,441,454	$7,744,128
Other increase	42,279	65,214
Total increase	$2,483,733	$7,809,342
Administration and general expense..	256,104	381,843
U.S. and foreign tax reserve	450,475	2,749,126
Net increase	$1,777,154	$4,678,373
Depreciation and minimum exhaust..	999,174	995,090
Profits	$ 777,980	$3,683,283
Preferred dividends	267,378	267,378
Balance	$ 510,602	$3,415,905
Common dividends	....	2,510,076
Surplus	$ 510,602	$ 905,829

Dominion Park Co.—The annual financial report of the company shows that the gross revenue amounted to $298,429, an increase of $17,719 over the preceding year. The company's net profit for the year amounted to $34,619 against $36,304 the preceding year. From this the dividend amounting to 6 per cent. was paid, or $24,000, and the balance of $10,619 was transferred to profit and loss. During the year the company's fire loss amounted to $36,904, of which $18,733 was recovered, as the company had been

DEBENTURES FOR SALE

DEBENTURES FOR SALE
(Refunding Issue of 1914)

$2,282,000.00 PROVINCE OF NEW BRUNSWICK 10-YEAR 5½ PER CENT. GOLD BONDS

Sealed tenders, endorsed, "Tenders for Province of New Brunswick Bonds," addressed to the undersigned, will be received for the purchase of $2,282,000.00 (Two million two hundred and eighty-two thousand dollars) Ten-year Gold Bonds of the above Province, to be dated December 1st, 1919, bearing interest at the rate of five and one-half per centum per annum, payable half-yearly on the 1st December and 1st June.

Principal and interest payable in gold at the office of the Provincial Secretary-Treasurer, Fredericton, N.B., or at the Bank of Montreal in St. John, Montreal or Toronto, or at the Agency of the Bank of Montreal in the City of New York, at the option of the holder.

Bonds to be in the denomination of $1,000, with coupons attached, and may be registered as to principal only. Full payment for Bonds, with accrued interest to date of payment, to be made at the Bank of Montreal, Fredericton, on delivery of Interim Securities at said Bank. Interim Securities will be supplied, to be exchanged for definite Bonds on completion by the purchaser of the issue.

Tenders to be delivered to the undersigned not later than noon on Tuesday, the 25th day of November, 1919. Tenders must be for the whole amount offered, and must be accompanied by marked cheque for $40,000, to be applied in the case of the successful tenderer in payment for the Bonds. All bids must be made in Fredericton funds. The right is reserved to reject any or all tenders. Tenders containing conditions varying from above will not be considered.

THE COMPTROLLER-GENERAL,
Province of New Brunswick.
Fredericton, N.B., November 1st, 1919. 7

TENDERS RE DEBENTURES

Sealed tenders, endorsed "Tender," addressed to B. W. Squire, Esq., in care of the County Clerk (Court House), Peterborough, are invited up to noon, Tuesday, the 25th of November, 1919, for $14,000 (twenty years), bearing 5½%, with coupons attached for interest (if desired).

B. W. SQUIRE,
2 Chairman Finance Committee.

CITY OF EDMONTON

DEBENTURES CALLED FOR PAYMENT

The holders of the undermentioned debentures are hereby notified that the City proposes to exercise its option, on the next Interest Due Date, of taking up all outstanding debentures of the following Series:—

Issued Under By-Law.	Series.	Maturity.	Next Interest Due Date.
683	A	July 1, 1920	Jan. 1st, 1920
684	B	July 1, 1920	Jan. 1st, 1920
700 & 3 1918	C	July 3, 1922	Jan. 3rd, 1920
27 1918	F	July 15, 1923	Jan. 15th, 1920
2 1919	G	Feb. 15, 1924	Feb. 15th, 1920

And take notice further that the above Bonds will bear no Interest after their next Interest Due Dates respectively.

F. BURNHOUSE,
9 City Treasurer.

COMMONWEALTH BANK OF AUSTRALIA

A financial statement of the Commonwealth Bank of Australia as at June 30th, 1919, shows that assets totalled £65,321,646, composed principally as follows: Cash, £6,493,758; Australian notes, £11,473,598; money on call in London, £9,470,000; investments, £16,735,020; loans and discounts, £19,471,672. Ordinary deposits totalled £43,672,182 and savings deposits £17,789,422. Profits for the half-year were £388,672, of which one-half was transferred to reserve and one-half to redemption fund.

INVESTMENTS AND THE MARKET

(Continued from page [illegible])

carrying insurance. The company's surplus account now amounts to $196,061, against $185,111 the preceding year During the year $21,000 of the company's bonds were redeemed and $20,000 was invested in Victory bonds. The balance sheet shows investment in war loans amounting to $67,015, and liquid assets amounting to $39,177, against current liabilities of $16,294, leaving working capital at $89,898. The total assets of the company amount to $724,576. Reserves amount to $49,217. Of the company's original bond issue of $250,000, the amount of $169,000 has been redeemed, leaving only $81,000 now outstanding.

In his address to the shareholders, the president, J. H. Redpath, stated that the company had authorized the reconstruction of the burnt area and that everything would be ready for the opening of the park next season.

British Columbia Electric Railway Co.—The statement was made by Mr. Geo. Kidd, general manager, that the present situation in regard to the controversy between the Dominion and provincial governments for jurisdiction over the company, is an impossible one. Mr. Kidd declares that the management of the B.C.E.R. is fully prepared to cooperate with the authorities in bringing pressure to bear upon the Dominion government to repeal the clause which the company's solicitor states, after investigating the situation at Ottawa, was "accidentally" inserted in the amendment to the Dominion Railway Act. While he is quite ready to abide by the final decision, Mr. Kidd admits that of the two bodies, Dominion Railway Commission and Provincial Public Utilities Commission, he would rather be under the jurisdiction of the latter. He said:—

"The clause in the Dominion Railway Act was first brought to the attention of the company by its solicitors on October 2nd and on October 4th the attention of the Public Utilities commissioner was drawn to this clause in order that a decision might be arrived at as to what action should be taken. It appears that this question of the jurisdiction of the Provincial Commission and the Dominion Railway Commission is entirely a legal matter and should be settled by the legal advisers of those two bodies. This company has no wish to interfere in any way with the jurisdiction of the Provincial Utilities commissioner. It is, I think, obvious to any one that from the point of view of convenience and common sense the public utilities of this province should be under the jurisdiction of a local commission, and my company is fully prepared to co-operate with the authorities in bringing such pressure to bear on the Dominion government as may be necessary to repeal the clause which has given rise to the present controversy and to bring back the utilities of this company under the Provincial Commission.

"Immediately this matter was brought to the attention of the company on October 2, L. G. McPhillips, the company's counsel was instructed to go to Ottawa for the purpose of ascertaining what our legal position was and also to find out whether the clause was accidental or intentional. Mr. McPhillips returned and informed me that in his opinion the clause is an accident so far as this company is concerned, and was never intended to affect us in any way. Our position in the matter is clear. We have brought the attention of the authorities to the action of the Dominion government —an action which is obviously a mistake and we anxiously await the decision of the legal advisers of the provincial government as to which body has jurisdiction over us. Obviously, lawyers at Ottawa have made a mistake and it is for them to clear it up."

The award of the Conciliation Board, consisting of representatives of the B.C.E.R. and Amalgamated Association of Street Railway Employees, has been made public, and gives a general increase in wages from 5 to 8 cents an hour for early-day men, and $10 to $15 a month for those paid on a monthly scale.

RECENT FIRES

Many Conflagrations this Week—Seven with Loss Over $10,000

Charlottetown, P.E.I.—November 10—Livery stable of R. E. Farquharson was destroyed, with many horses. Estimated loss, $4,000, only half covered by insurance.

Loan Objective More Than Doubled

Subscriptions Total $673,000,000—Last Year's Figure Was $690,000,000—Ontario Total $354,000,000—Large Sums To Be Spent, But No More Popular Loans, Says Finance Minister—List of Large Subscriptions

Subscriptions to Canada's sixth war loan and third Victory Loan, which opened October 27th, and closed November 15th, total $673,000,000. Last year's total was approximately $690,000,000, but when returns were made up on the evening of the Monday following the last day of the campaign, only $676,057,867 had been reported. The totals by provinces for the three Victory Loans, on corresponding dates, are as follows:—

Province.	1917.	1918.	1919.
British Columbia ..	$ 18,814,700	$ 35,396,667	$ 35,000,000
Alberta	16,515,150	18,189,600	16,000,000
Saskatchewan	21,777,050	23,889,000	20,000,000
Manitoba	32,326,600	43,639,900	40,000,000
Ontario	204,185,400	329,682,950	354,000,000
Quebec	94,287,250	175,757,250	161,000,000
New Brunswick ...	10,463,350	16,500,000	14,000,000
Nova Scotia	18,588,150	30,102,500	28,000,000
Prince Edward Island	2,331,350	2,900,000	3,000,000
Total for Dominion.	$419,289,000	$676,057,867	$673,000,000

Some of the city totals are:—

Toronto	$146,000,000
Montreal	126,000,000
Winnipeg	23,787,250
Hamilton	20,466,600
Vancouver	13,813,210
Ottawa	12,419,200
London	10,251,000
Halifax	7,000,000
Victoria	6,744,800
Calgary	5,116,900
Edmonton	4,009,750
Oshawa	3,988,550
St. Catharines	3,812,000
Regina	3,589,100
Kingston	2,976,250
Saskatoon	2,302,800
Sault Ste. Marie	2,167,800
Quebec	2,138,150
Galt	2,050,950
Sarnia	1,715,300
New Westminster	1,642,527
Stratford	1,500,000
Charlottetown	1,170,000
Medicine Hat	871,000
Lethbridge	841,950
Summerside	750,000
Brandon	665,250

These figures were announced at a meeting in Toronto on Monday evening, although it was known in the morning that $600,000,000 had been reached. Sir Henry Drayton, Minister of Finance, was present at the meeting, having just returned from the west. "This is the final making good of Canada's pledges," he said, "the final chapter of our war effort." Setting forth the factors which had contributed to the success of the loan, he said credit was due first to the press, second to the Victory Loan workers, and third to the fact that it was a people's loan.

On November 19th, Sir Henry Drayton issued the following statement by way of comment on the results:—

"With every Canadian, I am delighted with the success of the loan campaign, and am more than gratified to know that the last chapter of Canada's war effort has been in keeping with her marvellous war record. Personally, the campaign has been a grand thing for me, because it has thrown me into touch with the splendid organization which has done so well in this and the other Victory Loan drives. The work of the Victory Loan representatives in every province and everywhere in each province has been splendid. Special mention should be made of those who, in an honorary capacity, gave a patriotic and enthusiastic service which it was impossible for money to buy. Victory Loan workers were engaged night and day, and, I am sure, speaking generally, they put forth on behalf of their country a far greater effort than they usually give to their private business. The people responded in kind. I know of many subscriptions made which practically mortgaged the subscribers' incomes for the next year or eighteen months. The support of the loan has been general, including all classes. The result is the united effort of our peoples. This happy consummation has been very largely helped and brought about by the magnificent support that the press has given the campaign. They have donated much valuable space, and have featured the loan in the best possible manner.

"The whole underlying principle actuating the loan subscribers, newspapers and loan workers has been Canada first. Apart entirely from the financial campaign, it has been a great thing for Canada. A continuation of the spirit that has made the loan a success would render absolutely certain a bigger and greater Canada, and just as triumphant a result out of the stress of reconstruction as the outcome of the war itself. A continuation of this spirit will mean that subscribers everywhere will hold their bonds, and by holding them help greatly to enhance the value of the security, with the resultant benefit to the subscriber and to still further confirm Canada's credit. Now that the loan is over and the money raised, it becomes the duty of the government to see that it is properly applied to the purpose for which it was raised, and that all due and proper economies be exercised in carrying on the government of our country. The homely virtues of work and thrift are all that Canada to-day needs, and it is the duty of the government to the greatest extent possible to apply these in the conduct of our business."

One of the surprises of the campaign is the good showing made by the special subscriptions committee, under the chairmanship of J. H. Gundy, for the Dominion. Others associated in this branch of the work were: A. W. Scripture, T. H. Roadhouse, J. F. McDonagh, W. A. Woodcock, E. G. Spalding, A. F. White, Robert Cassels, Harold Marriott, H. W. Lofft, F. D. Chapman, Temple Blackwood, Col. J. A. Stimson, Major H. W. Murray, C. R. Clapp, Charles Turner, R. C. Matthews, A. W. McLennan, H. G. Cooper, C. H. Rankin. Many of the large subscriptions came from the United States, where the large institutions, particularly those doing business in Canada, were given an opportunity to subscribe.

The following table shows the special subscription results by provinces, compared with last year:—

	1918.	1919.
Ontario (exclusive of Toronto)	$53,239,150	$53,942,900
Quebec	8,146,200	8,500,000
Nova Scotia	7,470,000	5,348,000
New Brunswick	2,211,350	1,571,000
Prince Edward Island	106,500	400,000
Manitoba	18,612,400	19,801,750
Saskatchewan	1,560,500	3,510,000
North Alberta	2,591,000	1,227,500
South Alberta	....	1,602,500
British Columbia	8,082,005	9,000,000
Montreal	89,931,850	80,333,400
Toronto	80,621,250	96,150,000
Totals	$272,573,205	$281,387,050

The totals of the six domestic war loans are as follows:—

	Amount subscribed.	Amount allotted.
First	$103,729,500	$100,000,000
Second	201,444,800	100,000,000
Third	260,768,000	150,000,000
Fourth	419,289,000	398,000,000
Fifth	695,390,750	610,000,000
Sixth	673,000,000	....

Among the purposes for which this money is required are the following:—

Demobilization	$ 50,000,000
Soldiers' settlement	50,000,000
Public works	60,000,000
Credits	175,000,000
Housing	25,000,000
Railways	125,000,000

MONTREAL PUBLIC SERVICE CORPORATION BONDS

A block of $2,550,000 6½ per cent. 5-year Montreal Public Service Corporation bonds, dated July 2, 1919, are being offered by Rene T. Leclerc, Beausoleil, Ltd., and Credit-Canadien, Inc., Montreal, in denominations of $1,000, $500 and $100, at par and interest. The corporation, which was founded in 1908, is a consolidation of the Saguenay Electric and Water Co., the Dominion Light, Heat and Power Co., and the St. Paul Electric Light and Power Co. It furnishes electric power to the Montreal Tramways Co., under a contract, extending over a period of 50 years, until 1965. The bonds are subject to redemption by the company, in whole or in part, on the 2nd or 3rd interest date at 101½ and accrued interest, or at any subsequent interest date at 101 and accrued interest, on thirty days' notice being given in each case.

The security for the new issue consists of $400,000 first mortgage 5 per cent. 30-year bonds of the corporation, due in 1942; $2,550,000 second mortgage 6½ per cent. bonds, due in 1924; $1,700,000 5 per cent., first mortgage bonds of the Canadian Light, Heat and Power Co., due in 1949, and 59,500 shares of the latter enterprise out of an outstanding issue of 60,000 shares.

PERSONAL NOTES

Mr. Bernard M. Culver, vice-president of the Niagara Fire Insurance Company, sailed recently to England from Quebec.

Mr. J. Gordon Steele, of the office of comptroller-general of Manitoba, has resigned. He leaves for one of the largest accounting offices in New York.

Mr. W. E. Grey, general manager of the Employers' Liability Insurance Corporation of London, England, arrived in Canada recently on a business trip.

Dr. Jasper Halpenny, widely known in Winnipeg, has been elected to the directorate of the Bruce Consolidated Mining Company, Limited, of that city.

Hon. Peter Smith is now provincial treasurer for Ontario, succeeding Mr. T. W. McGarry. Mr. Smith has been a stock breeder, school teacher and a township clerk.

Mr. F. T. Fisher, who has resigned as secretary of the Edmonton Board of Trade, has accepted a position with Macdonald-Cooper, Limited, wholesale grocers of that city.

Mr. C. Elvins, advertising manager of the Imperial Life Assurance Company of Canada, was elected vice-president of the Direct Mail Advertising Association, at the annual convention in Cleveland, Ohio.

Mr. R. T. Moore, after two and a half years' connection with the North American Life of Toronto, has been appointed district manager for the company at Windsor, Ont., for that town and the surrounding territory.

Mr. F. N. Miller, general manager of the General Accident Fire and Life Insurance Company, of Perth, Scotland, was in Canada early this month. He also met a large number of the company's agents at Philadelphia.

Mr. James Arnold, formerly manager at the James Smart plant at Brockville, Ont., has been appointed assistant general manager of the Canada Foundries and Forgings, Limited, the corporation controlling the James Smart plant.

Mr. H. Vaughan, ordinary branch manager for Canada, of the Mutual Life and Citizen's Assurance Company, Limited, of Australia, expects to leave Canada for Australia at the end of this month. Mr. Vaughan left Australia on military service early in 1915 and has not been home since.

Mr. T. Alfred Fleming, a former Canadian, and in recent years fire marshal of Ohio, has resigned to take charge of conservation work under the supervision of the Committee on Fire Prevention and Engineering Standards of the National Board of Fire Underwriters of the United States.

OBITUARY

Mr. Alfred J. Dickey, assistant deputy fire marshal for Ontario, died in Toronto last week at the age of 55 years.

Mr. Rufus Shorey Neville, K.C., for many years official referee at Osgoode Hall, Toronto, died at his home in that city last week.

Mr. W. Ryrie, president of the Ryrie Paper Company, and also head of the Hyslop Company, Limited, manufacturers and importers of automobiles, died last week in his apartment in Toronto.

Mr. John Douglas, a resident of the town of Meaford, Ontario, died there this week in his 93rd year. He was deputy reeve of the town for one year, was also director for a number of years of the local Agricultural Society and the Sydenham Fire Insurance Company.

Mr. Geo. Black died in Vancouver, B.C., last week. He had been for many years auditor of Manitoba, and was a prominent figure in the life of the city of Winnipeg and the province of Manitoba for nearly half a century. He was particularly well known in fraternal circles.

Mr. W. S. Wisner, father of Chas. Wisner, director and second vice-president of the Massey-Harris Company, Toronto, was fatally injured when struck by a King Street car at the corner of Massey and King Streets, Toronto, this week. His home is in Brantford, and he was on his regular weekly visit.

Mr. Wilton C. Eddis, senior member of Wilton C. Eddis and Sons, chartered accountants, Toronto, died in that city last week. The practice will be carried on under the same name and style as heretofore by the remaining members of the firm—J. Wyndham Eddis, C.A., Chas. S. Eddis, C.A., A. R. McMichael, C.A., W. G. Berner, C.A.

BURGLARY INSURANCE IN CANADA

Organization of Association of Companies Writing Burglary Insurance to be Discussed in Montreal

On November 24th, a meeting of all American companies writing burglary insurance in Canada is to be held in Montreal, and an association of underwriters of this class of business is to be formed. Canadian and British companies have also been invited. This business has greatly increasd in recent years, both in the United States and in Canada. The causes of this increase were analysed by Samuel B. Brewster, assistant secretary of the American Surety Co., of New York, at a meeting of the Toronto Insurance Institute on November 19th. In 1909, $2,141,715 (premiums) of burglary insurance was written in the United States by 13 companies; in 1918, $7,202,428 was written by 30 companies; and it is estimated that the figure for 1919 will be upwards of $10,000,000, written by the 33 companies which now are members of the Burglary Insurance Underwriters Association. Mr. Brewster ascribes the increase to the general increase in economic values; to crime conditions in recent years; and to widespread holdings of government securities.

As early as 1906 there was a Burglary Insurance Underwriters Association in the United States, and although it was disrupted in 1910, it was revived in 1912, since which time it has gained such strength and rendered such service that competition on the part of companies outside the association is now almost impossible. Policy forms have been standardized in their essential clauses, rates have been made uniform, and the records of the association, collected in its statistical bureau, serve as a basis for accurate fixation of rates and make it impossible for an assured to collect indemnity from one company and then repeat the operation with another company.

Class of Burglary Insurance

Describing this class of insurance, Mr. Brewster said that the business is segregated into five general families—viz., residence, bank, mercantile open stock, mercantile safe, and robbery insurance. The first class furnishes the largest volume, and he expressed the opinion that there is a good field for this class of business in Canada. The banking business in Canada is so centralized that it is unlikely the second class offers any great field, although it might be developed in so far as property in safe deposit boxes is concerned. There should also be a good opportunity for the third and fourth classes, he said. Robbery insurance has in recent years increased by leaps and bounds.

Concluding, Mr. Brewster pointed out that conditions in Canada are similar to those in the United States. "While it is true," he said, "that there is not the same population upon which to create business, there being less than $500,000 in premiums in 1918, the relative volume of premium income is so very apparent that surely there must be some underlying reason. Your values may not be as great. Your crime conditions may be more favorable, and burglaries and robberies less frequent, but the exposure exists in Canada the same as in the United States, and I thoroughly believe that until you in Canada adopt the spirit of co-operation, as we have in the States, the development of this very profitable line of business will be insignificant."

CANADA HONORS ITS OBLIGATIONS

THE phenomenal success of the third Victory Loan is a subject for congratulation on the part of the campaign workers, but one of no small concern to the citizens of Canada who must pay the interest on this great addition to our national debt, involving as it does another $35,000,000 annually. The expenditure of almost the entire sum was, of course, already required under existing legislation. But it too often happens in political life that the balancing of the books is immediately followed by the incurring of new obligations; financial ability has time and again proved to be the only limit upon public expenditure.

During the war years we have become so accustomed to financing by borrowing that the reduction of expenditures to an amount within current revenue is accomplished only with the greatest difficulty, and in the face of the opposition of numerous vested interests which have benefited by the vast amount of government expenditures. Nevertheless it is urgent that this reduction be made without delay. Large deficits have dragged on over twelve months since the signing of the armistice, and the fact that $35,000,000 was added to the national debt of the Dominion during October would indicate that so far as finance is concerned, this month was as much a war month as any since 1914.

Frank A. Vanderlip, president of the National City Bank of New York, spoke most pessimistically before the Canadian Club of Toronto, on November 17th, of the outlook for European countries during the next few years. While he considerately coupled Canada with the United States in making comparisons, we must nevertheless remember that in many respects our experience has been similar to that of these European countries; indication of this is found in quotations of the foreign exchanges in New York, where the Canadian dollar is worth only about ninety-six cents. The United States may have surplus funds to provide foreign credits, but in Canada a substantial portion of this Victory Loan should be kept in reserve for unexpected contingencies, before the money of the Canadian people is loaned to European countries the credit of which is at least doubtful, and the artificial assistance of exports to which maintains the general high scale of prices here.

This expression of confidence on the part of country is, moreover, not an endorsement of government policy nor a *carte blanche* for future extravagance. Investors would continue to buy the bonds as long as the government offered them on attractive terms, but public opinion here as in England is powerfully though perhaps passively opposed to a continuation of this policy. Canada gave its government blank checks for war purposes and thus far the money has been carefully spent and the cheques honored to the last dollar. This was to be the last Victory popular loan, however, and the magnificent response should make doubly certain that no such appeal will again be made.

COMBINES AND THE CONSUMER

THE investigation into the affairs of the Canadian General Electric Company is one of the most important pieces of work which has been undertaken by the Board of Commerce, because sooner or later the attention of the board must be largely centred upon the investigation of alleged combines and the control of those which are found to be operating to the detriment of the consumer. The application in this case was made by the Canadian Laco-Phillips Company, which maintained that the Canadian General Electric Company had refused to supply it with wire used in the manufacture of electric bulbs, and evidence was received from officers of both companies in Toronto on November 14th. The decision of the board has not at the time of writing been announced.

During the proceedings it developed that the sales of electric bulbs in Canada total about eight million per annum, of which the General Electric sells about five million. A small number are imported, and the balance are manufactured by other companies in Canada which have, however, to use certain products the manufacture of which is controlled by patents owned by the General Electric. I. F. Hellmuth, K.C., counsel for the Canadian General Electric, admitted that the object in taking such action as it did in the case of the Laco-Phillips Company was to restrict competition, but he also pointed out that the partial monopoly enjoyed by the General Electric had not been made use of to the detriment of the public. Senator Fred Nicholls, president of the General Electric, when asked if they were mak-

[illegible] satisfactory profit, said they were not doing so as yet. The company's present plant, it was stated, is large enough to supply the whole Canadian demand, and it is now being increased by fifty per cent.

The relative increase in large-scale production, brought about by superior economies, has already produced monopolies in many lines of industry, which monopolies are in some cases world-wide. Where the product is such that sales may be greatly increased by cutting prices, it frequently happens that the business interests of the company coincide with those of the public, because a maximum business and profit may be obtained on a small margin over the cost of production. Even in the case of essential commodities, the demand for which does not usually vary greatly, a monopoly may benefit the consumer, but here it is desirable that public control be exercised, for there is a continual temptation to widen the margin of profit. The combine or monopoly is now an integral part of industrial life, however, and the creation of such a combine should not in itself be an offence. If this is the case then the great national railway system being created in Canada, the Ontario Hydro-Electric Commission, and the Alberta and Manitoba public telephone systems, are especially dangerous monopolies, for here they are operated by the state and are therefore not subject to its indenpenent control. The development on sound lines of public control is a slow but important task, but it is in this field that the Board of Commerce can do effective and beneficial work. In competitive industry, on the other hand, profits are normally kept down to a level determined by the supply and demand for capital and ability, and public interference can only be detrimental.

TOO MANY GOVERNMENTS IN THE EAST

THE maritime provinces are continually exhausted in their efforts to maintain adequate government service, says F. Magee, of F. Magee, Ltd., Port Elgin, N.B. Mr. Magee has been a strong supporter of a legislative union of the three provinces under such a name as "Acadia." Writing to *The Monetary Times* he says:

"No sound arguments have been advanced against this project. Sentiment is the only drawback. People speak of the loss of provincial identity, of provincial legislatures, of historic buildings, of governors and government houses, of old officials and their associations, etc., always sentiment. Members of the different legislatures are theoretically favorable but cannot be enthused. Perhaps they doubt their ability to secure a seat in a new maritime legislature, which may not require one hundred and forty-two representatives as now (including the twenty-one members of the legislative council of Nova Scotia), to conduct the affairs of about 950,000 people, or a representative for about every 7,000.

"We occupy in the vicinity of 50,000 square miles of eastern Canada in which is situated the two winter ports through which Canadian products must be exported. We are endeavoring to maintain and perpetuate three distinct governments and all that this entails: three different policies in education, agriculture, public works, administration of justice, etc. No unison. No united effort to better our conditions. We subscribe to the doctrine of "watchful waiting." We have at present two governments grappling the problem of the development of our water powers. We doubtless will have two distinct policies. It is common engineering knowledge that we have at Cape Split, N.S., and in the Petitcodiac River, N.B., sufficient undeveloped power to electrify the maritimes many times, and those who think, realize the immense possibilities of cheap power and the industries it establishes. One legislature might grapple with these problems, three cannot. One legislature could make "Acadia" known throughout the world and could secure for the maritimes practical attention at Ottawa. Offices could be maintained abroad that would be effective. What have we to-day? What means of placing eastern Canada before the people of any country? United we can become a factor in the world's activities—disunited we remain stagnant.

"Confederation has not proved to be any particular blessing to us and there are many who realize that there were four provinces only in the original pact, that Ontario and Quebec have both been given immense territorial additions. Prince Edward Island, which came into confederation in 1872 has had its federal subsidy increased, but Nova Scotia and New Brunswick plod away on the old basis of 80 cents per head. They annually demand more of Ottawa and their demands are taken 'into consideration.' In the meantime they exhaust every effort to secure sufficient revenue to maintain the services of the provinces in a modern manner; they are unable to do so and the public debts are being enlarged annually.

"These conditions cannot go on indefinitely. We must unite to protect ourselves. It is to be deplored that the public conscience of the maritimes cannot be aroused to its needs. We are suffering from 'dry rot.' Communities are doomed if they are too easily satisfied and their desires based on necessity alone. We must not permit ourselves to succumb in the international struggle for a place in the sun."

NO SHORTAGE IN FOOD COMMODITIES

A REPORT issued by the Internal Trade Division of the Dominion Bureau of Statistics showing stocks of meats, produce and fish in cold storage and in process of cure on November 1st, indicates that prices of these commodities will continue to fall. Most lines show increased quantities in storage as compared with October 1st, 1919, and with November 1st, 1918. Creamery butter in storage amounts to 22,150,352 lbs., and dairy butter amounts to 1,323,117 lbs. The total 23,473,469 lbs. is 18.32 per cent. more than what was in store one year ago, but is 11.64 per cent. less than the stocks of last month. The decline in stocks of butter at this time of year, owing to the fact that we are now using cold storage supplies, is usual. However, the movement out of storage this year is very much lighter than that of the same season last year. Oleomargarine stocks amount to 539,889 lbs., 20.65 per cent. more than last month, but 21.17 per cent. less than last year. Cheese stocks, amount to the very large total of 28,283,928 lbs. This is 366.46 per cent. more than last year. Egg stocks include 8,369,828 doz. in cold storage, 878,531 doz. on hand other than in cold storage and 397,281 lbs. frozen. The total amounts to 6.28 per cent. more than last year and 29.12 per cent. less than last month.

Pork stocks in storage and in process of cure total 39,222,333 lbs. This is 20.42 per cent. more than last year, but 3.78 per cent. less than last month. These stocks include 1,945,673 lbs. frozen fresh; 2,598,614 lbs. fresh unfrozen; 1,933,782 lbs. dry salted; 12,181,469 lbs. sweet pickled, and 20,562,795 lbs. in process of cure—not yet in cold storage. Beef stocks in storage and in process of cure total 29,096,364 lbs. This is 8.55 per cent. less than last year and 18.75 per cent. more than last month. These stocks include 22,212,990 lbs. of frozen beef, 5,857,206 lbs. of unfrozen fresh beef, 638,115 lbs. cured and 388,053 lbs. in process of cure. The mutton and lamb in store amounts to 4,062,724 lbs. This is 14.88 per cent. less than last year but 38.46 per cent. more than last month. The stocks include 3,433,173 lbs. frozen and 629,551 lbs. unfrozen.

The poultry stocks amount to 1,291,958 lbs. This is 1.60 per cent. more than last year and 93.51 per cent. more than last month. The stocks include 161,669 lbs. of broilers; 105,611 lbs. of chickens; 417,735 lbs. of fowl; 27,151 lbs. of ducks; 22,919 lbs. of geese; 64,711 lbs. of turkeys, and 192,162 lbs. of unclassified poultry. The fish in cold storage is 25,508,608 lbs. which is 16.46 per cent. more than last month. The fish on hand other than in cold storage is 2,784,866 lbs.

The Greek government objects to paying more than the market price for Canadian goods; considering the fact that the Canadian government has advanced the money to pay for these goods, business of this kind does not look attractive. Canadian goods command cash at market prices.

BANK BRANCH NOTES

Many New Buildings Going Up—Deal by Bank of Hamilton in Windsor

The following is a list of branches of Canadian banks recently opened:—

Debec, N.B.	Bank of Nova Scotia
Mount Forest, Ont.	Dominion Bank
Toronto, Ont. (Roncesvalles and Neepawa)	Home Bank of Canada
Kingsville, Ont.	Bank of Montreal
London, Ont. (1445 Dundas St.)	Home Bank of Canada
Dropmore, Alta.	Union Bank of Canada
London, Ont. (Dundas and Wellington)	Bank of Toronto

The following offices have been opened as sub-agencies:—

Indian River, Ont, (Peterboro)	Union Bank of Canada
St. Cyrille de Wendover, Que. (Drummondville)	Canadian Bank of Commerce

Coming Branches

The Royal Bank of Canada has purchased the property at the corner of Christina and Confederation Streets, Sarnia, Ont., at the price of $4,000. The Royal Bank has also leased premises at the corner of Denman and Davie Streets, English Bay, Vancouver, B.C.

Additions are to be made to the Bank of Toronto building at 100 A Street and Jasper Avenue, Edmonton, Alta., at a cost of $15,000.

A deal has been closed in Guelph, Ont., by the Dominion Bank, whereby the bank becomes owner of a large block of property, which will be utilized for the erection of a fine new building. The deal involves the purchase by the Dominion Bank of the large building which is occupied by the bank at the northwest corner of Wyndham and Macdonnell Streets. It comprises the premises at present occupied by the bank and the Canadian Express Co., and the several small stores and offices on Macdonnell Street, as far back as the Commercial Hotel, and also includes all the offices and other apartments in the upper stories of the building.

The Standard Bank of Canada has taken a five-year lease on the front half of the King and Green Building, Raymond, Alta., for the purpose of converting it into a new branch office.

A site of 63 ft. on Wyandotte and Lincoln Avenues, Windsor, Ont., has been secured by the Imperial Bank of Canada, and some time next season, a new branch will be erected. In the meantime, a temporary office will be opened.

The Bank of Hamilton has also purchased a site at Ouellette Avenue and Chatham Street, Windsor, Ont., at a price of about $75,000, and will erect a new building at an early date.

Bank Appointments

Mr. G. St. John, who previous to enlisting for military service was manager of one of the western branches of the Bank of Toronto, has been appointed manager of the new branch in London, Ont., at Wellington and Dundas Streets.

Mr. W. T. Sprague of the Bank of Montreal, has been appointed manager of the new branch at Kingsville, Ont.

Mr. H. A. Chapman, who has been manager of the Union Bank of Canada, at Piapot, Sask., for some time, has been appointed to a position with the bank in Yokohama, Japan.

Mr. R. N. Hanson, manager of the Lethbridge, Alta., branch of the Royal Bank of Canada, has been appointed inspector of all branches in the province of Alberta.

The last restriction on the employment of British capital abroad, which was only a nominal one requiring the taking out of a license before such an investment could be made, has been removed.

MONEY MARKETS

Exchange rates have sagged still further this week, francs reaching 9.70, lire 12.40 and marks .024. Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	4 15-16 pm	5 1-32 pm	....
Mont. funds	par	par	⅛ to ¼
Sterling—			
Demand	$4.2325	$4.2375	....
Cable transfers	4.24	4.2450	....

Rate in New York for sterling demand, $4.03¼.

Bank of England rate, 6 per cent.

RAILROAD EARNINGS

The following is a statement of the gross earnings of Canada's transcontinental railways for the first two weeks of November:—

	1919.	1918.	Inc. or dec.
Canadian Pacific Railway			
November 7	$3,821,000	$3,437,000	+ $ 384,000
November 14	4,083,000	3,247,000	+ 836,000
Grand Trunk Railway			
November 7	$1,421,706	$1,343,041	+ $ 78,665
November 14	1,488,716	1,471,654	+ 17,062
Canadian National Railways			
November 7	$1,948,591	$1,717,273	+ $ 231,318
November 14	1,961,003	1,719,030	+ 241,973

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended November 20, 1919, compared with the corresponding week last year:—

	Week ended Nov. 20, '19.	Week ended Nov. 21, '18.		Changes.
Montreal	$166,627,836	$104,812,295	+$	61,815,541

DAIRYING INDUSTRY IN CANADA

Statistics for 1918 Show Large Increase in Output, and Still Greater Increase in Value, of Products of Creameries and Factories

THE Dominion Bureau of Statistics has issued a preliminary bulletin giving statistics of creameries, cheese factories and condensed milk factories for 1918, as collected by the bureau in co-operation with the provincial governments. A detailed report is in preparation. The total production of creamery butter in 1918 was 93,266,876 lbs., value $41,845,164, as compared with 87,526,939 lbs., value $34,274,218 in 1917 and 82,564,130 lbs., value $26,966,355 in 1916. In order of production the figures for the provinces are as follows: Quebec 36,761,057 lbs., value $16,364,950; Ontario 29,397,185 lbs., value $13,136,470; Alberta 9,021,765 lbs., value $4,011,859; Manitoba, 8,436,962 lbs., value $3,897,476; Saskatchewan 5,009,014 lbs., value $2,221,403; Nova Scotia 1,756,905 lbs., value $808,755; British Columbia 1,581,924 lbs., value $807,861; New Brunswick 660,010 lbs., value $302,818; Prince Edward Island 611,754 lbs., value $293,572. For all Canada the average wholesale price of butter works out at about 45 cents per pound, as compared with 39 cents in 1917 and 33 cents in 1916. Every province showed an increase over 1917 in the production of creamery butter.

The total production of factory cheese in 1918 was 174,881,957 lbs., value $39,457,358, as compared with 194,904,336 lbs., value $41,180,623 in 1917, and 192,968,597 lbs., value $35,512,622 in 1916. Ontario and Quebec together produced 97 per cent. of the total factory-made cheese in Canada. In Ontario the quantity produced in 1918 was 107,886,724 lbs., value $24,356,019 as compared with 121,173,086 lbs., value $25,771,944 in 1917, and 126,015,870 lbs., value $23,312,935 in 1916. In Quebec the production in 1918 was 62,070,162 lbs., value $13,976,866, as compared with 67,835,017 lbs., value $14,172,273 in 1917 and 61,906,750 lbs., value $11,245,104 in 1916. All provinces with the exception of British Columbia and Saskatchewan show a decrease from 1917, in the production of cheese. British Columbia increased from 71,094 lbs., value $18,954 in 1917 to 249,647 lbs., value $60,901, in 1918. Saskatchewan which made no factory cheese in 1917, produced 13,573 lbs., value $3,257 in 1918. The average wholesale price of factory cheese for the whole of Canada in 1918 works out at 22½ cents per pound, as compared with 21 cents per pound in 1917, and 18 cents in 1916.

Condensed Milk and Other Products

A large increase is noted in the output of condensed milk factories, the quantities and values being, condensed milk 41,195,604 lbs., value $5,740,898, as compared with 32,105,799 lbs., value $3,811,281, in 1917; evaporated milk 38,612,367 lbs., value $4,048,055, as compared with 29,415,012 lbs., value $2,635,952, in 1917; and milk powder 5,530,915 lbs., value $1,388,248, as compared with 3,979,514 lbs., value $817,287, in 1917.

Other products of dairy factories in 1918 included 891,543 lbs. of whey butter, value $354,675, and 243,763 lbs. of casein, value $40,854, the total production being from Ontario factories.

The report shows that 3,371 dairy factories were in operation in 1918 as compared with 3,418 in 1917, and 3,446 in 1916. The number of creameries was 989 as compared with 949 in 1917 and 993 in 1916; cheese factories 1,885 as compared with 1,900 in 1917 and 1,813 in 1916; combined butter and cheese factories 476 as compared with 549 in 1917 and 624 in 1916; and condensed milk factories 21 as compared with 20 in 1917 and 16 in 1916.

NORWICH UNION INDEMNITY CO.

Organization of the Norwich Union Indemnity Co., New York, has now been completed and just as soon as a license is secured, business will be commenced. The president and manager, W. G. Falconer, was formerly assistant secretary of the Hartford Accident and Indemnity Co.

AUTOMOBILE UNDERWRITERS' ASSOCIATION

The first annual conference of the Canadian Automobile Underwriters' Association is to be held in Ottawa on November 27th and 28th. One of the subjects to be discussed is the alarming number of thefts and attendant damage. In Canada about 97 per cent. are recovered, however, whereas in the United States the proportion is only 70 per cent.

PRICE OF CANADIAN WHEAT CROP

James Stewart, chairman of the Canadian wheat board, stated on November 12th that it had been decided to withhold information as to the price received for Canadian wheat being sold until the close of the present crop year, August 31st, 1920. He believes that the majority of farmers are satisfied to wait until the crop has been cleaned up before being told what additional price they are to receive for their wheat over the fixed price as guaranteed by the government.

ROYAL BANK DECLARES BONUS

To commemorate the fiftieth anniversary of the founding of the bank, a special Christmas bonus of 2 per cent. has been declared by the Royal Bank of Canada, and will be paid on December 20th to shareholders of record at the close of business on November 29th. This will make a total distribution among shareholders for the current year of 14 per cent. A bonus of 20 per cent. in salary will also be given to the bank's 5,000 employees.

November 30th is the end of the Royal Bank's year, and it is understood that the annual statement, which will be published next month, will show very satisfactory results.

OTTAWA WATCHES FARMERS' MOVEMENT

Trade and Commerce Department May Have New Head—Growth of Newsprint Manufacture

(Special to *The Monetary Times.*)

Ottawa, Nov. 20th, 1919.

WITH parliament prorogued, Sir Robert Borden recuperating at American resorts, Hon. N. W. Rowell and Hon. Gideon Robertson attending the Labor Conference at Washington and the majority of the ministers taking brief holidays, things political at the capital are exceedingly quiet. However, those who are on the job are keeping a close eye on the developments of the farmers' movement. This movement originally was treated somewhat as a political joke at the capital. It was felt that it would never make more headway than the Patrons of Industry campaign a generation ago or the Populists' wave of the western States of the same period. The sweep in industrial Ontario by which a United Farmers' party headed the polls and now has installed a cabinet has opened the eyes of Ottawa. That it is a Dominion-wide movement which promises to prove a regular whirlwind in its intensity is apparent by the results of the recent federal by-elections. Outside of Quebec, no riding is safe at the present time, and the leaders of both the old-line parties are sitting back, praying that the present tide will have ebbed before the next elections come around.

With the majority of the ministers out of the city, there are no definite rumors as to political changes. The old story is being revived that Sir George Foster will become Canadian High Commissioner in London to succeed Sir George Perley. When the latter recently returned to London he told his friends in Ottawa that he expected to be back shortly for good. It is known that Sir George Foster, after nearly forty years of a strenuous political life, would like to retire to some more peaceful position. If he took the post in England the salary would have to be increased in order that he could fittingly maintain Canada's position in the old land. He is a poor man.

The production of newsprint is rapidly becoming one of Canada's greatest industries. Probably no industry is doing so much to help level our balance of trade with the United States as the pulp and paper industry, as the largest part of the product of our Canadian mills is being shipped to American newspapers. According to official figures at Ottawa Canada is now producing 2,775 tons of newsprint per day, or about 800 thousand tons a year. Four of the largest mills, namely, Price Bros., Abitibi, Spanish River and Laurentide will increase this output by an average of 90,000 tons a year according to their present plans for expansion. In addition, three new big projects are contemplated. Announcement has been made that Price Bros. are planning a new plant at Chicoutimi, where they propose to build a brand-new port. The International Paper Co. propose to build at Three Rivers, and a five-million-dollar plant is to be erected by the Great Lakes Pulp and Paper Co., at Port Arthur.

Ottawa is somewhat worried over the coal situation. Since the American strike began about November 1st, not a pound of coal has entered Canada; and although the strike is now officially off, the United States authorities are still refusing to export any coal to Canada. As soon as it was seen that the situation was serious, Mr. C. A. Magrath was reappointed fuel controller by the government. He has been in Washington for the past week, urging the American authorities to allow certain supplies to be shipped to Canada, but so far without success. He has called in the services of Hon. N. W. Rowell and Hon. Gideon Robertson, who are in Washington attending the labor conference and they have taken the matter up with the American Cabinet. They will be back in Ottawa this week-end, and will discuss the situation with the federal ministers.

The export of Canadian coal has been forbidden except by license, while a complete ban has been put on the exportation of coal to Europe. In view of this, the government here feel that the United States should go out of its way to supply Central Canada with any supplies which are urgently needed, as the Nova Scotia mines are bunkering American ships, and shipping to New England, while British Columbia mines are shipping to the Pacific Coast of the United States and Alaska. In view of these facts and also that a large amount of electrical energy is transmitted from Canada to the United States the government are preparing to make strong representations on the matter to Washington.

BANK OF MONTREAL STATEMENT

Total Assets Increase $55,000,000—Holdings of Government Securities Over $60,000,000

OF outstanding interest each year is the annual statement of the Bank of Montreal because of the close relations of this bank not only with business throughout the country, but also with financial affairs of the government. The Bank of Montreal's financial year ends October 31st, and that for the year just ended covers what is almost entirely a peace year. The profit and loss account shows the following items in comparison with last year:—

	1918.	1919.
Balance brought forward	$1,664,893	$1,901,613
Profits for the year	2,562,720	3,314,227
Premiums on new stock	....	3,500,000
Total	$4,227,613	$8,715,840
Dividends	1,900,000	2,372,250
War tax on circulation	160,000	190,986
Subscriptions to patriotic funds	46,000	39,750
Reservation for bank premises	200,000	300,000
Credited to rest accounts	....	4,000,000
Balance carried forward	1,901,613	1,812,854

The following are some of the items in the balance sheet compared with 1918:—

	1918.	1919.
Liabilities to shareholders	$ 42,268,652	$ 42,421,475
Notes in circulation	41,011,084	43,922,844
Demand deposits	124,736,111	129,946,641
Savings deposits	268,167,111	312,655,964
Gold and silver coin	24,743,935	24,742,634
Dominion notes	54,107,243	49,865,151

Total assets	489,271,197	545,304,809

The statement indicates how quickly the bank is meeting peace conditions throughout Canada. During the war period the bank assumed heavy commitments to assist the financing of the Dominion and Imperial governments, but since the armistice every endeavor has evidently been centred on getting back to normal line of business. Peace conditions naturally make for greater opportunities of trade and manufacture, and in providing for them there is a big gain in current loans throughout the country.

FAILURES IN CANADA

The following is a list of business failures in the Dominion from October 24 to November 14, as reported by R. G. Dun and Co.:—

Alberta Union of Municipalities Convention

Want Higher Hospital Grants From Province—Must be More Careful in Future Financing—Past and Present Forms of Municipal Government—Want Less Provincial Control

THE fifteenth annual convention of the Alberta Union of Municipalities was held in Edmonton, November 11th and 12th. A welcome to the city was extended by Mayor Clarke, who stated that Edmonton was emerging from its time of stress remarkably well, with bank clearings and general business returns greatly in excess of even one year ago. The mayor believed there was reason for the utmost confidence in the future. To the mayor's greetings reply was made by Mayor H. A. Blair, of Stettler, whose conviction it was that the union of municipalities was second only in importance to the provincial legislature.

Lieut.-Governor Brett, in officially opening the convention, emphasized the importance of the municipal field as a training ground for political life. Premier Stewart, who also spoke at the opening meeting, outlined new developments in the province, and expressed himself in favor of compulsory education for all. The presidential address was delivered by R. J. Chrystal, reeve of Carstairs and president of the Union of Municipalities. It reviewed the outstanding events of the year and for the future pointed out the desirability of action along certain lines. "One of the first questions that should be settled in the coming year," he said, "is that of our useless subdivisions, which are the cause of endless work and worry to our municipalities. It is high time to write off our bad debts where necessary and get down to a financial basis where we can reasonably figure income and expenditure, as in every other business, governing our actions by facts rather than future speculative growth."

Relations between the Union of Municipalities and the Alberta Association of Municipal Districts were referred to by J. H. Donahoe and W. J. Jackman, president and secretary respectively of the latter organization. Greater co-operation was possible, they claimed, especially in regard to the subdivision problem. The further floating of subdivisions miles out in the country must be prevented, and to that end, it was suggested, some public body representative of both interests, should be formed. Both speakers declared that the rural body stood ready to work hand in hand with the larger union. There was even the possibility of amalgamating.

Cities Want More Freedom

An address by Mayor W. D. L. Hardie, of Lethbridge was followed by the passing of a resolution to the effect that the legislature give the cities absolute control in levying and collecting current taxes. At the close of the convention it was decided to petition the government along these lines. Alderman Adams, of Calgary, suggested that the present city charters be abolished and a city Act passed defining the relations between the province and the cities, and making the latter self-governing bodies. Mr. Hardie looked forward to having city government entirely free, and the first step would be absolute control of taxation. "The uneven burden of taxation now imposed by charter conditions is one of the greatest evils," he said. "To straighten it out would be difficult at best, but under charter conditions controlled by people outside of the cities the task is impossible." He held that the argument often used to the effect that, even with their limited privileges, cities of the west were extravagant and piled up debts, was unsound because "the mere fact that charters specifically set forth what could be done led city councils to believe the privileges were sound. If they had been faced with indefinite responsibilities, they might have felt these responsibilities bearing more heavily upon them and would have weighed expenditure more carefully." Moreover, provincial governments had been guilty of like extravagance, said Mr. Hardie. Checks on over expenditure could be instituted more easily and speedily by free cities than by the cumbersome methods of the provincial government.

Municipal Accounting and Administration

Secretaries and treasurers from a number of the Alberta towns talked over ways and means of doing their work at a round table conference over which H. P. Long, of Vermilion, presided. Municipal bookkeeping and the best way to keep the civic records were discussed in detail. A. S. Soutter, inspector of the department of municipal affairs told the secretaries of proposed changes in the tax collection and record system, the purpose of which was to standardize and simpify the office procedure throughout the province. Revisions were now being made, some of which, however, did not seem to some of the delegates to be entirely acceptable, and a recommendation to the government for re-consideration of certain points will likely be passed before the convention is over. One of the facts brought out in the secretaries' discussion was to the effect that the ten per cent. discount on taxes was worth while because of its psychological value, even if it was added to the tax levy first and then taken off.

An address on "Local Improvements" was given by A. W. Haddow, city engineer of Edmonton, who said the assessment for improvements such as grading, paving, sidewalks and sewers should be from one-third to one-half the total cost; the unit-rate method of assessment was the most acceptable. J. A. Kinney, as member of the Workmen's Compensation board, explained the workings of the compensation Act in Alberta, which now applies to all industries in the province except agriculture and retail stores. Mr. Kinney thought that these, too, should be included within the scope of the Act in the interests of both employer and employee. Amendments to the Act should be secured, he said, in order to make it thoroughly operative and effective.

Hon. A. G. MacKay, in addressing the convention on the question of taxation, stated that the desire of the government was to give increased power and responsibility to the local municipalities, particularly in regard to hospitals, schools, and the like. The province's functions should terminate to a great extent, he said, when the laws and procedure were adequately standardized, and the local application should rest with the local governing bodies. It was neither possible nor desirable to put the province into a straight jacket. The present taxation system was not a good one, the minister admitted. There was too great inequality between the assessments in different parts of the province, and it was undeniable that in many cases the taxes were unfair. As a means to remedying the existing evils, Mr. MacKay recommended the appointment of a permanent and independent commission to review the assessments, so that a fair equalization might be effected. The minister thought that this commission should consist of five members, two to be appointed by the union of municipalities, two by the rural municipalities, and one by the government. It would hold, perhaps, ten or twelve sittings before attempting a rough equalization scheme, and he believed that a much better and more satisfactory distribution of taxation would result.

Petitions and Resolutions

It was decided to petition the government for a commission to investigate government aid to schools and the possibilities of securing more revenue; for an investigation of hydro-electric power possibilities in the province; that the province should adopt the federal housing scheme; and, as previously mentioned, that greater freedom in taxation be granted to cities and possibly to towns. At the last session resolutions were also passed asking that the town and village Act be amended to change the dates of election until after the end of the calendar year, so that auditors' reports might be completed; that legislation be sought making it compulsory for tax certificates to be filed in order to

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

secure registration of transfers; that the convention support the Industrial Research Bureau and its work.

The officers elected for 1919-20 are: President, R. C. Marshall, mayor of Calgary; vice-president, Commissioner Freeman, of Lethbridge; second vice-president, V. E. Forster, Camrose; secretary-treasurer, J. D. Saunders, Camrose, re-elected. The new executive committee is composed of Alderman McCarthy, Medicine Hat; Mayor Clarke, Edmonton; J. Carnegie, Bassano; H. P. Long, Vermilion; and Messrs. Bryan, of Innisfail, Campbell, of Viking, and Fulton, of Halkirk. Lethbridge was chosen as the place of meeting for next year's convention.

Forms of Civic Government

One of the features of the convention was an address on "Civic Government Past and Present," by C. J. Yorath, city commissioner of Saskatoon. He said in part:—

"While many forms of civic government have been placed upon the statute book, there is no one single form which has received general approbation. Matters of vital interest to the welfare and future development of the Dominion of Canada depend upon the legislative and administrative work of the civic government and unless municipal law and regulations are based upon expert knowledge of municipal subjects with some degree of uniformity and unless the administrative work of local authorities is efficiently carried out the best interests of the Dominion will be seriously affected.

"To show that civic government is not a subject which can be solved in the best interests of the country as a whole by individual local authorities or provincial governments it is desirable that some of the most deplorable results of the present system or lack of system of civic government should be realized.

"The combined general debt of towns and cities throughout Canada before the outbreak of war was $516,979,614 whereas the debt of the Dominion at the same time was $335,996,850 and the combined debt of the provinces $178,370,412, or the total municipal debt exceeded the combined debt of the Dominion and the provincial governments. From these figures it will be realized that if a reduction in taxation is to be made, some effective remedy should be applied to the government responsible for the largest expenditure of public moneys—i.e, the local authorities.

"Another national waste is the enormous annual fire loss throughout the Dominion. During the year 1914 the total loss by fire was $24,300,000, or nearly twice the amount of interest upon the Dominion debt which in the same year amounted to $12,893,505. Local authorities are largely responsible for this loss as it is part of their duty to pass building by-laws and regulations governing the construction of buildings, but because of the lack of knowledge, a uniform system of building regulations and by-laws throughout the Dominion, and a desire to build up a community as rapidly and as cheaply as possible, ordinary precautions against the spread of fires are not taken.

"Another great national loss and for which civic government is again largely responsible, is the infant mortality. It is estimated that the average annual deaths of infants under one year of age (according to Dr. C. A. Hodgetts, medical adviser, Commission of Conservation) is 25,000. This figure can only be approximated as the registration of births, deaths and marriages is under provincial control and owing to the divergent methods and entire lack of statistics, a definite figure cannot be given.

"There are many other channels through which an enormous sum of public money is allowed to run to waste for lack of experienced control, but the above examples should be sufficient to emphasize the necessity of an immediate reform in civic government.

"Before discussing an ideal form of government it will be necessary to shortly describe what civic government means and in what respect present forms of government have failed.

"Civic government should mean the conservation of life and all those resources which tend toward the economic development of the community; the betterment of social conditions and the elimination of blind wasteful expenditure in spasmodic and haphazard development of towns and cities without regard to the co-relation of the different units so as to build up a completed scheme of development capable of gradual expansion to meet the needs of the growing community.

"Civic government should control and govern:—

"(a) The proper housing of the people so that conditions are such as to promote a high standard of public health.

"(b) The proper and efficient development of a water, drainage and sewerage system which can be built up unit by unit at a minimum cost.

"(c) The proper relationship of the main arterial and secondary thoroughfares so that the most direct means of communication from one part of the community to another is obtained, thereby reducing the cost of haulage to merchants and others, and the amount to be expended upon street paving.

"(d) The proper protection to property from fire loss by prevention rather than by the establishment of a large fire department.

"(e) The proper provision of rapid means of transit from one part of the community to another in order to eliminate the congestion of traffic and its attendant waste and to provide easy and cheap means of access for the worker to and from his home and place of business.

"(f) The proper distribution of the different sections of the community so that residential commercial and industrial areas are placed in true relationship one with another.

"(g) The conditions under which the workers in factories are compelled to work so as to reduce if not entirely eliminate that terrible scourge, consumption, which is unduly prevalent amongst such workers.

"(h) The proper provision of 'lungs' in the way of parks and open spaces so that the healthful life of the country may be brought as near as possible into the lives of those living in our more thickly populated communities.

"(i) The proper removal and disposal of all refuse which so quickly accumulates in towns and cities.

"(j) The work of the police department so that the laws are properly enforced and the property of the community protected.

"(k) The proper system of assessment and taxation and the financing of its expenditures.

"(l) The receipts and expenditures of public moneys for current and capital accounts.

"(m) The safeguarding of the sinking fund and the investment of same so that it will earn its maximum rate of interest with absolute security.

"(n) The consolidation of all civic financing including that of schools.

"These problems in civic government necessitate the establishment of several civic departments including engineering, legal, finance, health, fire, police, assessment and taxation, cleansing, open spaces and parks, and in addition if the municipality owns its own utilities, water works, street railway, electric light and power, etc. The above are some of the important subjects with which civic government has to deal. A superficial glance at the constitution of and methods adopted by such governments, will convince the most indifferent taxpayer that his money is often being squandered through lack of experienced administration and proper representation.

"Some of the best and most successful business men are termed civic failures after they have for a short while served upon a town or city council and are sacrificed year after year upon the altar of public opinion. Why? Is it the man or is it the system which is at fault? There can be no doubt that the fault is with the system and if a successful business man who has served a term upon a council is asked for a reason, he will usually admit three things—i.e.:—

"(a) That he has not sufficient time to devote to civic affairs.

"(b) That principal work is so diverse and oftentimes so technical that it requires a great amount of study

and experience to conduct it in such a manner as will give the best results to the community.

"(c) That his own business if conducted upon the same system would be a failure.

"The recent reforms in civic government have aimed to remedy either one or all of the above reasons for failure in civic administration."

Mr. Yorath then described present forms of civic government in Great Britain, United States and Canada, pointing out some of the defects in each case. "It will have been noticed," he said, "from the above short history of municipal government that civic bodies struggling towards a goal which from their own business instincts they knew to be the only satisfactory system of civic government so far as it relates to administration—i.e.: experienced management with concentration of control and responsibility. Would any business be a success if instead of an experienced manager it was administered and controlled by a committee selected by the shareholders whose members had no experience in the particular class of business and the personnel of which was changed each year or every two or three years? The idea is ludicrous and it is equally as ludicrous to expect a city's affairs which are more diverse and more technical than the majority of businesses to be conducted with efficiency and with the best results to the ratepayers when such a system is in vogue.

Suggested Form of Civic Government

"It is suggested that the principles which should be recognized in order to obtain successful civic government and development are:—

"1. Popular control by proper representation.

"2. Division of government authority into: (a) Legislative and financial; (b) administrative.

"3. Experienced control of administration and development."

The speaker then described methods of electing civic councils, and division of civic government authority. The council should be directly responsible for legislative work governing the needs of the community, and for the financing of public improvements and current expenditures; to facilitate this work, committees on finance and on legislation and by-laws should be appointed. The next step, he said, is to concentrate responsibility in experienced management, by appointing an experienced manager. This manager should, at the first meeting in the financial year, submit a report upon contemplated capital and current expenditures, which estimates should be passed upon by the council as soon as possible. Departmental heads, instead of reporting to committees, would report to the manager upon the work of their respective departments.

RURAL CREDITS IN MANITOBA

An official statement issued by George Prout, M.L.A., for the Manitoba government department, shows an increase of more than 400 per cent. in the amount of money loaned under the Rural Credits scheme to the thirty-eight societies now operating in Manitoba. During 1917, the first year of the scheme, only $17,000 was loaned. In 1918, $215,000 was loaned, and this has been increased this year to $1,051,876. It is officially shown by the records of the department that the acreage of breaking done on capital borrowed under the Rural Credits Act for the present year was 30,000 acres.

The first convention of Rural Credit Society directors on the North American continent will be held in Winnipeg, January 13, 14 and 15, 1920, and will be attend-Sterling Bank. "Courteous service," says the article, "per-vention will be addressed by leading authorities of Canada and the United States on agriculture, farm management and farm finance. Rural credit societies in Manitoba have loaned more than $1,000,000 this year, and at the present time there are 38 societies in active operation.

PROMPTNESS IN BANK SERVICE

Customer Must Not Feel That His Business is Being Neglected for That of Another

The importance of dispatch in serving customers is emphasized in the October "Teller," just issued by the Sterling Bank. "Courteous service," says the article, "perhaps is the strongest and most potent factor in the building up of any bank. But, no matter how courteous, speed must be coupled with the service or it is not appreciated. 'Don't keep customers waiting any longer than necessary,' may seem like needless advice to many officers. They do transact business as quickly as possible—yet the customer goes away with the feeling that he has been kept longer than necessary. Why?

"Sometimes an officer of necessity must leave the client and go back out of sight to some inner office to get the information the client wants. Although he is perhaps conducting the business as fast as possible, yet every couple of minutes which pass seem like five to the waiting customer. He gets restless and, because he cannot actually see the banker hurrying, he goes away feeling that he has not received the service he had a right to expect. It is human nature to be suspicious of that which we cannot see. It would have helped perhaps if the officer had returned flushed of face and with beads of perspiration on his brow, but that cannot be and is not expected. It would be much better and leave the customer in a better frame of mind to let him know that he will be attended to with all possible speed, but that it will take a few minutes. This service behind the scenes is like the beginning of the second act of a play. Many things have happened during the interval while the audience waited. The actors by what they say tell the audience all about it, give them a complete understanding, and they are satisfied.

"One day a gentleman entered a bank and presented a cheque to an officer. The officer looked at it, asked a few questions, then went to a desk loaded with ledgers, selected one and turned the leaves in a smart and business-like way Before he found the desired page another officer standing beside him interrupted by touching his arm and showing him a sheet he had in his hand. They spoke together as though puzzled, then together opened a ledger and ran their fingers down several columns of figures. They seemed to find that which they were looking for, but still appeared rather puzzled. They opened another ledger, found the page and compared the two. One officer took a pad and did a little figuring and finally after a little more talk they seemed to solve the difficulty and the first officer turned again to the ledger he had opened. He quickly got the desired information, closed the ledger, and, on the way back to the client said something to another officer; then laid the cheque before the client.

"Now, everything that happened from the moment the banker took the cheque may have been absolutely necessary, yet the customer didn't understand it that way. He felt when the two officers were working together that he was being neglected while some other man was being attended to. That his business wasn't being put through with the dispatch it could have been. And he went away dissatisfied. There must have been reason for the short delay, and no doubt it could have been told to the client. A short, courteous explanation would have sufficed to send that customer away completely satisfied. So, like the actor in a play explaining what happened between acts, the officer should explain as quickly and as courteously as possible, the reason for each delay which the customer is unable to understand."

On November 2nd, preliminary steps were taken in Winnipeg, at a meeting of the Bureau of Civics, for the creation of a Bureau of Research, which will be operated with the object of educating the citizens in matters that relate to municipal government and the welfare of the community generally. A permanent secretary will be appointed, and the bureau has some funds in hand for the start upon a course of civic usefulness.

HAIL INSURANCE IN SASKATCHEWAN

Results This Year Are Unsatisfactory, But Municipal Hail Association is Still Confident

(Special to *The Monetary Times*)

Regina, November 14th, 1919.

WITH a total of $3,750,000 paid out or yet to be paid out in indemnities for 1919 losses, hail insurance in Saskatchewan this year received a severe jolt. Of this amount $1,800,000 was liability incurred by line companies operating in the province, the remainder, or more than fifty per cent. of the total, being charged up against the Saskatchewan Municipal Hail Insurance Association. While the damage to the crops from summer storms was heavy the indemnities will be paid in full, though some of the private companies have had to pay one hundred per cent. of their premium income for the year. The total premium income of the line companies was $2,250,000 approximately, according to the Saskatchewan Insurance Commissioner.

The total estimated expenditure of the Municipal Hail Insurance Association for the year is $2,167,000, including operating expenses. To offset this the municipalities operating under the Act have been assessed a total sum of $2,300,000, of which $1,639,000 has been paid in to the association or will be paid in by the end of this week. Further payments which may be made will probably reduce the deficit to $500,000, which will be recoverable next year. This will be provided for by bank loan, a guarantee for which has been promised by the Provincial government.

First Year for Special Levy

It was unfortunate for the municipal hail insurance scheme that heavy damage should have been incurred the first year of the operation of the seeded acreage plan of assessment, designed to provide for payment of indemnities in full. Prior to this year the scheme provided for a fixed indemnity of $5 an acre for total loss, the revenue being derived from a flat rate of 4 cents an acre on all lands, cultivated and uncultivated. The losses in 1916 were so heavy that it was only possible to pay out 40 cents on the dollar on a pro rata basis. In 1917 there was sufficient revenue to pay the losses in full, but the following year it was only possible to pay out 80 cents on the dollar.

To enable the association to pay indemnities in full the Saskatchewan legislature in 1918 amended the Act permitting the association, after the losses had been determined, to supplement its revenues by an additional assessment on crop acreage, making provision, however, for the exemption of 40 acres of seeded land of each man's holdings. This method of assessment came into force this year and, on account of the substantial losses it was found necessary to make a levy of 22 cents an acre on seeded acreage.

The abnormal crop conditions in some sections of the province, making it impossible for some of the municipalities to collect and pay their assessments, provided the directors with one of their financial difficulties, the system of operation in preceding years having precluded the possibility of building up any reserve, and it is the non-payment of levies by such municipalities that is responsible for the estimated deficit of $500,000. Another difficulty with which the management has had to contend this year is the delay of some municipalities in securing returns of acreage under crop from farmers in their districts, and in forwarding this information to the association. The returns are also required to show the farmers who have exercised the withdrawal privilege.

Many municipalities found it very difficult to secure accurate information from the farmers. In a number of municipalities no organized attempt was made to get the information; if the farmer supplied it voluntarily it was accepted. If he didn't the matter ended there. This was, of course, unfair to those who did report and who were taxed to provide the funds so that the claims could be paid in full. The number who are escaping in this way is very small, but the association was faced by the problem of providing some means so that all those who do not withdraw their lands will be required to give the necessary information.

Convention in Regina

With these difficulties to solve a convention of representatives of all the municipalities in the province was held in Regina on November 13th to consider the adoption of measures which would strengthen the Act and eliminate some of the troubles of administration. About one hundred of the one hundred and twenty-five municipalities operating under the Act were represented at this conference, which lasted the entire day. At the outset it was pointed out that if an additional rate had been imposed in 1918 sufficient to ensure full payment of an indemnity of $5 an acre, a farmer with 200 acres under crop would have received protection to the extent of $5 an acre for the years 1917, 1918 and 1919 at a total cost of $81.60 under the municipal plan, whereas it would have cost him $180 to secure similar protection for the same period from the private companies, who have been charging six per cent. cash, or 30 cents per acre cash premium for $5 insurance since 1916.

At no time during the convention was the question of the wisdom of continuing municipal hail insurance considered, the delegates setting themselves immediately to the task of improving the Act. On the contrary complete faith in the principle was unanimously expressed by the directors, representatives of the government and the rank and file of the convention.

It was decided to continue the policy of levying a flat rate of 4 cents an acre on all lands, and to continue to levy an additional rate upon crop when necessary. It was also decided to ask the government to amend the Act to permit the annual convention to fix a maximum additional rate, which it is suggested should be 30 cents an acre. Further amendments were asked providing adequate machinery for securing information of lands under crop and withdrawals at the proper time, the onus of furnishing this information to be placed partly upon the owner of land and partly upon the municipality. It was agreed that the owner who failed to report the amount of his land under crop to the municipality by June 1st should be penalized $1 per quarter-section.

In the event of the owner of the crop neglecting or failing to report, the council of the municipality is required to send some one around to secure the information, and in the absence of the owner he must make an estimate of the acreage under crop. The owner must be bound by the estimate which will be final, whether for the purpose of assessment or for the purpose of paying claims.

An amendment is asked which will make the minimum term of withdrawal by any owner of his land, one year, such land to remain withdrawn until the owner makes written application for his land to be re-assessed It was also agreed that provision should be made for cancellation of insurance within certain dates in the event of crops being partially or totally destroyed by some cause other than hail. In this respect it was decided to follow the plan in force in Alberta where provision for cancellation is made for periods ending July 1st, July 10th, and July 20th on payment respectively of 2½, 5, 7½ and 10 cents per acre excess rates.

In addition to the penalty of $1 per quarter-section already provided for non-payment of levy on November 1st, it was agreed that unpaid levies should carry the regular municipal penalty of 8 per cent. for unpaid taxes which is imposed the following January.

It was also agreed that commissions for the work of assessment and collection should be paid direct to the municipal council rather than to the secretary-treasurer. The amount to be paid was left to the directors who are of the opinion that it should not exceed one-fifth of a cent per acre upon all assessable land in the municipality.

An amendment will be asked empowering the association to levy for the purpose of building up a reserve. The amount to be raised for this purpose was left to the directors, but it was the consensus of opinion that assessment for reserve should only be made in years of small losses.

VINCENT MEREDITH,
President.

FREDERICK WILLIAMS-TAYLOR,
General Manager.

To the Shareholders of the Bank of Montreal:—

We have checked the Cash and verified the Securities of the Bank at the Chief Office on the 31st October, 1919, and also at another time as required by the Bank Act, and we have found them to be in accord with the books of the bank. We have also checked the Cash and verified the Securities at several of the Principal Branches of the Bank at various times during the year. We have obtained all information and explanations required, and all transactions that have come under our notice have been, in our opinion, within the powers of the Bank. We have compared the above Balance Sheet with the books and Accounts at the Chief Office of the Bank, and with the certified Returns received from its Branches, and we certify that in our opinion it exhibits a true and correct view of the state of the Bank's affairs according to the best of our information, the explanations given to us, and as shown by the books of the Bank.

Montreal, 17th November, 1919.

J. MAXTONE GRAHAM,
JAMES HUTCHISON, } Auditors.
GEORGE CREAK,
Chartered Accountants.

EMPLOYMENT CONDITIONS IN CANADA

The last report of the Employment Service of Canada, Ottawa, shows that returns for the week ending November 1st were tabulated from the reports of 4,631 firms, of which 2,211 were in Ontario, 890 in Quebec, 471 in the maritime provinces, 669 in the prairie provinces and 390 in British Columbia. These firms reported 666,139 persons on payroll as compared with 665,079 of the preceding week, an increase of 1,060 persons, or .2 per cent. A decrease of 1,531 persons, or .2 per cent., however, was anticipated for the week ending October 25th. Returns for the week ending October 25th were tabulated from the reports of 4,631 firms also with 661,572 persons on payroll, which firms had increased their staffs by 3,047 persons, or .5 per cent. An increase of 765 persons, or .1 per cent., was anticpated for the week ending November 1st, which anticipation was more than realized.

Plus industries—those that registered net increases in the number of persons employed—with their respective percentage increases, were: Commercial and mercantile, .9 per cent; food, drink and tobacco, 1.3 per cent.; leather and leather goods, .6 per cent.; metals, .7 per cent.; textiles, .6 per cent.; woodworking, .5 per cent.; quarrying and mining, .7 per cent.; miscellaneous, .3 per cent., and railway operation, a nominal increase only. The greatest increases were thus made by the same firms which registered the greatest increases during the week ending October 25th, namely, commercial and mercantile; food, drink and tobacco; metals; textiles, and quarrying and mining. The changes in the other groups were not so marked. With the exception of food, drink and tobacco, all groups anticipated further increases during the week ending November 8th. Textiles anticipated an increase of .6 per cent., while food, drink and tobacco anticipated a loss of .2 per cent.

Minus industries—those that registered net decreases in the number of persons employed—with their respective percentage decreases, were: Building and construction, 1.5 per cent.; lumbering, .4 per cent.; clay, glass and stone products, 1.5 per cent.; chemicals, .7 per cent.; pulp, paper and printing, .4 per cent.; vehicles, .3 per cent., and railway construction, 3.2 per cent. All decreases were thus large, but the decrease in railway construction was by far the most noticeable of any registered. Pulp, paper and printing, vehicles and railway construction, moreover, expected further decreases during the week ending November 8th, the anticipated loss in railway construction of 5.9 per cent. accounting largely for the decrease anticipated in the returns for the combined industries.

COBALT ORE SHIPMENTS

The following is a statement of shipments of ore, in pounds, from Cobalt Station for the week ended November 8th, 1919:—

O'Brien Mine, 64,010; Mining Corporation, 130,060; Buffalo Mine, 187,308; Coniagas Mines, 132,170. Total, 513,540.

Shipments for the week ended October 25th, 1919, were as follows:—Coniagas Mine, 60,000; Mining Corporation, 64,414; La Rose Mine, 83,475; Trethewey Mine, 125,969; Buffalo Mine, 198,000; total, 531,858 pounds. The total since January 1st, is 22,338,972 pounds, or 11,169.48 tons.

FIFTY MILLION IN FARM LOANS

The following figures represent the operations of the Soldier Settlement Board of Canada up to November 1st, 1919:—

Total amount of loans approved	$49,041,584
Total number of loans approved	15,209

The loans were approved for the following purposes:—

On Land Purchase—		
Amount for purchase	$27,254,171	
Amount for improvements	3,329,339	
Amount for stock and equipment.	9,912,106	
		$40,495,616
On Dominion Lands—		
Amount for improvements	$ 1,346,995	
Amount for stock and equipment	3,779,567	
		5,126,562
On Privately-Owned Lands—		
Amount for removal of encumbrances	$ 1,708,375	
Amount for improvements	574,700	
Amount for stock and equipment.	1,136,331	
		3,419,406

NEW ISSUE *FIVE YEAR*

6½%

$2,550,000

Collateral Trust Gold Bonds—6½ p.c.—Five Year

OF THE

Montreal Public Service Corporation

Dated July 2nd, 1919. Due July 2nd, 1924.

Semi-annual Interest payable January 2nd and July 2nd.

Principal and interest payable, in gold, at the holder's option, at:

La Banque d'Hochelaga, in Montreal and Quebec.

The Merchants Bank of Canada, in Montreal, Toronto and Quebec.

DENOMINATIONS: $1,000., $500. and $100.

REDEMPTION: Bonds are subject to redemption by the Company, in whole or in part, on the 2nd or 3rd interest date at 101½ and accrued interest,—or at any subsequent interest date at 101 and accrued interest, on thirty days' notice being given in each case.

REGISTRATION: Bonds may be registered as to Principal, at the office of the Bankers' Trust Company, Montreal.

TRUSTEE: The Bankers' Trust Company, Montreal.

LEGALITY: Messrs. Béique and Béique and Messrs. Perron, Taschereau, Rinfret, Vallée and Genest, solicitors, have passed upon the validity of this issue.

SECURITY FOR BONDS

These Bonds are secured by pledge and transfer to the Trustee, of:—

1. $ 400,000 Montreal Public Service Corporation, First and Refunding Mortgage 5%, 30 year gold Bonds, due 1st September, 1942;
2. 2,550,000 Montreal Public Service Corporation, Second Mortgage 6½% Bonds, dated July 2nd, 1919, due July 2nd, 1924;
3. 1,700,000 Canadian Light & Power Company 5% Bonds, First Mortgage due July 1st, 1949;
4. and 59,500 common shares of the par value of $100 each of the Canadian Light & Power Company, —out of a total outstanding issue of 60,000 shares.

The market value of the above collateral may be conservatively estimated at $3,445,000,—providing ample margin of security for the present issue.

MONTREAL PUBLIC SERVICE CORPORATION This Corporation, which was founded in 1908, is a consolidation of the SARAGUAY ELECTRIC AND WATER COMPANY, the DOMINION LIGHT, HEAT and POWER COMPANY and the St. PAUL ELECTRIC LIGHT & POWER COMPANY; it owns the distribution system of the CANADIAN LIGHT & POWER COMPANY, and operates, under lease, the plant and distribution system of the CENTRAL HEAT, LIGHT & POWER COMPANY.

It furnishes electric power to the MONTREAL TRAMWAYS COMPANY, under a most valuable contract extending over a period of 50 years, until 1965.

Its distribution market of electric light and power covers the larger part of the Island of Montreal, including the City, where it serves nearly 14,000 customers, amongst which figure some of the most important industrial and commercial institutions.—The Company also furnishes the street lighting to a large number of City wards and adjoining municipalities.

CANADIAN LIGHT & POWER COMPANY This Company is one of four Public Utility Companies headed by the Montreal Tramways & Power Company, Limited, and comprising the Montreal Public Service Corporation, the Montreal Tramways Company and the Canadian Light & Power Company, which are doing business under the same executive.—It owns and operates a large hydro-electric plant at St. Timothée, P.Q., and furnishes the electric light and power distributed by the Montreal Public Service Corporation.

PRICE: Par (100) and accrued interest

AREAS SOWN IN FALL WHEAT

Increase in Ontario, But Decrease in Alberta—Weather Has Retarded Fall Plowing

ON November 15th, the Dominion Bureau of Statistics issued a bulletin showing the area estimated to be sown to fall wheat for the harvest of 1920 and the condition of this crop on October 31; the proportion of fall ploughing; and the percentage of summer fallowing. The total area sown to fall wheat in Canada for the harvest of 1920 is estimated to be 776,400 acres, as compared with 714,700 acres last year, an increase of 9 per cent. The area sown in Ontario is placed at 717,000 acres, as compared with 652,000 acres last year, an increase of 10 per cent. In Alberta the area is 58,400 acres, as compared with 43,700 acres last year, a reduction of 12 per cent.; but the figures for this province are subject to revision. In the other provinces, where fall wheat is sown to a small extent—viz., Manitoba and British Columbia, the area in Manitoba is 6,400 acres as against 6,100 acres last year, and in British Columbia it is 14,600 acres, as against 12,900 acres. The condition of fall wheat on October 31 is reported as 104 per cent.—i.e. 4 per cent. above the decennial average, as compared with 102 per cent. last year and 87 per cent. in 1917. In Ontario the condition is 107 per cent., as compared with 102 per cent. last year and 87 per cent. in 1917; in Alberta the percentage is 98 for this year and last year, and in 1917 it was 99. In Manitoba and in British Columbia the percentage is 97 this year. Last year the percentage in Manitoba was 71 and in 1917 it was 110. In British Columbia the percentage last year was 98, and in 1917 it was 82.

Weather Conditions in the West

Reports from crop correspondents and from the Dominion experimental farms and stations indicate that the month of October has been unusually cold. Wintry conditions set in after the first ten days, hindering threshing operations, interfering with fall ploughing, and resulting in the freezing in the ground of large quantities of potatoes, as well as in the loss of thousands of boxes of apples in British Columbia. Towards the end of the month temperatures below zero were experienced in Manitoba of 11, at Brandon; in Saskatchewan, of 22, at Indian Head; of 11.8 at Rothern; of 19 at Scott, and, in Alberta, of 15 at Lethbridge.

Owing to these exceptional weather conditions, the proportion of fall ploughing completed in Saskatchewan and Alberta was smaller than in recent years, and this, notwithstanding the very early harvest. In Saskatchewan only 30 per cent. of fall ploughing has been done this year, as compared with 39 per cent. last year and 37 per cent. the year before. In Alberta the proportion is 24 per cent., as compared with 35 last year and 38 per cent. in 1917. On the other hand, Manitoba shows the higher proportion of 64 per cent., as against 54 per cent. last year and 40 per cent. in 1917. In British Columbia the proportion is 56 per cent., as against 48 per cent. last year and 51 per cent. in 1917. In the Maritime Provinces the proportions are higher, being 82 per cent. in Prince Edward Island and 68 per cent. in Nova Scotia and New Brunswick, as compared with 75, 63 and 68 per cent. in those provinces last year. In Quebec 75 per cent. of fall ploughing is reported as completed, as against 62 per cent. last year, and in Ontario the proportion is 77 per cent. as against 64 per cent. The average percentage for the whole of Canada is 66, or 10 per cent. more than last year, and 13 per cent. more than in 1917. As compared with last year, the area under summer fallow is, for Canada, about 6 per cent. less. In Ontario and in British Columbia the area is equal to that of last year; in Manitoba it is 6, in Saskatchewan it is 2, and in Alberta it is 15 per cent. less.

CANADIAN MANUFACTURERS' ANNUAL

The 1920 annual convention of the Canadian Manufacturers' Association will be held in Vancouver and Victoria next June.

CHATEAU FRONTENAC, QUEBEC.

Canadian Pacific Railway Hotel System

Canadian Pacific Hotels from the Atlantic Ocean to the Pacific set the standard for hotel accommodation in Canada. Each hotel is distinctive in appointment and style; each has the same superb Canadian Pacific service.

THE CHATEAU FRONTENAC, Quebec, is a famous hotel in the most characteristic city of North America. Standing on Dufferin Terrace, it commands magnificent views of the River St. Lawrence.

THE ROYAL ALEXANDRA, Winnipeg, so well known and so popular with travellers that it has been enlarged to twice its original size.

THE PLACE VIGER, Montreal, is an ideal hotel for those who prefer quietness and yet wish to be within easy reach of the business centre of Montreal.

THE PALLISER, Calgary, a handsome new hotel of metropolitan standard, from the roof of which the snow-capped Canadian Pacific Rockies are visible.

THE HOTEL VANCOUVER, a spacious hostelry that overlooks the Straits of Georgia and contains 650 rooms.

THE EMPRESS, Victoria, a luxurious hotel that appeals to the artistic sense, in a city of picturesque homes and Old Country atmosphere.

The above hotels, and others similarly situated at strategic points on the transcontinental line of the Canadian Pacific Railway at McAdam, N.B., Sicamous, B.C., and Penticton, B.C., are open all the year round. Six other hotels, including four in the wonderful Canadian Pacific Rockies, are open in summer only.

LIABILITY IN ADMINISTRATION CASE

Guarantee Co. Held Responsible for Moneys, of Which Account Had Not Been Rendered Before Date of Guarantee Bond

JUDGMENT has just been given in the Quebec Court of Review against the United States Fidelity and Guaranty Co., in the case of the insolvent estate of Emile Daust. The latter had, at the request of creditors, made an abandonment of his goods into the hands of Wm. T. Hood, accountant and liquidator. The United States Fidelity and Guaranty Co., on July 27th, 1914, guaranteed the good administration of Hood, in the sum of $2,000, so long as "he shall in all respects act legally and honestly." On July 21st, 1914, Hood prepared a dividend sheet which was protested by A. Bremner, Ltd., one of the creditors. The contestation was maintained by judgment dated March 18, 1916, and confirmed in review on June 27, 1917, several items being reduced to a total of $1,354. The curator was then ordered to prepare a new dividend sheet within thirty days. He did not do so, but, according to the record, left the country without rendering an account of the $1,354. Vinet et al, named curators in his place, were authorized to take the present action against the guarantee company, who submitted that under the conditions of their agreement, they were not responsible for acts committed by Hood before July 27, 1914. If he had dishonestly and illegally administered the insolvent estate previous to that date they said they could not be held responsible. The Superior Court maintained this defence and dismissed the action.

The Court of Review decided there was error in the Superior Court judgment, which was accordingly reversed, and the guarantee company held liable on its bond. Justice de Lorimier said they found that Hood acted illegally in refusing to obey the judgments of the Superior Court and the Court of Review, which ordered him to prepare a new dividend sheet. They also found that the words of the guarantee company's undertaking "that so long as Hood shall . . . . account for all moneys and properties that may come into his hands as liquidator," meant that not only was the guarantee company responsible for the moneys which, after July 27, 1914—the date of the bond—came into possession of Hood, but was responsible also for the moneys the curator received before that date, but of which he did not render an account after the bond was given. The company admitted that interpretation in their factum. "It is true," they said, "the bond also covers the obligation to account for all moneys and securities which the curator had received." But they maintained that the curator in declaring a dividend had actually rendered an account of the moneys he had received.

"The Court cannot concede the latter point," added Justice de Lorimier. "The dividend which the curator declared was illegal and null. That was the decision of the Superior Court, confirmed by the Court of Review. When the bond was given, the curator had in hand $1,354, which belonged to the insolvent estate, and he ought to have remitted that sum to the creditors. Not having done so, his sureties are bound to make good the default under their bond. We are of opinion that the curator (Hood), acted illegally in not obeying the order of the Court which was given subsequent to the date of the bond, and acted dishonestly in not rendering an account of the moneys he continued to hold in his possession after the bond in question was given. For these reasons the Court reverses the judgment *a quo*, dismisses the defence, maintains the action of plaintiffs and condemns the guarantee company defendant to pay to the plaintiffs in their quality of curators the sum of $1,354 with interest and costs."

The new Toronto building of the Huron and Erie Mortgage Corporation, which is to be ready this month, is a four-story building, of which the top floor has been leased to R. Home Smith and Co., the third floor to the Canada Bond Corporation, and the second floor to Edward N. Wilkes, Canadian correspondent of the Guaranty Trust Co.

BANK AND RENT ASSIGNMENT

Alberta Court Holds that Bank May not Distrain Through Assignment of Rents by Landlord

IN an appeal coming before the Appellate Division of the Supreme Court of Alberta on October 4, 1919, it was held that the right to distrain for arrears of rent did not pass to the bank through the endorsation by the landlord of certain promissory notes, taken as security for the payment of rent in arrears. The case was that of the Bank of Commerce vs. Edmonton Law Stationers, the pertinent facts of the case being as follows:—

Facts of the Case

The respondent company had been receiving rents from a certain tenant and had been in the habit of turning those rents, along with other moneys over to the plaintiff in payment of debts due by them to the bank. In the course of these transactions they received promissory notes, which they endorsed over to the bank, some of the promissory notes having been taken in payment of rent in arrears. The tenants of the respondents made some payments on the notes to the bank, but later the respondent company assigned all rents to the bank, one of the provisions of the assignment being: "The undersigned hereby assign and transfer to the Canadian Bank of Commerce as security for all existing or future indebtedness and liability of the undersigned to the bank, all the debts, accounts moneys due or accruing due, or that may at any time hereafter be due, to the undersigned by Edmonton Law Stationers, Ltd., and also all contracts, securities, bills, notes and other documents now held, or which may hereafter be taken or held by the undersigned, or anyone on behalf of the undersigned in respect of the said debts, accounts, moneys or any part thereof."

The question that brought on the present action was whether on the above provision, the bank secured the right to distrain for rent, which at common law resides in the landlord. The trial judge held that, "even if by the assignment to the plaintiffs the rent passed, it did so as an ordinary debt and not as rent and that, consequently, there being also no assignment of the right to distrain, no such right ever accrued to the plaintiffs, they never being entitled to anything that might be deemed to be a rent seck."

Distinction in Legal Status

Mr. Justice Summons in his judgment explained that the lease contained the usual provision enabling the landlord to distrain for rent in default of payment thereof. Now, under the Common Law Rules there must be a tenure between the grantor and grantee with reversion in the grantor to give the right of distress and where no distress is incident to the rent, it was called rent seck—in this case there was no reversion to the bank and hence the bank, under Common Law Rules could not distrain. Later, by statute, rent seck has been given the incident and right of distress. But the lease in question has incorporated in it as and by way of covenant that the right of distress is in the landlord. His Honor further explains that a claim for rent is of a higher degree than that arising out of contract or upon a promissory note and further the rent "may be regarded as of a twofold nature, first as something issuing out of the land as a compensation for the possession during the term, and secondly, as an acknowledgment made by the tenant to the lord of his fealty or tenure." (Wharton's Law Lexicon, 9th ed., p. 611.)

The notes given for rent being a lower form of security than the right of distress, would not be treated as payment of the rent and would not prevent the landlord from distraining before he endorsed them to the bank and therefore the assignment did not include rent as rents, that is to say, an assignment of that material incident of rent, which carries with it the right to distrain for rent in arrears. The bank, therefore, could only bring action on the promissory notes and could not distrain in the goods and chattels of the tenant by reason of the assignment of rent. The appeal was dismissed with costs.

Other deposits	48,682	+	2,616
Total funds	13,586,528	+	1,613,282

BUILDING PERMITS

Employment in the building trades, as indicated by the value of building permits issued in thirty-five cities, according to the Labor Gazette, showed an increase during September as compared with the preceding month, the total value of building permits rising from $9,622,887 in August to $11,645,456 in September, an increase of $2,022,569, or 21.0 per cent. Ontario was the only province to record a considerable increase in this comparison. As compared with the corresponding month in 1918, there was an increase of 332.8 per cent., the value for September, 1918, being $2,690,821. In this comparison all the provinces recorded substantial increases.

Of the larger cities, Toronto alone showed increases both as compared with August, 1919, and with September, 1918. Montreal, Winnipeg and Edmonton reported declines in comparison with August of this year and increases over September of last year, while Vancouver reported a gain as compared with the preceding month and a loss in comparison with September, 1918. Of the smaller centres, Halifax, Quebec, Three Rivers, Brantford, Guelph, Hamilton, Kitchener, Ottawa, Port Arthur, Stratford, St. Catharines, St. Thomas, Windsor, Brandon and Victoria all showed large gains, both as compared with August, 1919, and with September, 1918.

Government shipbuilding in Great Britain has been a failure, according to Sir George Hunter, chairman of Swan, Hunter and Wigham, Richardson, Ltd., shipbuilders, of Tyneside, who is now in Canada. Not one of the shipyards is ready to build ships, he says, although millions of dollars have been spent on them. Private firms, on the other hand, are still busy, and do not fear the competition of other countries.

INDUSTRIAL EVENTS OF THE WEEK

British Plants in Canada—American Investments—International Shipbuilding Plan

A NUMBER of British manufacturers are considering the establishment of branch plants in Canada, and just as soon as Great Britain's industrial machine has been adjusted from war conditions a substantial increase in Canadian trade with the Motherland may be expected. Large extensions are being made to the British Forgings plant at Toronto by the Baldwin Canadian Steel Corporation, a branch of the huge steel concern, Baldwin's Ltd., of Swansea, Wales. The announcement is also made from Hamilton, Ont., of the establishment of a new plant by Porrits and Spencer Co., of Bury, England, for the manufacture of commercial felts. An investment of upwards of $1,000,000 is represented. William Spencer is the head of the Canadian concern, besides being managing director of the company. Boards of trade and chambers of commerce are getting in touch with similar institutions on the other side whereby they can put the possibilities of their communities before the British manufacturers who are considering branching out in any way. F. Maclure Sclanders, commissioner of the Border Chamber of Commerce, who has been inviting branches of British firms in his district and in Canada in general, has received a reply from the Trade and Industrial Committee of the Royal Colonial Institute, London, Eng., revealing interest in Canadian trade possibilities.

American Investments

Interest by American manufacturers, who are placing their branch plants in Canada, is increasing. Francis H. Williams, vice-president of the Trademark Title Co., of Washington, who was commissioned by the government of Ohio in 1916 to investigate trade conditions in foreign countries, and who was in Toronto last week, said: "I look to Canada as being the coming field for big business, not alone for the American manufacturer, but for bigger business in the export field than is now enjoyed by any of the larger companies in the United States." One of the leading mail order houses in the United States is contemplating locating several large branches of their business and plants in Canada which will bring more than $25,000,000 in new building industry. This concern is now engaged in the wholesale business in foreign countries.

Other announcements have been made in connection with the establishing of American branch plants in Canada. The Robbins and Myers Co. is erecting a plant at Brantford with a capacity of 125,000 motors per working year and employing five hundred persons. The Firestone Tire Co., of Akron, Ohio, will commence the erection of a plant in November just outside the city limit of Hamilton, Ont. The Republic Motor Truck Co., of Michigan, will start work on a new plant in London immediately.

Under the name of the Niagara Wire Weaving Co., the Lindsay Wire Weaving Co., of Cleveland, Ohio, is spending $220,000 on the erection of a plant at Niagara Falls, Ont., which will employ 150 hands in the manufacture of wire cloth and wire-weaving machinery. The Railway Steel Spring Co., of New York, will start the manufacture of steel tires for railway equipment at Montreal in January under the name of the Canadian Steel Tire and Wheel Co. The Elgin Gas Motor, of Elgin, Ill., is erecting a three-story factory in Winnipeg which will be producing fifteen engines a day by December. New York capitalists are looking into the possibilities of establishing an extensive steel plant at Belleville, Ont.

Announcements are being made continuously of the extensions of existing plants, establishment of new industries and plans of boards of trade and other industrial institutes in Ontario. It has been decided by the directors of the Guelph Chamber of Commerce to form a company to be known as the Guelph Industrial Development Company, which company would co-operate with the civic council along very similar lines to what is being carried out in other places to undertake the erection of factory buildings in Guelph. This question has, however, first been referred to the Industrial Committee to report on. Secretary Phillip, of the London Chamber of Commerce, has urged upon the members the necessity of pushing a campaign to have the sum of $100,000 subscribed by private individuals toward an industrial fund for the purpose of bringing factories to London. When the sum is subscribed, the city will be asked to put up another $100,000, and the money will be used to purchase sites for industries. The Chamber of Commerce has already bought and taken possession of thirty-three acres, which are to be used for the same purpose.

Plans of the General Fire Extinguisher Co. for a factory on Dundas Street, Toronto, at a cost of about $500,000, have been approved. The Mayhew Co., Ltd., of Ridgetown, have purchased property on Sandwich Street, Windsor, and will move there about December 1st. The British-American Brewing Co., Windsor, manufacturers of temperance beers, will make a $125,000 extension to the plant now established. The National Showcase Co., Ltd., has been incorporated in Toronto with a capital of $50,000, and has secured a plant for the manufacture of showcases and interior fittings. The Greb Shoe Co., at Kitchener, one of the foremost shoe industries in that city, is doubling its floor space.

Activity in the West

A warehouse building, costing about $175,000, will be erected in Regina, Sask., by Wood, Vallance, Ltd., wholesale hardware merchants of Hamilton, Winnipeg and Calgary, provided the city council is prepared to sell certain lots for 65 per cent. of the assessed valuation.

The Marconi Wireless Telegraph Co. of Canada will build in the vicinity of Vancouver, B.C., a powerful radio depot. The station, which will cost $2,000,000, will handle commercial business between Canada and the Orient, and a station of like power and cost will, of course, be built in Japan. Negotiations are being carried on with the governments of Canada and Japan for licenses to construct and operate the two stations necessary to establish direct communication across the Pacific.

The Consolidated Mining and Smelting Company is contemplating the installation of a new concentrator at Rossland, B.C., which will involve an outlay of a million dollars. The mill is designed to treat the ores of the Rossland camp by a new process.

Burrard Inlet, B.C., will see a number of large improvements commenced this winter and early spring. The Canadian Pacific Railway is intending starting a three-million-dollar wharf to provide accommodation for their increased Pacific requirements. The government will build a new wharf for deep-sea ships, and will subsidize a drydock capable of handling the largest ships on the western ocean.

The announcement of two new industries in Quebec City has been made. The Gosselin Shoe Co., which will employ about two hundred men, and the Foch Foundry, which will also employ a large number of hands, are the companies.

The Frasers Companies, Ltd., have increased the production of their plant at Edmundston, N.B., until the output has reached from 90 to 110 tons daily, and it is now believed at Edmundston that the Frasers have in contemplation the erection of a large sawmill near Edmundston.

The statement is made that David Rodgers, formerly of the Skinner and Eddy shipbuilding plant at Seattle, who was in Montreal a few weeks ago, and it was understood negotiated with English capitalists and eastern representatives for a merger or alliance of shipbuilding interests in both Canada and the United States, will manage a large shipbuilding undertaking at Vancouver, B.C. Mr. Rodgers is now on his way to Europe to obtain more orders for ships. He is supported by twelve millions of American capital, and his company already has a number of contracts closed, but wishes to have an assurance of two or three years' work before they actually commence operations. Their plant will be located on a 160-acre plot on the north shore of Burrard Inlet, opposite the second Narrows.

THE SECRET OF SUCCESSFUL SALESMANSHIP

If the salesman has unlimited confidence in the company he represents and in the goods he is offering, it will not take long to communicate that confidence to the prospect. And this applies to Life Insurance more than to any other article. Agents of the Mutual Life of Canada meet with extraordinary success for that simple reason—they devoutly believe in Life Insurance and above all in "Mutual" Life Insurance. The Mutual Life has been conducted for fifty years exclusively in the interests of its policy-holders. The result is an unprecedented demand to-day for Mutual Life Policies. With the Mutual "the secret of successful salesmanship" is simplicity itself—the Agent knows that he has the Company and the Policy that the prospect NEEDS. The rest soon follows.

BE A MUTUALIST.

Economy of Ford Service

WEAR is unavoidable even in the best car, but certain parts wear out more quickly than others. There is no need of scrapping your car because the piston rings have seen their day, because the platinum points of the vibrators are worn out. Probably the rest of the car is as good as new.

Medical men agree that the human body is renewed, cell by cell, every seven years. You can do the same with your Ford Car and prolong its life at minimum cost by replacing worn parts from time to time.

Ford service has been the means of doubling the lives of hundreds of Ford Cars, and cutting down the cost of motoring. The fact that a Ford Touring Car, which costs $690, f.o.b. Ford, Ont., can be purchased part by part separately for $917 is ample proof of the economy of driving a Ford Car.

It will pay you to have your car overhauled during the winter months. 700 Canadian Dealers and over 2,000 Service Garages supply genuine Ford parts and prompt repair service.

When buying, choose a Ford, and take advantage of the economy of Ford service. 135

NEWS OF MUNICIPAL FINANCE

Care Needed in Dealing With Toronto Expenditures—Montreal and the Provincial Tax Question—Saskatoon Debt Per Capita, $150

Vancouver, B.C.—During the past year the city of Vancouver has taken over the counters of its city offices the sum of $1,500,000 in Victory bonds in payment of taxes and arrears of taxes.

Parry Sound, Ont.—The following figures in connection with the 1919 assessment have been supplied: Land, $759,920; buildings, $1,278,140; business, $129,855; income, $56,004; total assessment, $2,183,919; exemptions, $281,595.

London, Ont.—Real estate returns for October show that property assessed for $343,130 sold for $511,808. There were 210 transfers during the month and the assessment is 62.9 per cent. of the sale price. In October of last year there were 98 sales. The assessed value of the property was 73.3 per cent. of the selling price. During the corresponding period for the year previous there were 87 transfers, and the assessment was 71 per cent. of the selling price.

Port Arthur, Ont.—At the last council meeting a resolution was introduced favoring the union of Port Arthur and Fort William in name only. The object is to be able to show a population of 10,000 people, to boost the building permits and bank clearings and other items which go to favorably advertise the city.

At the city's tax sale thirty lots in the outlying sections of the city were sold, bringing in a revenue of about $100,000.

Moose Jaw, Sask.—Up to 31st October, $441,397 of the 1919 taxes have been collected, or 52.2 per cent. of the total 1919 levy, exclusive of $127,588 arrears, making a total tax collection up to the end of last month of $568,986. In the corresponding period last year the current taxes collected amounted to $358,496, which was 45 per cent. of the 1918 tax levy. In that year the city treasurer collected $138,162 arrears, making a total tax collection up to 31st October, 1918, of $496,659.

Quebec, Que.—According to the report of the city auditors this year, up to the 30th of October all the civic departments had kept well within their appropriations and there remained a sum of $920,640 to complete the fiscal year. This would mean a larger surplus this year than last. The collection of taxes was very satisfactory, the treasurer having received nearly a million more to date than at the same date last year. The smaller taxpayers were coming forward much better than they had in former years.

Portage la Prairie, Man.—The city has arranged to invest $200,000 in the 1919 Victory Loan. The accumulated debenture and trust funds of the city are on deposit with the National Trust Co. in Winnipeg, and are drawing 4½ per cent. interest. These funds can be secured next June, and arrangement has been made through the city's bankers whereby the money will be advanced for the ensuing months until the National Trust releases the funds. An additional profit of $2,000 is assured in the transaction.

New Westminster, B.C.—Mayor Gray has officially refuted the statement made at a recent public meeting by ex-Alderman Alex. Garrett that the Royal City was $8,000,000 in debt. He showed by a copy of the 1918 statement that the net bonded debt, outside of local improvement bond issues, is $4,365,853, and the local improvement bonded debt, of which the city's share is only $45,230, totals another $878,530, making a grand total of bonded debt for which the city at large is ultimately responsible of $5,244,383, plus municipal bonds for $400,000, issued against unsold debentures, making in all $5,644,383; and a long way from the eight millions as stated. The statement, however, shows current liabilities, against which there are current assets, adjusting liabilities and a revenue surplus, all of which have been added to make the eight millions referred to.

Saskatoon, Sask.—At present the per capita debt of Saskatoon is $150 as compared with Toronto $84, Ottawa $57, average United States cities $40. The fixed charges for next year, if the high school extensions, hospital extensions and new public school, already proposed, go through, will be $381,103. This year's figures are $302,534. If the city holds off, its present assessment of $28,000,000 may take a jump and more than make up for the increase in taxation. It still has a wide margin before reaching the absolute limit of its borrowing powers, which will be 20 per cent. of the total assessment, not including extensions to street railways and improvements under the Secondary Education Act. To date, charts show clearly how the sinking fund has been more than kept up to date. But for every additional $1,000 debenture—30-year term—sold, the amount that must yearly be deposited, allowing for compound interest at 5½ per cent., to bring the sinking fund up to date at the end of the term would be $17.63.

Montreal, Que.—The task of preparing the 1920 budget for the corporation is not completed yet. The new budget will provide, it is learned, a revenue in round figures of $20,000,000, which is about $1,000,000 more than last year. Unfortunately, the corporation will not benefit to that extent, as two-thirds of the increase will go to the Catholic and Protestant School Commissions. The additional million dollars, it seems, is made up of about $600,000 from the higher school tax and the balance of about $400,000 from other sources. In this latter amount will be included the estimated $200,000 more than the city will get this year from the amusement tax. The net additional revenue available for administrative purposes will, therefore, not exceed by $300,000, or possibly $400,000, what it was a year ago. The total budget for 1919 amounted to $18,944,850.

Another effort is being made to persuade the legislature to abandon its custom of taxing many things which, it is contended, come solely under municipal jurisdiction in other cities. It will be pointed out that, despite the increased tax on realty of 35 cents on the $100, there are not sufficient funds on hand to enable the Administrative Commission to properly carry on the affairs of the city. Owing to various municipal strikes, etc., the city has been compelled to vote a very much larger sum for salaries than otherwise would have been the case. The likelihood is, moreover, that in the budget for 1920 the total sum for salaries will have to be considerably augmented, due to new demands for better remuneration.

Toronto, Ont.—The city council has decided to submit to the electors a proposal for percentage exemption of houses (not on the land) actually occupied as homes by the owners, and assessed for not more than $4,000, as authorized by the last provincial legislature. A recommendation from the Assessment Reform Committee was for a referendum on the same schedule to include those owned by landlords and occupied by tenants. The houses affected would number 84,023, of which 53½ per cent. were not occupied by owners, and the assessment reduction would have been equivalent to $999,094 in taxes, or 1¾ mills. Under the modified plan, suggested by Finance Commissioner Bradshaw, the tax sacrifice is $472,588, and the tax rate increase resulting will be ¾ of a mill. The legislation making the exemption possible on a favorable vote does not distinguish between dwellings lived in by owners and those rented, so that the city must apply for special legislation if the referendum carries.

The city council has for consideration the expenditure of $7,000,000. It is made apparent by Finance Commissioner Bradshaw that unless these projects are dealt with in a thorough, businesslike manner, heavy losses are likely to result and will have to be met out of the taxes. Mr. Bradshaw calls attention to the fact that liabilities and expenditures totalling $405,740 have been authorized since the estimates were passed, for which no funds were provided. Among other matters, the most important are the recommendations that the city sanction and guarantee an issue of debentures to raise another $4,000,000 for harbor and waterfront improvement works; that a by-law be submitted to the people, asking their consent to raising $4,328,665 by the issue of debentures, being the city's share of the cost of constructing and equipping the Toronto-Bowmanville Hydro radial line.

Russian Govt. Ext. 6½% (July 10, 1919)	39	41
Swedish Govt. 6% (June 15, 1939)......	92	94
French Cities 6% (Nov. 1, 1934).......	..	92½

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Renfrew, Ont.	$ 17,500	6	30-years	Nov. 24
Peterborough County, Ont.	14,000	5½	20-years	Nov. 25
Toronto, Ont.	2,632,000	5½	1920-49	Nov. 27
Edmonton, Alta. ...	3,000,000	5½	10-years	Nov. 28
Bridgeburg, Ont. ...	50,000	6	....	Dec. 1
Verdun, Que.	225,000	5½	20-years	Dec. 1

Niagara Falls, Ont.—The by-law to raise $50,000 for additions to the hospital will be resubmitted to the ratepayers at the January elections.

Edmonton, Alta.—Tenders will be received up till November 28 for the purchase of $3,000,000 10-year 5½ per cent. debentures against the consolidated arrears of taxes. This is part of a total issue of $3,500,000. (See advertisement elsewhere in this issue.)

Verdun, Que.—The city is calling for tenders on an issue of $225,000 5½ per cent. bonds, dated May 1, 1919, and due May 1, 1939, up to December 1, 1919, at 5 p.m. The bonds are of coupon form, interest being payable semiannually on May 1 and November 1, at the office of the Home Bank of Canada, Montreal, or the National Park Bank, New York City. It will be remembered that tenders were called while bond houses were under restriction, and that an effort was made to place the issue in New York.

Debenture Notes

Edmundston, N.B.—The town will raise $100,000 for a new school building next year.

Beaverton, Ont.—At the January elections ratepayers will be asked to vote on the raising of $85,000 for a water system.

Oakville, Ont.—A by-law to issue debentures to the amount of $30,000 for waterworks has been passed by the town council.

Waterdown, Ont.—The council has decided to submit a by-law in January next to raise $20,000 for the erection of a memorial hall.

Hamilton, Ont.—A by-law to raise $150,000 for an athletic field and to improve Victoria Park, will be submitted at the January elections.

Windsor, Ont.—Extensions of the telephone system serving the border municipalities are being planned at a cost of more than $200,000.

Saskatoon, Sask.—By-laws to issue debentures to the amount of $692,000 for various local improvements will be submitted to the ratepayers on December 9.

Galt, Ont.—Voters will be asked at the January elections to endorse a by-law providing for the raising of $30,000 to install a central heating plant for hospitals.

Esquimalt, B.C.—It is the intention of the council to submit to the voters by-laws calling for the issuance of debentures for $25,000 and $20,000 for a new municipal hall and fire hall.

Niagara Falls, Ont.—Voters will be asked at the January elections to endorse two money by-laws, one for $50,000 hospital improvements, and the other for $14,000 for hydro office and store.

Toronto, Ont.—The city council has granted the Toronto Harbor Board a guarantee by the city of a new issue of debentures amounting to $4,000,000, to carry on water front improvements.

St. John, N.B.—The municipal council has decided to erect a new municipal building, the former one having been destroyed by fire last spring. The estimated cost is from $1,000,000 to $2,000,000.

Stratford, Ont.—At a meeting of the finance committee of the city council, it was decided to recommend that the council submit by-laws to the ratepayers for $35,000 and $15,000 for park purposes.

Kingston, Ont.—The city council has acceded to the request of the Board of Education for a new school in Cataraqui Ward without submitting the question to the ratepayers. Debentures will be raised to the amount of $142,000 for this purpose.

Kenora, Ont.—J. E. Currie, town clerk, advises *The Monetary Times* that a by-law for issuing debentures to the amount of $25,000 for public improvement purposes, will be submitted to the ratepayers at the New Year elections. Another $13,000 local improvement issue is in the course of preparation, and an issue of $10,000 electric light debentures will shortly be placed on the market.

London, Ont.—City Clerk Baker has announced that all applications for debenture issues must be made by November 26. The city council has decided to send to a vote of the people at the January elections the proposal of the Western Fair Board to purchase $300,000 worth of property adjoining Queen's Park for the purpose of facilitating the expansion of the Exhibition. The request of the London and Port Stanley Railway for a vote on the issuance of $218,000 worth of debentures to cover a program of road and structure improvements, and the cost of a new electric locomotive and other rolling stock, has been sent back to the finance committee. The council sent to the ratepayers also the proposal to build a $100,000 memorial hall for soldiers, to be used for the social and business purposes of veterans' organizations. The total of money by-laws to be submitted at the January elections aggregates over $1,000,000.

Windsor, Ont.—Ratepayers of the border municipalities will be asked to vote at the January elections upon the plans of the Essex Border Utilities Commission to consolidate the waterworks systems of Windsor and Walkerville to supply the five municipalities with filtered water at cost. The project will involve an ultimate expenditure of approximately $2,000,000, part of which will be spent in acquiring the plants of the Windsor Water Board and the Walkerville Water Co. Extensions will cost, it is estimated, $500,000. Windsor, in addition to losing control of its waterworks, will be asked to obligate itself to the extent of $801,800. The apportionments to the other municipalities are as follows: Walkerville, $295,400; Ojibway, $253,200; Sandwich, $232,100; Ford City, $189,900; Sandwich East, $168,800; Sandwich West, $168,800.

SAGUENAY BONDS AGAIN OFFERED

The Montreal syndicate which purchased an issue of $5,500,000 6½ per cent. bonds last June are offering $1,500,000 of the issue now. The first offering was made last summer, but the Victory Loan interrupted.

Regarding operations of the Saguenay Pulp Co. and subsidiaries, the president, Hon. F. L. Beique, reports that the price of mechanical pulp was increased to over $40 a ton, and that the last sales were made at $42.50 a ton. This compares with $26 to $29 a ton last year. As regards the mechanical pulp mill at Chandler, the output has been increased by more than 40 tons a day, and now amounts to 112 tons a day. At the same time the operating costs have been reduced by over $10 a ton.

INVESTMENTS AND THE MARKET

Mining Corporation Absorbs Buffalo—Lake of the Woods Milling and Canadian General Electric Stock Issues—Granby Report Shows Deficit

Brompton Pulp and Paper Co.—The company has announced production for the three months ended October 31 last as follows: News mill, 7,111 tons; wrapping paper, 1,552 tons; cardboard and mill, 3,040 tons; sulphate pulp mill, 5,595 tons; ground wood mill, 11,321 tons; sawmill, 1,039,000 ft.

Winnipeg Electric Railway.—Six-cent fares will be levied in Winnipeg at least until the New Year. Efforts to get the city's case against the company placed on the peremptory list were made without result. An official of the company states that it is not likely that the case will be heard before Christmas.

McIntyre-Porcupine Mines, Ltd.—The McIntyre-Porcupine is expected to realize a net profit of a million dollars during the current fiscal year, one-third of which is already past, according to a statement by J. P. Bickell, president. This would compare with $839,000 during the past fiscal year. In taking these figures into consideration, however, it is necessary to make allowance for depreciation which in the past year amounted to some $311,000, and which left a net profit of about $527,000, or over 14 per cent. on the company's issued capital.

Kerr Lake Mine.—During the month of October the company produced 112,000 ounces of silver, the output being the highest for several months. This is at a rate of close to the average monthly output during the fiscal year ended August 31, when a total of 1,482,649 ounces was produced. During the month the price of silver averaged close to $1.20 an ounce, lending an estimated value of about $134,000 to the October production. This is at the rate of about $1,612,800 a year, as compared with gross profits of $1,637,143 during the past fiscal year, of which $956,258 was net profit.

National Steel Car Co.—The shareholders of the company have ratified the terms of the sale to the new company, headed by J. Mager. The terms, which were published about a week ago, had been sent out to the shareholders, and they formally voted their approval. The company will probably carry on under its present name for the present at least. Sir John Gibson will retire, as will several others of the present directors, but Sir John stated that he believed the secretary, general manager and the present staff would be retained. He spoke optimistically of the prospects of the reorganized company.

Quebec Street Railway.—The Quebec city council has given final reading to a by-law empowering the company to charge increased fares on its railway lines. The new fares will be a seven-cent car fare, four tickets for 25 cents; 17 tickets for one dollar; three-cent cash fare for children not in arms, or eight tickets for 25 cents, and eight tickets for 25 cents for school children up to 16 years. Six tickets for 25 cents for employees, good between the hours of 6 and 8 a.m., and 5 and 7 p.m. According to the contract, which has not yet been approved by the directors of the company, the street railway will construct certain new lines and extensions.

Pressed Metals Co., Ltd.—The following have been added to the board of directors of the company: Benjamin Lowenstein, president, Nassau Smelting and Refining Co., New York; Morris Moskin, of Moskin Bros., New York; Edward Hay, late general manager, Imperial Bank; W. R. Johnston, of Toronto; Eugene Coste, E.M., of Calgary. The board previously consisted of C. E. Calvert, president; J. W. Leighton, vice-president; Simon Goldsmith, of New York; H. L. Nussbaum, of Toronto, J. R. L. Starr, K.C., Toronto, who remain, together with the men appointed. Further plans for the financing of the American plant of the company were considered at a meeting this week.

Lake of the Woods Milling Co.—It has been announced that the company will offer new shares amounting to $700,000 of common stock, to shareholders at par in the proportion of one new share for each three of old shares held. The shareholders of the company at a special meeting on October 1 last approved the proposal of the directors to increase the common stock capital of the enterprise, and application was made and permission subsequently given at Ottawa to increase the authorized amount to $4,000,000. There is at present outstanding $2,100,000 par value of common, which, with addition of the new issue, will bring the total up to $2,800,000, leaving a margin of $1,200,000 for additional capital needs when these may arise.

Mining Corporation of Canada.—The corporation has bought control of the Buffalo Mines, Ltd., whose property adjoins their own at Cobalt. The Buffalo is one of the older mines in the Cobalt area, but last year had a total production of silver of 625,786 ounces. The report for the year ended April 30 last, showed a total of 20,607 tons of ore in the stopes, and about 33,000 tons of sand-tailings remaining for further treatment, which it was said would average 6.5 ounces. The outstanding capital of the company is $500,000, and at current market prices of 50 cents per share (par value $1) control of the company could, it is presumed, be secured for something over $250,000. Total assets of the company were given as $1,189,261 in the last annual report. The head office was formerly in Toronto, but latterly has been in Buffalo.

Canadian General Electric Co., Ltd.—At a meeting of the board of directors held last week it was decided to issue 10,000 new shares of common stock. The company has already reinvested in capital assets between four and five million dollars surplus profits, but as the business of the company in certain departments has increased to a large extent making necessary extensions and additions to their manufacturing and warehousing facilities, the directors have deemed it advisable to issue another million dollars of capital stock. This stock will be offered for subscription to the holders of common stock of the company on record in the books of the company on December 12th next, and subscription lists will close on January 5th, 1920. The shares will be issued at par value ($100) and payment may be made in four instalments: 25 per cent. with subscription, 25 per cent. on February 29th, 1920; 25 per cent. on April 30th, 1920; and 25 per cent. on June 30th, 1920. Rights to subscribe may be assigned.

Granby Consolidated Mining, Smelting and Power Co.—The report of the company for the year ended June 30 last, shows a deficit after charges of $984,409, as compared with a surplus of $1,527,133 for the preceding year. Labor troubles, and enormous cost of ordinary operations and new construction are stated to be the cause. The report said: "It may be added that certain forward steps have been taken which promise to have a very important bearing on the future, two of which seem to have reached fruition. We have achieved our independence, so far as coal and coke are concerned. We are already producing, and apparently this is the last year in which we shall be to any extent dependent upon others. We have demonstrated that our concentration process is applicable to the low-grade ores, of which we have some fifteen million tons, the value of which has heretofore been regarded as problematical."

The following is a summary of the report, with comparisons:—

	1919.	1918.	1917.
Gross	$6,561,099	$11,644,310	$12,259,185
Other expenses	6,660,054	7,519,491	6,909,854
Interest, etc.	120,884	582,195	320,079
Depreciation, etc.	764,570	2,015,491	1,256,267
Loss	$ 984,409	*$ 1,527,133	*$ 3,768,985
Other income	....	....	197,225
Deficit	$ 984,409	*$ 1,527,133	*$ 3,966,210
Dividend	1,312,537	1,500,042	1,349,962
Deficit	$2,296,946	*$ 27,091	*$ 2,616,248
1916 profit	....	....	230,320
Previous surplus	3,421,355	3,402,326	6,587,471
Profit and loss surplus	$1,124,409	$ 3,429,417	$ 9,434,039

---

*Income.

Total assets are now $24,033,373, as compared with $23,837,843 in 1918 and $29,447,931 in 1917.

By order of the Board.

JAS. H. WEBB,
Secretary-Treasurer.

Montreal, 17th November, 1919. 16

DEBENTURES FOR SALE

CITY OF TORONTO

$2,632,000 SERIAL GOLD BONDS

Sealed tenders, endorsed "Tenders for City of Toronto Bonds," addressed to Thomas L. Church, Esq., Mayor and Chairman of the Board of Control, will be received by the undersigned until 12 o'clock noon, Thursday, 27th November, 1919, for the purchase of $2,632,000 bonds issued for various purposes, under several By-laws, and due 1920-1949 (approximate average maturity of the whole 14 years).

Full details as to the purposes for which the bonds are issued, and amounts maturing annually, together with financial statement of the City, will be furnished on application.

The legality of the issue has been approved by Mr. J. B. Clarke, K.C., of the legal firm of Clarke, Swabey & McLean, Toronto, and his favorable opinion will be engraved on each bond.

The bonds are an obligation of the City at large, are issued in coupon form, with provision for registration of principal, bear date September 1st, 1919, and are of the denomination of $1,000.

They are payable both as to principal and interest in gold in Toronto and New York, and carry interest at the rate of 5½% per annum, payable half-yearly on the 1st of March and September, the first half-yearly instalment of interest being due and payable on the 1st of March, 1920.

Engraved bonds will be ready for delivery upon acceptance of tender, but delivery must be taken and payment made not later than 4th December, 1919, with accrued interest from the 1st of September, 1919, to date of payment. Delivery and payment are to be made at the office of the undersigned, and in view of the premium on New York Funds, tenderers may submit two bids, one for payment in New York Funds, and the other for payment in Toronto Funds.

Tenders will be received for the bonds issued under any number, or all, of the By-laws, but not for a part of those issued under any one By-law.

A certified cheque, payable to the undersigned, for 2% of the par value of the bonds tendered, must accompany the tender.

Tenders specifying for bonds other than those herein described, or containing conditions varying from the above, will not be considered.

The right is reserved to reject any or all proposals.

T. BRADSHAW,
Commissioner of Finance.

Treasury Department,
City Hall, Toronto, Canada, November 15th, 1919. 10

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

WANTED first-class manager and organizer for bond house, one with experience in dealing in high-grade bonds preferred. Apply, stating experience, references and salary. Box 247, *The Monetary Times*, Toronto.

EXPERIENCED appraiser and valuator open for engagement beginning of year with Loan, Trust or Mortgage Company. Can take coast to coast or Winnipeg west. First-class references. Box 245, *The Monetary Times*, Toronto.

DEBENTURES FOR SALE

(Refunding Issue of 1914)

$2,282,000.00 PROVINCE OF NEW BRUNSWICK 10-YEAR 5½ PER CENT. GOLD BONDS

Sealed tenders, endorsed, "Tenders for Province of New Brunswick Bonds," addressed to the undersigned, will be received for the purchase of $2,282,000.00 (Two million two hundred and eighty-two thousand dollars) Ten-year Gold Bonds of the above Province, to be dated December 1st, 1919, bearing interest at the rate of five and one-half per centum per annum, payable half-yearly on the 1st December and 1st June.

Principal and interest payable in gold at the office of the Provincial Secretary-Treasurer, Fredericton, N.B., or at the Bank of Montreal in St. John, Montreal or Toronto, or at the Agency of the Bank of Montreal in the City of New York, at the option of the holder.

Bonds to be in the denomination of $1,000, with coupons attached, and may be registered as to principal only. Full payment for Bonds, with accrued interest to date of payment, to be made at the Bank of Montreal, Fredericton, on delivery of Interim Securities at said Bank. Interim Securities will be supplied, to be exchanged for definite Bonds on completion by the purchaser of the issue.

Tenders to be delivered to the undersigned not later than noon on Tuesday, the 25th day of November, 1919. Tenders must be for the whole amount offered, and must be accompanied by marked cheque for $40,000, to be applied in the case of the successful tenderer in payment for the Bonds. All bids must be made in Fredericton funds. The right is reserved to reject any or all tenders. Tenders containing conditions varying from above will not be considered.

THE COMPTROLLER-GENERAL,
Province of New Brunswick.

Fredericton, N.B., November 1st, 1919. 7

DEBENTURES FOR SALE

CITY OF EDMONTON, ALBERTA

Sealed tenders, addressed to the undersigned, will be received up to 12 o'clock noon, on Friday, the 28th of November, 1919, for the purchase of $3,000,000 of an issue of $3,500,000 10-year 5½% debentures issued against the consolidated arrears of taxes under the powers given in the "Arrears of Taxes Act."

The debentures will be dated October 1st, 1919, in denominations of $1,000 each, payable as to principal and half-yearly interest at Edmonton, Toronto or New York, and may be drawn for redemption on any interest due date.

The bonds will be delivered at Edmonton against payments as follows:—

Not later than December 29th, 1919, $1,126,000 at Edmonton (discount if any).

December 29th, 1919, $974,000 at New York.

February 13th, 1920, $900,000 at New York.

The city reserves the right to reject any or all tenders.

F. BARNHOUSE,
City Treasurer. 11

A seat on the Montreal Stock Exchange was sold on November 17th to George W. Fairbanks, of the local brokerage house of Fairbanks, Gosselin and Co., for the sum of $30,000. Mr. Fairbanks, it was stated, was acting for a client whose identity was not disclosed.

RECENT FIRES

Bedford, N.S.—November 11—The sawmill and box factory owned and operated by Moirs, Ltd., biscuit makers and confectioners, were destroyed. Estimated loss, $50,000.

Blyth, Ont.—November 13—Hardware building of Wm. Moore and Sons, and tinshop of J. H. Leith, were damaged. The loss is as follows: Moore and Son, hardware stock valued at $10,000, insurance $5,000; J. T. Leith, stock and tools $3,000, insurance $200. The building, valued at $3,500, was owned by J. G. Moser, of Kitchener, and insured for $2,500.

Belleville, Ont.—November 12—Three barns, season's crop and some farm implements of E. Walker, near Cherry Valley, Prince Edward County, were destroyed.

Hamilton, Ont.—November 14—The John Lennox building and adjoining tailor store of R. Babb, were destroyed. Estimated loss to Lennox building $40,000, fully covered by insurance. Loss to Babb's store $20,000, with only $4,000 insurance.

Harding, Man.—November 14—The Methodist parsonage was damaged. Cause, overheated furnace. Loss fully covered by insurance.

Hillhurst, Que.—November 7—Garage and fifteen cars of W. S. Waite were destroyed. Estimated loss, $25,000. Insurance carried on all property. Owing to typographical error, it was stated last week that the above fire occurred at Hillhurst, Alta.

Muenster, Sask.—November 14—A business block was damaged. The Woell and Mainser general store, building of the Bank of Hochelaga, telephone central building, offices of the Muenster Supply Co., and the Massey Harris Co., were included among the structures destroyed. Estimated loss, $40,000, partly covered by insurance.

Nanaimo, B.C.—November 13—Boathouse near the Bastion was damaged. Estimated loss, $500, with no insurance.

Oshawa, Ont.—November 15—The Simcoe Methodist church was destroyed. Estimated loss, $65,000. Insurance carried, $40,000.

Olds, Alta.—November 9—Five business places were destroyed. The buildings burned include R. B. Campbell's real estate office, the Alberta Hotel, Sweet Home Cafe, a laundry and the G. and S. restaurant. The total loss will probably reach from $20,000 to $30,000, partially covered by insurance.

Sabrevois, Que.—November 16—Church, presbytery and several barns and outhouses were destroyed. Estimated loss, $25,000.

Toronto, Ont.—November 14—Outhouse owned by the Dunlop Rubber Co., used as a warehouse, was damaged. Estimated loss, $500.

November 16—Rear of the music store of Thomas Claxton, Ltd., 251 Yonge St., owned by the National Trust Co., was damaged. Cause, spontaneous combustion. Estimated loss, $3,000, $1,000 to building and $2,000 to contents.

November 20—Church of the Epiphany, 1515 Queen Street West, was damaged. Cause, overheated furnace. Estimated loss, $3,500.

Windsor, Ont.—November 15—Store occupied by E. Glassco was damaged on Sandwich Street. Estimated loss, $300.

ADDITIONAL INFORMATION

Carson, B.C.—At the end of last month, the warehouse and packing house of the Grand Forks Co-operative Fruit Growers' Association was damaged. Estimated loss, $10,000, partly covered by insurance.

Windsor, Ont.—November 6—The cause of the fire at the Holy Trinity Church was candles left burning after at service. The loss was $300. Insurance was carried to the amount of $30,000.

Griswold, Man.—November 9—The Western Manitoba Hotel and the Purdy Block were damaged. Estimated loss on hotel, $18,000, with insurance of $8,000. Loss on Purdy Block, $7,000, with insurance of $1,000.

Hull, Que.—Fire Chief Tessier, in submitting a report for the ten months of this year, states that the actual loss by fire amounted to $32,500, as against $7,952 for 1918. The amount paid by insurance companies was $25,187, as against $5,894 in 1918.

Manitoba.—The Fire Commissioner for the province submits the following report for the month of September. Number of fires reported, 123; estimated value, $1,224,854; amount of insurance, $801,730; estimated loss, $107,270; less ratio per capita, 0.1749; fatalities reported, nil.

For the year to date: Number of fires reported, 1,157, estimated value, $20,321,046; amount of insurance, $15,187,428; estimated loss, $1,133,701; loss ratio per capita, 1.8493; fatalities reported, 7.

Vancouver, B.C.—Fire Chief Carlisle submits the following report for the month of October:—

The total estimated loss by fire for the month (two of the losses still pending final adjustment) was $163,098, of which amount $119,193 was covered by insurance, leaving the property loss above insurance at $43,905. The total value of the property at risk for this period was $812,111.

The following shows the cause of fires for the month: Awning (carelessness with firecrackers) 1, backfires (carburettors) 2, carelessness with cigarettes 1, children playing with matches 1, coal oil stove exploding 1, defective chimneys 3, defective fireplace 1, defective stovepipe 1, electrical origin 1, fire breaking out again 3, hot ashes placed in wooden receptacles 3, inflammable liquid placed too near heater 1, lighted match near gasoline 1, spontaneous combustion 1, stovepipe placed too near to wall 1, tarpot on fire 2, unprotected stovepipe 2.

DIVIDEND NOTICE

THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED

DIVIDEND No. 131

Notice is hereby given that a Dividend of two and one-quarter per cent. (being at the rate of nine per cent. per annum) on the amount paid up on the Capital Stock of this Company has been declared for the quarter-year to the thirty-first day of December, 1919, and that the same will be payable at the office of the Company, 23 Toronto Street, Toronto, on and after the second day of January, 1920, to Shareholders of record at the close of business on the seventeenth day of December, 1919.

By Order of the Board.
EDWARD SAUNDERS,
Managing Director.

Toronto, 19th November, 1919. 17

WANTED

By an old and well established Ontario Trust Company, the services of an energetic young man with a working knowledge of legal practice.

A large portion of his time will be spent in extending business by means of personal calls upon prospective clients.

An attractive personality is desired but salesmanship experience is not essential.

Prospects of future advancement are bright. State your past experience and present situation. Apply

Work of the War Trade Board

Expenditure Not Large— Important Factor in Supply and Distribution of Raw Materials — Importance in Shipbuilding Industry— Personnel of the Board — Official Statement of its Record

NOW that the time has come for the dissolution of the War Trade Board of Canada, the winding up of its affairs discloses the fact that the Dominion government advanced $150,000 to the board, but its balance sheet shows the expenditures for all purposes to have been little more than $144,000, and its receipts to be more than $260,000. Already the board has paid back to the Dominion government $220,000, and the remaining forty thousand dollars will go back soon. The board was appointed in February, 1918, to control industrial effort in Canada.

The Canadian War Trade Board was born of a crisis. Until the United States entered the war Canada had been able to obtain raw materials and half-finished products necessary in the munitions industry without difficulty from her southern neighbor. Afterwards the situation changed by reason of the fact that the United States immediately began to conserve every raw material and product which could be used in the war. To present her case effectively Canada had to organize on national lines. The two countries were interdependent, American industries needing nickel matte, asbestos, pulp, and power from Canada, and Canadian requiring pig iron, iron ore, steel sheets, coal, cotton etc., from the United States. By both countries appointing a War Trade Board composed of outstanding business men in both countries, and by means of a Canadian War Mission established in Washington, the two countries were able to present one industrial front to the enemy, and still preserve the national interests intact.

Drastic elimination of non-essentials had to be the first order of the day so that the railroads of the continent and the shipping of the world would be able to devote all their power and space to carrying necessaries and to keeping the allied war effort up to one hundred per cent. The Canadian board had to see that no company imported any material when stocks in Canada could be utilized for its needs. This was not only to fulfil its obligations to the United States War Trade Board but to keep down imports to the lowest possible figure so that Canada's trade balance with respect to the United States should be as little adverse as possible. For the same reason a number of imports were placed on the restricted list.

Supplied Raw Materials

Every day from all over Canada there came anxious men and constant streams of letters and telegrams informing the board as to stocks of raw materials on hand, and explaining the needs. The War Trade Board's duty was to see that the materials were forthcoming, if possible, and to take whatever measures were necessary to secure essential raw materials whether from Canada or the United States, or elsewhere. In following out its duties it had to purchase and distribute tin plate in Canada, it had to negotiate for the reopening of dormant blast furnaces and the construction of new undertakings for the production of pig iron in Canada as well as getting the huge supplies required from the United States. It had to control the sale, purchase and use of platinum. It had to finance the purchase and allotment through the wool commission of 46,208 bales of Australian wool weighing 15,573,542 pounds and valued at ten and a half million dollars as well as five and a half million dollars' worth of tops and noils from the United Kingdom. It was given power to pay bounties on the production of linen yarns in Canada. It was given control of production and distribution of iron and steel and their products in Canada, and it was empowered to take over and carry on the management of chrome ore producing properties for a period of five years. Besides this, the board had to be a clearing-house for industrial information to manufacturers, and it had to carry on its duties by means of constant communication with the various industries, either individually or through such bodies as the Imperial Munitions Board, the Canadian Wool Commission, the War Purchasing Commission, the Canadian Tanners' Council, the Canadian Pulp and Paper Association, and the Canadian Wool Growers' Association. But for the existence of such a body, there were many raw materials and products which Canadians could not have secured at all as the British, United States and Australian governments would not have permitted their shipment but for assurances as to the use to which they would be put or of a substantial cash advance. The shortage of shipping made it necessary in some cases to secure a vessel to go to South America or some other country to get materials urgently needed in Canada, and only a government body could have induced the Admiralty to permit it.

The securing of steel plates for Canadian shipbuilding industries was one of the board's most arduous and continuous tasks. Profiteering in steel plate and boiler tube stocks was sternly checked in the cases where complaints were well founded. Canadian steel companies were induced to make all the car plates necessary for the government's car program. The pyrites exports were increased to meet the needs of the sulphuric acid makers in the United States. Nitro-glycerine was conserved by restricting the content in commercial explosives. The commandeering powers of the board were not often exercised, the possession of the powers being amply sufficient to obtain the ends for which it was created without going to the limit of its authority. Most of the money made by the board was in connection with its wool purchases. The money obtained for the tops and noils from the United Kingdom it sent to the British treasury.

At the time of its appointment, the War Trade Board consisted of the chairman, Sir George E. Foster, Minister of Trade and Commerce, though he was replaced during a long vacation and when absent in Europe by the Hon. A. K. MacLean, the vice-chairman, F. P. Jones, and the following members: C. B. McNaught, Toronto; J. W. McConnell, Montreal; J. H. Gundy, and Joseph Gibbons, Toronto; Sir Hormisdas Laporte, Montreal; and C. A. Magrath, Fuel Controller, Ottawa. The secretary was Wm. K. Trower, and the assistant secretary, J. H. Wilkie. There was no change in the membership though Mr. Wilkie later became secretary. With the signing of the armistice on November 11th, it was no longer necessary to control exports except to enemy countries, Northern European neutrals and to parties on the statutory black list. On January 20th, 1919, all restrictions were removed, but on March 1st they were reimposed as far as neutral countries were concerned in order to co-ordinate Canadian export policy with that of Great Britain and the United States. With the proclamation of peace imminent the board will be laid away in an honored grave while its personnel is relieved to go back to business interests neglected at the country's call or to further service on the Canadian Trade Commission.

TOWN PLANNING AND INDUSTRIAL DEVELOPMENT

Importance of Foresight in Arranging Industrial Areas is Emphasized at Conference in Hamilton

THE third annual town-planning conference in southwestern Ontario was held in Hamilton, Ont., November 27th and 28th. Among the speakers was C. W. Kirkpatrick, industrial commissioner of Hamilton, whose subject was "Town Planning in Relation to Industrial Development." Mr. Kirkpatrick emphasized the importance of living conditions in labor efficiency, and labor was, according to his experience in Hamilton, the first concern of practically all large manufacturers. Housing is one of the most important elements in living conditions, and the speaker cited cases where good houses for workmen had helped to bring industries to Hamilton. He expressed the opinion that living too near the factory was not desired by most workers, and deplored the tendency of builders to rush into a district in which a new factory was to be started, and build houses as close to the factory site as possible.

Town planning, however, should be applied to industrial as well as to residential areas. "If a city desires new industries," said Mr. Kirkpatrick, "or if it wants to see its existing industries prosper and expand, it must provide them with the proper facilities for doing business. In every city that I know of, heretofore, when a new industry came along, it was permitted to acquire a tract of land and locate its buildings regardless of what effect its actions would have on the industrial development of adjacent lands. The result is that we have more railway switches crossing the streets than would have been necessary had the industrial areas been properly planned in advance, while in some cases large tracts of land otherwise suitable for industrial purposes have been cut off from railway connections altogether, rendering them unsuited for factory uses, while they are practically useless for other purposes. These are conditions that exist right here in Hamilton, and to my knowledge in some other Canadian cities.

"Care should also be given to the laying out of the streets in industrial districts. They should be so arranged as to lead to the commercial and residential districts by the shortest possible routes, consistent with good town planning and the general scheme for the development of the community, for it is important that it should be made as easy as possible for the working people to get from the factory to their homes and from their homes to the factory, and it is equally important that the manufacturer should be able to deliver his finished products as quickly as possible to the railway freight sheds or local distributors."

L. B. Duff, of Welland, discussed "What Should the Town Plan do for the Factory and the Factory Worker?" It often happens, he said, that when a factory wants to make an extension, it must build some distance away, because the immediately surrounding area is built up with houses. This causes a depreciation in the value of residential districts, and lack of economy in industry. "The factory area," said Mr. Duff, "should be located at the beginning, but the beginning is long gone past and the duty of this day remains to make the best of it, in the laying out of areas that will serve the best interests of the community and of the industry itself. The areas chosen should be selected in their relation to: (1) Railway facilities; (2) water frontage where necessary; (3) prevailing winds; (4) land available in large blocks, unbroken by streets; (5) accessibility; and (6) most important of all, in relation to the worker's home. Locations, indeed, may vary. A plant making breakfast food differs in location requirement from a cement works.

"In general, decision as to location should be reached in the light of the greatest advantage to the city as a whole. New factories should be placed where they belong, whatever the temptation may be to place them where they do not belong, and there are always such temptations. Industries already wrongly placed should be encouraged to remove to their proper areas. There is always the incentive of added efficiency from proper location. Some of our municipalities, among them Port Colborne in the Niagara section, have purchased areas for industrial development, a very necessary step to preserve the land from the subdivider. In not a few cases land admirably located for factories has been divided into lots. Some may be built upon and the others owned at the four corners of the globe. The divided ownership, the values enhanced by speculation and the broken streets shut the property out forever from industrial possibilities."

Addresses were also given on "Municipal Government and Reconstruction," by Dr. H. L. Brittain, Toronto, by S. Baker, London, J. A. Ellis, Toronto, and Sir John Willison, Toronto; "Zoning," by W. J. Donald, secretary of Niagara Falls Chamber of Commerce; and by numerous other speakers.

Control of Expenditures

Mr. Brittain emphasized the importance of having citizens well informed as to civic affairs, and good government cannot be secured unless they co-operate. Dealing with the relation between city planning and the control of ordinary current expenditures he said: "The amount which can be raised by taxation and rates each year has an upper limit. Every dollar wasted in current operations either by paying too much for necessary services or by incurring expenditures for unnecessary services is therefore potentially a dollar subtracted from a possible fund for community improvements. The proper control of current expenditures has therefore a very close relation to town planning. The fundamental method of such control is comparison—comparison of the total and unit costs and of the various services from year to year within the same city, and comparison of costs of similar services for other cities of a like rank. Such comparisons necessarily demand: (a) Local accounts which produce such costs automatically; (b) the standardization of municipal accounting throughout the country.

"It is impossible to compare results within the same municipality from year to year unless:—

"(a) The accounts differentiate between payments and receipts on one hand and revenue and expenditures on the other.

"(b) A clear distinction is made between current and capital expenditures defrayed out of current funds.

"(c) The accounts show the costs of objects of expenditure, such as: Personal services; services other than personal; heat, light and power; supplies, other than heat; light and power; upkeep and depreciation of structure and equipment; etc.

"(d) The accounts show the costs of the various kinds of work done by each department under general and specific headings, such as the following: Health service; general administration, accounts, records, statistics, etc.; medical and dental service; nursing service; laboratory service; hospital service; social service; food control; sanitation service.

"(e) The separation of ordinary services from those of public utilities.

"Having established satisfactory accounts within a municipality it is still impossible to secure the results of comparison with other communities unless municipal accounting is standardized by keeping similar accounts in cities of like rank and securing the acceptance of definite and universal meanings for accounting terms used. The standardization of accounting alone will not serve. There must be readily available also a description of the general methods of financing and departmental operations in our various towns and cities lest we compare costs which are not comparable."

Important Questions for Next Session

Labor Legislation, Shipbuilding Program and Tariff Will Occupy Attention of Dominion Parliament— Farmers' Party Now a Power in Federal Politics — Government is Preparing Now

(Special to *The Monetary Times.*)

Ottawa, November 27, 1919.

WITH the return of Sir Robert Borden refreshed in body from his holiday in the south, and of Hon. N. W. Rowell and Senator Gideon Robertson from the Washington Labor Conference, things are beginning to warm up at the capital. The government announced that the next session will be called early in the new year, and the next few weeks will have to be occupied by the cabinet in mending its political fences and in preparing legislation.

The coming session promises to be a vital one. There will be much controversial and important legislation, while with the growing and substantial cross-bench group, led by Hon. T. A. Crerar, who has now definitely assumed the leadership of the third party, the path of the government will be far from rosy. During the past two years, the ministry has always been able to depend on a certain and large majority, but unless it treads cautiously, anything might happen in the coming session. The three most important legislative measures in sight at present are the Franchise Act; bills growing out of the recent labor conference at Ottawa and the later one at Washington; and the Government's shipbuilding and naval program.

Labor legislation promises to be much to the fore. The government has already promised that it will carry into effect next session the recommendations made at the Ottawa Joint Conference of Employers and Employees in October. Since that time the International Conference has been held at Washington, which, among other things, has recommended the eight-hour day. Hon. N. W. Rowell, speaking on behalf of the Canadian government, strongly supported the resolution, so that it is presumed that the cabinet will endeavor to crystallize their views so expressed into legislation.

Must Decide Shipbuilding Question

The present outlook is that the government will introduce a policy for the placing of the shipbuilding industry on a permanent basis. The government's naval policy will also, in all probability, be laid before parliament. Judging from the past, both these questions will prove highly controversial. Both the shipbuilding and naval policies will be under advisement during the next couple of weeks by the cabinet. Since the war Canada has built up a large public-owned mercantile marine. Over fifty ships have been built or are under construction for the government, and the question now arises as to the continuation or otherwise of this policy. The feeling is strong here that it is impossible for the government to continue indefinitely to build ships. There may be a few more contracts let, largely to keep yards going through the coming winter, but the opinion of the ministers seems to be that in future, shipbuilding should be left to private enterprise.

It is admitted, however, that under present uncertain conditions, private capital will have to be given some encouragement, and the question arises as to what form this shall take. Since the beginning of the war a dozen or more large plants employing thousands of skilled men have been built up on the Atlantic and Pacific coasts and on the Great Lakes, and it is felt by the government that in the national interests such an industry should not be allowed to decay. The usual method of aid which is advocated by shipbuilding men is a form of bonus, but the farmers are strongly opposed to such a policy, either for shipbuilding or any other industry, and with the farmers' movement in the ascendancy at the present time it is questionable whether the government would adopt such a policy, or could put it through parliament if they did adopt it.

May be Tariff Inquiry

In addition to the above three questions there will be the omnipresent question of the tariff. Sir Thomas White in his budget speech last session announced that a thorough inquiry would be conducted by the minister of finance and two or more of his colleagues representing different parts of the Dominion. Following this report the tariff would be revised at the next session of parliament. Since his resignation, Sir Henry Drayton, his successor, has intimated his intention of carrying out this policy. However, the delay in his appointment, combined with the the fact that his activities all fall have been devoted to the Victory Loan campaign, has delayed the commencement of this inquiry. A decision will have to be made on the return of Sir Robert Borden. Even if the inquiry started immediately, and the ministers sat continuously for the next couple of months, it is questionable whether they would have any report ready in time for the government to prepare a comprehensive tariff policy. This week, a deputation representing the Canadian Manufacturers' Association, laid its views before the cabinet. They asked for three things:—

1. That the proposed ministerial inquiry into the tariff be abandoned.

2. That the whole question of tariff revision be left in abeyance for the present.

3. That a permanent tariff commission be appointed with investigatory and advisory powers to deal with the tariff upon a purely economic and scientific basis.

The government's reply to the delegation was that the proposal for a ministerial inquiry into the tariff had been submitted to parliament in the form of a promise and this promise would have to be kept. As to the matter of a permanent tariff commission, the suggestion was not a new one, but it would receive the consideration which its importance deserved.

ASSOCIATION OF LIFE AGENCY OFFICERS

The third annual convention of the Association of Life Agency Officers was held in Chicago, Ill., November 11th and 12th, eleven Canadians being present. In addition to the transaction of usual business, several papers were read and discussions took place on points of interest in field work. This association is a comparatively new one, having been formed a few years ago to bring together the head office men in charge of field work for the exchange of experiences and of views.

TERMINAL ELEVATORS INVESTIGATED

An investigation last week into the business of terminal elevators at Fort William, on the application of the Canadian Feed Manufacturing Co., which had alleged that the elevators refused to sell them screenings for the manufacture of stock feed, resulted in the practical acquittal of the elevators by the Board of Commerce. The elevators, however, agreed to sell the company screenings at market prices. It was decided that a pooling arrangement which was found to exist was quite justified.

PERSONAL NOTES

Mr. H. B. Shaw, general manager of the Union Bank of Canada, who has been in England and France for some time, landed in New York a few days ago.

Mr. Lee Choon Guan, chairman of the China Commercial Bank, Singapore, and of several other banking and financial concerns, was in Canada this week on his way to London, Eng.

Mr. Ralph A. Stephenson, formerly Canadian manager and partner of Harris, Forbes and Company, investment bankers, has been elected senior vice-president of the new Industrial Bank of New York.

Mr. Andrew Hamilton has been appointed branch manager of the Sun Fire Insurance office for the province of Quebec. For the past nineteen years he has been connected with the Union Assurance Society, Limited.

Mr. A. R. Phipps, who is assistant manager of the Canadian Bank of Commerce in London, Eng., is on a visit to the west. He is in Canada to secure first-hand information for the benefit of friends of the institution in Great Britain.

Mr. William Hogg, inspector of the Canadian Bank of Commerce, attached to the British Columbia division with headquarters at Vancouver, has taken up his new position in Toronto as superintendent of branches for the province of Ontario.

Mr. E. M. Winslow, western superintendent for the Bank of Montreal, accompanied by Mr. G. C. Cassels, one of the assistant general managers and the chief representative of the bank in London, Eng., is on his semi-annual visit to the head office.

Mr. Wilmot L. Matthews and **Mr. Stephen Haas** have been elected to the directorate of the Canadian General Electric Company, Limited, and the Canadian Allis-Chalmers, Limited, Toronto, to fill the two vacancies on the board. Mr. W. L. Matthews is succeeding his father, the late Mr. W. D. Matthews, on the board.

Mr. J. R. Binning has been appointed manager of Furness-Withy and Company, for Canada and Newfoundland, according to an announcement by Sir Frederick Lewis, Bart., chairman of the Furness-Withy and associated steamship lines, who has been visiting Canada in company with Mr. H. C. Blackiston, director and general manager of the United States offices.

Lieut.-Col. Hercule Barre has been appointed Canadian Trade Commissioner at Paris. This position is created by the Minister of Trade and Commerce for the purpose of encouraging better trade relations between France and Canada. Since 1895, Lieut.-Col. Barre has been a member of the 65th Regiment. He will assume his new duties about the beginning of next year.

Mr. Judson G. Lee, who for the past ten years has been chief agent for the province of Quebec, at Montreal, for the General Accident Fire and Life Assurance Corporation of Perth, has been appointed branch manager at Montreal of the General Accident Assurance Company of Canada. He still retains the agency of the General Accident of Perth, which controls the General Accident of Canada.

Mr. T. B. Macaulay, president of the Sun Life Assurance Company, has just returned from a trip to England. He points out that England is to-day faced with many grave problems, but none of them necessarily mean revolution. Mr. Macaulay states that there is free spending of money, frank pursuit of pleasure, and every outward sign of prosperity.

The war loan subscription of the Brown Company, Portland, Me., mentioned as $20,000 in our issue of November 21st, was later increased to $100,000.

HEALTH INSURANCE IN BRITISH COLUMBIA

The British Columbia government has announced that it will appoint a commission to investigate state health insurance, and old-age and mothers' pensions. E. S. H. Winn, chairman of the Provincial Workmen's Compensation Board, will be chairman of the commission. Mr. Winn has been an advocate of some measure in this direction for some time, and his views, as stated in an address before the Vancouver Board of Trade, were quoted in *The Monetary Times* of November 14th. The board did not go so far as to endorse his views, as was stated in a footnote in that issue, but merely expressed thanks for the address.

BRITISH COLUMBIA TRUST CORPORATION

The British Columbia Trust Corporation is being reorganized, although trust powers may be relinquished and the company operated merely as a financial concern. W. U. Runnalls, provincial inspector of trust companies, and succession duties clerk in the Department of Finance, has resigned that position to take charge of the company. Mr. Runnalls joined the provincial service in 1904, as a member of the Treasury Department. Shortly afterwards he became a member of the audit staff and some years ago was appointed to the position of inspector of trust companies. The British Columbia Trust Corporation has on its directorate Lieutenant-Governor Sir Frank Barnard; David Ker, of Victoria; Mr. Farrell, head of the British Columbia Co.; Robert Kelly, Mr. Carter-Cotton and other prominent business and financial men of Vancouver.

STANDARD RELIANCE INVESTIGATION

The Ontario government investigation into the affairs of the defunct Standard Reliance Mortgage Corporation has continued, with several interruptions, since last mentioned in these columns. Last week it was adjourned until December 2. Among the transactions inquired into were the purchases of the Huron and Bruce Loan Co. in 1904 and of the Canadian Savings Loan and Building Association, in connection with which payments were made, the objects for which could not be determined. W. S. Dinnick was the chief witness throughout the proceedings.

Another feature of the evidence was that the Standard Loan had lost over one hundred thousand dollars in trying to establish the Canadian Casualty Co., which had been organized in 1902 by G. T. C. Dinnick and other directors of the Standard Loan. The Standard Loan first bought the stock of the Casualty Co., making payments to the extent of $43,000 and then sold this stock to its subsidiary, the Dovercourt Land Co., who paid for it with a cheque drawn on the Standard Loan, and which sum remained as an overdraft. In all, the Dovercourt Co. was shown to have advanced the Canadian Casualty Co. $134,000, and when the Casualty Co. was wound up in 1908, and the assets sold to the General Accident Co. for $50,000, the Dovercourt Co. received $28,000 of this amount for its stock. The Dovercourt loss was thus $106,000, and this was covered up by writing up the Dovercourt assets $122,000.

OBITUARIES

Mr. F. W. Sumner, of Moncton, Agent-General of New Brunswick in London, Eng., died suddenly at St. John, N.B., last week, where he had been attending a meeting of the directorate of the New Brunswick Telephone Company.

Mr. Francis Lacey Carter-Cotton, a pioneer of British Columbia, and founder of the News-Advertiser, now incorporated with the Vancouver Daily Sun, died at his home in Vancouver last week at the age of 77. An Englishman by birth, he had been identified with political affairs and commercial and other enterprises.

OUR RESOURCES AND THEIR DEVELOPMENT

"INEXHAUSTIBLE resources," "unlimited possibilities," "the twentieth century is Canada's," with these and other similar expressions the Canadian people have beguiled themselves into a policy of prodigality, of opportunism in the present and of disregard for the future. For fifty years, of course, Canada has been in the van of prosperity, and will unquestionably continue to grow and prosper. But our resources are not inexhaustible, and our possibilities are limited by climatic and other natural conditions. Concrete evidence of the first is found in the fact that our best timber supplies have been used, some of our fisheries depleted, and supplies of natural gas in some parts of Ontario are showing signs of exhaustion. Proof of the second is seen in our great transcontinental railways, for which we are unable to supply adequate traffic. Writing in reference to the present railway problem, Senator W. C. Edwards of Ottawa, said in a recent letter to the Montreal Gazette: "The whole is the outcome of a constant demand for railway construction by the people of Canada, arising from the inordinate imagination of the Canadian people as to Canada's possibilities, or from a lack of consideration of Canada's limitations; for from the earliest childhood of the oldest resident in Canada until the present day our public men have been proclaiming from every platform the wonderful, numerous, inexhaustible resources of Canada, overlooking the fact that in truth Canada is a country very limited in variety of resources, and also the fact that there is no resource that is inexhaustible. I do not hesitate to venture the assertion that if a more accurate knowledge of Canada and her possibilities existed, many thousands of miles of present railway would never have been constructed."

Senator Edwards' reputation as a pessimist is already established, but his opinions are at least founded on intimate knowledge, and are not expressed for the purpose of pleasing an impressionable electorate. Prodigality is a national vice which it is only too easy to acquire, and public men have too often exploited this tendency. Confederation leaders, looking towards the future of the Dominion which was being created, estimated that in fifty years it would have a population several times as large as the present population. At the end of these fifty years Canada is, as Senator Edwards expressed it, "nothing more nor less than a narrow fringe on this North American continent, affected very seriously in its possibilities of productivity by adverse climatic conditions and very much hampered in the exchange of its products by the long distances of transportation from east to west. These disabilities necessarily make Canada a dear country to live in and produce in, and handicap her very materially in her competition with the more favorably situated countries of the world."

Referring to the railroads, he expressed the opinion that one double-tracked transcontinental railway would be adequate for present and future traffic requirements. The net result of past policy is that "freight charges are materially enhanced by the cost of maintaining such an enormous amount of unnecessary railway mileage. The popular idea is that by the multiplication of railways competition is afforded; but unnecessary multiplication has exactly the reverse effect. The railroads have to be carried and they are carried only by the transportation of the produce of the country. . . . I venture to say that if the government of Canada continues its administration of railway affairs and in addition takes over the Grand Trunk system, freight rates will become so exorbitant in Canada that commerce and industry will be enormously handicapped. The fact is that our high railway charges will have the effect of retarding very seriously the progress of our country."

FIXES PROFIT ON RETAIL CLOTHING

ON November 22nd, an order was issued by the Toronto representative of the Board of Commerce, fixing the retail spread on men's suits and overcoats. The order, which applies to Toronto only, is as follows:—.

"When the cost of the commodity to the vendor is twenty-five dollars or under he may mark, offer or sell at a gross profit or margin not greater than thirty-three and one-third the sale price marked or demanded, but when the cost of the commodity to the vendor is over twenty-five dollars he may mark, offer or sell at a gross profit or margin not greater than thirty-three and one-third per cent. of the sale price marked or demanded.

"Provided, however, that after the fifteenth day of March, nineteen hundred and twenty, the mentioned limita-

[illegible] twenty-five per cent. shall apply when the cost of the commodity to the vendor is thirty dollars or under, and the mentioned limitation of thirty-three and one-third per cent shall apply when the cost of the commodity to the vendor is over thirty dollars.

"And it is further ordered and declared that any vendor of said commodities or either of them who, on, from or after the fifteenth day of December, nineteen hundred and nineteen, marks for sale, offers for sale, or sells the said commodities or either of them within the city of Toronto at a price greater than the cost of the commodity to him, with the gross profit or margin by this order permitted super-added, shall be deemed to have committed an offense against Sections 17 and 18 of the Combines and Fair Prices Act

"And it is further ordered that, for the purposes of this order and for the calculation of the percentage of gross profit or margin on sale, the cost price of the article shall mean the invoice price plus duty, exchange and freight actually paid and less all discounts allowed or obtainable.

"And it is further ordered that all vendors of said commodities within Canada, but not within the city of Toronto, do, before the first day of January, nineteen hundred and twenty, show cause why the terms of this order should not apply throughout Canada."

CANADIAN WAR LOANS REVIEWED

THE government, as well as the officials of the Finance Department, are naturally delighted over the magnificent success of the Victory Loan. With the war over and the lack of any patriotic incentive, there was considerable doubt—it may as well be confessed now—as to the success of the flotation. It was realized that if it proved a failure it would be a national calamity, as the Dominion had commitments which would take every cent that could be raised, and the money had to be secured in Canada, as London was out of the question and the New York market was practically closed to Canada.

The loan just raised is the sixth domestic flotation since the war, or practically at any time. The first war loan was raised in 1915, and the securing of money for Dominion purposes was such a novelty that there was much doubt expressed by Canadian financiers as to whether Sir Thomas White could secure the modest fifty million dollars he asked for in that year. This loan was doubled, the amount applied for by the public being $103,729,500. This loan could in no way be termed a popular flotation. There was no appeal to the small investor, and the total number of applications was only 24,862. Nearly half of the fifty million was taken by the banks, or $24,729,500.

The second war loan was floated in 1916, and Sir Thomas White, as a result of the success of the first loan, asked for one hundred million dollars. The amount applied for was slightly over $210,000,000, but only the hundred million was accepted. This loan, like the first, was largely subscribed by the big institutions and wealthy investors, the total applications being 34,526.

The third loan came in March, 1917, and, like the two previous loans, there was no great campaign to reach the humble investor. One hundred and fifty million dollars was requested, and $260,768,000 applied for. The total applications showed a slight increase, but were still comparatively small, being 40,800. Again the bank applications amounted to nearly half the loan, being $77,708,000.

It was in the fall of 1917, when the war situation was becoming critical and the question of world finances more difficult, that the first attempt was made to popularize Canadian bonds. Sir Thomas White formed a Dominion-wide organization, and a great campaign was conducted throughout the whole Dominion. This loan again was $150,000,000, the rate of interest being raised from 5 to 5½ per cent. The loan was a success far beyond the fondest hopes of Sir Thomas and his colleagues. The amount applied for was no less than $419,289,000, and the number of applications jumped from slightly over the forty thousand of the previous loan to 871,331. This was a great tribute to the value of advertising and organization.

The fifth loan, floated in the fall of 1918, was an even greater success. The amount requested was $300,000,000. The amount applied for was $695,390,250, the number of applications reaching the enormous total of 1,101,287, or about one in every seven of the population.

PATRIOTIC FUND DEPENDANTS

THE announcement from the headquarters of the Canadian Patriotic Fund at Ottawa, to the effect that substantial payments are still being made monthly, and that the number of applications for such payments is increasing, will not be received with relish by those who have contributed to this commendable organization. While the waning spirit of voluntary charity is regrettable, it is not desirable that this war time fund should become a means of support for favored dependants whose claims cannot be recognized by the government. The existence of large numbers of people who are without means of support and whose claims on voluntary charity are overlooked in the complexity of present-day society is a large question which is difficult to settle, but no progress in this direction is made by arbitrarily selecting an insignificant fraction for support, while numerous more deserving cases may be overlooked.

QUEBEC UNION OF MUNICIPALITIES

QUEBEC Union of Municipalities, which was organized only a few weeks ago, is to hold its first convention in Montreal on December 2nd and 3rd. Until this union war organized, Quebec was the only province which did not have such a union, and the indications are that it will be successful. The other provincial unions, where the management is in the hands of a vigorous executive, are doing effective work, and many of their conventions are in distinct contrast to the rather flat convention of the union of Canadian municipalities. It is rather surprising that Quebec has not had a provincial union sooner, because its municipal institutions differ in many respects from those of the rest of Canada. Many of the Quebec municipalities have, nevertheless, been staunch supporters of the Canadian union, and it can reasonably be expected that most of them will actively support the newly formed organization. Quite recently a provincial Department of Municipal Affairs was created, and plans are being made under the direction of Oscar Morin, deputy minister, whereby assistance in engineering, financial and other questions will be at the disposal of the municipalities through their union.

Now that the farmers of Ontario are in power, they are astonished at the number of friends they have outside their own ranks.

* * * * *

The government of Newfoundland has just been overturned, following in the wake of the provincial governments in Prince Edward Island and Ontario. Hon. M. P. Cashin was premier of the defeated administration. The new leader is Richard Squires, and it is significant that the new minister of marine and fisheries is William Coaker, head of the Fishermen's Union. The new minister of finance is Henry B. Rigg.

* * * *

A recently formed Federation of School Teachers in Manitoba has discovered a means of raising revenue for education. At a meeting held recently the president of the federation stated that a provincial school tax of one mill would not be a hardship, and would raise double the amount now required for teachers' salaries. Taxation presents no terrors to those who hope to benefit by it, but overtaxed Canadians do not look with favor upon any such increase in their burden, in which education is already one of the largest factors.

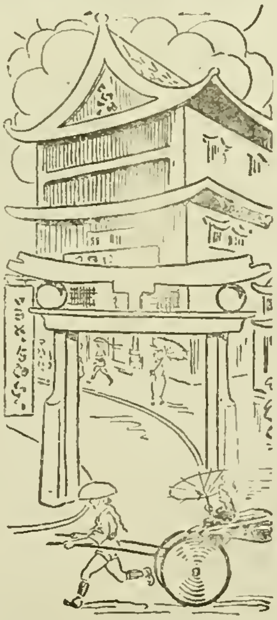
SHANGHAI

SHANGHAI is the distributing port of China. The deep water of its harbour and its miles of wharves bristle with ships that bring to China the millions of dollars' worth of goods she buys, and that carry in return the hundreds of millions of dollars' worth of silk, cotton, tea, rice, hides, wool, cereals, matches, paper and curios all over the world

China holds vast possibilities to Canadian importers and exporters; and the Park-Union Foreign Banking Corporation can be of service to those engaging in foreign trade.

Through Branches in Shanghai, China; Yokohama, Japan; Paris, France, New York, San Francisco and Seattle, U.S.A., and London, Eng., we are in a position to extend to exporters and importers every facility for the transaction and extension of foreign trade throughout the world.



UNION BANK OF CANADA

Park-Union Foreign Banking Corporation jointly owned and controlled by National Park Bank of New York and Union Bank of Canada.

CURRENT ACCOUNTS

Efficiency is hard to obtain and highly paid for. Merchants and Manufacturers will find this Bank equipped and prepared to give all Current Accounts the efficient care and careful consideration they demand.

RECENT FIRES

Many Large Conflagrations This Week—Destructive Fire at Montreal University

Allandale, Ont.—November 20—Residence of Rev. W. J. Watt was damaged. Estimated loss, $600, covered by insurance.

Brantford, Ont.—November 20—Home of Mr. Dent, 236 Chatham Street, was damaged. Defective stovepipe is stated to be the cause. Estimated loss, $400.

Belleville, Ont.—November 19—Residence of R. E. Lazier was damaged. Cause originated from the stovepipes. Estimated loss, $500.

Calgary, Alta.—November 19—The Ontario Laundry, at Fifth Avenue and Second Street, was damaged. Estimated loss, $1,000.

Campbellton, N.B.—November 20—The Rosebury Street school was destroyed. Estimated loss, $25,000, covered by insurance.

Charleswood, Man.—November 17—Home of T. Johnston, Roblin Boulevard, was destroyed. Estimated loss, $2,000, with no insurance.

Cranbrook, B.C.—November 16—Canadian Pacific Railway fruit car, loaded with apples, was destroyed. Cause, defective heating system. Estimated loss, $3,500.

Dartmouth, N.S.—November 19—Coal sheds and office of A. Brysson were damaged. Cause, defective stove. No insurance.

Glen Buell, Ont.—November 18—Cheese factory of R. K. Addison was destroyed. Estimated loss, $3,000, covered by insurance.

Halifax, N.S.—November 19—Garage of Rhodes and Curry was damaged. A motor tractor and Ford truck were destroyed. Estimated loss, $5,000.

Lakefield, Ont.—November 20—Sawmill of J. Charlton at Hague's Point was damaged. Cause, spontaneous combustion. Loss covered by insurance to the extent of $1,000.

London, Ont.—November 25—Planing mill of Wm. Gerry and Sons was damaged to the extent of $23,000. Coal yard of J. M. Daly was also damaged to the extent of $3,000. Cause, spark from passing locomotive.

Montreal, Que.—November 22—Montreal Warehousing Co.'s shed on Wellington Street was damaged, with twelve tractors, six automobiles, four motor trucks and a quantity of leather. Estimated loss, $30,000. The University of Montreal, commonly known as Laval, was destroyed. The loss is roughly estimated at $400,000, but the fact that some of the books and instruments destroyed cannot be replaced makes the loss heavier than it would originally be.

Port Dover, Ont.—November 23—Grand Trunk roundhouse was destroyed.

Sharpton, Ont.—November 22—Residence of G. Bell was destroyed.

Sherbrooke, Que.—November 17—Six barns, a quantity of grain and machinery was damaged. Cause, starting of gasoline engine. Estimated loss, $5,700, partly covered by insurance.

Sudbury, Ont.—November 18—The Sudbury High School was damaged. Cause, defective chimney and pipes. Estimated loss, $4,000, covered by insurance.

Toronto, Ont.—November 20—Sheds at the rear of 158 and 160 Queen Street East were damaged. Estimated loss, $1,500.

November 23—Planing mill of Rankin and Co., 1536 Dundas Street, was damaged. Cause, boys smoking cigarettes. Estimated loss, $2,000.

Trois Pistoles, Que.—November 20—One mill of the Brown Lumber Corporation, of Berlin, N.H., was destroyed and another damaged at Lobin, near Trois Pistoles, with 2,000,000 feet of lumber and 3,000 cords of pulpwood. Cause, children playing with matches in nearby residence. Estimated loss, $1,000,000, covered by insurance.

Winnipeg, Man.—November 20—The City Garage and automobiles of A. Craft, F. Cosford and I. Resnic were damaged. Estimated loss, $2,000.

OCTOBER BANK STATEMENT

The bank statement for October, which will be given in full next week, shows assets totalling almost $3,000,000,000, an increase of nearly $330,000,000, as compared with October, 1918, while the liabilities during the twelve months' period have grown by about $115,000,000. Notice deposits now stand over the billion and a quarter mark, while demand deposits exceed seven hundred millions. Deposits will drop in November, however, because of withdrawals for the purchase of Victory bonds. The principal figures of the October statement, compared with September, 1919, follow:—

	Oct., 1919.	Sept., 1919.
Reserve fund	$ 123,477,561	$ 123,014,750
Note circulation	236,477,479	225,907,997
Demand deposits	705,280,241	650,743,015
Notice deposits	1,262,746,984	1,227,437,715
Deposits outside Canada	253,965,203	255,274,256
Current coin	81,053,489	81,560,043
Dominion notes	165,457,289	166,098,147
Deposits central gold reserve	126,100,000	115,100,000
Call loans in Canada	100,549,390	96,912,709
Call loans outside Canada	158,194,085	169,532,489
Current loans in Canada	1,104,940,160	1,058,572,202
Current loans outside Canada	160,713,386	151,814,511
Total liabilities	2,607,447,772	2,582,558,149
Total assets	2,967,598,848	2,851,917,680

COBALT ORE SHIPMENTS

The following is a statement of shipments of ore, in pounds, from Cobalt Station for the week ended November 21st, 1919:—

Buffalo, 109,290; Mining Corporation, 92,611; McKinley-Darragh, 105,659; Dominion Reduction, 62,000; total, 369,560.

The total since January 1st is 22,708,532 pounds, or 11,354.26 tons.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended November 27th, 1919, compared with the corresponding week last year:—

	Week ended Nov. 27, '19.	Week ended Nov. 28, '18.		Changes.
Montreal	$140,688,057	$133,167,645	+	$ 7,520,412
Toronto	93,148,987	66,065,912	+	27,083,075
Winnipeg	64,810,262	69,509,049	—	4,698,787
Vancouver	13,375,017	11,033,255	+	2,341,762
Calgary	10,111,482	7,892,340	+	2,219,142
Hamilton	6,702,200	4,792,620	+	1,909,580
Quebec	5,911,160	5,138,458	+	772,702
Edmonton	5,919,713	3,627,596	+	2,292,117
Halifax	4,666,919	4,904,691	—	237,772

ONTARIO FIRE INSURANCE LIQUIDATION

Two Dividends Have Been Paid, and Realization of Assets Has Been Better Than Anticipated

In 1914, after nine years of business, the Ontario Fire Insurance Co. of Calgary went into liquidation, and winding up proceedings are now nearing completion. In its statement as at December 31st, 1911, the company showed assets of $224,136, including an expense reserve of $26,229, against which there were liabilities of about $132,000, not including capital stock. The Trusts and Guarantee Co. is in charge of the liquidation. Mr. P. Dalziel of Calgary, who is handling it for the company made the following statement a few days ago to *The Monetary Times*:—

"This company has been in liquidation over five years and the winding up is not yet complete. There were nearly seventeen thousand policies in force at the time the winding up order was made and the business was not reinsured. The liquidator had, therefore, to establish the many claims for unearned premiums and this was rendered somewhat complicated by the fact that a number of the agents had reinsured their own business at their own expense without sending proper notice to the company or taking the matter up promptly with the liquidator. The final result was that the liquidator, with the consent of the court, allowed some two hundred agents to rank as creditors for claims for unearned premiums of $17,150.28 settled by them and to share in the proceeds of the securities held by the minister of finance for the benefit of the policyholders. This reduced the number of policyholders who had claims for unearned premiums with whom the liquidator had to deal direct to about twelve thousand, the amount of their claims being $54,269.32. There were one hundred and seventy-three claims for fire losses, the amount of these being $109,154.78. The total of the claims of the policyholders was $180,574.38.

Dividend Payments

The proceeds of the securities held by the minister of who had claims for unearned premiums with whom twenty-five per cent., or $45,143.59, which, deducted from the total claims of the policyholders of $180,574.38 left a balance of $135,430.79. Claims other than those of policyholders of $3,978.11 have been admitted, while there are additional claims of some $15,000.00 not yet admitted. It is expected that some of these will be disallowed.

"Out of the proceeds of the company's assets, other than the securities held by the minister of finance, the liquidator paid some time ago a first ordinary dividend of five per cent. This dividend was paid on the numerous small claims along with the preferred dividend of twenty-five per cent. The liquidator is now paying a second ordinary dividend of fifteen per cent., but only on the claims for fire losses and the claims of the agents, as the expense involved in paying another interim dividend on the twelve thousand odd claims for unearned premiums would be too great. It is proposed to make no further distribution to this class of creditors until a final dividend can be paid. These creditors will, of course, receive in all the same amount in dividends as the other creditors.

"The liquidator was successful in establishing a claim of $40,000.00 against the Western Canada Fire Insurance Co., which is also being wound up. The Trusts and Guarantee Co., Ltd., at Calgary, is now liquidator of both companies, having been appointed liquidator of the Western Canada Fire after the dispute between that company and the Ontario Fire had been settled. At first it was estimated that possibly not more than $30,000 would be realized on the claim against the Western Canada Fire, but the prospects are now more favorable and it is probable that the full amount will be realized, in which case the creditors of the Western Canada Fire will receive payment in full and those of the Ontario Fire additional substantial dividends. So far only $14,000.00 has been paid by the Western Canada Fire on the Ontario Fire claim which ranked, in terms of the settlement, after the other claims.

"It will be some time yet before a final distribution can be made as practically the only asset which the Western Canada Fire had was its unpaid capital. The liquidator has, however, had good success in realizing from the contributories, considering the difficulties encountered, and the final outcome of the liquidation of both companies will apparently be much better than was at first anticipated."

ONTARIO WORKMEN'S COMPENSATION FIGURES

Taking the reports of industrial accidents as the measure, industrial activity in Ontario has largely and steadily increased since midsummer, according to the figures of the Provincial Workmen's Compensation Board. October, 1919, not only exceeded October, 1918, but also exceeded the monthly average for 1918. The monthly totals since July 1st are: July, 3,492; August, 3,778; September, 3,993; and October, 4,329. The monthly average for 1918 was 3,987. Building is one of the things that shows the greatest increase.

The totals for 1919 will be slightly less than for 1918, because of the small figures during the first half year, but the difference will be much less than expected by reason of the present increased activity. The first ten months of 1919 show 35,403 accidents as against 40,287 during the like period in 1918. The amount of compensation awarded during the first ten months of 1919 was $2,859,448, which somewhat exceeds the amount for the same period in 1918. The increased wages and the increase in widows' and children's allowances in accidents happening since April 24th, account for the increase in the amount of compensation. The total for the year will be well over the total for 1918, which was $3,514,648, exclusive of $369,346, paid for medical aid. The amount for medical aid will also exceed that for 1918, because of the amendment taking away the medical aid limitation.

BANK BRANCH NOTES

Royal Bank Opens in Buenos Aires—Many Other Branches

The following is a list of branches of Canadian banks recently opened:—

Great Village, N.S.	Royal Bank of Canada
Birsay, Sask.	Royal Bank of Canada
Grande Prairie, Alta.	Royal Bank of Canada
Halifax, N.S. (North and Windsor)	Royal Bank of Canada
Bracebridge, Ont.	Dominion Bank
Cedar Dale, Ont.	Dominion Bank
Windham Centre, Ont.	Standard Bank of Canada
Teeterville, Ont. (sub-agency)	Standard Bank of Canada
Toronto, Ont. (1960 Gerrard Street)	Union Bank of Canada
Marpole, B.C.	Canadian Bank of Commerce
Buenos Aires, Argentine	Royal Bank of Canada

The new branch of the Royal Bank of Canada at Buenos Aires is under the management of Mr. T. F. Denver, late manager of the branch of the bank at Barcelona, Spain, and formerly supervisor of Cuban branches. The Royal Bank has now 68 branches in the West Indies, Central and South America.

A permit has been issued to the Canadian Bank of Commerce, for the erection of an office at Grosvenor and Stafford Streets, Winnipeg, Man.

The Union Bank of Canada has acquired the property at the corner of Woodbine Avenue and Gerrard Street, Toronto, Ont., and intends to build a new branch in the spring.

Plans are being prepared for the erection of a new branch of the Bank of Hamilton in Walkerville, Ont., at Wyandotte Street and Devonshire Road.

RAILROAD EARNINGS

The following is a statement of the gross earnings of Canada's transcontinental railways for the first three weeks of November:—

	1919.	1918.	Inc. or dec.
Canadian Pacific Railway			
November 7	$3,821,000	$3,437,000	+ $ 384,000
November 14	4,083,000	3,247,000	+ 836,000

The Fire Insurance Company of Canada

142 Notre Dame Street W., MONTREAL

J. E. CLEMENT, Managing Director

This company is prepared to make quotations to general managers and agents for the insurance of contingent commissions.

Correspondence with the management is invited.

BANKERS BOND COMPANY'S NEW BUILDING

The new building of the Bankers Bond Co., at 60 King Street W., Toronto, which is to be known as the Bankers Bond Building, was completed this week and the company has taken up quarters there. The building is of Grecian architecture, and is in keeping with the style of building considered appropriate for financial institutions. Messrs. Jones and Proctor Bros., insurance agents, will occupy the entire second floor when completed.

BRITISH GENERAL INSURANCE CO.

The British General Insurance Co., of London, England, will enter Canada for the operation of fire insurance. Norman M. Walker, managing director of the company, was in Montreal recently, and announced the appointment of Mr. Thomas F. Dobbin as the company's Canadian manager. The British General commenced business in 1904 and has made considerable progress under conservative management. The company has a subscribed capital of $1,250,000, paid-up $312,000 and reserve funds of $750,000. Its total assets exceed $3,000,000.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

Rate in New York, sterling demand, $4.04¾.
Bank of England rate, 6 per cent.

MERCHANTS BANK HALF-YEARLY STATEMENT

Further material gains and growth are disclosed in the half-yearly balance sheet of the Merchants Bank of Canada, issued from the headquarters of the institution on November 22nd. Profit and loss figures, following the policy of the bank, are withheld until the completion of the fiscal year, but the balance sheet shows that total assets have increased in the period by $32,582,136 to the aggregate of $198,506,572. Readily available assets of the bank stand at $84,014,965, a gain of $11,566,688, or approximately 16 per cent. over the preceding half-year. Aggregate deposits at the end of the half-yearly period ended October 31st last are given in the statement at $166,006,015, compared with $135,888,213 on the same date a year ago, an increase of $30,117,802. Of this gain, $19,368,746 was in savings deposits, while demand deposits increased by $10,749,056.

Securities of Dominion and provincial governments held by the institution show an increase of $4,682,244, while current loans and discounts in Canada have increased by $19,435,478 over the total as at October 31st a year ago. Note circulation at $15,827,373 is higher by $647,130 than a year ago, while the issue in excess of the paid-up capital is more than covered by a deposit in the central gold reserve of $8,000,000. Compared with the position of October 31st, 1918, the paid-up capital of the bank shows an increase of $1,341,535, with rest account standing at the satisfactory level of $7,000,000. Actual cash on hand and in banks increased in the year by upwards of $5,000,000, while call loans in Canada grew by almost $2,000,000 to $6,843,017, those outside the Dominion being increased by upwards of $500,000.

Union of Manitoba Municipalities Convention

Twelve Municipalities May Borrow $2,365,209 For Good Roads Alone — Next Year's Meeting Will be in Brandon — Want Central Authority to Equalize Assessments for Provincial and Local Taxes

THE sixteenth annual convention of the Union of Manitoba Municipalities was held in Winnipeg, November 18 to 20. After an address of welcome by Alderman MacLean, the president, Alderman Marion, of St. Boniface, delivered his opening address. In addition to reviewing the work of the Union during the year, he referred to the labor situation, pointing out that as labor is the main factor in production, any reduction in working hours could not fail to reduce the material welfare of the country. The subject of tax equalization was discussed at length, and disparity in the existing taxes pointed out. G. L. Guy, of the Manitoba Public Utilities Commission, addressed the convention on the advantages of electric light and power in cities, towns and villages. Hon. J. W. Armstrong, minister of municipal affairs, commended the work of the Union and acknowledged its assistance in improving the Municipal Act.

H. W. Cox-Smith, secretary of the Manitoba School Trustees Association, and J. A. Bowman, of the employment service of Canada, also addressed the convention. A. J. H. Donahoe, of Calgary, mentioned public health, education, good roads and tax equalization as the chief municipal problems in Alberta. E. G. Hingley, of Regina, told what had been done by a deputation sent to Ottawa, and of which he was a member. Its main purpose was to insure payment of taxes on unpatented lands and to have taxes made the first burden against homestead lands cancelled or abandoned, with improvements. He read a letter received last month from the minister of the interior and stating that in 350 cases where a quarter-section had been held for five years or longer without application being made for the patent, cancellation proceedings had been taken and the land thrown open for resettlement, preferably by returned soldiers. Mr. Hingley said that in the memorial made to the government last summer, 3,000 parcels of land in the prairie provinces on which tax arrears amounted to about $300,000, had been cited. Geo. Prout, M.L.A., announced the Rural Credits' Association convention to be held in January, and invited those present to attend. Sir Augustus Nanton and W. J. Bulman presented the work of the Patriotic Fund, and explained the need for a levy of ½ mill to wind up the work of the fund. The position of the Winnipeg General Hospital and its title to public support was presented by Stanley Hough.

Hon. G. A. Grierson, minister of public works, referred to the "perennial resolution," asking the government to cover entire expenditure on trunk highways. He expressed his intention of recommending to the government that all money from motor licenses be used only for good roads. But the revenue from this source was much less than people seemed to think. It amounted to only about $226,000 last year and $325,000 this year, whereas more than $1,000,000 had been spent on road improvement in the province last year. Under the present system the municipality might receive government assistance to the extent of one-third of the cost of a market road or one-half of the cost, if gravelled, and two-thirds of the cost of a through road or highway.

A. McGillivray, provincial highways commissioner, said that 50 municipalities were now engaged in construction of good roads under the Good Roads Act. Road systems have been laid out in the province covering 4,300 miles of market roads and 450 miles of through roads. Up to the present $3,250,000 has been spent under the Act. There are 12 municipalities submitting by-laws at the coming elections, December 16, for debentures totalling $2,365,209 for building good roads. With government assistance this will mean an expenditure of about $4,100,000 if the by-laws carry. He added that the board had in view the construction of about 1,800 miles of provincial highways, but considered local roads of more immediate importance.

Resolutions

Among the resolutions passed was the following:—

"It is resolved that this convention urge upon the government the necessity of sending to all municipal secretary-treasurers a complete list of equalized assessments for the judicial district in which they are; and that a column be added to the sheet of statistical information respecting municipalities published annually by the municipal commissioner giving the equalized assessment of each municipality, so that this information will appear together with the other statistical information now published."

Another resolution endorsed "the principle of establishing some central authority to co-operate with municipal assessors in the matter of assessment and taxation, for the purpose of bringing about a more equitable assessment of all assessable property both for provincial and municipal levies in Manitoba."

The resolutions passed also included one to have the Good Roads Act amended so that cities as well as towns and villages might take advantage of it in building their trunk highways. Another asked for an amendment to the Noxious Weeds Act empowering the municipalities to pass such by-laws and impose such special taxes as might be necessary to deal with any outbreak of grasshoppers or locusts in their localities. A provincial levy of a sufficient amount in 1920 to carry on the work of the Patriotic Fund was approved by the convention, the amount suggested being one-half mill on the equalized assessment. Amendment of both the Municipal Act and the Transient Traders' Act was asked in a resolution requiring a license to be secured from the municipality for selling, from any conveyance, any goods produced or manufactured in this province.

New Officers

At the last session of the union, Alderman J. A. Marion, of St. Boniface, was re-elected president. Reeve John Haddow, of Rosser, was re-elected vice-president; Robert Forke, of Pipestone, was re-elected secretary-treasurer; and ex-Mayor Adolph, of Brandon, solicitor. The executive committee appointed for the coming year includes Reeve D. D. McDonald, of Dauphin; Reeve J. W. Mitchell, of Miniota; Col. C. E. Ivens, reeve of Wallace; Reeve S. R. Henderson, of East Kildonan; V. W. McFarlane, secretary-treasurer of Rockwood and Stonewall; Reeve R. G. Willis, of Morton; and Reeve C. Wroth, of Ellice. Reeve Haddow was appointed to represent the union on the board of trustees, Winnipeg General Hospital. It was also decided that the next convention should be held at Brandon.

NORTH EMPIRE FIRE INSURANCE COMPANY

Arrangements have been completed whereby the London Guarantee and Accident Co. purchases the North Empire Fire Insurance Co. In a letter sent several weeks ago by the directors of the latter company to the shareholders the directors stated that they had agreed to sell their shares to the London Guarantee and Accident Co., and recommended that the shareholders do the same. The price offered by the London Guarantee and Accident was about $33 for each share on which $30 had been paid, and was conditional upon 52 per cent. of all outstanding shares being turned in. Some adjustment remaining to be made in agents' balances, etc., might, the directors said, result in the payment of a further dividend on or after December 31st, and which, it was hoped, would increase the realization to 114 per cent. of the original investment.

Want Thorough Tariff Investigation—Hydro Exemptions Cut Down Municipal Assessments

THE 1919 convention of the Associated Boards of Trade and Commerce of Ontario was held in Toronto, November 21st and 22nd. Wm. Taylor, of Owen Sound, president of the organization, was in the chair. The officers elected for 1919-20 are as follows:—Honorary presidents, Dr. H. T. Reason, London; Lieut.-Col. W. N. Ponton, Belleville; A. J. Young, North Bay; R. Home Smith, Toronto; president, Wm. Taylor, Owen Sound; 1st vice-president, Arthur Hewitt, Toronto; 2nd vice-president, John Elliott, Belleville; 3rd vice-president, Wm. Anderson, Chatham; secretary-treasurer, F. G. Morley, Toronto; executive, John Bingham, Ottawa; Lieut.-Col. H. Brock, Toronto; M. P. Byrnes, Collingwood; A. B. Carscallen, Wallaceburg; W. F. Cockshutt, M.P., Brantford; George C. Copley, Hamilton; K. J. Dunstan, Toronto; J. G. Elliott, Kingston; John Goodwin, Welland; T. J. Hannigan, Guelph; John G. Henry, Sudbury; John A. Hussey, Sault Ste. Marie; G. C. Martin, Hamilton; G. F. McKimm, Smith's Falls; A. T. H. Taylor, Cochrane.

Among the resolutions passed was one in favor of daylight saving; favoring a report on metals and minerals of Ontario by the Provincial and Dominion governments; favoring government aid to steel shipbuilding in Canada; opposing the leasing of all Grand Trunk lines in Ontario to the Hydro-Electric Commission; opposing business taxation; urging the appointment of a royal commission to study the tariff, and of a permanent tariff board; urging legislation to provide for the immediate coinage of pure nickel coins of small denomination; that 1920 be a year of industrial peace, in which disputes be either amicably adjusted or arbitrated.

Public Utilities Should Pay Taxes

A suggestion which came from the Niagara Falls Chamber of Commerce that public utilities owned by governments, municipalities or commissioners, and operated as such, should be subject to municipal assessment and taxation the same as other property, was carried after some opposition developed. Thomas F. Battle, of Niagara Falls, who championed the resolution, pointed out that this was not intended as an attack upon the Hydro-Electric, but he added that so far as his home city is concerned, the exemption of the Hydro property from taxation cut off practically one-quarter of their assessment. The resolution of the Kingston Board of Trade, asking that in future all rates for Hydro-Electric power should be uniform all over the province to all municipalities, was defeated after much discussion. In introducing the motion, J. M. Campbell, of Kingston, declared he was not criticizing the rates of the past, or past methods of distributing hydro power, but he did believe the present arrangement would result in frightening industries away from some centres, while it would draw them to others.

Lieutenant-Colonel W. N. Ponton, K.C., of Belleville, secured the endorsation of the convention on a resolution calling for every possible encouragement, by subsidy or otherwise, to aviation for the commercial and postal services of the Dominion. While speaking upon the latter question, Colonel Ponton referred to the tearing down of the aerodrome at Deseronto, and termed this one of the greatest crimes of Canada. Thousands of dollars, he declared, had been spent in the erection of the buildings, and now they are being used as kindling wood.

A resolution from the Hamilton Board of Trade calling upon the convention to pledge their support and influence to wise and desirous policies for the Insurance Department at Ottawa, and to the assistance of the provincial fire marshal, in the way of preventing fire losses, was passed.

Government encouragement to the steel shipbuilding industry of Canada met with the favor of the convention. The convention was not unanimous, however, on a motion submitted by the Kingston Board calling for payment of a bonus on tonnage distributed, and urging that foreign-built ships at least over five years old be not permitted to engage in coastwise trade. Several delegates expressed the opinion that the methods proposed were too drastic. A resolution from Port Arthur favoring payment to mine operators of a bonus of fifty cents a ton on all iron ore mined and smelted in Canada was moved by Delegate Henry, of Sudbury, in the absence of the Port Arthur delegates. The mover stated that a bill embodying such a bonus was to have been enacted as a government measure at Ottawa last session, but had been deferred for some unaccountable reason.

Coinage of pure nickel coins of small denominations was urged in a resolution submitted by Sudbury Board of Trade and carried. Delegate Smith, of Sudbury, in moving the resolution, declared that 54 countries of the world now use nickel in their coinage, and that Canada produces 85 per cent. of the nickel output of the world. He warned that silver coinage had so depreciated that it might soon be profitable to melt it down into bullion.

The convention was also addressed by Hon. E. C. Drury, Premier of Ontario, who stated that the farmers' government would stand for economy and efficiency, the development of the resources of the province, and would devote more attention to public school education. D. B. Hanna, general manager of the Canadian National Railways, described the system and expressed confidence in its future. "When all these railways are consolidated," he said, "we will have 22,375 miles of railways operating in every province of the Dominion, including 1,881 miles in the United States. That railway will be one of the most gigantic in the history of the world. It will employ 80,000 men, and will have gross earnings of $170,000,000 annually. I venture to predict that in five years we will have probably $225,000,000 gross earnings, and there is nothing to prevent the property being made a success if you and others will see to it that neither your member of parliament nor the government is permitted to have a hand in the management of the road. Sir Robert Borden has made this statement himself."

UNITED STATES WHEAT EMBARGO RAISED

On November 21st the United States Grain Corporation announced that embargoes on wheat and wheat flour would be raised after December 15th. Referring to effects on Canada, Julius H. Barnes, wheat director, said:—

"This release of embargo also permits Canadian wheat and wheat flour to enter American markets free of duty under rulings of the customs service. It is expected that this will greatly enlarge the United States supply of spring wheat flours, which are favorites in the baking trade, and which, because of the partial crop failure in the northwest this year have been relatively in light supply."

ALBERTA CLAIMS RAILWAY TAXES

The tax suit of Alberta against the Canadian National Railways has been set for trial for February 6th, 1920. This action was brought to enforce payment of taxes on Canadian National Railway lines in the province. The statement of claim, as produced in the record, shows that the defendant company runs lines, among others, from Edmonton to Strathcona and from Lloydminster to Edmonton. These are not exempt from taxation, and fall within the meaning of the amendment to the Revenues of the Crown Act. Under section three of this statute it is provided that, unless the value of the railway lines is fixed by the Lieutenant-Governor-in-council, the taxes shall be assessed on a value of $20,000 a mile. The plaintiffs allege that on August 29th, 1908, the value was fixed at $11,985.34 a mile. The defendant did not deliver to the provincial treasurer, as required, a statement of the number of miles of the Canadian National Railways in the province. For this omission a penalty of $20 a day is provided.

THE BEST EXECUTOR

never dies
is always available
is financially responsible
is satisfied with moderate compensation, and
is experienced in all the duties of
estate management.

ADMINISTRATOR OR EXECUTOR?

If a man dies without having appointed an executor, the Court appoints an *administrator* to wind up his affairs. The administrator, where no will is left, distributes the estate among the legal heirs. The previous owner's wishes are not consulted.

An *executor* carries out the owner's wishes, but receives no more for his services than the administrator.

This Company acts as executor under wills. Our officers are glad to have you write for booklets, or better still, to have you consult them about the ways in which the Company may serve you.

EARNINGS AND RATES OF TELEGRAPH COMPANIES

Increase of Thirty to Thirty-five Per Cent. Asked—Public Utility Securities Out of Favor Because of Poor Returns

SESSIONS of the Board of Railway Commissioners for Canada to hear evidence on the application of the telegraph companies for higher rates commenced in Ottawa on November 11th. F. H. Phippen, K.C., counsel for the Canadian Pacific Railway Telegraph Co., stated that earnings of 10 or 11 per cent. were necessary to maintain proper service and pay interest on the investment. It is the intention of the company, he said, to ask the board how much additional income they should have, and then they would submit a new tariff and zone rates. He proposed to submit the valuation of property arrived at before the board in 1910, plus the capital investments and other disbursements since made. This amount, he said, was $6,696,421.

James McMillan, general manager of the company, said the average cost of construction since 1911 was $435.69 per mile. Of 14,000 messages sent within a given period, 11,500 were commercial and the remainder was railway business. In return for this service the telegraph company received the free use of the right-of-way, policing of lines by section men, and carriage of men and materials for construction and repair work. Mr. McMillan stated that there were 17,772 miles of telegraph along the Canadian Pacific Railway, in addition to lines on the Intercolonial right-of-way and the lake steamer routes in the maritime provinces. At the time of the first rates case the value of the system was fixed at slightly less than $7,000,000, in addition to which there were the expenditures since that date. Total operating expenses were $3,791,347, operating revenue $3,756,425, and deficit $34,922; wage increases had been granted which would bring the 1920 deficit to $199,425; $1,060,657 was required annually for depreciation. During the 1919 fiscal year 5,544,585 messages had been handled, and each of these was handled an average of 5.25 times.

F. H. Markey, representing the Great North Western, Canadian Northern and Western Union companies, stated that an increase of 30 to 35 per cent. was necessary if they were to operate their lines properly and provide for future outlays. Since July last, he said, the Great North Western had been operating the Canadian Northern telegraphs.

Evidence on investment conditions was received from J. E. Aldred, president of the Shawinigan Falls Power Co. and a director of the Montreal Light, Heat and Power Co. Many public utility companies in the United States were, he said, in the hands of receivers. There is nothing so cheap as the service given by public utility corporations, and rates could only be raised with permission. Investors were now turning to industrial securities because they paid better dividends than did those of public utility corporations.

On November 12th, G. D. Perry, general manager of the Great North Western Telegraph Co., stated that for the year ended June 30th last the company had a deficit of $296,491, and that for the present fiscal year a deficit of $451,864 was estimated. This change was due to increased wages and other expenses. The value of the company's plant was, he said, $7,606,307, and 6 per cent. per annum was required for depreciation. This was higher than the rate of depreciation claimed for the Canadian Pacific Railway (5.35 per cent.) on account of the fact that the Great North Western office buildings were old and their telegraph lines are almost entirely of iron, while those of the Canadian Pacific Railway are 40 per cent. copper.

The inquiry was resumed in Winnipeg on November 17th, where A. E. Boyle, representing the Board of Trade, urged that any increase which should be granted should be for one year only. Further evidence was also received from the manager of the Canadian Pacific Railway and Great North Western telegraph systems. During the proceedings F. B. Carvell, chairman of the board, said: "If their statements are correct, and unless we find some gross mismanagement, they cannot live another year unless they get relief. It means that the Canadian Pacific Railway Telegraphs must be given the same increase."

NORTHERN MANITOBA MINING DEVELOPMENT

In an address before the Manitoba branch of the Canadian Mining Institute, on November 12th, W. J. Dick, formerly mining engineer of the Commission of Conservation, referred to the possibilities in northern Manitoba. "Manitoba," he said, "has always been considered as an agricultural province. When the north country was added to the 'postage stamp' province, it was not very clear for what reasons it had been acquired. From the geology of this country and the development which has taken place in connection with mineral deposits discovered in the area adjacent to the Hudson Bay railway, and in the Rice Lake district, it might be safely forecasted that upon careful and well considered expenditure of money Manitoba will prove to be one of the most important mineral producers in Canada.

"Practically the whole area recently acquired by the province is underlain with pre-Cambrian rocks, the most important mineral-bearing formation in the world. Very little of this area has ever been prospected at all, and practically none has been prospected in detail. Nevertheless, what has been discovered already has made Canada an important mineral producer. From this it is evident that our north country is an area of great promise, and I believe some day that the value of the mineral products that will be obtained from it will exceed the products of agriculture."

Referring to the investment side, he said: "It is deplorable that in the past the public have been led away by 'get-rich-quick' tales of mining promoters, and, consequently, consider mining investments more or less in the nature of a gamble. The best advice I can give anyone is to buy mining stock only on the strength of reports of thoroughly competent engineers of the highest integrity. In so far as Manitoba is concerned, much can be done to encourage the mineral development of the north country. Every facility should be provided to encourage the prospector and thus help discovery. The services of the geological survey should be used as much as possible. The government should inaugurate a well-planned advertising campaign so that Canadian, American and British investors will have reliable information and engineers should realize that they have a duty to perform in coming before the public and demonstrating their worth so that the public will acquire as a matter of business, the advice of competent mining engineers before investing in mining properties."

At a meeting held in Winnipeg on November 21, the Rice Lake Mine Operators' Association was formed. This association includes the Bellevue, Gold Pan, Angus McDonald Syndicate, Sunshine Gabrielle, Golden Vein, Pan-Extension, J. W. Harris holdings, Marigold, Brooklyn and the Bruce Consolidated properties. The following were elected to the council: J. W. Harris, F. O. Fowler, Col. A. C. Gray, Joseph Myers and Gordon McTavish. These gentlemen will be required to draw up a constitution and by-laws to be submitted at the next meeting of the association.

In describing the objects of the association, Gordon McTavish said: "The object of the meeting is to form an association for the purpose of securing from the Dominion and provincial governments necessary improvements in the way of transportation by water and land, mail facilities, telegraph facilities, appointment of a resident government mining engineer, who would advise as to the development of properties, harbor improvements, and such other matters as might from time to time seem desirable." He pointed out further, that the premier had, at his instigation, sent an engineer, Mr. Campbell, to the district in the fall of 1918, but apparently Mr. Campbell's suggestions had not been acted upon. Also, since 1912, the Dominion government has collected $36,000 in fees, though no part of this has been spent in the betterment of the field. Another object of the association is to minimize the expense to individuals and companies, of transport and freight. It was suggested that the association, when formed, should make arrangements with some of the wholesalers for the establishment of central depots, where necessary non-perishable supplies could be stored in sufficient quantities and sold to the various operators as required.

UNCERTAIN EXCHANGE A TRADE HANDICAP

Country Whose Exchange is at Discount Has an Important Advantage—Postponing Payment to Suit Exchange

"WITHIN the last few months Canadian imports from the United States have decreased and while Canada is still one of the best foreign customers the United States possesses the effect on many industries engaged in the Canada-United States trade is serious enough to demand a remedy," declares Forrest L. Appleby, second agent of the Union Bank of Canada in New York City. Widely known in Canadian banking, Mr. Appleby's discussion of a pertinent topic becomes of increasing interest.

"Fundamentally," continued Mr. Appleby, "the fluctuations in the market rate for Canadian Exchange like all other foreign exchange are affected to the greatest extent by the import and export of merchandise, exaggerated or modified by flotation of loans. If both importers and exporters of merchandise could effect coincidentally their payments, fluctuations would be reduced to a minimum and according to whether on balance, total imports (including capital) from all foreign countries were greater or less than total exports, so would the exchange values of the currency (rate of exchange) of any country depreciate or appreciate in the money markets of foreign countries.

"Speaking specifically of Canadian exchange—for generations past it has been and still is a well-known condition that the value of the Canadian dollar in foreign countries is highest during the fall of each year and lowest during the spring and summer. The reason for this is that Canada is what is known as a seasonal country, that is to say, the bulk of its exports are effected during a well defined season. As the main export commodity is grain, which is harvested and transported through the Great Lakes during the fall (lake navigation usually ceases not later than December 20 and does not reopen until April or May), the rush of exports during the short season accounts for the Canadian dollar being quoted at its highest price during this period of the year.

"Now if only Canadian importers could arrange to pay for their goods at the time when the exporters were receiving payment for theirs and if all government and other borrowings abroad could be so arranged as to bridge over the interval, there would be no fluctuations whatever, but unfortunately each trade has its own fixed customs concerning date of payments of goods sold and worse still does not concern itself in any way with the different dates of payments existing in other trades. Consequently, instead of pooling their interests in an effort to effect a more or less steady rate of exchange the Canadian exporting interests are pulling for a greater discount on the Canadian dollar, while the importing interests are pulling for a smaller one. In other words, it is 'each for himself and the devil take the hindmost.' (This, of course, does not apply to Canada alone.)

Remedy Would Not Suit All Parties

"It is obvious that a remedy proposed for the benefit of the exporter might not be well received by the importers and vice versa; also that to those American business concerns who are so well organized as to be able to take advantage of these conditions no remedy is required. In consequence this is meant chiefly to appeal to those business interests who have suffered loss through the fluctuations in Canadian exchange, together with those far-sighted enough to realize that even if they gain at the moment it is at the expense of their Canadian customers and that some time in the future it will be their turn.

"Therefore in proposing a remedy I start from the admitted base that all uncertainty is a handicap to trade, and just as the merchant insures his goods against loss he should insure for himself the receipt of the full amount of his invoice, while the buyer can and should insure himself against the risk of having to pay an amount greater than he anticipated at the time he purchased the goods. To the American exporter who sells for cash to be paid in New York or Chicago or any other American city there is no risk or loss in exchange which is shouldered by his Canadian customer. His great risk is that of fewer renewal orders.

"As an illustration, assuming (as was the case and will be again) that goods can be manufactured equally well in England, France and the United States and laid down in Canada for $100 United States or its equivalent on a given date, and the price of $100 United States in Canada is $103 Canadian with the chance of its being $105 or $106 before the goods have been resold and the accounts fall due, while the chance is that pounds sterling or francs may only cost $100 or $97 Canadian, the Canadian buyer would actually prefer to buy from England or France.

"The American exporter must be prepared to meet this condition by guaranteeing to his Canadian buyer that his United States dollars shall not cost him more than a certain number of Canadian dollars. To all intents and purposes this is the same as if he sold for payment in Canadian dollars, so that now the two problems become identical. The American exporter cannot guarantee his customer any rate of exchange unless he himself is guaranteed, nor can he be certain how many dollars, United States, he will receive per $100 Canadian unless by some method or other he has contracted with a bank to buy his Canadian dollars at a certain price, delivery to be made at his option over a certain period. This period should be broad enough to cover the times when the accounts fall due and funds in settlement shall have been received. If the unforeseen should happen and the accounts still be unpaid, extension of time of delivery could be made for a very nominal charge or even none at all. A well-equipped bank can accomplish the desired result by many different methods of finance suitable to the various trade customs and also to the needs of the individual firms, but these methods are too numerous and technical to be detailed here.

"With the American importer of Canadian goods the reverse condition exists with an equally varied assortment of remedies. It is beyond the power of any institution to finance all the export and import trade between the United States and Canada; neither as regards rate of exchange is it possible for any bank to satisfy completely both its export and import customers if they match the order of the one against those of the other, but it is possible for a bank in actual contact with the foreign exchange market of the world to provide all its customers with absolute protection against unforeseen loss in exchange by 'bridging over' the period between date of acceptance of the order and that of payment for the goods."

BOOT AND SHOE INDUSTRY INVESTIGATED

After spending two days in making a thorough study of the boot and shoe business, W. H. Price, counsel for the Board of Commerce, decided that before a fair profit could be fixed it would be necessary to investigate the tanning, leather manufacturing and leather jobbing industries. He expressed the opinion that profits of department stores were too large, and that the profit on low-priced goods should be relatively greater than the profit on high-priced goods, so that the purchase of the former would be encouraged by the retailer. He also discovered that the market is under the control of United States firms, who allowed a certain allotment of supplies to go to Canada. Prices of various materials have been going up rapidly. Prices of uppers, for instance, had risen by 127 per cent. between 1913 and 1918, while between 1913 and 1919 the rise had been 338 per cent. Sole leather had increased by 177 per cent. since 1913, while findings had advanced by 109 per cent. Labor costs also had risen sharply, the advance since 1913 amounting to one hundred per cent.

The North American Reindeer Co., capitalized at $750,000, has been granted a concession of 73,750 square miles of land north of the Churchill River for the grazing of caribou and reindeer. The rental, which will be paid to the Dominion government, is one-fourth cent per acre per annum, or $192,000 per annum.

DOMINION FINANCES AT OCTOBER 31

The October financial statement of the Dominion shows that the debt grew to the extent of $35,545,015. During September the increase was nearly sixty-five millions. The net debt now stands at $1,749,331,792. At the close of September, 1918, or one year and one month ago, it stood at $1,224,227,892, or approximately $225,000,000 less than at the end of October, 1919. War expenditures since April 1, the beginning of the Dominion's fiscal year, have aggregated $206,085,707. For the same period last year they were $169,574,417. These figures indicate that the demobilization of the army has been more costly than its maintenance in the field. That this expenditure is rapidly decreasing, however, is indicated in the war expenditures for October alone, a month which witnessed but a small homeward movement of fighting men. For October the expenditure was $22,345,482, while in October, 1918, the war cost the Dominion treasury $66,610,092. It has been estimated that subsequent to the close of the current fiscal year the sum of fifty million dollars will complete the work of demobilization.

For the seven-months period since April 1, revenues have totalled $186,408,794. For the same period last year they were $164,414,136. For October alone revenues amounted to $27,323,234, as compared with $23,431,234 for October, 1918. Ordinary expenditures on the other hand rose from $81,107,824 for the seven-months period in 1918 to $159,049,406 from April 1 to October 31st this year. Expenditures on capital account jumped from approximately nine millons last year to over twenty-four millions this year due to the renewal of activities in connection with the construction of public works, including railways. The following is the official summary:—

PUBLIC DEBT	1919		1919

NEW ISSUE

$1,350,000

King Edward Construction Company, Limited

GUARANTEED 7% CUMULATIVE REDEEMABLE PREFERENCE SHARES

PAR VALUE $100 PER SHARE

Dividends payable half-yearly, May 1st & November 1st. Redeemable at option of the Company at 110 on any dividend date.

THE KING EDWARD CONSTRUCTION COMPANY, LIMITED, has been incorporated for the purpose of constructing an addition to the King Edward Hotel of Toronto, containing 500 Guest Rooms and other increased accommodation, at an estimated cost of $2,350,000. Upon completion of the construction, the building will be leased to the King Edward Hotel Company for a period of 30 years at a rental sufficient to provide all fixed charges, including the dividend of 7% on the Cumulative Preference Stock and 10% on the Common Stock of the Construction Company.

The controlling interest in the Company, represented by 50% of the Common Stock, will be owned by the present King Edward Hotel Company and will continue to be operated under the direction of the United Hotels Company of America, which Company is at present operating sixteen modern fire-proof Hotels in the United States and Canada.

Payment of the 7% Cumulative dividend on this Preference Stock is unconditionally and irrevocably guaranteed by the United Hotels Company of America and The King Edward Hotel Company, Limited.

The security for this Preference Stock is thoroughly adequate, and the earnings to be derived from the operation of the enlarged enterprise, estimated on the results at present being obtained from the existing accommodation of the King Edward Hotel Company, will be amply sufficient to provide for the payment of the dividend on both the Preference and Common Stock of the Company.

PRICE: PAR ($100) PER SHARE.

Carrying a bonus of thirty per cent. in Common Shares.

We recommend the purchase of these shares as an investment.

Complete prospectus and further information will be supplied upon request.

SASKATCHEWAN EXPENDITURE INCREASED

The Province Had More Revenue Last Fiscal Year—Surplus of Assets Over Liabilities is Over $36,619,791

THE balance sheet of the province of Saskatchewan as at April 30th, 1919, included in the public accounts for the fiscal year ended that date, which have just been issued, shows total assets of $69,043,131, including debt allowance of $8,107,500 by the Dominion, and $26,884,978 in the School Lands Trust account. Other items are: Sinking funds, $891,9[illegible]0, public building and lands, $9,717,252; public improvements, $[illegible]; telephone system, $7,857,384; and $2,514,72[illegible] under the administration of the Saskatchewan Farm Loans Act.

The provincial debt, including $1,457,500 of treasury bills outstanding, totals $30,003,670. There are also debentures to the amount of $2,117,240 outstanding, and a bank loan of $[illegible]0,400, under the Farm Loans Act. Assets exceed liabilities by $36,619,791.

Revenue and expenditure for the fiscal year ended April 30th, 1919, compared with the previous year, were as follows:—

Comparative Statement of Revenue

DOMINION BANK DECLARES BONUS

Dominion Bank directors have declared a bonus of 1 per cent., in addition to the regular 3 per cent. quarterly dividend, payable January 2nd to shareholders of record December 20th. Since 1915 the Dominion Bank has been paying 12 per cent. flat.

CANADIAN COUNCIL OF AGRICULTURE

Most of the attention of the annual meeting of the Canadian Council of Agriculture, which was held in Winnipeg, November 11th to 13th, was taken up with political questions. The railroad situation was discussed at some length, however, and the following resolution was passed:—

"Whereas the government of Canada has already acquired the Canadian Northern Railway, and negotiations are under way for the acquisition of the Grand Trunk and Grand Trunk Pacific systems; and whereas it is most desirable that the administration of these government properties be conducted with efficiency, vigor and determination in a desire to develop a profitable business for these railways in behalf of the Canadian taxpayers; be it resolved that a memorandum be presented to the next meeting of the Canadian council of agriculture, setting forth the present state of development in the relationship of the people with the railways of this country."

POST OFFICE SAVINGS BANKS

The statement of post office savings banks for the month of July last, shows that withdrawals exceeded deposits by over $500,000. The balance to the credit of the depositors at the end of the month was $39,070,422 compared with $39,547,520 at the end of the previous month. The following is the statement:—

D		JULY, 1919	Cr.
	$ cts.		$ cts.

Merchants Bank Continues to Gain

Statement for Half-Year Gives Total Assets of $198,506,572. A New Record.

Deposits Gain $30,117,802

The Balance Sheet of the Merchants Bank of Canada as at the end of the half-year period, 31st October last, received from the Bank's headquarters here on Saturday, shows continued gains and growth on the part of this well-known financial institution.

The Total Assets have now reached the commanding figure of $198,506,572, an increase of $32,582,136 over the corresponding date last year. The readily available portion of the Assets amounts to $84,014,965, an increase of $11,566,688, by which is shown that the liquid position of the Bank has been well maintained.

That the Bank has continued to do its full share, both to the Government and the Commercial Community is shown by an increase of $4,682,244 in securities held of the Dominion and Provincial Governments, while Current Loans and Discounts in Canada have increased by $19,435,478 during the 12 months' period.

Note Circulation at $15,827,373 is $647,130 higher than a year ago with the issue in excess of Paid-Up Capital more than covered by a Deposit of $8,000,000 in the Central Gold Reserve.

The Deposits amount to $166,006,015, against $135,888,213 on October 31st, 1918, being an increase for the period of $30,117,802, of which gain $19,368,746 was in Savings or Time Deposits and $10,749,056 in Deposits payable on Demand—a basis of progress which cannot but be considered satisfactory.

The statement altogether makes very good reading for those who realize the important part that our Chartered Banks play in the well-being of the whole country, industrial as well as agricultural, and the figures are especially interesting, as the period covered, with the exception of 11 days, has been after the date of the Armistice and clearly demonstrates that our large and well-managed financial Institutions are continuing their progress and growth on a solid basis with the war a thing of the past.

The main features of the figures of October 31st, 1919, and October 31st, 1918, compare as follows:—

BALANCE SHEET as at 31st October

THE MERCHANTS BANK OF CANADA

Statement to the Dominion Government (condensed) 31st October

INTERPRETATION OF SURETYSHIP BOND

Privy Council Defines Amount Owners Could Pay Without Breaking Bond

ON July 11th, 1919, the Privy Council handed down a judgment in the case of the American Surety Co. vs. Calgary Milling Co., an appeal from the Supreme Court of Alberta, which is interesting in view of the meaning given by their Lordships to certain covenants regarding bonds of suretyship.

The facts of the case as reported in the Dominion Law Reports, briefly, are: The Calgary Milling Co. was in need of a new grain elevator, for the construction of which they entered into a contract with a firm of contractors who agreed to erect the building for $65,000. The following clause was part of the agreement:—"Provided that the total amount so paid by the owner during the progress of the work as aforesaid shall not exceed a sum equal to 80% of the amount of work done and materials furnished on the premises at the contract price. And the contractors hereby agree that the owner shall be and is hereby authorized to retain out of the moneys payable to the contractors under this agreement, the sum of 20% of the amount of the contract and to expend the same in the manner following, namely: To retain such 20% until 31 days after the completion of the works and to pay thereout the claims of all persons who have done work or furnished material in the execution of any part of this contract to or for the contractors and in repairing the said works or finishing any work left unfinished by the contractors." (Clause 14, 2nd paragraph).

The section of the agreement of interest here is section 20 which relates that: "The contractors hereby covenant and agree to furnish to the owner a good and sufficient bond to the satisfaction of the owner in the sum of $30,000 for the faithful performance of this contract conditional to indemnify and save harmless the owner from all suits or actions of every kind and description brought against the owner for or on account of any damages received or sustained by any party or parties by or from contractors or their servants or agents in the construction of the said works or by or in consequence of any negligence regarding the same or by reason of any improper material furnished by the contractors in the construction thereof, or by or on account of any act or omission of the contractors, and further conditioned for the faithful performance and completion of this contract by the contractors."

Contract Not Carried Out

The work was begun and the bond was secured, but shortly afterwards the contractors found it impossible to go on with the work, whereupon the Calgary Milling Co. continued the work, but was forced to spend over $30,000 more than the 20 per cent. of the agreed $65,000 which was in their hands for the completion of the work. Action was brought and the Surety Co. defended themselves by claiming that the conditions of the bond had not been fulfilled. This view was upheld by the trial judge but reversed by the Court of Appeal whereupon this appeal was lodged.

The chief point in question was as to the meaning and application of sections 14 (2nd para.) and 20, supra. The bond required bound the surety (the appellants) to indemnify the obligee (the respondents) against loss in the contract owing to default of the contractors. The material terms of the bond are:—

"Provided however and upon the express condition the performance of each of which shall be a condition precedent to any right of recovery hereon. . . .

"Fourth: that the obligee shall faithfully perform all the terms, covenants and conditions of such contract on the part of the obligee to be performed; and shall retain that proportion, if any, which such contract specifies the obligee shall or may retain of the value of all work performed or materials furnished in the prosecution of such contract (not less, however, in any event, than 10% of such value) until the complete performance by the principal of all the terms, covenants and conditions of said contract on the principal's part to be performed. . . ."

The appellants claimed this condition was broken in two respects, only one of which is of importance here, that being that the respondents infringed the condition as to retaining 20 per cent. out of payments made. In this connection, the respondents asked the appellants by letter the meaning to be read into the said terms regarding the retention of 20 per cent. of the contract price. In their letter they said that the contractors claimed that section 3 of clause 14 of this agreement "binds us to pay them after our acceptance of the bond, 100 per cent. or in full for all paid vouchers produced for work done and material supplied on the building; up to a point where we have paid them 80 per cent. of the contract price or $52,000, after which all payments cease until 31 days after the completion of the contract to our satisfaction, when final payment will be due them. Now it appears to us that the wording of this section of clause 14 is rather ambiguous and you may have interpreted it as binding us to pay them not more than 80 per cent. of the amount of such paid vouchers; up to a point where we will have paid them $52,000, or 80 per cent. of the contract price, after which all payments cease, until they are entitled to their final payment."

In answer the appellants said: "Our company is of opinion that payments to be made to the contractors should be on an 80% basis, that is, 20% of every payment should be retained until the final completion and acceptance of the work."

Acting on this the respondents paid the contractors 80 per cent. of the certified accounts for labor and materials up to and inclusive of November 15, and on November 17 refused to pay a further account presented to them.

Judgment of the Court

Their Lordships' judgment and explanation was delivered in these words:—

"The respondents, therefore, did not infringe the contract if the true construction is that they were entitled to pay till the limit of 80% of the whole contract was reached. On the other hand, if they were only entitled to pay 80% *toties quoties* as the certificates were issued, then, inasmuch as the total amounts paid amounted to 80% of the whole contract price and the whole contract had not been finished, there had not been enough retained. This question depends entirely upon the true construction of the proviso above quoted. Now it is to be observed that the 80% which is to be paid is expressed as a supplement of the 20% which is to be retained. The 20% which is to be retained is expressed as 20% 'of the amount of the contract,' and that necessarily refers to the total price. It would, therefore, seem to follow that the 80% must be based on the same calculation. The other interpretation would necessitate a calculation which would be practically impossible except by a sort of rough and ready guess-work, for it would be necessary for the giver of the certificate to calculate the amount of work done and materials furnished from time to time, 'according to the contract price.' Now the contract here had no schedule prices, and such a calculation would, therefore, be practically impossible according to any reliable standard. In view of these considerations, their Lordships agree with the learned Chief Justice that the proper interpretation of the proviso is to hold that the respondents were entitled to make payments for all work certified as actually done and materials as actually supplied, provided that the total of such payments did not exceed 80% of the total contract price."

The appeal was dismissed with costs.

A seat on the New York Stock Exchange has been sold for $100,000, the largest amount ever paid for membership. The previous record was $96,000.

The Mahon Bond Corporation, of Halifax, N.S., is opening an office in St. John, N.B., which will be under the management of A. G. Shatford, formerly with the Bank of Commerce in that city.

TRADE OF CANADA FOR OCTOBER

An increase of approximately $[illegible],000,000 in the grand total of Canadian trade for the seven months of the fiscal year ending with October, as compared with the same period last year, is shown in the trade statement for October. The total trade for the seven months' period amounted to $1,259,648,371. For the same period last year the total was $1,2[illegible]9,-[illegible]. For October alone, Canada's trade amounted to $205,000,000 as against $207,261,005 in October, 1918.

Exports of domestic produce for the seven months' period reached a total of $688,889,909. For the seven months in 1918 domestic products were sent out of Canada to the value of $720,139,972. For October alone, domestic exports, valued at $109,446,814, were sent out of Canada as compared with $129,554,438 in October, 1918. Agricultural products exported were in first place, being to the value of $214,155,396; animals and animal products, valued at $177,558,247, were in second place, while manufactures of wood and wood products, including paper, held third place with exports to the value of $184,058,827. Imports of dutiable goods for the seven months were to the value of $354,633,741, on which customs collections amounted to $98,016,495. For the seven months' period of 1918, dutiable goods worth $395,856,345 were imported, on which $94,743,530 was collected by way of duty. Free goods to the value of $354,633,741 were imported to the end of October as against $344,217,682 in 1918. The following are the details:—

The application of the Prudential Trust Co. for permission to sell the property of the Superior Brick Co., Fort William, was granted in Toronto on November 13th. The Trust Co. is trustee for a bond issue of $100,000.

Mercantile and residential insurance rates in Welland have been increased by from 5 to 15 per cent. The increases are made because of unsatisfactory facilities for fighting fire.

INDUSTRIAL EVENTS OF THE WEEK

Agreement Between Port Arthur and New Pulp Company—Branch Plants in Ontario—Canadian Trade Fleet on the Pacific

An agreement has been reached regarding the establishment of the Great Lakes Pulp and Paper Co.'s plant at Port Arthur, Ont., and the details will be submitted to the ratepayers for ratification at the January elections. The total outlay by the municipality will be approximately $124,000, and is estimated as follows: Extension of street railway from present limits to site of proposed mills, $102,000; extension of telephone system, $1,000; building of two miles of road, $21,000. The company will erect the first unit of pulp and paper mills, employing not less than 500 men, and the work of clearing and assembling construction material is to start immediately. A groundwork plant and sulphite plant will also be erected. The expenditure on this work will be not less than $1,000,000. A contract will be made with the Hydro to take 12,000 horsepower for the operation of the first unit, which unit, in the case of the company, consists of two paper machines, with a capacity of 33,000 tons of paper annually.

Future developments as guaranteed by the company are as follows: To erect two more units similar to the first, employing a proportionately increased number of men; incidental expenditure by the city, which cannot be charged against the mill, as it would be necessary for urban service with addition to population; purchase of three additional main line cars, to cost $12,000 each, $36,000; purchase of a motor generator set, $16,000.

Branch Plants in Ontario

Announcements have been received of the establishment of a number of branch plants in Ontario. The McClary Manufacturing Co. will build a foundry in London, costing nearly $60,000. The Reliance Manufacturing Co., which has been incorporated with a capital of $500,000, will locate a plant in Bridgeburg, for the manufacture of electrical goods, fuses, etc. The Grosch Felt and Shoe Co., of Milverton, manufacturers of felt shoes, slippers and other felt goods, has purchased the plant formerly occupied by the Stratford Flax Co., at Stratford, and will commence remodeling immediately. A new company has been formed in Kitchener for the purpose of manufacturing gaiters for both men and women, under the name of the Dominion Gaiter Co., and machinery is now being installed. The Eagle Knitting Co., of Hamilton, has leased the old glove factory on Cross St., Dundas, where a branch factory will be opened at once. Waterloo's newest industry, the branch of the Forsyth Co., of Kitchener, manufacturers of shirts, has commenced operations. The company is operating the new factory under the name of the John Forsyth Productions Co., Ltd.

Another new industry has located in Woodstock. Announcement has been made that the Delong Hook and Eye Co., of the United States, would establish a Canadian branch in that city. Already suitable premises have been secured, and operations will begin almost immediately. The concern has had a small establishment at St. Mary's. Steel and wire products, such as hooks and eyes, safety pins, dome fasteners, etc., will be manufactured.

A new lumbering and manufacturing company, known as the Bancroft Lumber and Manufacturing Co., have received a charter as a private company, with head office in Bancroft. The new company intends operating at Paudash Lake on an extensive scale. A large mill with complicated machinery for the manufacture of timber for various purposes is being erected and will be put into running order as quickly as the machinery is installed.

A deal has just been completed whereby Galt secures a new industry. McCaskey Systems, Ltd., of Carlaw Avenue, Toronto, manufacturers of register and professional systems and counter check books, have purchased the plant of the Roelofson Machine Tool Co., on Beverly Street, Galt. The building was erected during the war, the plant being engaged on munitions. The new concern, which will move there in June or July next, will employ 100 hands. The locating of the concern in Galt was brought about by a special committee from the Board of Trade, which conducted negotiations.

The construction of a sawmill of reinforced concrete, something new in the sawmill line in Ontario, has been begun by the lumber firm of Gillies Bros., Ltd., who do business at Braeside, a few miles from Renfrew. The mill, which will have a length of 190 feet and a depth of 73 feet, and look out on the Ottawa River, will have a greater capacity than the one destroyed by fire on June 23rd last.

The Brazil Motors Co., of Brazil, Ind., which is considering the location of an international branch of its motor truck industry in Canada, has not yet decided what town it will select. Welland, Port Colborne, Bridgeburg, and other places are being considered, but no decision has been arrived at. The concern is planning a million-dollar auto plant to handle its products in Canada. Mr. R. Kylie, president of the Lindsay Board of Trade, is in receipt of a letter from an American manufacturing concern which is anxious to locate in Canada. The firm is a large one, and the local executive will make every effort to get the industry to Lindsay. The Nyando Pulp and Paper Co., of Rochester, N.Y., is about to commence operations near Fort William and will shortly open up a large pulpwood camp. The wood will be taken out during the winter and shipped to the mill in the spring. The Nyando Pulp and Paper Co. is the concern which a couple of years ago purchased practically all the timber holdings of Messrs. Hogan Brothers, Fort William, on the Lac de Milles Lacs, said to be one of the finest tracts of spruce in Ontario.

Quebec and Maritime Developments

A new oil company, supplying all grades of oil is now looking for a site to establish one of its branches in Quebec. A woollen carding and spooling mill enterprise is locating at Tourville, near Monk, Que. The name of the new company is the Tourville Worsted Milling Co., Ltd. An industry under the name of the Prince Rupert Cigar Co. will locate in Quebec, Que. The firm is a branch of the Guy and Bourget concern of Montreal, one of the largest tobacco manufacturing companies in the country. The Kenworthy Bros. Co., of Stoughton, Mass., have decided to put their Canadian development in St. Johns, Que. The company specializes in a patented innersole, made of wool, which has been adopted by most of the manufacturers in the United States of rubber footwear.

Breeding fur-bearing animals for their pelts, practically an infant industry in the Dominion, is to be extended by one of the leading French fur dealers, the "Fourrures Roberte," of Biarritz, a resort in the French Pyrenees. Several such ranches or farms exist already in Canada, most of them, however, confined to the breeding of black and silver fox, notably in Prince Edward Island, where the business is conducted on a very large scale, and in Manitoba in the Lac du Bonnet district, where some of the finest specimens of fox are to be found. Mr. R. Chene, president of the French firm, intends establishing a "ranch" or farm in some suitable locality in the province of Quebec, probably at St. Hyacinthe, and later develop the business by organizing similar establishments in other parts of the country.

Announcement has been made that the Nashwaak Pulp and Paper Co. have concluded the purchase of a new pulp and paper mill site at South Devon, N.B. The property involved in the transfer consists of twenty acres located near the mouth of the Nashwaak River, opposite Fredericton, and it is tapped by both the Canadian National and the Canadian Pacific Railways, thus giving unexcelled shipping facilities.

Industry in the West

A factory for the manufacture of ice cream cones will be established in Winnipeg, Man., by E. Dalsandro of Chicago. Messrs. Beatty Bros. Ltd., of Fergus, Ont., manufacturers of barn and farm equipment, are to build a $200,000 warehouse on 109th St., and 103rd Ave., Edmonton, Alta. The company announces that additional branches are to be opened in Vancouver and Regina early next year.

THE SECRET OF SUCCESSFUL SALESMANSHIP
If the salesman has unlimited confidence in the company he represents and in the goods he is offering, it will not take long to communicate that confidence to the prospect. And this applies to Life Insurance more than to any other article. Agents of the Mutual Life of Canada meet with extraordinary success for that simple reason—they devoutly believe in Life Insurance and above all in "Mutual" Life Insurance. The Mutual Life has been conducted for fifty years exclusively in the interests of its policy-holders. The result is an unprecedented demand to-day for Mutual Life Policies. With the Mutual "the secret of successful salesmanship" is simplicity itself—the Agent knows that he has the Company and the Policy that the prospect NEEDS. The rest soon follows.

BE A MUTUALIST.

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

STARTING RIGHT!
Young men—with their careers before them, do well to consider the benefits of Life Insurance.

This is the one investment where a young man has an advantage over his elders. The lower the age, the lower the cost.

There is no better way of saving money—none so certain to prove profitable. A Matured Endowment, for example, has proved the corner stone of many a fortune.

The Great-West Life Assurance Company issues Life Policies on most attractive terms. These Policies are well worth examination—even where there is no immediate intention of insuring. Permit the Company to give you details. State age.

Canadian Trade Fleet on the Pacific

Official confirmation has been given by C. C. Ballantyne, minister of marine for Canada, to the rumor that the Canadian government is about to build a fleet of coasting vessels to operate on the Pacific. In giving confirmation Mr. Ballantyne stated that the government has lately taken over the Canadian National Railway and intends to build up a big merchant marine connecting with the railway terminal at Vancouver, B.C. Tenders will be called for immediately so that construction may begin by January 1st of two steamers for the triangular run between Vancouver, Seattle and Victoria. These vessels will be fifty feet longer and at least three knots faster than the Princess Victoria and Princess Charlotte, now on the route for the Canadian Pacific Railway. The government expects to pay about $1,000,000 each for these vessels. The Princess Charlotte was built in England several years before the war and cost $600,000, and has a speed of about twenty knots.

These vessels will have their terminal at a new government wharf to be constructed in Vancouver. Plans for pier and steamers are being discussed by the minister of marine and the Vancouver Harbor Commissioners who have gone to Ottawa for the conference. The government plans to put new cargo carriers on the Pacific, both to Oriental and Australian ports.

NEW INCORPORATIONS

Howard Smith Paper Mills, Ltd.—Firestone Tire and Rubber Co. of Canada, Ltd.—Benson and Hedges (Canada), Ltd.

The following is a list of companies recently incorporated, with the head office, authorized capital and names of some of the provisional directors:—

DIRECTORS

King Edward Construction Company

FRANK A. DUDLEY, *President*	Niagara Falls, N.Y.
FREDERICK W. ROCKWELL, *Vice-President*	Albany, N.Y.
GEO. H. O'NEIL, *Secretary and Treasurer*	Toronto, Can.
D. M. JOHNSON	New York, N.Y.
ÆMILIUS JARVIS, Banker	Toronto, Can.
STEPHEN HAAS, Director, Union Bank of Canada	Toronto, Can.
HUME BLAKE, Director, Union Bank of Canada.	Toronto, Can.

We summarize a letter from Mr. Frank A. Dudley, President of United Hotels Co. of America, as follows:—

THE KING EDWARD CONSTRUCTION CO.—The King Edward Construction Company has been incorporated for the purpose of constructing an addition to the King Edward Hotel, of Toronto, now in the chain of United Hotels Company of America, and is acquiring the remainder of the block on King Street, Toronto, now occupied in part by The King Edward Hotel Company, Limited, consisting of a tract of land bounded on the north by King Street, on the east by Leader Lane and on the south by Colborne Street, covering in all approximately 16,000 square feet, on which it is proposed to erect a modern, fire-proof hotel building of seventeen stories, having 500 guest and 500 bathrooms, or bath connections.

The estimated cost of Land and Building is $2,350,000; of this $1,000,000 has been arranged for by the issuance of a first mortgage, the balance to be provided from the proceeds of the sale of the Company's shares.

LEASE.—The King Edward Hotel Company has made an agreement with The King Edward Construction Company by which it leases the new addition for a period of 30 years at a rental sufficient to create a sinking fund, the application of which will retire the first mortgage by the end of the lease and pay interest thereon, pay 7% dividend on the Cumulative Preference Stock, 10% on the Common Stock; all taxes, rates, insurance and repairs.

OPERATION.—The control of The King Edward Hotel Company of Toronto was acquired on April 1st, 1918, by the United Hotels Company of America, since which date it has had an unsurpassed success.

PARENT ORGANIZATION.—The United Hotels Company of America, guarantors, control sixteen modern, fire-proof hotels throughout the United States and Canada; the net earnings of which (after interest and depreciation) for the first six months of 1919 WERE $558,639.94. Three of these hotels are in course of construction. It is safe to say that no company operating hotels in North America was ever better organized or equipped than the United Hotels Company of America.

EARNINGS.—It is estimated that the completed hotel can be operated at a 50% increase over the present cost of operation of the King Edward Hotel. The earnings, based on accomplishments to date, would justify an expectation of approximately $500,000 NET PER ANNUM.

PREFERENCE STOCK GUARANTEES AND SAFEGUARDS.—The dividend on the Preference Stock is guaranteed unconditionally and irrevocably both by The King Edward Hotel Company and the United Hotels Company of America, by trust agreement with the Toronto General Trusts Corporation, Trustee.

The application of the Sinking Fund against the outstanding mortgage will wipe it out in thirty years, thereby leaving the entire property as security to the Preference Stock.

The terms of the lease by The King Edward Hotel Company make the dividends and sinking fund payments of The King Edward Construction Company, Limited, a direct obligation of The King Edward Hotel Company, Limited, and therefore payable in priority to dividends on that Company's stocks.

This stock is Preferred both as to Capital and Dividends, the latter being cumulative.

HOTEL ACCOMMODATION.—Toronto with a population exceeding half a million at the present time has less than 500 rooms in fire-proof hotels over 400 of which are in the King Edward. On completion of the new addition there will still be only 1,000 rooms available. This is a smaller percentage than in any other city of its size in America.

Price: Par ($100) per share

Carrying a bonus of thirty per cent. in Common Shares.

Payment may be made as follows: 25% on application; 25% on Feb. 1st, 1920;
25% on Jan. 1st, 1920; 25% on Mar. 1st, 1920.

Subscriptions may be prepaid in full on application or at any time thereafter.

Fractional shares of Common Stock will be adjusted by Æmilius Jarvis & Company, at $60 per share.

Dividends on amounts paid up on Preference Stock commence on date of payment. Interim transferable receipt will be ready for delivery on or about November 15th, exchangeable for Definite Certificate when engraved.

We reserve the right to cancel all subscriptions and return the amounts paid by subscribers with interest at 7% at any time prior to the 1st day of April, 1920.

Application will be made to list the Preference and Common Stock on the Toronto Stock Exchange.

The statements made, as they relate to the profits of the United Hotels Company of America, are compiled from the statements of the Companies' General Auditor, Mr. Charles H. Doherty, and the books and statements of The King Edward Hotel Company, Limited, since incorporation, have been audited by Messrs Æmilius Jarvis & Company, by Messrs. George A. Touche & Company, Chartered Accountants, Toronto.

All legal details, leases and guarantees in connection with this issue have been passed upon for Æmilius Jarvis & Company by Blake, Lash, Anglin & Cassels; for United Hotels Company of America by Starr, Spence, Cooper & Fraser.

Detailed statements of the Companies involved, agreements, guarantees and leases are on file at this office and open to inspection by purchasers of stock.

Send for Prospectus.

Dominion of Canada 5½% (Aug. 1, 1929)	96⅝	96⅞
Russian Govt. Ext. 5½% (Dec. 1, 1921)	36	38
Russian Govt. Ext. 6½% (July 10, 1919)	36	38
Swedish Govt. 6% (June 15, 1939)	93	94
French Cities 6% (Nov. 1, 1934)	..	92½

County of Renfrew, Ont.—Tenders will be called for shortly on an issue of $150,000 5 per cent. 20-year debentures.

Collingwood, Ont.—Tenders will be received until December 5, 1919, for the purchase of $8,650 6 per cent. 10-instalment debentures.

Renfrew, Ont.—The town is calling for new tenders up till December 8, 1919, for the purchase of $17,500 6 per cent. 30-year debentures.

Prescott and Russell Counties, Ont.—Tenders will be received until December 2, 1919, for the purchase of $50,000 6 per cent. 25-year serial bonds.

County of Peterborough, Ont.—Tenders were to be received until November 25 for an issue of $14,000 5½ per cent. 20-year debentures, but the county has decided to call again in about two or three weeks.

Port Colborne, Ont.—Tenders will be received until December 15, 1919, for the purchase of $80,000 5½ per cent. 20-instalment debentures, for school and hydro-electric purposes. (See announcement elsewhere in this issue.)

Walkerville, Ont.—Tenders are being received until December 8, 1919, for the purchase of $13,343 local improvement debentures, bearing interest at 6 per cent., and payable in ten instalments. Tenders will also be received on the same date for the purchase of $50,000 5½ per cent., 30-instalment school debentures. (See announcement elsewhere in this issue.)

Vancouver, B.C.—The Vancouver and District Joint Sewerage Board intend putting on the local market 5 per cent. 40-year bonds at 90. The bonds will be sold to citizens in denominations of $500 and $1,000, and will be ready for sale as soon as they have the signature of the minister of finance. It was pointed out that there had been a number of bids on the bonds already, but many of these were from American parties. It was contended it would be better to sell the bonds to the people of the city.

Debenture Notes

Brandon, Man.—An expenditure of $250,000 will be required for a new hospital.

Dundas, Ont.—A by-law has been passed for borrowing $35,000 for bridge purposes.

Cayuga, Ont.—The ratepayers have passed a by-law to raise $10,000 for good roads.

Galt, Ont.—Ratepayers have voted for the loan of $20,000 to the Perfect Machine Co.

Woodstock, Ont.—A by law will be submitted to the electors to raise $100,000 for sewerage works.

Sandwich, Ont.—Debenture by-laws for a total expenditure of $140,000, were passed by the council last week.

St. Thomas, Ont.—The council has a resolution that the Board of Education be granted $75,000 for a new school.

Cornwallis, Man.—On December 16th electors will vote on a by-law to borrow $100,000 on debentures for the construction and improvement of roads.

St. Andrew's, Man.—A by-law will be submitted to electors on December 16, providing for the construction of roads and other improvements at a cost of $424,728.

Montreal, Que. Notice has been given by Commissioner Mareil of his intention to propose the adoption of a by-law which will authorize the borrowing of $8,000,000, in anticipation of revenue for 1920.

British Columbia.—The following certificates have been issued by the municipal department of the province under date of November 17:—

The City of Armstrong Consolidated School Loan By-law, 1919, No. 66, $25,000, payable October 1st, 1939, with interest at 6 per cent., payable half-yearly.

The Township of Spallumcheen Consolidated School Loan By-law, 1919, No. 222, $25,000, payable October 15th, 1939, with interest at 6 per cent., payable half-yearly.

Saskatchewan.—The Local Government Board has authorized school debentures to the amount of $23,750 and rural telephone debentures to the amount of $46,680. The board has also authorized the issuance of $12,000 7 per cent. 20-year annuity bonds for the town of Govan, and $9,091 6½ per cent. 20-year annuity bonds of Wapella.

Alberta School Districts.—Tenders are being received by the debenture branch of the Department of Education of Alberta for the purchase of $59,400 6½ per cent. 10 and 15-year serial debentures. There are 21 blocks in all.

Windsor, Ont.—Tenders were called for the purchase of $235,502 5½ per cent. bonds, maturing various dates between ten and twenty years by instalments. The following tenders were received:—

W. A. Mackenzie & Co., and Geo. Carruthers & Co.	95.60
National City Co., Ltd.	94.435
A. E. Ames & Co., C. H. Burgess & Co., and R. C. Matthews & Co.	94.43
Wood, Gundy & Co.	94.04

The highest tender would be on a basis of about 6.10, so it was decided to reject the bids, and make another call in the hope of getting cheaper money.

New Brunswick.—Three bids were received on the issue of $2,282,000 5½ per cent. 10-year province of New Brunswick bonds, the highest being from the syndicate comprising the Bank of Nova Scotia, R. A. Daly and Co. and W. A. Mackenzie and Co., at 96.11, which is on a basis of about 6.05 per cent. The following are the other tenders: Wood, Gundy and Co., Dominion Securities Corporation, A. E. Ames and Co., of Toronto, J. M. Robinson and Sons, Eastern Securities Co., Ltd., St. John, N.B. 95.34; Harris, Forbes and Co., Montreal, Guaranty Trust Co. and National City Co., New York, 95.80. The bonds are in denominations of $1,000 with coupons attached. Principle and interest will be payable in gold at the office of the provincial secretary-treasurer, Fredericton, N.B., or at the Bank of Montreal in St. John, Montreal or Toronto, or at the agency of the Bank of Montreal in the city of New York, at the option of the holder.

Bond Sales

County of Halton, Ont.—Messrs. Brent, Noxon and Co. have purchased a block of $30,000 bonds on a 5⅞ per cent. basis. Other tenders received were: MacNeill, Graham and Co., 96.23; A. E. Ames and Co., 95.46; Wood, Gundy and Co., 95.28, and R. C. Matthews and Co., 94.75. The money is to be spent on a bridge.

Toronto, Ont.—A syndicate, comprising the National City Co., Ltd., Harris, Forbes and Co., and the United Financial Corporation, has been awarded the city's issue of $2,632,000 5½ per cent. bonds, at 96.201, in Toronto funds. The bonds are for various purposes, and are due 1920-49, the approximate average of maturity of the whole being about 14 years. On this basis, the city paid about 5.90 for its money. In all five bids were submitted. They are as follows:—

National City Co., Harris, Forbes & Co. and the United Financial Corp. (Toronto funds)	96.201
A. E. Ames & Co., Wood, Gundy & Co. and Dominion Securities Corp. (Toronto funds)	95.08
W. A. Mackenzie & Co., Toronto, Continental and Commercial Trust & Savings Co., First Trust and Savings Bank, Illinois Trust and Savings Co., Merchants Loan & Trust Co., all of Chicago (Toronto funds)	94.701
A. Jarvis & Co. (New York funds)	88.89

Messrs. Hornblower and Weeks, Boston, bid $497,600 on one block of $500,000 under one by-law.

Saskatchewan.—The following is a list of sales reported from November 1 to November 15:—

School Districts.—Avebury, $2,800, Kilton Hill, $3,350, Meadow Ville, $3,000, Carnagh, $3,000, Carlton Siding, $4,700, Woodlight, $4,600, Snow Bird, $3,000, North Bench, $3,500, Lewiswyn, $5,000, Hardscrabble, $2,400, Brancepeth, $4,000; Waterman-Waterbury Manufacturing Co., Regina. Chatsworth, $700; W. S. Middlebro, Owen Sound. Kimball, $1,100; Peter Abrams.

Rural Telephone Companies.—Rhein, $7,700, Hoey, $17,000, Tribune, $22,300, Tribune, N.W., $13,900; Harris, Read and Co., Regina. Silton, N.W., $3,450, Meskanaw, $2,350, Wartime, $7,800; W. L. McKinnon and Co., Regina. Atwater, $2,850; Harry A. Crosswell, Atwater. Invermay, $23,100; R. Berwick, Ltd., Regina. Pleasantdale, $16,750; Goldman and Co., Regina. Gilead, $2,850; W. S. Channel, Regina. Blackley, $2,400; A. L. Koyl and Co., Saskatoon. Starrs' Point, $2,500; T. R. Billett and Co., Toronto. Juniata, $1,300; Nay and James, Regina. Big Butte, $75; Regina Public School Sinking Fund Trustees. Big Butte, $125; Town of Biggar Sinking Fund Trustees. Glen Mary, $20,000; H. J. Birkett and Co., Toronto.

Rural Municipality.—Progress, $3,000; Regina Sinking Fund Trustees.

City.—Moose Jaw, $40,000, $13,000.

ANNOUNCEMENT

Bankers Bond Company

NEWS OF MUNICIPAL FINANCE

Wetaskiwin Financial Difficulties—Regina Utilities Show Deficit—Moose Jaw Finances in Good Shape

Niagara Falls, Ont.—The Hydro Commission appealed at the Court of Revision, held at Niagara Falls last week, against its assessment on other than land values on the Ontario Power Company plant. It asked for exemption from taxation from all except land values. The appeal was disallowed.

Montreal, Que.—The city will apply to the provincial legislature at the next session for certain amendments to its charter, included amongst which are the following matters: Sale of immovables for taxes; taxes for local improvements, pavings and sidewalks; annual budget; taxes on public utility companies; taxation system; debentures, bonds or registered stock of the city placed in its sinking fund.

London, Ont.—A statement just issued by the London and Port Stanley Railway Commission shows that operating expenses for the years 1916, 1917, 1918 and 1919 were $180,000, $2 7,356, $223,389 and $207,815, respectively. For the same years the pay-rolls were $102,633, $142,984, $147,769 and $199,697. The gross incomes for the four years were $100,438, $109,329, $114,254 and $118,915. The total surplus for the four years of operation was $99,612.

New Westminster, B.C.—Alderman Johnston, chairman of the finance committee, has submitted a statement in connection with tax receipts. This statement records a total collection of $385,384, made up as follows: Land tax, $322,775; local improvement, $62,609. This is an increase of $45,000 over the same period of last year, the increase being $25,000 on land and $20,000 on local improvement. Alderman Johnston reported that the city sold $450,000 debentures for $462,610, and that this sum was then invested in Victory bonds of the 15-year term.

Wetaskiwin, Alta.—The town has applied to the Alberta Finances Commission for advice as to how to secure an extension of time for the payment of the municipal debt. The Alberta Finances Commission is the body charged with the administration of the Act passed at the last session of the Legislature to assist municipalities which are in financial difficulty. As a result of Wetaskiwin's application, the interested bond dealers and bond holders held a meeting in Toronto on November 19th, and further meetings this week, to discuss their position. At the latter meetings, Mr. Nash, who is secretary of the commission, was present.

Moose Jaw, Sask.—The financial statement of the city for the first ten months of the year has just been issued. The report shows excess revenue over expenditure of $125,119, revenue amounting to $1,072,389, and expenditure to $947,270. The balance sheet shows that total assets are $8,490,938, and total liabilities, $5,990,232, a surplus of $2,500,705. Tax collections were $568,986, and tax arrears $595,783. The tax rate this year is 22.8 mills.

The net debt of the city at 31st October was $5,129,571 as compared with $5,107,296 at the same period last year. The only debentures sold during the year were a $10,000 issue for the Children's Home to the sinking fund trustees, and a $206,000 issue for electric and power extensions to Messrs. Wood, Gundy and Co.

The sinking fund, for the purpose of redeeming the debenture debt of the city, has increased from $654,273 to $832,920. Since 1914 moneys were only paid into the sinking fund as the taxes were collected, but this year the city borrowed money from its bankers in order, as far as possible, to bring sinking fund payments up to date, and the city is only behind in its payments the sum of $1,651, and as an offset to this the surplus earnings in the sinking fund amount to $65,371.

Regina, Sask.—The financial report of the city has just been issued by the city commissioners for the ten months ended October 31st, 1919. The statement of assessment is given as follows: Realty, $42,858,650; improvements, $7,948,970; business and income, $4,596,280; property exemptions, $13,981,510; taxable assessment, $41,422,390; total assessment, $55,403,900. The bonded debt at October 31st was $10,917,324 and the debt per capita $296.75. Debentures authorized and unissued amounted to $114,084.

The total tax levy for the year is $1,433,575, exclusive of local improvement taxes, and is made up as follows: General levy, $898,905; public schools, $350,851; separate schools, $39,149; collegiate, $61,773; public library, $22,650; public revenue tax, $62,247. The general or municipal levy includes provision of $99,522 for the deficit of 1918.

A further statement which follows shows the arrears of taxes to date, including school taxes, etc. The item for 1918 taxes, $222,291, will be reduced below $30,000 by the tax sale being held this month. The statement also includes $765,928 current taxes not yet paid. Of the total amount $1,243,697, the sum of $442,569 is in respect to schools and other outside authorities.

The statement of general revenue and expense of the city for the ten months ending October 31st last shows a deficit of $28,438, including the utilities deficit of $7,708. The actual expenditure for the ten months was $780,591 compared with the estimate of $757,210 and the estimate of $908,652 for the whole year. Actual revenue totalled $752,153, compared with the estimate of $746,125. It was estimated that there would be a utilities surplus of $11,084.

The amount to the credit of the sinking fund is as follows:—

On deposit in Bank of Montreal October 31st....	$ 113,789
Balance of 1919 levy due by city of Regina as of October 31st, 1919	47,655
Investments—Book value	1,659,142
Interest accrued on investment	59,324
	$1,879,910

Montreal, Que.—Taxpayers of the city will be called upon to provide over $20,000,000 for administration and the payment of interest on its debt during the coming year. The actual figure as given out is $20,850,999 as compared with $18,944,850 last year. The taxes that they will impose, however, to raise this sum will not be any greater than they were last year, with the exception that the charge for snow removal on sidewalks has been increased from seven cents to ten cents per lineal foot of property facing on the sidewalk that is maintained. The realty tax will remain at $1.35 for the city generally, except for Maisonneuve, where the tax is $2.50, as fixed by the charter for a period of fifteen years. The two special taxes of 25 cents each which were formerly imposed on Maisonneuve were removed by the Legislature at the last session, but, despite this loss of a 50-cent tax, the commission have been able, by economies effected in various departments and by the increase in the assessable value of the city, to make both ends practically meet with the same tax as last year. Their estimated revenue for 1920 is $20,504,173, which leaves a deficit of $346,826, but it is anticipated that this deficit will be covered by the supplementary budget made up of arrears of revenue received after the close of the civic financial year.

The general summary of the budget provides for the payment of $6,985,296 for interest on the city debt, an increase of $63,487 over the total provided for the current year. The school tax is also considerably increased, the figure being $4,552,278, an addition of $571,087 over the present revenue collected by the city and handed over to the school commissions. The estimate for the reserve fund is $615,125, an increase of $46,780 over the current year. The possible losses in collection of revenue is put at $160,000, which is $10,000 more than for the present year.

The new taxes that it is proposed to impose in addition to the realty tax are a surtax of 1 per cent. on water companies' property and 5 per cent. on other public utility companies, 10 cents per lineal foot for snow removal on sidewalks, 8½ per cent. business tax, 6 per cent. water tax, and a variety of licenses and permits, the same as last year. Before the budget comes to the city council in detail, the commission will probably issue a statement showing the economies that have been effected during the past year, and how the money has had to be expended in increased wages and cost of materials and other expenses incurred for the better administration of the city.

INVESTMENTS AND THE MARKET

Howard Smith Paper Increasing Capital—K. and S. Fire Stock Offering—British Interest in Dominion Steel—Canadian Car Co. Presents Satisfactory Report

Western Canada Flour Mills Co., Ltd.—The announcement has been made of n 10 per cent. bonus in Victory bonds to shareholders in addition to the regular 8 per cent. dividend. The new bonus will be to shareholders of record of November 1st.

Federal Zinc and Lead Co., Ltd.—An offering is being made of an issue of $500,000 treasury stock at $4 per share, the par value being $5 per share. The authorized capital of the company is $3,000,000. The issue is for the purpose of completing the equipment of the company's property for mining, miling and smelting, and to provide transportation facilities between the company's mines and the nearest town with rail and water facilities for shipping its products. No portion of the proceeds will be used to defray the expenses of the development work to date, which is now advanced to the point where commercial production only awaits the equipment named above.

Howard Smith Paper Mills, Ltd.—Shareholders of the company are in receipt of circular stating that the directors of the company decided at a recent meeting to increase the common stock capitalization of the enterprise from the present total of $1,162,500 to $1,250,000. The additional $87,500 par value of the stock is offered at par to shareholders of record of November 29th next in the proportion of one share of new for every 13 2-7 shares of old stock held. Fractional shares will not be issued, subscriptions for full shares only being accepted. The right to subscribe for the new shares will expire at the close of business on December 13th next, with payment in full a week later.

The Toronto Paper Co., recently acquired by the Howard Smith company, has a sulphite mill of 20 tons per day capacity. This is being increased by the new owners to 30 tons per day. The same interests, it is understood, have also acquired valuable timber limits, with sawmills, etc., containing over 500,000 cords of pulpwood, or sufficient to supply the company's needs for over twenty years. These valuable acquisitions make the company self-contained. The capacity of the combined companies is now 154,000 pounds per day of writing, book and ledger papers.

K. and S. Tire and Rubber Goods, Ltd.—An offering of $500.000 7 per cent. cumulative participating preferred shares of the company is being made by a Toronto syndicate, comprising Richardson, Sheppard and Thorburn, Ltd., Reiner, Walsh and Co., Campbell, Thompson and Co. and the Federal Finance Corporation, Ltd., at par. With each 7 per cent. share the purchaser will receive a bonus of one share of common stock.

The gross sales of the company have shown a marked increase each year. In 1915 they amounted to $160,000, and in 1918 to $593,000, and for 1919 are estimated at $1,000,000. For the first six months of 1919 the gross sales were $586,000, and, it is estimated, will be over $1,000,000 for the year. With the additional plant in operation it is estimated that the gross sales shall be in the neighborhood of $1,600,000 for the year 1920, and over $3,000,000 in 1921. The business offering for this company's products has been so great that they have not been able to fill the demand.

The net earnings of the company for the year ending December 31st, 1918, were $85,245.91; for the first six months of 1919, $75,080.57, and it is estimated for the year 1919 should exceed $135,000. With the new additional plant in operation it is estimated that the net earnings of the new company for the year 1920 should be $225.000, and for the year 1921 over $400.000.

Canadian Car and Foundry Co., Ltd.—The report of the company which has just been mailed to shareholders shows profits of $1,887,684, as compared with $3,252,609 for the previous year. The following is a comparative statement of the profit and loss:—

	1918-19.	1917-18.
Combined profits	$2,993,471	$4,617,391
Deduct	568,718	711,563
Profits before interest	2,414,752	3,905,827
Bond interest	493,910	507,305
Interest on bank loans	43,207	145,913
Year's profits subject to government tax	1,887,635	3,252,609
Dividends on preferred stock	656,250	262,500
Surplus after deductions shown	1,231,385	2,990,109
Previous surplus	5,830,172	2,840,063
Total surplus subject to government tax	7,061,556	5,830,172

The result of the year's business was to increase the working capital of the company from $9,109,964 to $10,363,976, representing an improvement of $1,344,012.

In his report to shareholders, Mr. W. W. Butler said: "After charging earnings with the cost of maintenance of all plants as well as the customary depreciation, and after making due provision for contingencies of the nature of bad debts, rebuilding furnaces, etc., also writing down inventories held at war time prices, to present market basis, there remains a profit of $1,887,634. Having regard especially to the fact that the year under review represents a transition period—from war to peace—your directors consider that the results are satisfactory.

"Reference was made in the last report to the adjustment of certain claims in connection with the Russian shell contracts. Since then, further adjustments have been made to the extent that settlement of this particular matter has been considerably advanced.

"So far as the orders situation is concerned, the company has orders on hand which will carry it into next year, but, as might be expected, the outlook is somewhat uncertain. Your directors, however, are hopeful of securing enough business to insure a reasonably full operation of the main plants over the next fiscal year.

"Your directors have to point out that payment of the dividends in question must be dictated entirely by the conditions confronting your undertakings from time to time. They are of the opinion that it is most necessary, especially in these times, to pursue a conservative policy, particularly having in mind that war taxes are as yet undetermined and unpaid, and that periods may have to be faced in which business may be more or less scanty, and during which the cash resources of the company may have to be drawn upon."

Dominion Steel Corporation.—Confirmation to the report last week that the Dominion Iron and Steel Co. will sell to a London syndicate composed of prominent British financial and business men 50,000 shares of the common stock of the Steel corporation was given by Col. Grant Morden in London, Eng., this week. The shares are to be new stock which the Iron and Steel Co. will acquire from the parent corporation, and will not affect in any manner the 50,000 shares which are held by the subsidiary company in its treasury. The price to be paid is $70 per share.

Col. Morden is coming to Canada himself next month, bringing engineering experts with him to advise concerning reconstruction of the company. He stated that ten to fifteen million dollars is required to put the plant straight, and, with the financial backing now secured, the company has a bright future before it.

Names mentioned in connection with the deal are: Viccount Furness, Sir Wm. Beardmore, Sir Trevor Dawson, Sir H. McGowan, Benjamin Talbot and Henry Steel, chairman of the United Steel Companies, of Sheffield.

It is stated authoritatively that the purchase of the Dominion Steel Co. is merely the first operation in a series of widespread amalgamations in Canada involving companies with a total capitalization in the neighborhood of $400,000,000. Coal, steel, shipbuilding and shipping companies are included, each feeding the business of the rest. Most of the new capital is provided by British financial men, who investigated the possibilities during the past six months, and who are now entering the project prepared to make the industry one of the biggest on the American continent.

ADDITIONAL INFORMATION CONCERNING FIRES

Griswold, Man.—November 9—Dwelling and physician's office, owned by Dr. F. K. Purdie, were destroyed. Loss on building, $2,000; on contents, $4,000. Insurance in British Northwestern on building, $1,500, and contents, $500. Cause, presumably furnace. Hotel owned and occupied by Mrs. M. Shepard. Loss on building, $12,000; on contents, $2,500. Insurance on building: Alliance, $2,000; Guardian, $2,000; Royal, $2,000. On contents, British Northwestern, $2,000. Cause, spread from Dr. Purdie's building.

Nelson, B.C.—November 3—Garage and transfer building of the Nelson Transfer Co. were damaged. Estimated loss, $9,500. Insurance was carried to the amount of $6,500 as follows: Royal, $2,000; London Guarantee and Accident, $1,000; North American, $1,500; North British and Mercantile, $1,000; Continental Insurance Co., $1,000.

Toronto, Ont.—November 16—The stock of Thomas Claxton, Ltd., 251 Yonge Street, was damaged to the amount of $11,000. Insurance was carried to the amount of $18,000 as follows: Liverpool, London and Globe, $3,500; Insurance Co. of the State of Pennsylvania, $5,000; Yorkshire Insurance Co., $5,000; Connecticut Fire Insurance Co., $2,500; Mercantile Fire Insurance Co., $2,000. A statement has not yet been received of the loss and insurance on the building, which is owned by the National Trust Co.

KING EDWARD CONSTRUCTION CO., LTD.

As recently announced, a seventeen-story addition is being made to the King Edward Hotel, Toronto. This addition will cost about $2,350,000, and will be financed through an independent company, the King Edward Construction Co., Ltd., which has just been incorporated. This company will erect the addition and lease it to the King Edward Hotel Co., for 30 years, at a rental sufficient to pay fixed charges, 7 per cent. on the preference stock, and 10 per cent. on the common stock of the construction company. It will be controlled by the King Edward Hotel Co. The guaranteed 7 per cent. accumulative, redeemable preference shares of the construction company are now being offered at par, with a bonus of 30 per cent. in common shares by Toronto houses; details appear elsewhere in this issue.

The amount of preference stock being placed upon the market is $1,350,000, the balance of $1,000,000 necessary for the work having been raised by mortgage. The preference stock, in addition to being guaranteed by the King Edward Hotel Co., is also guaranteed by the United Hotels Co., which controls sixteen large hotels in the United States and Canada, including the King Edward. It has been announced that the Canadian Pacific Railway has subscribed for $75,000 of the preference stock.

Bank Statements Show Business Growth

Current Loans, Demand Deposits and Circulation All Increase Substantially — Victory Loan Payments Cause Falling Off in Savings Deposits—Loans to Municipalities Are Also Cut Down — Capital and Reserves Still Further Increased

	October, 1918.	September, 1919.	October, 1919.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$ 644,220,998	$ 650,743,015	$ 705,280,241	+ 9.5	+ 8.5
Deposits after notice	1,076,514,627	1,277,437,715	1,262,746,984	+ 17.3	— 1.2
Current loans in Canada	1,003,593,603	1,058,572,202	1,104,940,160	+ 10.1	+ 4.4
Current loans elsewhere	112,869,399	151,814,511	160,713,386	+ 42.9	+ 5.9
Loans to municipalities	46,275,106	57,033,309	56,116,897	+ 21.8	— 1.8
Call loans in Canada	73,685,136	96,912,709	100,549,390	+ 36.9	+ 4.0
Call loans elsewhere	157,040,858	169,532,489	158,194,085	+ .6	— 6.5
Circulation	232,438,622	229,532,356	242,509,573	+ 4.3	+ 5.7

The above are the principal changes shown by the Finance Department's summary of statements of chartered banks as at October 31st, the most notable change being the increase in current loans, accompanied by the increase in demand deposits and in circulation, for the month. The peak of savings deposits was probably reached about October 25th, before the Victory Loan campaign. Considerable withdrawals were made during the first week of the campaign, and the total savings deposits on October 31st were less than at the end of September, by $15,000,000. Advances to municipalities also show a seasonal falling off, as tax payments came in in large volume in October, and permanent financing was well completed up to date.

Several changes are shown in the banks' capital and reserves, compared with September, as follows:—

	Capital subscribed.	Capital paid up.	Reserve.
Merchants	$195,500	$204,770	....
Provincial	....	16,905	....
Union	329,300	344,410	$206,646
Royal	3,700	52,510	26,255
Hamilton	.....	5,820	2,910
Sterling	.....	648	.....
Totals	$528,500	$625,063	$235,811

The following comparison shows the changes in deposits in Canada over a period of one year:—

	Deposits payable on demand.	Deposits payable after notice.
1918—October	$644,220,998	$1,076,514,627
November	666,366,359	939,329,271
December	711,034,060	958,473,557
1919—January	623,919,410	990,000,085
February	566,775,434	1,018,184,512
March	566,797,268	1,037,851,766
April	571,412,857	1,070,985,080
May	568,730,118	1,107,983,072
June	605,927,027	1,139,569,570
July	584,176,765	1,175,092,155
August	584,300,855	1,196,632,931
September	650,743,015	1,277,437,715
October	705,280,241	1,262,746,984

While the savings deposits have fallen off, demand deposits and total deposits have made a record. The course of the deposits account during the past six years is shown in the following table:—

October.	On demand.	After notice.	Total.
1914	$348,732,830	$ 659,806,682	$1,008,539,512
1915	392,042,193	701,336,850	1,093,379,043
1916	489,230,234	814,297,404	1,303,527,638
1917	495,058,449	985,790,850	1,480,849,299
1918	644,220,998	1,076,514,627	1,720,735,625
1919	705,280,241	1,262,746,984	1,968,027,225

Balances due to the Dominion government show an increase of $11,000,000, probably a result of transfers on Victory Loan account. Those due to the provinces, on the other hand, were down by $3,500,000. Among the other liabilities, balances due to banks in the United Kingdom decreased by about $1,700,000, those due to banks elsewhere increased by about $1,300,000, and acceptances under letters of credit increased by $8,000,000.

In the assets statement, the following changes are shown for the month in the holdings of coin and Dominion notes:—

Gold and sub. coin in Canada	—	$159,527
" " " " elsewhere	—	329,025
" " " " Total	—	506,554
Dominion notes in Canada	—	642,335
" " elsewhere	+	1,477
" " Total	—	627,380

Holdings of notes of other banks show a decrease of over $2.500,000, and holdings of checks an increase of $9,000,000. War loan payments are in part responsible for the latter. Further financing of the Dominion government is reflected in the holdings of securities of the Dominion and provincial governments, which were $38,000,000 more at the end of October than at the end of September. Call loans in Canada are increased by over $3,000,000, but those elsewhere fell by $11,000,000. The following table shows the course of principal loan accounts in recent years:—

October.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1914	$ 816,623,852	$ 42,040,716	$ 70,201.939	$ 81,201,671
1915	780,785,754	49.612.985	74,574,270	120,681,624
1916	774,928,222	79,459,621	90,412,023	189,346,216

LIFE INSURANCE PRESIDENTS' ASSOCIATION

Sir Henry Drayton Outlines Some Canadian Reconstruction Problems—Investment Side of Life Insurance Emphasized

THE thirteenth annual convention of the Association of Life Insurance Presidents was held in New York, December 4th and 5th. The chairman was William W. McClench, president of the Massachusetts Mutual Life Insurance Co., and the subject of his opening address was, "The Part of Life Insurance in the Problems of Reconstruction." Sir Henry Drayton, Canadian Minister of Finance, addressed the convention on "Some Canadian Reconstruction Problems." The great increase in the amount of the business written was emphasized, and investment problems were also dealt with at considerable length.

Other addresses on the program were as follows: "Mental vs. Material Reconstruction," by Nicholas Murray Butler, LL.D., president, Columbia University, New York; "Good Health and Good Government," by Watson S. Rankin, M.D., president, American Public Health Association; "Are Public Utilities a Real Utility?" by General G. E. Tripp, chairman of board of directors, Westinghouse Electric and Manufacturing Co.; "The Significance of the Increasing Volume of Life Insurance," by Hon. William A. Day, president, Equitable Life Assurance Society; "An Efficient Transportation Machine a National Necessity," by Mr. Howard Eliott, president, Northern Pacific Railway Co.; address by Hon. Atlee Pomerene, United States Senator from Ohio; "The Problem of Housing the American People," by Mr. Frederick H. Eckler, vice-president, Metropolitan Life Insurance Co.; "Departmental Attitude Toward Readjustment Problems," by Hon. Joseph G. Brown, president, National Convention of Insurance Commissioners; "Protecting the Public by Informing the Investor," by Hon. Huston Thompson, Federal Trade Commissioner. Washington.

* * *

R. B. Holden and Co., brokers, of Toronto, announce new wire connections with New York by which all their transactions in New York stocks, bonds, and cotton will be placed through the New York stock exchange firm of Hentz and Co.

PERSONAL NOTES

Mr. Paul F. Sise has been elected to the presidency of the Northern Electric Company, Limited, succeeding Mr. E. F. Sise.

Mr. H. Gurney, president of the Gurney Foundry Company, Toronto, has been appointed to the directorate of the North American Life Insurance Company.

Mr. Roger E. Owen, general manager of the Commercial Union Assurance Company, has returned to England after staying on this side of the Atlantic for some time.

Major-General Sir David Watson, Col. D. M. Robertson (of Toronto) and **Hon. Frank Carroll**, M.C.L., LL.D., have recently been added to the directorate of the Prudential Trust Company.

Mr. A. E. Boyle has tendered his resignation as secretary of the civics', retail trade and wholesale trade bureaus of the Winnipeg Board of Trade, the designation to take effect December 31st.

A. E. Ham, vice-president of the Union Casualty Company of Winnipeg, and formerly superintendent of insurance for Manitoba, was in Toronto and other Ontario points this week in connection with the business of the company.

Mr. Lionel H. Clarke, chairman of the Harbor Commission of Toronto, has been sworn in as Lieutenant-Governor of Ontario, and has now assumed his duties. He succeeds Sir John Hendrie whose term of office has expired.

Mr. Judson G. Lee, for the past ten years chief agent for Quebec province for the General Accident, Fire and Life Insurance Company, has been appointed branch manager at Montreal for the General Accident Assurance Company of Canada. He still retains the former agency.

Sir Alfred Smithers, chairman of the Grand Trunk board of directors, left for England last week. He will present to the directors and shareholders of the company his report regarding the negotiations with the government for the taking over of the system.

Mr. G. T. Milne, who has been senior British trade commissioner in Canada and Newfoundland during the last eighteen months, has been transferred to the commercial diplomatic service of the Imperial government, and has left for Havana to take up his duties as secretary of the British legation there.

Mr. Robert Fleming, C.E., formerly of Aberdeen, Scotland, has joined the firm of J. and L. M. Wood, Toronto which will be continued under the name of Wood, Fleming and Company, the partners being L. M. Wood, Robert Fleming and T. C. Wood. Mr. Fleming, who has been in Canada for some years, is a son of Sir John Fleming of Aberdeen.

Sir Hormisdas Laporte has been appointed to fill the vacancy on the advisory board of the Gresham Life Assurance Society, Limited, and on the board of the Dominion Gresham Guarantee and Casualty Company, owing to the absence from Canada of Sir Herbert Ames, who is now filling an important position in connection with the League of Nations.

Mr. William Baird, general agent of the Canadian Pacific Steamship Service in Liverpool, Eng., has been appointed general passenger agent for Europe, to succeed E. T. Stebbing, passenger manager, who, with C. E. Benjamin and H. B. Beaumont, are returning to Montreal on the Empress of France. Mr. Beaumont, after two years' war work in London, is returning to the general passenger agency in Montreal.

Mr. M. J. Butler, managing director of Armstrong and Whitworth of Canada, Montreal, has retired from active work, and is now living in Oakville, Ont. Mr. Butler was Deputy Minister and Chief Engineer of the Department of Railways and Canals for Ontario, from 1905 to 1910, when he resigned to become second vice-president and general manager of the Dominion Steel Corporation. In 1912 Mr. Butler left Nova Scotia to organize a Canadian branch of Armstrong and Whitworth.

Mr. E. W. Kneeland, of Winnipeg, has been elected to the directorate of the Merchants Bank of Canada. Mr. Kneeland, who is a naturalized Canadian subject, having been born in the United States of Canadian parentage some 50 years ago, has devoted his whole life to the development of the grain business in the United States and Canada. He is now general manager of the British American Elevator Company, vice-president, Port Arthur Elevator Company, vice-president, Saskatchewan Elevator Company and Liberty Grain Company. He is a director of the National Elevator Company, Home Grain Company, Grain and Produce Exchange, Traders Building Association, Canadian Bond and Mortgage Company, all of Winnipeg, and a member of the Winnipeg Grain Exchange.

OBITUARIES

Mr. C. Wahlroth, manager of the casualty department of the Toronto office of the United States Fidelity and Guarantee Company, died last week.

Mr. Benjamin Hollinger, discoverer of the Hollinger mines at Cobalt, Ont., and one of Canada's most famous prospectors and mining magnates, died suddenly last week at his home in Pembroke, Ont.

Col. Geo. A. Stimson, a well-known Toronto bond dealer, died suddenly on December 4th at his home on St. George Street. He was many years ago officer commanding the Grenadiers, and has been interested in military affairs all his life. The firm of G. A. Stimson and Company was one of the first to handle municipal securities in Canada.

INSURANCE LICENSES ISSUED

The Occidental Fire Insurance Co. has been licensed to transact in Canada the business of automobile insurance, in addition to fire insurance, for which it is already licensed.

The American Equitable Assurance Co., of New York, has been licensed to transact the business of fire insurance in the province of Quebec.

The St. Roch-d'Orford Parish Mutual Fire Insurance Co. has been licensed to transact the business of mutual fire insurance in the province of Quebec.

The Northern Assurance Co., Ltd., has been licensed to transact in the province of British Columbia the business of guarantee and plate-glass insurance, in addition to marine accident, sickness and automobile insurance.

The Monarch Fire Insurance Co. (cash, mutual and stock), of Toronto, has been licensed to transact the business of fire insurance in the province of Quebec.

The London and Lancashire Life and General Assurance Association, Ltd., which has been licensed to transact the business of life insurance in the province of Quebec, has changed its name to the London and Scottish Assurance Corporation, Ltd.

The London and Lancashire Guarantee and Accident Company of Canada, has been licensed to transact in the province of British Columbia, the business of insurance of automobiles against fire. The provincial head office is to be at Vancouver.

LIFE UNDERWRITERS' MEMBERSHIP CAMPAIGN

Final plans for a Dominion-wide membership campaign will be completed at a meeting of the executive of the Life Underwriters' Association of Canada, to be held on Monday, December 8th. The present membership of the association is over 2,400, having increased by about 1,000 during the past year, and efforts will be made to secure at least 1,000 more members. The large volume of business has attracted many new agents into the field, and a large proportion of agents are still outside the association.

BUSINESS DEPRESSION ON THE HORIZON

THE downward tendency on the stock exchanges is the most significant economic event since the signing of the armistice. Just three weeks ago stocks on the New York exchange broke to a greater extent than at any other time in recent years. Those on other markets, including the Canadian exchanges, followed, though declines were less marked because dealings on these exchanges are less speculative. That this downward movement was not due to any temporary cause is proved by further breaks which have taken place, some stocks making successively low levels. In fact the market seems ready to respond quickly to any bad news, while good reports cause little or no reaction. During the past few days the bond market in the United States has also started downward, Liberty bonds being offered in excess of the demand.

Prices of listed stocks are a good index to future business conditions; they are in fact the best index known, because they are more sensitive than railroad earnings, bank clearings, and other statistics. The armistice was not immediately followed, as had been anticipated, by a period of falling prices, accompanied by poor business and unemployment. Prices have gone slightly upward, goods have been scarce, and factories have had more orders than they could fill. The trend of stock prices during the year has been upward, with only a few temporary breaks. This prosperity may be one of the unexplained results of the war, but in any case it is recognized that sooner or later supply must catch up with demand, prices fall, and orders fail to equal productive power. If past experience is to be repeated, therefore, the inference is that this condition is close at hand.

This view at least was expressed by Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, in his address to the shareholders last Monday. The annual addresses of the president and of the general manager of the Bank of Montreal constitute one of the most authoritative summaries of the economic situation and outlook in Canada, and the views expressed are based on thorough knowledge of conditions. "The inevitable decline in prices is at least nearer," said Sir Frederick, "and it is to be hoped that the delay is not lulling dealers into the erroneous belief that the standards of these last few years will continue indefinitely. Misconception on this point would constitute a menace alike to borrower and banker. It seems certain that food prices will drop presently and that all commodities must decline in price; therefore, great care and scrutiny of credits on the part of bankers and other business men are imperative." This statement, coupled with his reference to the fact that the cost to the borrower of loanable funds of banking institutions was one thing which had not increased in recent years, may presage a general tightening of the credit upon which war-time expansion of industry has been so largely based.

That Canada will survive this period with little difficulty may confidently be anticipated. Though our currency is moderately inflated, some of our municipalities are in financial difficulty, and consumption has more than kept pace with our producing power, yet the fact that Canadian industry is mainly devoted to the production of essential commodities will make it easier for this country than for most others. Radical agitations are no longer in favor, confidence in government is greater, and the public is less prone to blame the producers and government authorities for unavoidable and world-wide advances in prices. Nevertheless falling prices must be accompanied by reductions in wages, and labor difficulties are by no means at an end. Stable price levels are necessary, however, before satisfactory conditions in industry can be obtained, and these can be secured only by reductions in production costs as well as by a gradual elimination of the element of inflation in our credit and currency.

FUEL CONTROL AGAIN IN FORCE

AS a result of the fuel situation caused by the strike of miners in the United States, the Dominion government has revived the organization formed to conserve fuel during war-time. C. A. Magrath has again taken up his duties as fuel controller. The Canadian Trade Commission has taken control of exports. The provincial governments have been asked to bring their fuel administrations into existence again and the public is being urged to exercise the greatest possible economy in the use of bituminous coal. Supplies of bituminous coal are below normal, are being depleted, and may not be replenished for some little time to come. Practically no soft coal has come to Canada from the United States since November 1st. Although the soft coal miners have been ordered to return to work, many of them are refusing to do so. The probability, therefore, is that coal production in the bituminous fields will be below normal for weeks, and it can scarcely become normal for many months. In the meantime, the United States can only provide fuel for Canadian requirements in proportion to production.

The quantity of coal received between April 1st and October 31st this year is the smallest recorded for the period since 1915. In those seven months in 1914 imports of bituminous coal amounted to 6,859,000 tons; in 1915 to 5,850,000 tons; in 1916 to 9,289,000 tons; in 1918 to 12,120,000 tons. In the seven months of 1919 only 8,600,000 tons were received or only 70 per cent. of the demand of last year.

In western Canada the fuel situation has been aggravated by several factors. Weather conditions, in the first place, have been exceptionally severe during October and November. Again, shipments of soft coal from the United States for the territory from Regina eastward to the head of the Great Lakes have been below normal. Those shipments amounted to 2,300,000 tons in 1917, to 1,660,000 tons in 1918. This year they have fallen to 1,400,000 tons. Production in the Alberta coal fields, too, has suffered this year as a result of labor difficulties. The railways, in consequence, hauled from the Alberta mines during the summer months only about 50 per cent. of the usual quantity of fuel. They transported last month some 30 per cent. more than in October, 1918. That increase, however, was not sufficient fully to meet the situation and the railways themselves have been hampered by the fact that 15 per cent. of their cars are in the United States, that rolling stock has been needed to move cattle from dry areas in southern Saskatchewan and Alberta to the grass lands of the north, and equipment has been required to move wheat to fill European orders.

In view of the situation Fuel Controller Magrath is calling for rigid economy in the use of soft coal in order that the industries and transportation system of the country may not suffer. The Canadian Trade Commission, exercising the powers which were conferred upon it during the war and which it still has, has prohibited exportation of coal except under license. Exportation of Canadian coal to Europe, which has reached a considerable volume, is to be stopped entirely. Other exports will be controlled. Eastern and western Canadian coal mines where the miners have remained at work, will help, it is stated, to supply requirements of the Atlantic and Pacific coast states and central Canada will receive a certain supply for public utilities and essential industries from the bituminous fields of Pennsylvania and Ohio. To meet all eventualities, however, economy in the use of bituminous coal will be necessary throughout the Dominion.

TRAINING LIFE AGENTS

USEFUL hints on locating and training life insurance agents were given at a recent convention of the "Excel" Club by T. Price Thomas, who represents the Excelsior Life in northern Saskatchewan. "There are three general methods of locating new agents," he said: "personal canvass, circularizing and advertising. Personally looking for salesmen is not unlike soliciting business. The general agent should go over his list of prospects for insurance and his acquaintances, and select from among them those whom he believes would make salesmen, personally soliciting them to come into his company's employ, showing them the advantages of so doing, just as he would demonstrate the advisability of taking a life policy.

"Every community has at least one man who has the character, ability and energy necessary to make a success in the insurance business. The problem is to find him. Good agency material can be found among public school teachers, travelling salesmen, business men (who have sold out), municipal secretaries, brokers. Some of our biggest producers are men who had never thought of writing life insurance until the possibilities of the business were put before them. The ranks of women are full of good salesmanship material.

"Having spent time and money securing a new agent, every possible effort should be made not only to develop him into a large producer, but also to retain his services should he prove a success. Induce new agents to give part of their time to the work until they have demonstrated that they can or cannot succeed. This is simple, inexpensive and thoroughly practical.

"The new man should not be started out with a rate book and a few applications and have to trust to luck, but should be thoroughly instructed in the different forms of policies of the company, particularly the ordinary life, twenty-payment life and twenty-year endowment plans, also explain our application forms and premium settlements. Instruct your new agent to pay special attention while you are soliciting each applicant, and, before finally leaving him to his own resources, give him an opportunity to write his first application after you have made sure of the business. Stay with your agent until you have closed a good batch of applications, and plan everything necessary to make him enthusiastic.

"It is just as unwise for a general agent to fail to properly cultivate his new agent as it is for a farmer to neglect cultivating the crop which he has planted. Don't appoint men faster than you can train and develop them. Train them so that they will fit into the organization and add force to it. The cost in time and money of adding new material is too great to be wasted by improper development. Grow intensely. Grow slowly, but grow surely."

CANADA'S RESOURCES MUST BE CONSERVED

THE natural gas supply at Bridgeburg, Ontario, which for many years has furnished the vicinity with light and heat, is falling off. This is not an exceptional instance of depleted resources in this country, illustrating that our prosperity has been built too much upon the using up of the gifts of nature, rather than upon current production. A serious warning to the government and people of Alberta regarding the use of natural gas for power development on a large scale is contained in a report on "Power in Alberta," which has just been issued by James White, M.E.I.C., assistant to chairman, Commission of Conservation. Mr. White refers to the great value of this natural asset, pointing out that at a cost of 19 cents per thousand it compared with $1 per thousand in Toronto—the lowest figure on the continent for coal gas—and at the same time had a heating value 75 to 100 per cent. greater. However, attention is called to these features of the situation:—

"Owing to its unique characteristics, its special adaptability for various purposes, and the possibility of its rapid exhaustion, natural gas should be zealously conserved for use in its sphere of greatest efficiency. In my judgment, this sphere is not the development of power on a wholesale scale." Mr. White also deals with the development of water powers with coal steam plants as an auxiliary to solve the power problems of the province.

Before entering the milk business, the city of Winnipeg should examine the results of Toronto's experiment in the meat business. From the city's civic abattoir, which has been operated since August, 1914, a deficit of almost $300,000 has resulted, and no provision is made for sinking fund. The property is exempt from taxes, and if privately owned would pay about $20,000 a year to the city in taxes, whereas it now costs the city about $80,000 a year.

SHANGHAI

SHANGHAI is the distributing port of China. The deep water of its harbour and its miles of wharves bristle with ships that bring to China the millions of dollars' worth of goods she buys, and that carry in return the hundreds of millions of dollars' worth of silk, cotton, tea, rice, hides, wool, cereals, matches, paper and curios all over the world.

China holds vast possibilities to Canadian importers and exporters: and the Park-Union Foreign Banking Corporation can be of service to those engaging in foreign trade.

Through Branches in Shanghai, China; Yokohama, Japan; Paris, France, New York, San Francisco and Seattle, U.S.A.; and London, Eng., we are in a position to extend to exporters and importers every facility for the transaction and extension of foreign trade throughout the world.

UNION BANK OF CANADA

Park-Union Foreign Banking Corporation jointly owned and controlled by National Park Bank of New York and Union Bank of Canada.

Business Accounts

The complete banking facilities provided at all our branches enable this Bank to give Business Accounts the care and attention they need and deserve.

The Merchant and the Manufacturer will find the services rendered by this Bank of the greatest assistance in conducting their business.

IMPERIAL BANK OF CANADA

BANK BRANCH NOTES

Merchants Bank Opening Office in London, England—Other New Branches

The following is a list of branches of Canadian banks recently opened:—

Carlisle, Ont.	Standard Bank of Canada
Havelock, N.B.	Bank of Nova Scotia
Melfort, Sask.	Bank of Nova Scotia
Doaktown, N.B.	Bank of Nova Scotia
Toronto, Ont. (Todmorden Branch)	Bank of Nova Scotia
Dartmouth, N.S. (Imperial)	Royal Bank of Canada
Hermitage, Nfld.	Bank of Nova Scotia
Marysville, N.B.	Bank of Montreal
Toronto, Ont. (Danforth and Carlaw)	Bank of Montreal

The Merchants Bank of Canada will shortly open a branch at Cornhill, London, England, in premises formerly occupied by an enemy bank. The manager is Col. J. B. Donnelly, who served with the 60th Battalion (Montreal) in France, and had been one of the bank's inspectors.

Additions are being made to the Vancouver branch of the Standard Bank of Canada.

The building on the south side of Portage Avenue and Vaughan Street, Winnipeg, Man., is being remodelled for the Merchants Bank of Canada. According to Geo. Munro, western superintendent of the bank, the office will be ready for business on January 1 next.

Bank Appointments

Mr. C. W. Montgomery, manager of the Canadian Bank of Commerce at Truro, N.S., has resigned his position to enter the stock brokerage business.

Mr. T. G. Haslam, manager of the Mount Forest, Ont., branch of the Royal Bank of Canada, has been transferred to Toronto. Mr. Fowlie, manager at Cargill, Ont., has been appointed to take his place.

Mr. A. H. Davey, manager of the Royal Bank of Canada at the branch at Selkirk and Main, Winnipeg, Man., has been transferred to Alameda, Sask. Mr. F. A. Deckman, now accountant at the main Winnipeg office, has been appointed to take his place.

The following appointments have been announced by the Bank of Nova Scotia: Mr. H. Sutherland, formerly manager at Queen and Church Streets branch, Toronto, has assumed the management of Queen and McCaul Streets branch, Toronto. Mr. F. W. Moody, formerly manager at Picton, Ont., succeeds Mr. Sutherland at Queen and Church Streets, Toronto. Mr. W. R. Adams, formerly manager at Stouffville, Ont., succeeds Mr. Moody at Picton, Ont. Mr. M. G. Bruce, formerly manager at Queen and Lee branch, Toronto, succeeds Mr. Adams at Stouffville, Ont. Mr. J. S. Lewis, formerly manager at Chatham, N.B. branch, but more recently on sick leave, succeeds Mr. Bruce at Queen and Lee branch, Toronto.

Major A. L. MacDonald, who has returned from military duty, has been appointed chief accountant of the bank. Mr. H. J. Coon, former chief accountant, has been appointed inspector. Mr. E. G. Spencer has been appointed manager of the staff department of the bank.

The 1919-20 edition of "Investors' Reference" has been issued by A. E. Ames and Co., Toronto. It gives a brief outline of some of the essential features of investment knowledge, and concise information about prominent companies, whose securities are dealt with in Canada.

The Montreal branch of the Canadian Manufacturers' Association is holding a membership drive, lasting from December 3 to December 6. The present membership is 635, and there are about 150 eligible concerns still outside the association.

EASTERN PORT FINDS BUSINESS SLACKENED

"Generally speaking, it has been a good business year for St. John," said R. B. Emerson, president of the Board of Trade of St. John, N.B., at its annual meeting on December 1st. "There have been few failures and the increasing bank clearings indicate a larger volume of trade than usual. Such disturbing factors as high costs of material and industrial unrest have had a tendency to limit almost all forms of construction. The decision of the federal authorities to withhold expenditures for public works, on the ground that unemployment conditions in other parts of Canada demanded the spending of the public moneys in those localities, led to a complete suspension of harbor development at this port, a condition greatly to be deplored in the national as well as local interest. This suspension of port development, while it has delayed most materially the progress of the port, has reduced the opportunities for employment in this section and has been a fruitful cause of unrest and criticism.

"The sudden closing of war effort, leaving large stocks of packed goods on hand, has had a detrimental effect on the fishing industry of this locality. The local sardine factory did not pack any fish this season and the pack at other points was greatly reduced. The suspension of war contracts, and the switching back into peace pursuits of the plants that had been employed on this class of work, has not been without its influence in reducing employment and limiting production. However, with the sympathetic co-operation of the labor element, there is every reason to look for improved conditions in the near future. Harbor traffic during the past summer has been somewhat better than usual, and the outlook for the current winter season is most encouraging, provided untoward circumstances do not arise to prevent.

"Forms of city development, which were suspended during the war are now in line for resumption. A beginning has already been made, and the opportunities for extension, when a careful and comprehensive scheme of development has been worked out, are very great."

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended December 4, 1919, compared with the corresponding week last year:—

	Week ended Dec. 4, '19.	Week ended Dec. 5, '18.		Changes.
Montreal	$167,088,108	$134,154,650	+	$32,933,458

WINDSTORM DOES MUCH DAMAGE

On Saturday evening, November 29th, a windstorm, which had come up the Mississippi Valley from the Gulf of Mexico, swept eastward across southern Ontario, southern Quebec and the maritime provinces, doing considerable property damage. The total in Toronto alone was about $200,000, made up as follows: Exhibition grounds, $25,000; Scarboro Beach, $9,000; Island Stadium, $1,000; Gall Lumber Co., $15,000; Simpson Planing Mills, $500; Beaver Marine Construction Co., $15,000; Queen City Yacht Club, $2,500; Argonaut Yacht Club, $1,000; C.P.R. Telegraph System, $1,200; G.N.W. Telegraph System, $2,000; Toronto Hydro-Electric System, $3,000; Toronto Electric Light, $2,000; Dominion Cloak Co., $4,000; Board of Education, $2,000; City of Toronto, $500; damage to private property (estimated), $100,000. Numerous claims for plate glass and windstorm indemnity are being made as a result of this storm.

DECREASE IN ONTARIO MINERAL OUTPUT

Curtailing of operations in the nickel-copper mines of Ontario is chiefly responsible for a shrinkage in the value of the metal produced in the province for the first nine months of the present year. Up to the end of September, 1918, the mineral production was valued at $49,599,036, while for the corresponding period of 1919, the total was only $27,875,713. The extent to which the shutting down of operations in the nickel-copper fields contributed to this result is shown by a drop from $20,105,087 to $5,424,552 in nickel matte, and $6,820,785 to $1,908,936 in copper matte. Silver production showed a drop of from $12,500,980 to $7,898,220. A slight increase in the production of gold is shown in the nine months' report of the Bureau of Mines.

MUNICIPALITIES APPROVE HYDRO RADIAL

On November 22 the towns of Bowmanville and Oshawa and the townships of Scarborough and East Whitby, carried, by large majorities, by-laws favorable to the Hydro-Electric Power Commission of Ontario taking over from the Dominion government the Toronto Eastern Railway as part of the proposed radial line running east from Toronto. Seven of the ten municipalities interested in the taking over of the Toronto Eastern Railway by the people's commission have now voted favorably. Pickering and West Whitby townships and Whitby town voted on the by-laws recently, and signified their willingness to enter into joint ownership of the road. Three other municipalities have still to vote, as follows: Darlington township, December 13; York township, January 1; and Toronto, about January 1.

EMPIRE EXHIBITION OF TIMBER

The British trade commissioners in Canada have been notified by the Department of Overseas Trade of the British government that the department is organizing an exhibition of timbers grown within the British Empire, to take place in London from July 5th to July 17th, 1920. The classification embraces: (a) Specimens of timber (polished and unpolished); (b) exhibits demonstrating the various uses to which timbers are put—viz., floors, panelling, staircases, furniture, ply wood and articles of every-day use; (c) wood pulp. A committee has been formed to arrange all details connected with the exhibition, and includes representatives of the colonial office, crown agents for the colonies, government of India, self-governing Dominions, forestry authority and of the British societies interested in the production and utilization of timber.

The main object of the exhibition is to bring prominently before architects, inspectors, firms who have to specify timbers in their contracts, as well as the users and consumers of timbers, the full range of Imperial grown timbers and especially those timbers which, up to the present, are only very slightly, if at all, known in this country, and at the same time to demonstrate the chief uses for which such timbers are suitable.

SILVER PRICE HAS DOUBLED

In 1917 silver reached the extraordinary price of $1 per ounce. By November 14th of this year it had reached $1.23 per ounce. The price in pre-war years ranged from forty to sixty cents. Discussing the effects of this advance, the November Commercial Letter of the Canadian Bank of Commerce says:—

"Extraordinary demands by India and China, and unusually heavy demands by European countries for silver for coinage purposes, cannot fail to stimulate both the production of that metal, and the utilization of large quantities of low grade ore which was not of commercial value when prices were below 60 cents per ounce. Quotations at the close of October were approximately $1.22 per ounce. As the world's production of silver is far below current requirements, it is quite probable that the price will remain higher than it has been in recent years. The average production in all countries for some years has not exceeded 160,000,000 ounces annually, whereas to meet present demands 315,000,000 ounces are required. India and China require annually 175,000,000 ounces in settlement of the trade balances due to them which are payable in silver instead of gold. To meet the growing demand for silver coinage, 100,000,000 ounces are now required, and for use in the arts, 40,000,000 ounces.

"The present shortage of silver is attributable in part to the hoarding instincts of the native East Indian, and to the acceptance of the rupee in Mesopotamia, and in Egypt and other African countries, as legal currency. Germany must, perforce, turn to silver, as gold is not within her reach, and without exception the use of silver coinage has greatly increased in all European countries. The result of the advance in the price of silver bullion has in some instances been to make the bullion value of silver greater than the legal value, hence many restrictive measures. The British Chancellor announced on October 30th, that the melting or exporting of British silver coins was made illegal and that silver bullion was not to be exported except under licence. The same restrictions apply in France also. These developments will favorably affect the mining industry of Canada. Two-thirds of the world's production of silver is a by-product of the lead, copper and zinc industry, but in Canada only 16 per cent. of the output is thus obtained, the balance being obtained from the mines at Cobalt. From the Cobalt and outlying camps 17,661,694 ounces, having a value of $17,341,790, were produced in 1918, and since the opening of these camps in 1903 up to the end of 1918, 292,056,976 ounces, valued at $169,241,387 have been produced by them. The stimulus which high prices will give to exploration, and to the application of more highly developed processes to all grades of ore, will do much to increase the output, the scale of which in recent years is indicated in the table following:—

Silver Production in Canada

	Value.	Production, ounces.	Average price. cents.
1910	$17,580,455	32,869,264	53.59
1911	17,355,272	32,559,044	53.30
1912	19,440,165	31,995,560	60.83
1913	19,040,924	31,845,803	59.79
1914	15,593,630	28,449,821	54.81
1915	13,228,842	26,625,960	49.68
1916	16,717,121	25,459,741	81.84
1917	18,034,419	22,150,680	81.41
1918	20,000,000	20,780,000	97.10

BURGLARY UNDERWRITERS' ASSOCIATION

As mentioned in these columns last week, a Burglary Underwriters' Association of Canada was organized at a meeting held in Montreal on November 24. The following officers were elected: President A. E. Kirkpatrick, Toronto; vice-presidents, W. H. Burgess, Toronto and R. Welch, Montreal; secretaries, H. G. Humphries, Toronto and T. D. Hutchins, Montreal; treasurer, H. F. Roden, Montreal. A constitution was also drawn up and by-laws passed.

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution, have done so since their beginning.

Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

366 Branches in Canada, extending from the Atlantic to the Pacific

New York Agency: 63 and 65 Wall Street

Bankers in Great Britain: The London Joint City & Midland Bank, Limited The Royal Bank of Scotland

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter
N.Y. funds	5 9-32 pm	5 11-32 pm	.. ....
Mont. funds .	par	par	1/8 to 1/4
Sterling—			
Demand	$4.0925	$4.0975	......
Cable transfers ...	4.10	4.1050	....

Rate in New York for sterling demand, $3.88¼.

Bank of England rate, 6 per cent.

The sterling quotation is a new low record, being sixteen cents lower than last week. Corresponding with this decline in sterling, New York funds have advanced to a still higher premium in Canada.

RAILROAD EARNINGS

The following is a statement of the gross earnings of Canada's transcontinental railways for the month of November:—

Canadian Pacific Railway

	1919.	1918.	Inc. or dec.
November 7	$3,821,000	$3,437,000	+ $ 384,000
November 14	4,083,000	3,247,000	+ 836,000
November 21	4,111,000	3,582,000	+ 529,000
November 30	5,086,000	4,502,000	+ 584,000
	$17,101,000	$14,768,000	+ $2,333,000

Grand Trunk Railway

	1919.	1918.	Inc. or dec.
November 7	$1,421,706	$1,343,041	+ $ 78,665
November 14 ...	1,488,716	1,471,654	+ 17,062
November 21	1,433,496	1,357,756	+ 75,740
November 30	1,748,865	1,500,629	+ 248,236
	$6,092,783	$5,673,080	+ $ 419,703

Canadian National Railways

	1919.	1918.	Inc. or dec.

November 30	2,721,699	2,515,883	+ 205,816
	$8,739,457	$7,836,384	+ $ 903,073

LOEW'S BUFFALO THEATRES ISSUE

An offering is being made of $1,000,000 8 per cent. cumulative sinking fund preferred stock of Loew's Buffalo Theatres, Inc., by a Toronto syndicate, comprising Richardson, Sheppard and Thorburn, Graham, Sanson and Co., and the Federal Finance Corp., Ltd. The price is $100, and with each 8 per cent. preferred share, the purchaser will receive a bonus of two shares of common stock of a par value of $10.

The cumulative sinking fund preferred shares are preferred both as to assets and dividends, and at the option of the company are redeemable at $110 per share and accumulated dividends. The company's by-laws provide that, commencing with the year 1923, 10 per cent. of the net earnings shall be set aside annually as a sinking fund for the redemption and cancellation of the preferred shares. These shares are offered with a bonus of 20 per cent. of common stock. As the amount of preference stock outstanding is reduced the holdings of common stock will be greatly enhanced.

Loew's Theatres in Canada were correspondingly financed by the sale of preferred stock carrying a bonus of common stock. In the five years of operation the preferred stock of Loew's Toronto Theatre has paid 35 per cent. in dividends (7 per cent. per annum) and common stock 49 per cent., or an average of nearly 10 per cent. per annum, and the net earnings will permit of a further increase in dividends. Loew's Toronto common stock has now a market value of approximately $300 per share, which stock was given as a bonus to the purchasers of preferred shares.

WINNIPEG LIFE UNDERWRITERS MEET

At the November meeting of the Winnipeg Life Underwriters' Association, held on November 29, Robert I. Clancy, branch manager in that city for the National Life, gave a demonstration of actual salesmanship. Mr. Clancy sold over one million of insurance last year.

ALLEN'S CALGARY STOCK ISSUE

Allen's Calgary Theatre, Ltd., is placing on the market as an investment $260,000 in shares of the authorized capital of $850,000. The money will be used for the erection of a new picture house. The authorized capital of $850,000 for the enterprise is composed of $550,000 of common capital stock, issued and outstanding, of a par value of $25 a share, and $260,000 of 7 per cent. cumulative preferred stock of a par value of $100 per share. The present offering consists of $260,000 of the 7 per cent. cumulative preferred shares of $100 each, with a bonus of 25 per cent. of common stock. The issue is being handled by the Security Trust Co., Calgary, Alta.

UNION BANK ISSUE OVERSUBSCRIBED

Shareholders responded to the Union Bank's offering of $3,000,000 of new capital stock by oversubscribing the issue, according to an announcement just made. This issue, which was authorized at the last annual meeting, brings the paid-up capital to $8,000,000. Considering the fact that the subscription price, $160 per $100 share, is just about the price at which the bank's stock is selling on the exchanges, and also in view of the crop failures in the west, where a good proportion of the bank's shareholders are located, the response was excellent. The Union Bank's annual report for the year ended November 30th, will be made public about the end of this month, in anticipation of the annual meeting to be held in Winnipeg on January 8.

CANADIAN CAR AND FOUNDRY CO.

Elsewhere in this issue is given a detailed report of the finances of the Canadian Car and Foundry Co., Ltd., for the year ended September 30 last. The report shows that the profits subject to government taxes amount to $1,887,634, compared with $3,252,608 for the previous year, a decrease of over $1,000,000. In commenting on this in his report to shareholders Mr. W. W. Butler, president, said: "After charging earnings with the cost of maintenance of all plants as well as the customary depreciation, and after making due provision for contingencies of the nature of bad debts, rebuilding furnaces, etc., also writing down inventories held at war-time prices, to present market basis, there remains a profit of $1,887,634. Having regard especially to the fact that the year under review represents a transition period—from war to peace—your directors consider that the results are satisfactory."

The balance sheet, in comparison with last year, reflects the quieter business conditions and the more liquid financial position of the company. While cost of properties has increased by $1,000,000, current assets are only $12,438,623, compared with over $18,000,000 last year, and cash and investments are also increased. The following is a comparison of some of the principal items in the balance sheet:—

	1917-18.	1918-19.
Cost of properties	$21,376,024	$22,373,964
Cash in bank	489,116	814,915
Investments	165,479	1,903,297
Total current assets	18,148,601	12,438,623
Bonded debt	5,222,593	5,223,133
Current liabilities	9,128,637	2,074,647
Reserves	4,011,186	5,123,455

BUSINESS AND FINANCE IN EDMONTON SECTION

City and District Make Good Progress—City Finances Improved—Board of Trade Active

(Staff Correspondence)

December 1, 1919.

WHEN *The Monetary Times'* representative visited Edmonton winter weather was found, as in fact it is in most parts of the prairies. Business, however, was found to be satisfactory, and in discussing the situation with a number of business men at a well-attended board of trade luncheon, they all spoke in the highest terms of trade conditions. The volume of business is away ahead of last year, and collections are good. Edmonton is in a favorable location and is surrounded by large areas, for which it is the distributing centre. The crops around Edmonton and in the Peace River country were fairly good, and the country north of Edmonton is bound to see great development in the near future.

The Edmonton Board of Trade is active, and is putting on a campaign to get 1,000 members. At present the membership is about 300. F. T. Fisher who was secretary for many years, and who has done a great deal to put Edmonton on the map, so to speak, was recently presented by the members with a $1,000 Victory bond on the occasion of his retirement, as a token of the high regard and esteem in which he is held.

In discussing the present outlook H. M. E. Evans, ex-mayor of Edmonton, said:—

"The success of the Victory loan is an old story now, but the result for the whole country was obviously the aggregation of local achievements and any observations on conditions in Edmonton must begin with the fact that this city more than doubled its honor flag objective. In special subscriptions alone we trebled our quota and quadrupled last year's results. But for unfavorable canvassing conditions in the country, northern Alberta would surely have made a similar record, instead of merely exceeding its quota by 25 per cent. These are very encouraging signs of the sound condition of affairs. In the absence of any large war industries and with no military payroll to speak of, the population of Edmonton was seriously depleted by the heavy enlistment for overseas service. The city has quietly filled up again until we are now up to the limit of accommodation of all sorts, and a heavy building programme is in prospect for next year. Several of our largest industries, such as the Swift and Burns' packing plants, are making important extensions. New wholesalers are coming in and building, and present establishments are to be enlarged. One of these, for example, will build an eight-story warehouse covering four lots. There are no vacant flats or houses, and much residential construction is inevitable.

Agriculture Now Developing

"Some years ago, those of us whose business interests were both in and out of the city were rather concerned to note that development in the country was hardly commensurate with the exceedingly rapid growth of the town, but today, the reverse is the case, and it is a very healthy state of affairs. For instance, this year our own office has made sales of over $300,000 of farm land not previously cultivated, and so far as we know, every sale is to a man who is a bona fide farmer, going to use the land immediately. It is our policy not to sell to anyone else. Other larger land owners such as the C.P.R. and Hudson Bay Co., have been selling freely. This has been the most favored district for soldier settlers, most of them practical farmers and well qualified to succeed under the government scheme of assistance. Altogether, a great development is taking place all through Edmonton's tributary territory.

"When the important industrial congress for British Columbia and Alberta meets at Edmonton next summer, it will find conditions, at this point at least, absolutely right for action. Useful as these congresses are, it is not always easy to produce practical results from them, but it is not too much to hope that in view of general conditions here, at least a few important new industries may thus be established. Even without them, I believe that Edmonton is in for steady and comparatively rapid growth beyond the glorified market town basis. Already we have substantial manufacturing concerns operating here and serving much more than a provincial territory. If, based on their experience, the leaders of industries who visit us this coming summer can see their way to establish here, Edmonton may very rapidly reach the size and importance which its location warrants."

In discussing city conditions, David Mitchell, comptroller of Edmonton, said to *The Monetary Times*:—

Tax Arrears Still High

"According to the interim financial statements prepared for the annual meetings of the citizens, the city of Edmonton's position appears to be steadily improving. Taxes collected on account of the current year's levy to date (18th November), amounted to $1,861,085, and on account of arrears collections were $795,763, making a total collection of taxes of $2,656,848.

"The overdraft at the bank at the last-mentioned date, was $92,090, which in the interval has been completely extinguished and instead there is now a balance to the credit of the city at the bank. Arrears of taxes outstanding at present aggregate $5,959,997.50, and under the terms of the Tax Arrears Recovery Act a considerable number of property owners are availing themselves of the option of liquidating their tax arrears by means of agreements providing for payment of same by eight annual instalments of principal and interest commencing in 1921. In the meantime, however, it is an essential condition that all penalties and interest, as well as current taxes, must be fully met by the property owners.

"The temporary loans against tax arrears outstanding which mature at varying dates between 1920 and 1924, amounting to about $3,000,000 are to be replaced by a consolidated issue of debentures for $3,000,000 extending over a period of ten years, and tenders are now being invited for the sale of these debentures.

"It is important to observe that the city has seen fit to provide a substantial reserve of $435,000 against those arrears which may ultimately prove uncollectable. Such a reserve is undoubtedly a desirable precaution in view of the possibility of a percentage of shrinkage in these assets. The operation of the city's utilities for the first nine months created a record in producing a net surplus, inclusive of the street railway deficit of $106,451 as compared with $16,958 for the corresponding period of 1918." Further particulars about the utilities' results will be found in section entitled "News of Municipal Finance."

MANUFACTURERS URGE TARIFF COMMISSION

On November 25th a delegation representing the Canadian Manufacturers' Association urged upon the Dominion government the need for appointing an advisory tariff commission. Sir George Foster, Hon. C. C. Ballantyne, Hon. J. A. Calder and Sir Henry Drayton heard the delegates. The necessity for having such a board of experts was strongly emphasized, but its recommendations should, of course, be subject to confirmation by the government.

The delegation was made up as follows: T. P. Howard, president of the Canadian Manufacturers' Association; E. G. Henderson, ex-president Canadian Manufacturers' Association; C. H. Carlisle, chairman Industrial Relations Committee; W. C. Coulter, chairman Toronto branch; C. A. Waterous, chairman Brantford branch; Mr. Stewart, vice-president Montreal branch; J. E. Ruby, chairman Agricultural Implement Section; B. W. Coughlin, R. J. Coughlin Co.; W. Ramsay, Wm. Ramsay Co.; J. L. Waldie, Canada Tube Co.; Mr. Blackwell, Canadian Car and Foundry Co.; Mr. O'Reilly, Gillette Safety Razor Co.; J. E. Walsh, general manager Canadian Manufacturers' Association; J. R. K. Bristol, manager Tariff Department; H. I. Thomas, Ottawa; G. Y. Chown, Kingston.

BANKERS AS ECONOMIC LEADERS

Financial Leaders Can Play Part in Encouraging Production and Industrial Stability

"SLOWLY we are beginning to realize that we are passing through a crucial period fraught with social and economic dangers, grave as the dangers arising from the war itself," declares W. Mitham, western auditor of the Union Bank of Canada, Winnipeg, in "A Plea for Economic Education," in the December issue of the Union Bank Monthly. Mr. Mitham continues:—

"Impoverished from the frightful waste and destruction of war, the world's welfare in this crisis depends on the right and fair use of money. Progress is only possible if we conduct our affairs in conformity and in harmony with economic law, and any attempt to work in conflict with that law will simply lead to disaster. We have not yet reached a stage of economic progress where consumption can be increased at the expense of production. Higher standards, better conditions cannot come by limitation of effort. Painfully we must go back and learn again the old lessons of economy and hard work. They are the two watchwords of to-day and the actual concern of each one of us must be to do his honest best in his own work, to curtail luxury and extravagance, to subordinate selfish interests, and strive after the ideals of honesty, loyalty and just conduct. We who are the financial trustees of the community need to practise this faith, teach it and live up to it as never before.

Increased Production

"The most crying of all the needs is that of emphasizing the underlying principles of our economic problems, the fundamental issues that must sooner or later be faced when evasion and opportunism have exhausted their power. Only with education will come a better acquaintance with the operation of economic laws and forces, a better grasp of the basic fact that the only way permanently to improve social conditions as a whole is by the maximum individual effort in the cause of increased production.

"The progress of society in the past has been under the rule of economic law. Beneficent in its tendencies, this law has its own methods of righting wrongs and bringing things back into balance. In the economic sphere, as in the moral, there can be no injustice without retribution. Artificial remedies, restricting the free play of economic forces, the attempt to establish maximum prices of commodities and labor in violation of natural law, have ever resulted in stagnation, higher prices and often bloodshed. The lesson is nearly as old as the hills. In 301 B.C., the Roman emperor, Diocletian, attempted thus artificially to relieve a similar situation to that in which we find ourselves today, as did Emperor Julian a decade or so later, but each had to acknowledge his inability to cope with economic law and finally cancelled his edicts in order that industry might build itself up again on normal and natural lines.

"One of the primary lessons of economics is that wages, costs and prices are so related that when one is increased the others must be too, that costs and prices are related to production as well as to wages, and if production is increased costs are reduced. Once these fundamental facts are recognized, the futile remedy of pushing wages higher will be apparent, and we shall come to look for the solution of the cost of living problem to the true antecedent principle of increased production, and the enhanced purchasing power of the dollar. The heresy of restriction of output, the "deliberate prevention of wealth production" founded on the false doctrine that the less men worked the more work there would be for others, will be seen to be no less dangerous than the reckless and indiscriminate use of strikes. When greater productivity is seen to be the only effective remedy, labor will no longer persist in continual demands for shorter hours of work, but with a sounder sense of social obligation, will recognize that short hours are economically impossible unless accompanied by maximum production.

"The prevailing impression that a greater share of current production can be distributed amongst labor and nothing withheld for conversion into capital for growth and development is fundamentally wrong. Indeed, industry can carry its present burdens only if they are spread over a much larger output. Real progress in the industrial world can only be accomplished in the future as in the past by raising the standard of efficiency. In the words of one of the more thoughtful labor leaders of England, J. R. Clynes, 'It will come by better arrangements, by a more successful subdivision of work, by accepting and welcoming the higher and better forms of management that the modern-minded and more capable business men apply to their interests. In short, it will come by organization and skill.' Let us not forget that these are factors in production to be recognized and rewarded. Capital, management and labor are all necessary to industrial progress, and just in proportion as one suffers the others suffer also."

TO DEVELOP THE GREAT LAKES

A Great Waterways conference, the first meeting of its kind in Canada, was held in Windsor, Ont., November 18th and 19th. About one hundred delegates were present from various points in Ontario. F. H. Keefer, of Port Arthur, Under-Parliamentary Secretary of State, pointed out that railways had so absorbed public attention that the lakes had been overlooked. C. P. Craig, secretary of the Great Lakes-Tidewater-St. Lawrence Association of Duluth, Minn., urged the further deepening of St. Lawrence canals. E. L. Cousins, manager of the Toronto Harbor Commission, described the work being done to accommodate ocean-going vessels in that city. The meeting was also addressed by Sir Adam Beck, who urged the immediate deepening of the canals, in conjunction with power development, along the St. Lawrence. The delegates finally endorsed a plan to form a Canadian Deep Waterways and Power Association, with the following officers: Honorary president, W. M. German, K.C., Welland; honorary vice-presidents, Sir Adam Beck, London, and T L. Church, Mayor of Toronto; president, O. E. Fleming; secretary-treasurer, F. M. Sclanders, Windsor.

ROYAL BANK FOREIGN TRADE DEPARTMENT

The Royal Bank of Canada announces the establishment of a Foreign Trade Department at head office to handle commercial inquiries and to cater to the growing interest shown in export trade by Canadian business men. This new department is to be in charge of Mr. L. D. Wilgress, who for some years has been connected with the Department of Trade and Commerce, Ottawa, and who during the past three years has been in Siberia in the capacity of Canadian Trade Commissioner, being stationed first at Omsk and afterwards at Vladivostok. The establishment of such a department has been rendered necessary by the rapid extension of the foreign connections of the Royal Bank of Canada. This institution has now 76 offices in foreign countries, in addition to 544 branches in Canada and Newfoundland. The recent opening of branches in the leading trade centres of South America gives the Royal Bank of Canada a complete chain of branches throughout the West Indies, Central and South America and offices in the important financial centres of London, New York, Paris and Barcelona, Spain.

With such extensive connections the Royal Bank of Canada is in a position to offer exceptional facilities to traders with foreign countries. Every mail brings an increasingly large number of inquiries from foreign firms desirous of establishing connections with Canadian houses for the import or export of merchandise. These inquiries will in future be handled by the newly established foreign trade department. Information regarding trade conditions in foreign countries, markets for Canadian goods, current prices in export markets, and particulars as to the credit and standing of foreign firms will be systematically collected and kept on file for the use of Canadian firms. Publications will be issued from time to time on subjects connected with the development of Canadian trade.

The Toronto General Trusts Corporation

DIVIDEND No. 94

Notice is hereby given that a dividend of Two and one-half per cent. (2½%) has been declared upon the paid-up Capital Stock of this Corporation for the quarter ending the 31st day of December, 1919, being at the rate of Ten per cent. (10%) per annum, and that the same will be payable on and after the 2nd day of January, 1920; and that a bonus of One per cent. (1%) has been declared upon the said Capital Stock, payable at the same time as the said Dividend.

The Transfer Books of the Corporation will be closed from the 20th day of December to the 31st day of December, both days inclusive.

By Order of the Board,
A. D. LANGMUIR,
Toronto, December 1st, 1919. General Manager

Canadian Financiers Trust Company

Head Office - Vancouver, B.C.

TRUSTEE EXECUTOR ASSIGNEE

Agents for investment in all classes of Securities.
Business Agent for the R. C. Archdiocese of Vancouver.
Fiscal Agent for B. C. Municipalities.

Inquiries Invited

General Manager Lieut.-Col. G. H. DORRELL

The Old Way and the New

The Old Way was to appoint a friend Executor. The New Way is to appoint a Trust Company. Its financial responsibility, permanent organization and experienced officials make it a much preferable appointment. We suggest as your choice,

Chartered Trust and Executor Company
46 KING STREET WEST, TORONTO

Hon. W. A. CHARLTON, President
JOHN J. GIBSON, Managing Director

5% Absolute Security

OVER 200 Corporations, Societies, Trustees and Individuals have found our Debentures an attractive investment. Terms one to five years.

The Empire Loan Company
WINNIPEG, Man.

Uninterrupted Executor Service

An individual executor may find himself unable to attend to business affairs through illness. Circumstances liable to lead to confusion in the administration of an estate are absent when the Union Trust Company is named as executor. Write for literature.

Union Trust Company
LIMITED
Henry F. Gooderham, President
Head Office: Corner Bay and Richmond Streets, Toronto
Winnipeg. London, Eng.
64a

Canadian Guaranty Trust Company

DIVIDEND NOTICE

Notice is hereby given that a Dividend at the rate of Six per cent. per annum on the paid-up Capital of this Company has been declared for the year ending December 31st, 1919, and the same will be payable at the Head Office, 1031 Rosser Avenue, Brandon, Manitoba, on January 2nd, 1920.

Transfer Books will be closed from December 15th to the 31st, inclusive.

By Order of the Board,
JOHN R. LITTLE,
Managing Director.

When selecting a Trust Company as an Executor choose one whose fixed policy is to give

FINANCIAL ASSISTANCE

to Estates being administered by it.

CAPITAL, ISSUED AND SUBSCRIBED ..$1,171,700.00
PAID-UP CAPITAL AND RESERVE...... 860,225 00

The Imperial Canadian Trust Co.
Executor, Administrator, Assignee, Trustee, Etc.

A WILL MAKER'S DIFFICULTIES

A wise man makes a will; and a will implies an executor. Yet anyone choosing a personal executor must choose either an able man with interests of his own, who can give only his spare time to the estate, or a man who has less than the ability required to administer the property of another.

Many prudent people, unwilling to make either choice, have appointed this Company executor. Write for our booklets; or, may we explain to you personally the advantages of such a course?

National Trust Company
Limited

18-22 KING STREET EAST, TORONTO

STATISTICS OF 1919 FARM CROPS

Average Yields Sometimes Lower, But Increased Acreage Brings Total Production Above 1918—More Livestock in Country

THE Dominion Bureau of Statistics has announced the results of the compilation of the annual statistics of areas under field crops and numbers of farm livestock as collected from farmers throughout Canada, in co-operation with the provincial governments of the nine provinces. The total areas estimated to be sown in Canada to the principal field crops this year are, in acres, as follows, the figures for 1918 being shown within brackets for the purposes of comparison:—

Fall wheat, 678,893 (416,615); spring wheat, 18,466,444 (16,937,287); all wheat, 19,141,337 (17,353,902); oats, 14,997,135 (14,790,336); barley, 2,645,509 (3,153,711); rye, 753,511 (555,294); peas, 224,685 (235,976); beans, 83,577 (228,577); buckwheat, 444,732 (548,097); flax, 1,093,115 (1,068,120); mixed grains, 900,234 (921,826); corn for husking, 264,207 (250,000); potatoes, 821,061 (735,192); turnips, etc., 314,620 (325,037); hay and clover, 10,595,383 (10,544,625); fodder corn, 511,769 (502,069).

Of these crops, the highest areas on record are established for wheat, oats, rye, potatoes, hay and clover and fodder corn. Beans have receded greatly since last year, when they were overproduced to a considerable extent; but the acreage is still about double what it was before the war.

Average and Total Yield

According to the returns of crop correspondents at the end of September last, the average yields per acre of the principal crops were, in bushels, as follows, the corresponding averages for 1918 being given within brackets:—

Fall wheat, 23¾ (19); spring wheat, 9¾ (10¾); all wheat, 10¼ (11); oats, 27½ (28¾); barley, 22 (24½); rye, 14½ (15¼); peas, 16½ (13¼); beans, 17¾ (15½); buckwheat, 25½ (20¾); flax, 6¼ (5¾); mixed grains, 29½ (38¾); corn for husking, 48 (56¾); potatoes, 160¾ (142); turnips, etc., 334¼ (377); hay and clover, 1.55 tons (1.40); fodder corn, 9.15 (9.50).

These averages represent the following total yields in bushels (or tons) as the second or provisional estimate of this year's crops, the final figures for 1918 being given within brackets:—

Fall wheat, 16,133,000 (7,942,800); spring wheat, 180,228,000 (181,132,550); all wheat, 196,361,000 (189,075,350); oats, 411,136,000 (426,312,000); barley, 58,336,000 (77,287,240); rye, 11,003,000 (8,504,400); peas, 3,722,800 (4,253,300); beans, 1,478,000 (3,563,380); buckwheat, 11,311,000 (11,305,500); flax, 6,767,000 (6,055,200); mixed grains, 26,519,000 (35,662,300); corn for husking, 12,691,000 (14,205,200); potatoes, 131,952,200 (134,364,200); turnips, 195,184,600 (122,699,600); hay and clover, 16,527,800 tons (14,722,300); fodder corn, 4,722,000 tons (4,787,500). In the prairie provinces the estimated production of wheat is 167,270,000 bushels from 17,750,167 acres; of oats, 247,234,000 bushels from 9,452,386 acres; of barley, 38,124,000 bushels from 1,800,745 acres; of rye 7,958,000 bushels from 573,218 acres; and of flax, 6,433,000 bushels from 1,068,014 acres.

Estimated Livestock

The estimated numbers of farm livestock, based upon returns collected during June and July, are for the whole of Canada as follows, the corresponding figures for 1918 being placed within brackets for comparison:—

Horses, 3,667,369 (3,609,257); mules, 15,102 (10,261); milch cows, 3,547,437 (3,538,600); other cattle, 6,536,574 (6,507,267); total cattle, 10,084,011 (10,045,867); sheep, 3,421,958 (3,052,748); swine, 4,040,070 (4,289,682); hens, 31,785,722 (31,334,498); other descriptions comprising turkeys, geese and ducks, 2,859,516 (2,825,193); total poultry, 34,645,238 (34,159,691); rabbits, 83,050 in British Columbia. For horses and cattle the numbers for 1919 constitute the highest on record. Sheep show a further very satisfactory increase since the annual decline in numbers was arrested in 1917. This year's total is the highest on record and compares with 3,155,509, the number recorded in 1871 by the first census after Confederation. Swine show a decrease of 249,612, as compared with last year's record number of 4,289,682.

VANCOUVER FIRE CONDITIONS CRITICIZED

Something must be done to lessen the fire risk along the water front in Vancouver, according to J. Grove Smith, Dominion Fire Commissioner, who was in that city recently. After inspecting the water front along Burrard Inlet, he said: "Some improvement in the fire conditions without any delay is very essential, and, while I am not now prepared to say upon whom the responsibility for such improvements will fall, nor am I prepared to say just what recommendations I will make, there is no doubt that those properties along the whole waterfront are a serious menace to the mercantile section particularly, of Vancouver. The chief danger to the city would be from a fire along the Burrard Inlet waterfront which, with a favorable wind, would easily sweep the city downtown. The fire department is efficient and the water supply appears to be fairly adequate, but the general construction of the buildings along the waterfront is poor. They are practically all frame buildings and in poor condition. The maintenance is bad, and the occupants and owners have apparently been careless in the upkeep of the various buildings. Under these conditions there can be no doubt as to the great value of fire boat protection for this harbor, as ordinary fire-fighting apparatus is not sufficient to tackle property so difficult of access as piers and wharves extending out into the deep water. Recommendations will be made for Vancouver, but no definite announcement can be made until it has been possible to go more thoroughly into the matter of the protection needed."

A Vancouver chapter of the British Columbia Fire Prevention League was discussed at a meeting held on November 12th, at which J. W. Farris, attorney-general, Mayor Gale, and other officials and insurance men were present. A nominating committee was appointed, and about twenty-five prominent men in the city will be asked to assume duties in connection with the league.

INCREASE OF ALL TELEGRAPH TOLLS INTIMATED

When the case of the Grand Trunk Pacific Telegraph Co. was brought forward by F. H. Phippen, K.C., at the sitting of the Dominion Railway Commission in Vancouver last week, an increase of all telegraph tolls in Canada of about 26 per cent. was intimated. Counsel pointed out that the Grand Trunk Pacific Railway and the Grand Trunk Pacific Telegraph Co. were two separate organizations, and that the earnings of the telegraph companies have not been able to do much more than pay operating expenses, in support of which contention financial statements were submitted to Hon. F. B. Carvell, chairman of the commission.

W. E. Bell, assistant to the telegraph manager of the company, who went into details of the company's operations, pointed out that a deficit of $31,347 marked the last fiscal year's operations, and that the company is facing a huge increase in the cost of materials of all kinds and a constant increase in wages paid. Counsel suggested that, in view of the fact that this line is operated in a comparatively unsettled country, it is entitled to some extra consideration at the hands of the board when the final decision is announced.

On behalf of the Canadian Pacific Telegraph Co., a schedule of suggested increase in tariff all over the lines in Canada was put in by J. McMillan, general manager of the line, whose offices are in Montreal, and who stated that the changes, if approved by the board, would provide for an increase in tariff for lines in Canada of about 26 per cent., and the increase in the Canadian proportion of tolls into the United States would amount to 20 per cent. The whole application, made by Mr. Phippen on behalf of all the telegraph companies, will be taken under consideration by the board and the decision will be made known at a later date.

The Hamilton Provident and Loan Society

DIVIDEND No. 97

Notice is hereby given that a Dividend of *Four and one half* per cent., being at the rate of *Nine* per cent. per annum, has been declared for the half year endng December 31st, 1919, upon the paid-up Capital Stock of this Society, and that the same will be payable at the Society's Head Office, Hamilton, Ontario, on and after Friday, the 2nd day of January, 1920.

The Transfer Books will be closed from the 15th to the 31st of December, both days inclusive.

By order of the Board.

BANK ROUTINE*

Nature of Business Prevents Degree of Specialization Found in Manufacturing, but Joint Action Should Assist Banks

By A. B. Barker

THERE have been many changes in bank routine in recent years, and the elaborate detail in records and returns, which a few years ago was considered absolutely essential in most of the banks, has given place to more simple systems, largely developed from the best methods in mercantile accounting. Until recently there has been little effort on the part of the banks to unite in any joint investigation into systems of routine in which the various features of each bank's methods could be discussed and the benefit of the experience of officers of other institutions utilized to still further reduce unnecessary detail.

In mercantile circles every form of trade activity has come under discussion, chiefly through the media of conventions of delegates, representing all classes of officials in the companies and firms making up the association. At these meetings committees are formed to deal with matters affecting each branch of work, and as a result any new improvements in process, sales management, accounting systems, and the like, are available to all the members. Banks in Canada have not worked along these lines, any joint organization being in connection with those matters of policy which are exclusively the domain of the chief executives. The difference in organization has, no doubt, much to do with this, as a bank does not lend itself so readily to departmentalization, as a mercantile or manufacturing company. In these the lines between the different departments, process, purchasing, selling and accounting, are very clearly drawn, and in the more progressive concerns the executives of each department have a fairly free hand. In the case of a bank, particularly under the branch system, division is not so easy, as the various branches of its business dovetail into each other so closely in most offices that it is difficult to differentiate.

Inter-Bank Routine Committee

The increasing volume of business and the problems involved, however, required thorough organization, and up to the present each bank has handled each problem along the lines of its own system, making such changes in routine as have been found necessary, on its own initiative, and based on the results of its own experience and tests. Recently, however, the association has recognized the advantages of joint action in this connection, and an Inter-Bank Routine Committee has been appointed to investigate and suggest such further changes as they may consider advisable. This committee is composed of men in close touch with the daily routine problems, such as chief accountants and inspectors. There will undoubtedly be much benefit from the work of this committee, but it is doubtful whether by this method the experience and skill of the officers appointed can be fully utilized. In the first place, chief accountants and inspectors are, as a rule, among the hardest worked members of the staff, with little time to spare to make the necessary investigations into new systems and then discuss them in committee. They would, however, be able to find time for criticism of schemes brought to their attention. The convention method of obtaining material for such discussions might not be suitable, but if any member of the staffs of the various banks was free to send in suggestions to be discussed, there would be no difficulty in finding such material.

Some years ago the association held several essay competitions on various banking subjects; why not revive the custom? If the question of bank routine were divided into a series of problems and prizes offered by the association for the most practical solutions, the routine committee to act as judges, it is very probable that ideas of value would be obtained.

For instance, one result of the trade conventions has been the gradual perfection of cost systems for both manufacturing and trading firms and companies, by which the cost of operation in the different lines of business has been worked out in detail. The best accounting talent has been concentrated on this problem, and in those lines of business for which detailed cost systems are not suited, it has been found that the desired results can be obtained by readjusting the bookkeeping methods to give the required information without increasing the office work.

The Cost System in Manufacturing

The benefits of accurate costing are recognized by the banks in connection with their customers' businesses, and in many cases a line of credit has been granted conditional on the installation of such a system in the plant. In regard to their own business, however, few banks have paid much attention to it. If a system could be worked out based on district averages, by which a manager could tell, by actual demonstration, the per item cost of running his branch, there would be a much greater incentive to charge fair rates for services rendered. Any manager is willing to forgo a profit on the chance of getting new business, but if he really understood the actual cost to his branch of the work done, he would see things from a different angle. It would tend to stabilize fair rates. The average man is reasonable, and provided he is satisfied no one else is paying less, he is willing to pay a fair price for what he wants. There is no objection to the rates charged by the express companies for remittances. They are, on the average, higher than those charged by the banks, yet the greater volume of this business goes to the express companies. There are, of course, other reasons for this, but one great factor is the standardization of the rates, which are printed on the orders plainly and are the same for all.

The idea of a general discussion on these subjects came from a plan worked out in the United States on similar lines, though for a different object.

When that country entered the war it was as unprepared as we were in 1914. To remedy this there was formed, among others, a committee on inventions. To it suggestions poured in until it was literally swamped. Among so many, there were ideas, good, bad and indifferent, and in order to be able to utilize the first, it occurred to a prominent engineer that there were many engineers throughout the country who for various reasons were unable to enlist, but who would be glad to give their spare time to national work. The suggestion appealed to the heads of the War Council, and the leading engineers, and was tried out. The problems were set out in the form of engineering problems and sent to the secretaries of the various societies throughout the country, and they in turn distributed them to their members. The idea was that, with a large number of different men working separately on the various problems, some one among them would be likely to hit on the practical solution, and it is understood that the results were satisfactory.

In connection with banking problems, there is no reason to doubt but that similar satisfactory results would be obtained, and in any event if the only effect was to arouse interest among the members of the staffs of the Canadian banks, it would more than justify any expenditure it is likely to cost.

CANADIAN HAIL UNDERWRITERS' ASSOCIATION

At the annual meeting of the Canadian Hail Underwriters' Association, held in Regina on November 20th, W. A. Smart and H. H. Campkin, both of that city, were elected chairman and secretary, respectively. Mr. Campkin has been secretary for some time past. H. E. Anderson, of Moose Jaw, was elected vice-president and the following will constitute the executive for 1920: Manitoba representatives, W. H. Hurd and W. J. Wilcox; Saskatchewan, C. W. Bolton and the chairman; Alberta, J. H. Redding and J. H. Johnson. Figures were submitted showing that the companies had had a varied experience this year, the loss ratio ranging from 45 to 120 per cent. of the premium income. Thirty-two of the thirty-five companies doing business in the three provinces were represented.

1920

MONETARY TIMES ANNUAL

YEAR after year the MONETARY TIMES ANNUAL finds a most cordial reception at the hands of business and financial interests in Canada. Its intrinsic value as a work of reference is recognized in the offices of financial and commercial houses not only throughout Canada but in all financial centres of the world—in fact, wherever there are those who have investment and commercial interests in Canada.

The 1920 Annual, on which our editorial organization is now at work, will contain statistics covering banking, clearing houses, insurance, bonds, dividend records, fire losses, war finances, loans, exports, imports, etc., which it would be almost impossible for anyone to gather together without an expenditure of much time and effort.

Orders for advertising space are now being received for this issue. The earlier orders are received the better can we serve you in the matter of position.

Read what a few of Canada's leading men of affairs have to say concerning the *Monetary Times Annual*:

"Its contents are always well chosen and constitute what is probably the best record available of Canadian financial affairs during the year."—SIR FREDERICK WILLIAMS-TAYLOR, General Manager, Bank of Montreal.

"It certainly is a mine of information presented in an interesting and attractive manner, not only, as you say, of current interest, but of value for reference. The volume will have its place on the shelves of the President's bookcase."—L. HENDERSON, Private Secretary to T. B. Macaulay, President of Sun Life Assurance Company of Canada.

"The information which it contains is of considerable value to this Department."—HON. EDWARD BROWN, Provincial Treasurer, Manitoba.

"It is always the most welcome of annual reviews which reach our office."—A. L. CROSSIN, Oldfield, Kirby & Gardner.

"You are to be very much congratulated on the general make-up. Certainly any student of Canadian affairs has, as a result of your publication, a very useful compendium."—J. FRATER TAYLOR.

"For many years I have kept *The Monetary Times* Annual for reference. It contains a mass of facts, and facts after all are more influential than opinions. I regard this particular issue of *The Monetary Times* as of real national value. For all those who are interested in industrial and national questions it gives information which it would not be easy to find in as compact form elsewhere."—SIR J. WILLISON, President, Canadian Reconstruction Association.

"The Annual is replete with valuable information and instructive and interesting reading."—D. C. MACAROW, General Manager, The Merchants Bank of Canada.

"I found most of the articles very interesting and instructive. They form a reference library upon financial topics that in so far as I am concerned will be turned up and consulted many times during the coming year."—D. MCEACHERN, Huron and Erie Mortgage Corporation.

"An admirable compendium of very useful statistical and other information, together with analyses and estimates by many of the best informed and most far-sighted of the business men and students of economic conditions in the country."—DR. ADAM SHORTT, Ottawa.

"We have received two copies of *The Monetary Times* Annual for 1919. We find this publication of yours very useful for reference, and wish to compliment you on the manner in which it is got up."—R. M. JELLETT, Assistant Manager, Royal Trust Company.

"There is nothing that I have seen in Canada that can for a minute compare with it in the valuable information compiled."—J. R. DAVISON, Commissioner, Vancouver, B.C.

ANALYSIS OF SASKATCHEWAN FINANCE

The Citizens' Research Institute has now issued Pamphlet number two on the cost of government in Canada. This deals with Saskatchewan. The first, dealing with Alberta, was quoted in *The Monetary Times* of September 12th. The grouping is somewhat different in each case, some items showing revenue from sources, and others revenue from departments, etc.

Saskatchewan's revenue for the financial year 1916 is analysed as shown in the first table, and the expenditure is given in the second table.

Regina, the capital, is taken as a typical municipality, and its income and expenditure for 1917 are shown herewith. Combining these results with the Dominion expenditure, the following is the per capita cost of government in Saskatchewan:—

Provincial (1916-17)	$ 8.31
Municipal (1917)	33.26
National (1917)	16.40
Total	$57.97

SASKATCHEWAN REVENUE (1916-17)

Dominion of Canada	$1,983,721	or 35.2%
General fees, fines, licenses, etc.	1,445,448	“ 25.7%
Treasury department	820,725	“ 14.6%
Public works department (including $311,871 refund)	376,831	“ 6.7%
Taxation of corporations and companies	304,215	“ 5.4%
Highways department (including advance, $137,111)	141,598	“ 2.5%
Agricultural (including $40,000 refund)	83,337	“ 1.5%
Succession duties	69,996	“ 1.2%
Education department	41,802	“ .7%
Municipal department	7,237	“ .1%
Other items	357,000	“ 6.4%
	$5,631,910	100%

SASKATCHEWAN EXPENDITURE (1916-17)

Civil government, legislation and administration of justice	$1,263,597	or 22.5%
Public debt charges	1,156,928	“ 20.7%
Education	978,360	“ 17.4%
Public works	795,653	“ 14.0%
Agriculture and statistics	220,203	“ 4.0%
Bureau of public health	205,496	“ 3.7%
Neglected children	40,015	“ .7%
Other expenditures (including public works advance)	943,720	“ 17.0%
	$5,603,972	100%

SPECIAL FEATURES

The expenditure on general education was 17.4 per cent. of the total expenditure.

The expenditure for public health was 3.7 per cent of the total expenditure.

According to the Canada Year Book, the per capita provincial expenditure of Saskatchewan for 1916-1917 was $8.31.

REGINA INCOME (1917)

(Including surplus from preceding year. Revenue from public service enterprises is excluded.)

Taxation (General)	$585,743.77		
Taxation (Public schools)	273,526.27		
Taxation (Separate schools)	37,904.03		
Taxation (Libraries)	17,437.38	$ 914,611.45	or 68.7%
Miscellaneous departmental revenues		328,486.40	“ 24.7%
Surplus, 1916		87,647.96	“ 6.6%
		$1,330,745.81	100%
1917 deficit (not including public utilities)		533.05	
		$1,331,278.86	

REGINA EXPENDITURE (1917)

General government	$ 232,384.98	or 17.5%
Education	328,867.68	“ 24.7%
Protection of persons and property	137,674.17	“ 10.4%
Highways	127,061.55	“ 32.1%
Health and sanitation	148,614.30	“ 11.1%
Charities and correction	10,916.31	“ .8%
Recreation	45,729.87	“ 3.4%
	$1,331,278.86	100%

(This represents an expenditure per head of population of about $33.26 (the population being taken as 40,000, the estimate for 1917 as given in the Regina Municipal Manual). If 30,213—the latest official population figures as given by the Dominion Census 1911—were taken, the per capita expenditure would be $44.06.)

CANADIAN LIFE INSURANCE OFFICERS

The annual meeting of the Canadian Life Insurance Officers' Association was held in Toronto on November 21. There was a good attendance of members from the different cities of the Dominion and several important questions were discussed. At the close of the session the election of officers for the ensuing year took place, when George B. Woods, president and managing director of the Continental Life, was elected president, in succession to C. C. Ferguson, managing director of the Great-West Life, the retiring president; J. B. McKechnie, managing director of the Manufacturers Life, was elected first vice-president; and J. F. Weston, managing director of the Imperial Life, second vice-president. D. E. Kilgour, actuary of the North American Life, was re-elected secretary. J. B. McKechnie, first vice-president, will leave early next year on an extended trip to the Orient, visiting his company's agencies in China and Japan.

PROGRESS OF ALBERTA IRRIGATION PLANS

Arrangements for a comprehensive irrigation scheme in Alberta have now been completed, following meetings between those directly interested and the Dominion and provincial governments. Reviewing what has been done, G. R. Marnoch, president of the Lethbridge Board of Trade, who recently returned from an extended visit to Scotland, said a few days ago:—

"When we recollect that it is less than a year ago that our farmers were beginning to take an interest in the possibilities for getting irrigation water for the 350,000 acres south and east of Lethbridge; and that at the middle of June this year Premier Stewart of Alberta, and Hon. Arthur Meighen, minister of the interior for the Dominion, were only beginning to reach an understanding as to the various responsibilities of their governments, there is some cause to be pleased with the progress that has been made—although we would all have been glad to have seen even more. The educational processes that had to be gone through have proceeded very well. The results from farming under irrigation on the long-established 120,000 acres under water at Magrath, Raymond, Coaldale and Lethbridge this year have been splendid. The 17,000-acre extension of this system at Taber is now under construction. The 100,000-acre Lethbridge northern district has been fully organized and construction should be started in the spring; while the United Irrigation district, west of Cardston, is also getting near the actual construction stage."

Referring to seed grain loans, he said there should be no hesitancy in meeting legitimate wants. He pointed out that of the twelve million dollars advanced in the west in 1914-15, only three and one-half millions went to Alberta. The amounts advanced in the Lethbridge and Medicine Hat districts totalled $2,200,000, of which $1,900,000 has been repaid.

Bank of Montreal

Annual General Meeting Held
1st December, 1919

The 102nd Annual General Meeting of the Shareholders of the Bank of Montreal was held in the Board Room at the Bank's headquarters.

Amongst those present were:—

D. Forbes Angus, R. B. Angus, S. M. Baylis, E. W. Beatty, K.C., H. W. Beauclerk, D. R. Clarke, Colonel Henry Cockshutt, Huntly Drummond, Edward Fiske, J. Jeffrey Fiske, C. J. Fleet, K.C., Hon. Geo. G. Foster, K.C., G. B. Fraser, Dr. Wm. Gardner, Sir Charles Gordon, G.B.E., J. Maxtone Graham, C.A., Lt.-Col. G. R. Hooper, C. R. Hosmer, L. Julien, Harold Kennedy, T. Marion, Chas. Meredith, Sir Vincent Meredith, Bart., W. R. Miller, Lt.-Col. Herbert Molson, M.C., S. Geo. McElwaine, Wm. McMaster, Campbell Nelles, Hugh Paton, John Patterson, Alfred Piddington, Henry E. Rawlings, James Rodgers, A. G. Ross, Bt., Hon. Lord Shaughnessy, K.C.V.O., E. P. Winslow.

On motion of Mr. R. B. Angus, Sir Vincent Meredith was requested to take the chair.

Mr. C. J. Fleet, K.C., moved, seconded by Mr. H. W. Beauclerk, that Lt.-Col. George R. Hooper and Mr. W. R. Miller be appointed to act as Scrutineers, and that Mr. C. H. Cronyn be the Secretary of the meeting.

This was carried unanimously.

Sir Vincent Meredith, the Chairman, then called upon the General Manager, Sir Frederick Williams-Taylor, to read the Annual Report of the Directors to the Shareholders at their 102nd Annual General Meeting, held Monday, December 1st, 1919:—

THE PRESIDENT'S ADDRESS

Sir Vincent Meredith, in moving the adoption of the Report of the Directors to the Shareholders, said:—

General trade in practically all branches has been active and profitable during the year and the Bank has participated in the general prosperity. The balance sheet shows profits in moderate proportion to the resources employed and yet, I trust, not unsatisfactory to the Shareholders. That reaction from the feverish activities and high prices produced by the vast conflict which so many apprehended, has not occurred, nor can it be said to be impending. The feeling as to the future is less optimistic than it has been, but the great pressure on our agricultural and manufactured resources caused by home and foreign demand shows no sign of abatement.

Though marked by a high degree of prosperity, the year has also been one of world-wide labour unrest, with demands for increased wages and shorter working hours, culminating in strikes and disorder, with resultant decreased efficiency, lessened production and greater cost of output. This unrest may in a measure be attributable to unsatisfactory pre-war conditions, but probably in a greater degree is the result of unsettlement due to the abnormal nervous strain of the great war.

In one important respect, normality has come again—the mercantile sea-going tonnage of the world has been restored to pre-war dimensions and is rapidly being increased, an accomplishment that should soon permit of regularity in the carriage of overseas trade and in a reduction in freight rates and cheapened cost of commodities.

The high cost of living, about which so much is being said and for the relief of which so many remedies are suggested, is a world-wide, not a local, condition. It is due in part to the large volume of currency now in circulation, which to a considerable extent must be regarded as credit expansion, largely the result of Government borrowings and the disbursements of the proceeds thereof, together with post-war activity.

The deprivations of the past five years have induced an orgy of self-indulgent expenditure by the general public, to which has been added lavish outlay by many people who amassed fortunes during the war. All these are contributing factors, but they affect to only a limited extent the high costs, which are without doubt the direct result of the pressing demands of European countries for commodities of every nature at abnormally high prices. We cannot, therefore, expect any considerable amelioration in living conditions until the world's demands are satisfied and Europe once more returns to an exporting basis. Every effort is being made to this end, but it must of necessity come gradually. Food prices will without doubt be the soonest overcome, and I think we may look forward confidently to a reduction in the cost of all commodities both at home and abroad after another harvest, to be followed in natural sequence by a reduction to some extent in the scale of wages; but the process promises to be gradual, and marked and rapid declines in the near future do not seem probable.

FOREIGN TRADE WELL MAINTAINED

The foreign trade of the Dominion has been well maintained, and the outlook gives no cause for apprehension of an early recession. The latest available figures, those of the seven months ending October 31st, show imports to have been $543,670,000 and exports $688,890,000. As compared with the corresponding period last year, there was a decline of $16,400,000 in imports and of $31,200,000 in exports, a relatively insignificant decrease, while the favorable balance of trade has this year been $145,200,000. The price index of commodities not having materially varied during the periods under review, the deduction may be made that the volume of our foreign commerce has not greatly changed, although the figures of particular products have fluctuated considerably. Thus, the export of foodstuffs was larger in value by $114,200,000 this year than last, in the seven months, and the export of wood and wood products, including paper, $25,800,000 larger. On the other hand, miscellaneous exports, which include munitions, show a decrease of $141,600,000.

With the exception of the United States, the gold holdings of all the belligerent countries have been depleted during the war to meet adverse trade balances, and their economic condition has been greatly weakened, the value of the pound sterling, in terms of the American dollar, being reduced to $4, the mark to 2½c, the franc to 10c, and our own currency by 4% to 5%.

The depreciation of currency, however, is not wholly an unmixed evil, as it acts as a corrective to adverse trade balances by checking imports and stimulating exports.

In the absence of gold, large issues of paper money have been made necessary in all countries to meet the demand for a circulating medium in consequence of abnormal business activity, coupled with war expenditures. The effect has been the demoralization of all exchanges.

To restore the reserves of metal and provide an effective gold standard correcting the over-issue of paper money will take time, and can only be brought about by economy and increased exports. The stabilizing or pegging of exchange I believe to be inadvisable, owing to its prohibitive cost. In any event, it would be futile to attempt to do so until there is a cessation of Government borrowings.

CIRCULATION

The relation of gold reserve to note circulation is a question on which divergent views are held, one school of economists demanding the restoration and maintenance of an effective gold standard and the other contending that goods and services, combined with gold, form an adequate and more elastic reserve.

I am not sure that it is not the part of wisdom to depart from old notions of the rigidity of the gold reserve and recognize that we are justified in enlarging our note-issuing powers to respond to all legitimate business demands in periods of great trade activity or emergency, provided such expansion is based on self-liquidating securities. If used to cover discrepancies in revenue, it is then a form of inflation wholly unjustifiable, bringing with it, as it does, the well-known evil effect of a depreciated currency at home, besides greatly damaging our credit in the eyes of the financial world.

IMMIGRATION AND PRODUCTION

There are three indispensable factors to the upbuilding of Canada—immigration, production and exports. Immigration during the last five years has been negligible owing to the war. In the first seven months of the current fiscal year, new arrivals numbered 82,893, of whom 42,377 came from Great Britain and 35,949 from the United States. While these figures do not represent a large movement as compared with several pre-war periods, they show a gain of 51,734 immigrants, or about 166 per cent. over the corresponding months last year. After-the-war emigration of foreign-born has taken place in fairly large volume, the exact figures of which are not obtainable.

In my judgment, it is of vital importance that our unoccupied areas be settled and made productive with as much rapidity as possible, the future prosperity of the country and ability to meet our debts largely depending on increased production. It is believed that nations will not war again in this generation, and the objection to the incoming of alien people is in consequence mitigated. The combing should not, therefore, be made too fine. The economic gain of a large immigration to develop our basic industries cannot be overestimated, particularly at a time when war has left many nations impoverished in food and denuded of commodities which Canada is capable of supplying.

There is reason to believe that the policy of the energetic Minister of Immigration will be broad-based, and that its fruits will be manifested in an increasing influx of settlers upon the land, of domestic servants and of artisans and laborers. Indications are already given of a large movement in the spring from the United States into our Western Provinces, attracted by the superior productivity of our soil and its comparative cheapness, and I think we may reasonably hope for a considerable immigration from the countries of our late Allies and from the Scandinavian kingdoms.

POSITION OF NATIONAL FINANCES

The state of the national finances deserves a wider and more profound consideration than the subject appears to receive. The net debt, which before the war was $331,000,000, had on October 31st last reached the vast sum, having regard to population, of $1,785,000,000, an increase of more than fivefold in as many years. That debt is still mounting, and by the close of the current fiscal year, that is to say on March 31st next, will not be less than two thousand million dollars and probably more. The situation is a serious one, though mitigated by the fact that our debt is largely internal. We cannot go on borrowing indefinitely, and it is a certainty that we shall have to bear a much heavier burden of taxation than formerly for many years to come. To repeat the formula that has been heard so frequently, but to which, unfortunately, sufficient attention has not been paid, relief is to be found in immigration, harder work, greater efficiency, increased production and thrift. To these agencies must be conjoined rigid economy in all private and public expenditure.

There arises in this connection the question of methods of taxation, which may require readjustment to meet post-war conditions. Trade is being hampered by a somewhat penalizing excess business profit tax, and unless this impost is speedily reduced or abandoned altogether, we cannot meet unencumbered competition on equal terms. Furthermore, enterprise and expansion are stifled and foreign establishments deterred from entering the Canadian industrial field. Taxation should be so distributed that it will not have the effect of making this country too dear to live in and thereby divert intending residents to other countries.

Doing away with many exemptions and imposing taxation on all classes of the community who have the ability to pay, and placing a high tariff upon imported luxuries would, I believe, cause little hardship and considerably ease a strained financial situation, besides giving all persons in Canada a more immediate interest in the economical administration of our public affairs.

Canada can and will meet all her obligations, and of her ability to do so no more conclusive evidence need be given than the immense subscription to the recent Victory Loan.

With regard to the subject of foreign trade, it is only a matter of time before increased production will overtake domestic demands, and unless preparations are made in advance for finding markets overseas for our exportable surplus of raw materials and manufactured goods, our uninterrupted prosperity may be checked. The needs of foreign countries are great and pressing, and profitable business awaits the Canadian exporter, but it cannot be acquired unless long term credits are provided.

Our Government has been far-sighted in giving assistance in this direction, and, no doubt, is prepared to extend further aid, provided exporters, who reap the benefit, will assume a proportion of the risk.

Self-interest alone would seem to dictate that credit facilities be extended to those countries who can demonstrate their ability to pay if given reasonable time, and we would thus avoid the possibility of abrupt changes in industrial conditions and bring about a gradual return of international trade equilibrium.

I cannot close without voicing what, I am sure, is the feeling of every Canadian—that the recent visit to Canada of His Royal Highness the Prince of Wales, not only gave abiding pleasure to every class of our population, but rendered a great and memorable service to the Empire in strengthening the Throne in the affection and confidence of the people, and by drawing still closer the ties which bind the commonwealth of nations over which he is destined to reign.

THE GENERAL MANAGER'S ADDRESS

Sir Frederick Williams-Taylor, General Manager of the Bank, then made his annual address, as follows:—

Mr. Chairman and Gentlemen:—The balance sheet to the 30th October last, which I now submit for your approval, covers a round period of twelve months following the armistice.

The economic and financial difficulties that confronted the country during the war have since changed in nature, but have not disappeared by any means. There is an aftermath of problems which Canada must face and in which bankers are vitally concerned. At present there is great trade activity; yet our national debt grows apace, with attendant ills. Therefore, even with a full measure of faith in our country, I find the near future difficult to visualize. We derive a measure of consolation in comparing our lot with that of countries worse off than our own, but continguity and ambition direct our eyes towards that country to the south, which has benefited so vastly by the war.

It is no reassuring reflection that the United States has already reduced its war debt by some $800,000,000, while we confront an increase of $600,000,000 for the current year. It seems obvious, however, that though fate has treated the two countries differently, any prosperity experienced in the United States must be reflected in Canada. Our true comfort, as well as our pride, is that the Dominion did its duty in the great war as a part of the British Empire. No Canadian would have it otherwise, and therefore we face the cost with stout hearts and the future with watchful serenity.

Turning to the special features in our balance sheet and the points of interest arising therefrom, I might say, first, that the absorption of the Bank of British North America has been so smooth and complete that no ripple appears upon the surface of our affairs. We believe its friends and officers alike feel at home in the Bank of Montreal.

Since presenting the last balance sheet there has been an increase in our capital stock of $4,000,000, with a corresponding increase in Rest Account. Both items now stand at $20,000,000. The increases are primarily in connection with the acquisition of the Bank of British North America.

Shareholders of that Bank were accorded the option of taking cash or exchanging their holdings into Bank of Montreal shares on a determined basis. After the allotments had been made under this arrangement, our own Shareholders accepted the opportunity of subscribing for the limited remainder of capital shares to bring the whole up to $20,000,000. Our authorized capital is $28,075,000.

Many of our banking transactions during the post-bellum year under review were unusual in character and of special interest. They need not be described in a report of this nature. It will suffice to say that they have added to the strength and prestige of the Bank.

Our profits for the year have been satisfactory, enabling us to provide the usual return of 12% on capital and make adequate provision for doubtful debts.

NO PROFITEERING BY BANKS

It seems to me of sufficient importance to bear repeating that there has been no profiteering whatever by the banks of Canada, for the price of money has not been raised. Alone of all commodities, the cost to the borrower of loanable funds of the banking institutions of this country remains unchanged. Not only is this the case, but, speaking for ourselves, it seems only proper for the shareholders to know that in handling business entrusted to us by the several Governments during the war and since, our policy has been to charge only the narrowest of commissions and minimum interest rates. In many instances, where the services were of a war character, we have acted free of charge.

The Bank's earnings have been maintained through fuller employment of our reserves, the ratio of our liquid assets to liabilities being 67%, as compared with 71% a year ago. There has been no restriction of credit to our commercial borrowers. All legitimate applications of this nature have been granted. Also we have loaned freely to subscribers against the security of the various war loans, and to Municipal, Provincial and Federal Governments as required.

UNUSUAL FREEDOM FROM LOSSES

It is pertinent to mention that, in the ordinary trade of the country, money has been made so easily and with so little risk since 1914 as compared with ordinary times, that our Banks, in turn, have operated with unusual freedom from losses. As a measure of prudence, however, we provide for contingencies, a policy with which, we feel sure, you will be in accord.

The practical evidence of Canada's fortunate trade conditions lies in the fact that commercial failures for the twelve months ended 31st October were 766, as compared with 904 for the previous coresponding period and with 1669 in our bank year 1912-1913.

That outstanding subject, the high cost of living, has been dealt with by your President, but I might add that the inevitable decline in prices is at least nearer, and it is to be hoped that the delay is not lulling dealers into the erroneous belief that the standards of these last few years will continue indefinitely. Misconception on this point would constitute a menace alike to borrower and banker. It seems certain that food prices will drop presently and that all commodities must decline in price; therefore, great care and scrutiny of credits on the part of bankers and other business men are imperative.

Our savings deposits continue to grow satisfactorily both in volume and in number. The fact that we are custodians of deposits of a special nature inevitably causes our total figures to fluctuate heavily. Our total deposits are $442,000,000, being $27,000,000 less than a year ago. Our deposits ten years ago were $173,000,000.

The total deposits of all Canadian Banks are now $2,360,000,000, as compared with $2,085,000,000 a year ago and $832,000,000 ten years ago.

Our current loans in Canada also vary largely in volume. The total is now $164,000,000, as compared with $146,000,000 at the corresponding date last year.

Our provincial and municipal borrowers continue to exercise caution in the matter of capital expenditure. Loans in this class aggregate $15,000,000.

The Bank's premises account has been reduced by $500,000 through the sale of certain banking properties not required.

Among our assets, the item Dominion and Provincial Government securities, including loans to the former, now stands at $64,000,000. A year ago the total was $46,800,000. The total holdings of all the Banks, as indicated by the Government return of October 31st, was $361,200,000.

PROBLEMS OF EXCHANGE

The premium on New York funds, the increase in our national debt, and in our Canadian currency circulation, are matters of deep interest and should be studied by all.

The purchasing power of the Canadian dollar in the United States has decreased, as reflected in the premium on New York funds. A year ago it cost two dollars to send one hundred dollars to the United States of America; to-day the cost is four dollars and seventy-five cents.

Exchange is now a subject which, as an English authority states, "insists on bringing itself to the attention of all kinds of people who hitherto regarded it as a sort of mysterious cryptogram with which they had no practical connection." In elementary terms, more money continues to flow out of Canada than comes in, thus creating a net balance against us after taking all transactions into account. New York being our natural clearing house for transactions with Great Britain and the rest of the world, it is clear that the present extraordinary cost of sending money to the United States would not exist but for the fact that we cannot spare the gold with which to pay the net balance in question against this country, while, in common with all countries, our legal tenders are naturally not current abroad. We should have precisely the same conditions between our own Provinces, were it not that our legal tenders and bank notes are current throughout the Dominion.

It is true the balance of trade was in favor of Canada to the extent of $340,000,000 for the year ended 31st October last, but whereas we paid for all our purchases abroad, we have, in the same period, shipped goods on credit to England and Continental countries to the extent of many millions not easy to estimate, besides sending out of Canada annually about $200,000,000 interest on our recorded indebtedness abroad, mainly to Great Britain and the United States. These facts alone would not create an adverse exchange to the extent that exists, but, in addition, there are the invisible earnings in the Dominion of foreign business corporations, chiefly American, seeking return to proprietors abroad. The disadvantage Canada is under in respect to the premium on New York funds will last until the ebb and flow of such funds are equal. Repayment to Canada of the moneys, aggregating $420,000,000, owed us by Great Britain and the Allies, would quickly cause the premium in question to disappear. We naturally shall be repaid in the fullness of time, but it is well to bear in mind that an alleviation of the penalty can as surely be found by diminution of imported luxuries as it is certain that the penalty, in part, is caused by such importations. Also, the situation could be relieved by borrowing in the United States, but this course is to be deprecated and would not be a cure, but merely postponement of payments. As indicated by your President, the true remedy lies in increased production and the economy that would be reflected in resumption of those personal sacrifices of pleasure made during the war. It is here in place to remark that in the eyes of Europeans the people of North America are extravagant and wasteful.

Since the outbreak of war, Canada has created fresh domestic credit instruments in the form of bonds of $2,100,000,000. The increase of circulation and of bank deposits followed as a natural sequence.

Our Bank and Government note circulation is now $532,000,000, as compared with $236,000,000 in 1913, an increase of $296,000,000. In the same period the total gold held in Canada has increased $60,000,000.

GOVERNMENT FINANCING

Canadian Provincial Government, municipal and industrial public loan flotations, during the twelve months under review, were $117,500,000, of which, in round figures, $90,000,000 was placed in the United States. The discount on the Canadian dollar attracted material American buying of such securities, especially of those domiciled in New York.

In Great Britain the dollar exchange situation is the cause of much anxious thought. Meanwhile, the present low value of the pound sterling, in America encourages special operations such as the purchase in London of Canadian and American securities. These operations help to correct the abnormal conditions and, granted a reasonable attitude on the part of labor, there is ground to justify confidence regarding future financial and industrial conditions.

Considering the time, money continues plentiful in England at moderate rates, and there is no thought on the part of London of surrendering an historic position as the financial centre of the world.

As in the previous years of war, our London office has been cut off from the important business of issuing loans for Canadian borrowers, but, on the other hand, it has increased greatly in importance and utility as an administrative centre for our foreign business, and is steadily growing in great value to our branches on this side of the water.

The Dominion Government, in July of this year, borrowed $75,000,000 in New York for refunding purposes. The terms paid by the Government were onerous yet unavoidable. Evidence that the price of issue was in keeping with American market conditions lies in the fact that there has since been no rise in the quoted price. Incidentally it may be mentioned that Canada secured as good terms as in the case of the recent British loan of $250,000,000 in the same market.

A sign of the times is the buying power for first-class securities created throughout the Dominion. This is a healthy and desirable condition induced by Government war loans and war savings certificates. It is vital that Canadians should recognize the virtue of saving. As between production and thrift, though they should go hand in hand, the latter is fundamental and leads naturally to the former.

We have opened 19 branches during the year. We will open more as and when circumstances justify.

Our Paris office is well established in attractive premises, and has already proved its value locally and as a link between our extensive European connections and London, New York, Chicago, San Francisco and Canada.

Our branch in Trafalgar Square, London, which was opened to provide extra facilities for Canadian soldiers, has been closed and the business merged in our Waterloo Place office. It is our hope that our many friends who were familiar visitors in uniform at the latter will continue to make full use of our facilities when they revisit London, whether in a military or civilian capacity.

It will interest you to know that on my recent trip to the Pacific Coast, when I travelled nine thousand miles in visiting various branches of the Bank, I met some 110 of our Managers, and returned more than ever satisfied with the personnel, the intelligent loyalty and devotion of our ever-increasing staff of officers.

Such meetings are advantageous to the Bank and an inducement also to close relations between the Bank and its friends at distant points.

POTENTIAL WEALTH OF WEST

It is impressive and satisfying to view the Dominion's greatest quick asset, the rich wheat areas of our three Western Provinces, at harvest time. While this year the yield was not up to the mark, the Western farmers had much to be thankful for.

In British Columbia, one is struck by the confidence of the people in the future of their rich and beautiful Province, with its wonderful climate. It is a healthy sign that the men of affairs in the West hold such sane views concerning the outlook locally and for the Dominion at large.

I hope that time may presently permit me to visit other divisions, as I did British Columbia and the North-West.

In concluding, I have no hesitation in expressing the belief that the affairs of the Bank have never been in a healthier state. Our domestic business is expanding satisfactorily, our foreign branches and connections have been adequately extended to meet the development of the country's trade, and, what is most important, we are well equipped in point of staff. Altogether, I feel that we are well prepared to meet any conditions and contingencies that may arise.

ONTARIO.

Manufacturing in Ontario has been limited only by shortage of supplies and disturbances in labor. Government credits for goods sold to Europe have stimulated manufacturing, and domestic demands have been insistent. New industries have been started, and a number of successful manufacturing concerns in the United States have been making enquiries with the intention of locating in Ontario.

Ontario farmers have been steadily bettering their position in recent years, installing modern equipment and improving their modes of living. The past year has been one of fair crops and high prices. A wet spring was followed by an exceptionally dry summer, and grain crops, with the exception of fall wheat, fell below the average. Root crops were good; corn and tomatoes were a record yield; the season was poor for all fruit except grapes. Cheese production showed a falling off. There is a shortage of hogs; sheep raising is on the increase. The cattle situation is somewhat unsettled, owing to the limited amount of feed available for carrying through the winter.

The production of lumber has been seriously reduced owing to shortage of labor, 1919 has been an excellent marketing year, with heavy sales to Great Britain and the United States, and a steady domestic demand for all classes of lumber. Prices have been unusually high, there is no accumulation of stocks on hand, and notwithstanding the scarcity of labor and increased costs of operating, the year has been a successful one. Pulp and paper have been in large and increasing demand, with soaring prices for the latter.

Mining production during the year has been curtailed. The demand for nickel fell off after the Armistice; strikes lessened the silver output. Both these situations are improving and larger production has taken place at the gold mines.

Both wholesalers and retailers report it easy to sell goods. Credits are shortened and bad debts negligible.

Larger expenditures were generally made by municipalities this year in an effort to overtake works postponed during the war.

Population shows a general increase, with a tendency to drift to urban and manufacturing centres.

Values in real estate are steadily increasing. So little building took place during the war that there is now a general shortage, particularly in dwelling houses, and in consequence there is much activity in real estate and an improvement in the building trades.

There has been a continued extension in hydro-electric power during the past year, and works at Nipigon and Chippawa, as well as at other places less important, will within the next two years add very largely to the available power for manufacturing and other purposes throughout Ontario.

Generally speaking, the year has been one of great activity throughout the Province.

THANKS TO OFFICERS

Mr. James Rodger then moved, seconded by Mr. John Patterson, that the thanks of the meeting be presented to the President, the Vice-President and Directors, for their attention to the interests of the Bank.

The motion was carried, with applause.

The President:—"On behalf of the Vice-President, the Directors and myself, I thank you for your continued expression of confidence, and for the kind manner in which this motion has been presented and accepted by the meeting."

Mr. E. W. Beatty moved, seconded by Sir Charles Gordon, that the thanks of the meeting be tendered the General Manager, the Assistants-General Manager, the Superintendents, the Managers and other officers of the Bank, for their services during the past year.

The motion was adopted unanimously, with applause.

GENERAL MANAGER'S REPLY

In replying to this the General Manager, Sir Frederick Williams-Taylor, said:—

"Mr. Beatty, Sir Charles Gordon, please accept my hearty thanks and the thanks of the Assistants-General Manager, and Staff at large, for your courteous commendation of our services during the past year.

"I am glad to say our staff is now recovering from the overwork and lack of holidays to which they were necessarily subjected and to which they willingly consented during the war.

"As for our men who served with the colors and survived, 1,182 in number, 663 have already been reinstated at the advanced salary they would have received had they not been absent on leave. A few have sought other employment, while some are yet to be heard from. Of the total who joined the colors, it is my sad duty to now record the fact that 223, or 16 per cent., gave their lives for their country. No words of tongue or pen can fully express our pride in, or our admiration for, these gallant young crusaders. It must suffice to say that their names are not merely written in the records of this Bank and in the history of the Empire they served so well, but 'live on far away, woven into the fabric of other men's lives.' Such dead are honored with unchallenged admiration."

The Board of Directors was re-elected as follows:—

D. Forbes Angus, R. B. Angus, J. H. Ashdown, E. W. Beatty, K.C., H. W. Beauclerk, Colonel Henry Cockshutt, H. R. Drummond, G. B. Fraser, Sir Charles Gordon, G.B.E., C. R. Hosmer, Harold Kennedy, William McMaster, Sir Vincent Meredith, Bart., Lieut.-Col. Herbert Molson, M.C., Rt. Hon. Lord Shaughnessy, K.C.V.O.

At a subsequent meeting of the Directors, Sir Vincent Meredith, Bart., was re-elected President, and Sir Charles Gordon, G.B.E., was re-elected Vice-President.

BUSINESS FAILURES INCREASED

The following compilation shows failures in the Dominion for the four weeks in November, as reported by R. G. Dun and Co., Toronto:—

SEVERAL PROVINCES FACE MORE EXPENSE

The cost of government is increasing and every year sees an addition to the salary expenses of the provinces. In British Columbia the salary schedule of the whole civil service has just been regarded by Civil Service Commissioner MacInnes. The new schedule shows average salaries to be paid to different grades of employees. The comptroller-general, A. N. Mouatt, has however taken the view that the new schedule does not comply with the Civil Service Act.

No provision has been made in the Manitoba estimates for a bonus to civil servants, Hon. Edward Brown, provincial treasurer, stated a few days ago, and he indicated that the matter would have to come before the legislature for consideration. The 10 per cent. the civil servants were asking would mean an expenditure approximately of $450,000, he stated. No definite estimate, however, could be made of the amount until after the matter had been gone into on the return of Attorney-General Johnson from the International Labor Conference at Washington.

On November 28 Premier Stewart of Alberta told a deputation of the Civil Service Association, that there would be no further increases in salary to government employees. Bonuses and higher pay have recently been granted, but do not meet with approval, so a delegation waited on Mr. Stewart. The premier announced that his decision was final.

NOVEMBER BANK CLEARINGS

The following are the bank clearings for the month of November, 1919, compared with November 30th, 1918:—

	Week ended Nov. 30, '19.	Week ended Nov. 30, '18.		Changes.
Montreal	$ 615,325,528	$ 509,093,163	+	$106,232,365
Toronto	414,730,544	295,575,307	+	119,155,237

Some Canadian Reconstruction Problems*

United States Life Companies Doing Business in Canada Lose Exchange on Premiums From Canada—Earnings on Canadian Investments Are High, and Exchange Can Partly Be Remedied by Further Investments Here

By Sir HENRY DRAYTON

THE reconstruction problems of every country are diverse and many. To attempt to deal with them generally within the compass of a brief paper would be entirely impossible unless the treatment given were indeed superficial. Viewed from many aspects, the problems of reconstruction are moral rather than material. In so far as material resources are concerned, Canada has no need for concern. Over and above all present agricultural, mining, lumbering, and fishing activities the untouched natural resources of the country remain in volume and indeed in greater volume than they have up to the present been utilized. While it is true that Canada's debt to-day stands approximately at a total of two billions of dollars with heavy resultant interest charges, while it is true that the claims of the returned soldier, costs of pensions and disability claims are heavy, and will all in the nature of things continue for many years to come, it is also true that the country and the people as a whole are infinitely better off than they ever were before.

It took the war to discover for us just what could be done and to realize to some extent, perhaps only to a small extent, the possibilities and greatness of the country.

To illustrate, in the year 1913 our export of foodstuffs and fodders amounted to $194,930,254 and at the close of the last fiscal year to $467,625,311. Our manufactured exports in 1913 amounted to $43,692,708 and at the end of the last fiscal year to $549,284,268.

The progress of Canada both agriculturally and industrially has been marvellous. But the great underlying principle of reconstruction as it appeals to us generally is rather that reconstruction which will make for a better and improved state of society as such, a reconstruction which, while preserving the right of initiative and proper incentive for effort, will at the same time to the fullest extent possible afford equality of opportunity for everybody.

Deeply Interested in Canada

There is, however, a material question which in the conduct of our public business of the future I venture to think you, firstly as presidents of life insurance companies and secondly as American citizens, are interested in. In the first instance, as life insurance presidents, I would confidently claim that you have a real interest in Canada and a constantly increasing interest. I note that in 1898 your insurance companies had in force in Canada $105,708,154; in 1908 the amount of business in force was increased to $193,087,126; but the extent of that business of later years has been much more rapidly increased, as your business in force in Canada in 1918 amounted to the large sum of $619,261,713. Out of a total insurance in force at that time of $1,785,061,273 your companies had over one-third of the total business.

But not only are you interested in the volume of business but you are also interested in your Canadian assets which have grown with the growth of the business and which I am pleased to understand have formed remunerative investments. These assets in 1898 were $23,563,824; in 1908, $46,762,534; and in 1918, $98,607,188. As insurance presidents you have a very real interest in Canada. One of the greatest aids to sound national status is that each and every citizen to the fullest extent possible should have a personal direct property interest in his country. Outside of a Canadian 5½% Victory Bond, which of course I place higher than any other security—a security of greater value not only to the citizens but to the country than any other—there is no way in which our average citizen can make his first investment easier than by investing twenty or thirty dollars in a thousand-dollar policy. Life insurance indeed tends to stabilize financial and industrial conditions. It tends to, where adopted in large measure, prevent distress and suffering and constitutes a real protection to the worker and his dependents.

I feel that to-day we require the fullest extension, the fullest production, the greatest amount of useful work and the practice of economy and thrift everywhere. Life insurance agents are particularly at home in preaching thrift. They can do much to instil into our people thrift—that essential prerequisite to national reconstruction. Personally I well recollect that the first money I ever saved was that rendered necessary by a twenty-pay life insurance policy. May your endeavors to make Canadian people money-savers be most successful.

Very intimately connected with the problem of reconstruction is the bettering of conditions of public health. This is a matter in which the insurance companies are particularly interested, and as I understand it many of you have already commenced an educational campaign amongst your policyholders. You are in a position, with your efficient organizations, to aid very largely in propaganda on better health conditions, of which both our countries are in need. Your efforts in this regard will be doubly pleasing to you, as while bettering and aiding the living conditions generally to the great national benefit you will also be securing a greater longevity in the lives insured, bettering your risks, and increasing the profits of the policyholders and of your shareholders.

Per Capita Insurance is Low

There is much room for a great advance in insurance in Canada. Assuming a population of eight millions, the life insurance in force in Canada to-day is but approximately $225 per capita. Canadians are under-insured and life insurance companies have a most useful public task ahead of them in bringing up the average protection for the families of the workers of Canada, but increased insurance like every other good thing depends upon ability to pay premiums, depends upon prosperity. While Canada is prosperous, the question of the matter of exchange between our respective countries is something that I am sure you do not view with complacency. Your insurance premiums are paid in Canadian dollars and as a result of the trade balance existing between the countries the Canadian dollar is at the moment at a discount, and a serious discount when the value of the Canadian dollar, the prosperity and assets of the country are considered. The depreciation while very real is merely the effect of present trade balances and does not reflect in the slightest upon the intrinsic value of Canada's obligations. The depreciation of the Canadian premium in New York funds is simply owing to the fact that we do too much business with you and you do too little business with us.

I wonder if the extent of Canada's purchases in the United States are realized. In South America you have a whole continent, you have been doing business with that continent for many years, you have trade commissions and trade representatives and, I think, have covered that field with characteristic American energy. Your statistics show that your total trade with all South American countries amounted for the year 1918 to the sum of $881,977,051, with a trade balance against your country of $252,859,463. In the same

CONSOLIDATED STATEMENT OF SURPLUS AND PROFITS SEPTEMBER 30th, 1919

Combined Profits for the Fiscal Year ending September 30th, 1919		$2,993,470.61
Deduct:		
Provision for Depreciation		568,718.84
Profits before charging Interest		$2,424,751.77
Deduct:		
Interest on Bonds Outstanding	$493,910.52	
Interest on Bank Loans, etc.	43,206.55	
		537,117.07
Profits for the Fiscal Year, subject to Government Taxes		$1,887,634.70
Combined Surplus of the Canadian Car & Foundry Company, Limited, and its subsidiary Companies at Sept. 30, 1918, subject to Government Taxes for year ended that date		5,830,171.86
		$7,717,806.56
Deduct:		
Dividends paid—8¾ per cent. on Preference Stock		656,250.00
Surplus carried forward, September 30, 1919, subject to Government Taxes		$7,061,556.56

CONSOLIDATED BALANCE SHEET, SEPT. 30th, 1919

ASSETS

COST OF PROPERTIES:		
Real Estate, Buildings, Machinery, Patents and Goodwill, as at Sept. 30, 1918	$21,376,024.36	
Additions during Fiscal Year	997,939.83	
		$22,373,964.19
DEPOSITED WITH MONTREAL TRUST COMPANY:		
Towards the redemption of the outstanding Bonds of the Montreal Steel Works, Limited, invested in Securities		100,000.00
CURRENT ASSETS:		
Inventories of manufactured and partly manufactured product, materials and supplies, at or below cost	$7,394,225.51	
Accounts and Bills Receivable (Less Reserve)	2,326,184.33	
Temporary Investments—Government and other Securities	1,903,297.87	
Cash in Bank	814,915.58	
		12,438,623.29
DEFERRED CHARGES:		104,848.14
		$35,017,435.62

LIABILITIES

CAPITAL STOCK:			
Preference: Seven per cent. cumulative and participating: Authorized and Issued—75,000 Shares of $100 each			$7,500,000.00
Ordinary:			
Authorized — 50,000 Shares of $100 each		$5,000,000.00	
Issued—49,750 Shares of $100 each			4,975,000.00
BONDED DEBT:			
Canadian Car & Foundry Company, Limited:			
First Mortgage Thirty Year Six Per Cent. Sinking Fund Gold Bonds, due 1939 (Authorized $7,500,000)	$6,275,000.00		
Less: Redeemed by Sinking Fund	1,051,866.60		
		$5,223,133.40	
Canadian Steel Foundries, Limited:			
First Mortgage Collateral Trust Bonds Six Per Cent., due 1936 (Authorized $5,000,000)	$3,650,000.00		
Less: Bonds held in escrow by Montreal Trust Company towards redemption of Montreal Steel Works, Ltd., Bonds	742,069.34		
	$2,907,930.66		
Less: Retired by Sinking Fund	690,288.00		
		2,217,642.66	
First Mortgage Six Per Cent. Gold Bonds, due 1940, of the Montreal Steel Works, Limited		742,000.00	
			8,182,776.06

Surplus, as per attached statement, subject to Government Taxes			7,061,556.56
			$35,017,435.62

Note.—Excluding amount due October 10, 1919, as above 24½ per cent. of Preference Dividends remain unpaid.

Approved on behalf of the Board:
W. W. BUTLER, Director.
K. W. BLACKWELL, Director.
L. A. PETO, Comptroller.

AUDITORS' REPORT TO THE SHAREHOLDERS:

We have examined the Books and Accounts of the Canadian Car & Foundry Company, Limited, and its Subsidiary Companies, for the year ending September 30, 1919, and have obtained all the information and explanations which we required; and we certify that, in our opinion, the above Balance Sheet at September 30, 1919, is properly drawn up so as to exhibit a true and correct view of the state of the combined affairs of the Canadian Car & Foundry Company, Limited, and its Subsidiary Companies, according to the best of our information and the explanations given to us and as shown by the Books of the Companies.

PRICE, WATERHOUSE & CO.,
Auditors.

Montreal, November 11, 1919.

year your business with Canada amounted to $1,216,744,359 and resulted in a favorable trade balance of $344,235,455 to your country. In 1919 the United States business with all South American countries was $969,276,505, the balance of trade against you being $167,173,303. On the other hand, for the same year with Canada your total trade amounted to $1,282,677,849 and the balance of trade in your favor amounted to a sum no less than $344,768,213. With such a balance against us and with the further fact that Canada is doing some business overseas, settlement of which is ordinarily made in New York in credit instead of for cash, the reason why your Canadian premiums only net you approximately 95 cents on the dollar in New York funds is very readily apparent. While our respective countries have always very largely traded one with the other, the adverse balance of trade used not to tell so heavily upon Canada. In 1910 the adverse balance was $106,888,088 and in 1915 it was $110,289,650 and at these times of course Canada was selling overseas for cash.

That Canada is a very large purchaser in the United States and that the tendency to purchase is increasing is made very clear by the exhibit of the percentage of imports in comparison with Canada's total imports. During the fiscal year ending March 31, 1913, our imports from the United States amounted to 65.03 per cent. of the whole, but during the fiscal year ending March 31, 1919, that percentage had grown to 81.50. On the other hand, the percentage of purchases made by the United States in Canada in comparison with our total exports not only has not increased in a like ratio but has declined, as the percentage of Canadian exports to the United States in comparison with our total exports for the year ending March 31, 1913, was 39.27, and for the year ending March 31, 1919, only amounted to 37.66.

Good Field for Investment

It may be suggested that the best way of restoring the full value to your Canadian premium would be for Canada to do less purchasing in the United States, but I do not think that this solution of the subject is one which would commend itself to you as American citizens. We want to do as much business as possible with you and I think you want to do as much business as possible with us. I think we all realize that two of the very necessary essentials in any proper re-establishment are firm currencies and standard exchanges. I am quite sure that you would much sooner see the exchange situation righted by additional American purchases in Canada rather than decreased Canadian purchases in the United States. Temporarily, and from time to time, these adverse balances may be easily rectified by the investment of America's large surplus reserves in Canada, and this solution is one which is probably as much in the hands of the presidents of great American companies as in anybody's. The field for investment in Canada is very large. There is still great room in Canada for development.

Apart altogether from the exigencies of the exchange situation, I feel that little argument is necessary to interest United States life insurance companies in Canadian investments. The Canadian life insurance companies earn upon the average one per cent. higher interest than do the United States companies and this higher earning naturally materially affects policyholders' profits. The average rate of interest in your investment assets is, as I understand it, approximately five per cent. The rate earned by Canadian companies is slightly over six per cent. You can with absolute security by investing in Canadian government bonds earn one-half per cent. more than your average return, and should a higher yield be desired the Canadian municipal field offers securities as high as six per cent. If a still higher yield is desired Canadian mortgage investments can to-day be obtained at the rate of from six and one-half per cent. to seven per cent. In Canada first-class city mortgages are being placed at six and one-half per cent. and loans on farm property at seven per cent. and sometimes even at eight per cent. You are familiar with the investigation made some five years ago of the farm mortgages held by the United States life insurance companies, showing that the average rate of interest earned was 5.55 per cent. At that time farm mortgages in Canada were yielding an average of about seven and one-half per cent.

You have been so kind as to ask me to speak on some Canadian problems. The problem that I am leaving with you is not alone a Canadian problem. It is a problem in which both of our countries are interested. It is a problem further which is one of the most urgent ones confronting us and one which I am confident your association with its tremendous resources can do much in assisting to remedy. My apology for introducing it, if any apology is needed, is that it is a problem in which you as insurers of Canadian lives as well as all sellers of American goods to Canadian purchasers are deeply and vitally interested.

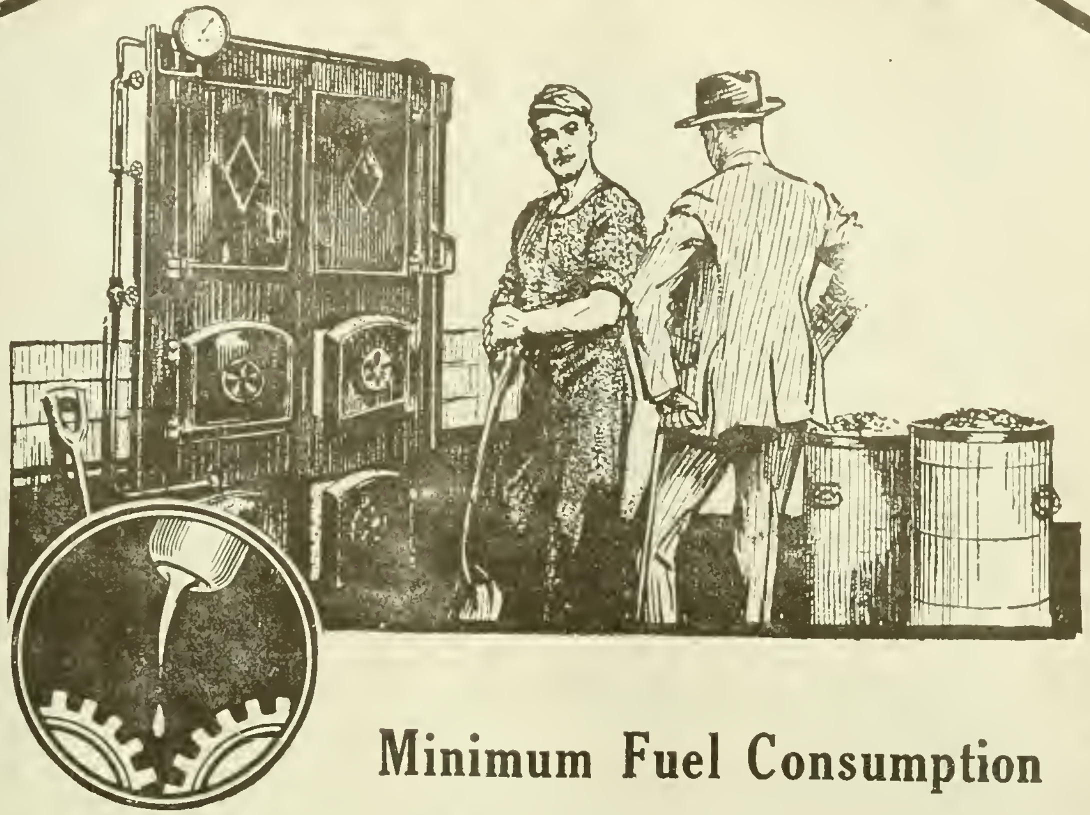
The problems of the North American continent will have to be worked out by our respective countries and to an ever increasing degree the problems of the world will be solved by your great Republic and the confederated nations of the British Empire. With a history, with laws, interests, traditions and aspirations so largely common, the essential combined effort for civilization and humanity ought to be, and I am confident will be, harmonious and effective.

BANK OF MONTREAL ANNUAL MEETING

At the annual meeting of the Bank of Montreal, held in Montreal on December 1st, the financial statement for the year ended October 31st, 1919, which has already been reviewed in these columns, was presented. The president, Sir Vincent Meredith, in his report pointed out the important features in the statement, and also referred to the fact that a California State charter had been taken out for the British American Bank, which is controlled by the Bank of Montreal, and this in conjunction with a license for operating a branch of the Bank of Montreal, provides complete facilities for conducting business in San Francisco. In his address to the shareholders the president referred to economic developments of the year, pointing out that high prices are due in part to the large volume of currency now in circulation. He expected they would come down first in the case of foodstuffs, probably after the next harvest, but in any case the change would be gradual. Foreign trade has been well maintained by Canada. Currency depreciation presents problems, and he expressed the view that old methods of adjusting supply to demand were probably too rigid. The state of our national finances deserves serious consideration, but taxation should be levied with care, so as not to make living too dear. Mentioning foreign credits, "our government," he said, "has been far-sighted in giving assistance in this direction and no doubt is prepared to extend further aid, provided exporters, who reap the benefit, will assume a proportion of the risk."

The general manager, in a careful examination of the present economic situation, viewed the future with some concern. "Even with a full measure of faith in our country," he said, "I find the near future difficult to visualize. We derive a measure of consolation in comparing our lot with that of countries worse off than our own, but contiguity and ambition direct our eyes towards the country to the south which has benefited so vastly by the war." The United States has already reduced its war debt by $800,000,000, whereas Canada's will increase by $600,000,000 during the current year, he said. Sir Frederick then dealt at length with the Bank's statement, and the banking and financial conditions which it reflected. His address, and that of the president, are given in full in this issue.

The board of directors and chief executive of the bank were elected without change, as follows: Sir Vincent Meredith, Bart., president; Sir Charles Gordon, vice-president; R. B. Angus, Lord Shaughnessy, Chas. R. Hosmer, Huntly R. Drummond, D. Forbes Angus, William McMaster, Lt.-Col. Herbert Molson, Harold Kennedy, H. W. Beauclerk, G. B. Fraser, Col. Henry Cockshutt, J. H. Ashdown and E. W. Beatty, with Sir Frederick Williams-Taylor, general manager.



Minimum Fuel Consumption

MINIMUM fuel consumption is only possible when the lubricants used perfectly match each mechanical need and service condition.

Imperial Lubricants provide correct lubrication because they are a complete line carefully formulated to meet every lubrication need under all conditions. By reducing the friction load, they lighten your power requirements and increase the efficiency of your power-producing equipment.

Not only for industrial power plants but for motor cars, trucks, tractors and other farm machines and even down to the smallest lubrication need of the home, Imperial Lubricants have no superiors and few, if any, equals.

Thoroughly dependable and of unvarying high quality, Imperial Lubricants are recommended by experts everywhere.

Our experienced lubrication engineers are at your service. They will gladly advise you on anything relating to lubrication. Write to us at 56 Church St., Toronto, or to any of our branches.

CANADIAN AUTOMOBILE UNDERWRITERS' ANNUAL

Theft Experience is Not Satisfactory and Rates Will Probably be Increased Next Year

THE annual meeting of the Canadian Automobile Underwriters' Association was held at Ottawa on November 28, and which was attended by about 50 managers of companies writing this class of insurance, from Montreal, New York, Hartford and Toronto.

Reports of the various committees were presented, and some of these indicated that although the year was not closed, that a heavy loss would be sustained on some classes of the business, and this was particularly so in regard to the insurance against theft of cars. The secretary of the association reported what he had done in regard to this rapidly growing evil, and that he had secured the cooperation of the customs authorities in endeavoring to stop stolen cars being taken across the border into the United States. Notwithstanding this, however, and the increasing sentences being imposed by the courts upon joy riders and automobile thieves, heavy losses continue and it is probable that the present low rates charged for theft insurance will have to be increased, the rates for this class of insurance in Canada being now less than one-third the rates charged in the United States.

Committees were appointed to deal with various details of the business, and for the preparation of tariffs for 1920, which, it is expected, will be of a simpler form than in the past, and tend to assist the agents of the companies in dealing with this growing class of business. It was estimated that there are now over 250,000 automobiles in operation in Canada, with the expectation that there will be at least 300,000 in 1920.

An incident of the meeting was a complimentary dinner to Mr. Timberlake, manager at Hartford of the automobile department of the Hartford Insurance Co., who attended the meeting.

BRITISH COLUMBIA WORKMEN'S COMPENSATION

Proposed changes in the provincial Workmen's Compensation Act, with a view to the prevention of accidents, were discussed at a meeting in Vancouver on November 26, presided over by H. B. Gilmour, a member of the board. The changes will come into force January 1. Mr. Gilmour said that the board had curtailed the number of industrial accidents and that more could be eliminated, so that it behooved all to take a hand in the matter. One of the regulations will be the establishment of an accident prevention committee in every manufacturing plant, construction camp, logging camp and workshop, in which fifty or more men are employed, this committee to consist of not less than three members. The general duties of the committee will be to make a thorough inspection not less than once a month for the purpose of receiving complaints, determining hazardous conditions and receiving recommendations for their improvement.

The committee will also hold meetings at least monthly for the purpose of discussing arduous accidents, their causes and suggested means of preventing their recurrences. Education of fellow employees against dangerous practices and methods is also part of the committee's duties, as well as the investigation of fire conditions and lighting arrangements. The committee will also inspect or arrange for inspection of all machinery and equipment.

One of the regulations call for the inspection of all boilers and pressure vessels. Previously, boilers of more than two horse-power only have been examined. Mr. Gilmour pointed out that the board for the past year had paid to workmen $598,415 and death claims amounting to $544,455, together with medical aid to the value of $222,415, making a total for the year of $1,365,287. The loss in wages through accidents last year was $700,000. The regulations placed before the meeting dealt with cranes, boilers, explosives, sawmills, shingle mills, laundries, electric energy, railroad, logging, fire and gas and candy employment.

SASKATCHEWAN GOVERNMENT PROGRAM

The Saskatchewan legislative session opened on November 27. In his speech from the throne the Lieutenant-Governor, Sir Richard Lake, intimated that legislation would be introduced to give larger powers to rural municipal councils, and to develop natural resources in the province.

On December 1 Premier Martin stated that a bill will be brought down for furnishing seed grain in districts which had crop failures. The government, he said, would make provision to enable the loan companies, as far as possible, to handle seed grain relief in the organized municipalities, the loan companies having performed this service satisfactorily last year. While Mr. Martin did not state what provisions would be made in the bill for seed grain relief in the unorganized areas, he said that similar measures to those in force last year would be proposed; in other words, it is the intention that the federal government shall look after the requirements where unpatented lands are concerned, and in the case of patented lands the provincial government will furnish the grain, but the provincial machinery will be utilized for administrative purposes in both cases.

ST. LAWRENCE POWER DEVELOPMENT

The demand of Sir Adam Beck, chairman of the Ontario Hydro-Electric Power Commission, that the commission be allowed to develop the St. Lawrence water powers in connection with its plan to electrify the railroads of the province, will probably be refused by the Dominion government. The government's view is that the problem, being international and inter-provincial, requires federal control, and that more than the power question enters into it. A deep waterway has to be constructed as well as the power development, because the friends of the project in the United States are all middle and northwestern states bordering on the great lakes, who desire to have their chief lake cities become ocean ports. St. Lawrence power means nothing to them. Atlantic coast cities in the United States do not favor the project, because it would divert much traffic now going to and through them.

The plan most favored for the combined waterway and power scheme consists of four dams located, respectively, near Morrisburg, near Cornwall, at the foot of Lake St. Francis and below the Lachine Rapids, and extensive borings are being made to determine the best sites. The first two dams would be international, as they lie between Ontario and New York State, and the last two would be in the province of Quebec. Based on a 24-hour service it is stated here that at least three million horsepower could be developed at the dams. The dams would make a deep-water channel between them for ocean vessels, but locks would be required at each dam just as large as those being constructed on the Welland Canal, and near Montreal there would have to be a new and exceedingly expensive canal system. The canalization cost would be divided between Canada and the United States for the international waters, and it might be divided between the two countries for the whole one hundred miles, except that in that event the United States would probably insist on sharing in the power development and in exporting it to her own towns and cities.

This would not probably meet the views of the Dominion government so that the Canadian expenditure would exceed the American. It is expected that both countries will be ready to begin the preliminary work by continuing the surveys and soundings already made in order to discover the exact extent of the work needed and to make a more exact estimate of the cost than is now possible.

Nesbitt, Thomson and Co., Ltd., have moved their Toronto office from the C.P.R. Building to the Bank of Hamilton Building.

DOMINION WORKMEN'S COMPENSATION MEETING

A convention of representatives of Workmen's Compensation Boards in Canada was held in Vancouver, on December 1. Among those present were John A. Sinclair, of St. John, chairman of the New Brunswick Compensation Board; W. W. Wormith, secretary of the Ontario Board; H. A. Wilson, chairman of the Manitoba Board; John A. Stirling, chairman of the Alberta Board; and Mr. Fletcher, secretary of the Manitoba Board. The purpose of the meeting was to arrange the organization of the various boards in order to secure uniformity of legislation and to deal with administration problems.

GREAT BRITAIN IN DEBT TO CANADA

An adjustment of accounts between the Canadian and British governments resulting from the war is now in progress. The British government has financed Canadian operations on the other side while the Canadian government has established Imperial credits here. The only credit now operating is for the purchase of timber, though arrangements regarding the wheat crops are to be made. As the balance now stands Great Britain owes Canada $200,000,000, interest on which is being paid at 5½ per cent. Of the hundred millions appropriated in equal proportions as credits to Rumania, Serbia, Greece and Belgium, about $16,000,000 has been advanced to Rumania, but very little to the others. Rumania recently paid interest on the advances.

WHOLESALE GROCERS APPROVE COMMERCE BOARD

At a meeting of the Canadian Wholesale Grocers' Association in Toronto on November 2nd, a resolution was passed expressing appreciation of the establishment of the Board of Commerce. Organization of the association was completed, and arrangements made for taking over the assets of the Dominion Wholesale Grocers' Guild.

The officers of the association are: President, Hugh Blain, Toronto; 1st vice-president, Z. Hebert, Montreal; 2nd vice-president, F. C. Burton, Regina; 3rd vice-president, G. E. Barbour, St. John, N.B.; treasurer, Thos. Kinnear, Toronto; secretary, A. C. Pyke, Toronto; and an executive committee of two from each province. Those from Ontario on this committee are: H. W. Chamberlain, Ottawa, and W. G. Lumbers, Toronto; those from Quebec: A. Chaput, Montreal, and J. S. Royer, Quebec City.

SUGAR ISSUE TO BE OFFERED HERE

The Royal Securities Corporation has undertaken the financing of a large sugar-producing property in the province of Oriente, Cuba. The new flotation will involve one of the largest pieces of corporation financing undertaken in Canada for many months. It is understood that the transaction involves over $5,000,000, and when completed will place Royal Securities Corporation and its associates in control of one of the best-managed sugar estates in the island, and one with a record of low-cost production. Productive capacity of the estate is placed at 81,250,000 pounds of raw sugar per annum.

Canadians have realized large profits from sugar refining operations; and, in view of the marked upward trend of sugar prices, it is but natural and logical that Canadian capital should look towards extending its scope of operations to production of the basic raw material of the sugar industry.

Though of late years more conspicuously connected with the development of Canadian basic industries, notably that of cement, steel and pulp and paper, Royal Securities Corporation has many times in past years directed Canadian capital into channels of active and lucrative employment in Cuban enterprise. Among its most recent Cuban financing might be instanced the Camaguey Electric Co., and the Guantanamo Electric Co., the securities of which have been placed largely with Canadian investors.

EASTERN MARKETS FOR CANADA

Good openings for Canadian trade are to be found in the Orient, according to Chas. S. Meek, of Chas. S. Meek and Co., Vancouver, who has recently returned from a three months' trip in the east. When interviewed a few days ago by *The Monetary Times* in Vancouver, Mr. Meek said:—

"The people of the great centres across the Pacific do not know there is a Canada, or if they do, they attach about as much importance to it as we give to the area within the Arctic circle. Canada is part of the United States when you come to talk to the people of China, and the reason is that for every trade advocate Canada has in the Orient there are thousands of men whose business houses are located in the United States. I spent days in Shanghai, strolled the docks and along the famous Bund and the only indication I saw of Canadian goods being imported into that great commercial city, with its millions of people and hundreds of steamers loading and unloading, were lumber from the Dollar boats and Powell River pulp. Now is the time for the Canadian to sell his goods in China, it is China's buying time, as the Mexican dollar is worth double what it could bring a year ago. Consequently China is seeking all the goods she can get at present and taking advantage of the increase in the exchange."

Mr. Meek expressed great regret at the fact that the Canadian Trade Commissioner is located in a little office in a most out-of-the-way place, and that practically nothing is known of the fact that Canada is a manufacturing country. "This is further regretable," continued Mr. Meek, "in the face of the fact that the British Commercial attache and his staff has done much to establish a bond of confidence between the British and the Chinese in all commercial dealings, and that the attache is anxious to foster trade within the Empire, consequently Canada could benefit to a marked extent by the pioneering of the British authorities.

"We must give China what she wants, not what we want to give her," said Mr. Meek with emphasis. "Once established in the good graces of the Chinese through the agencies of his compradore, there is no receding as long as the goods and dealings are with that degree of honesty which the Chinese demand in all their commercial transactions." Mr. Meek pointed out that during the war certain countries had lost the confidence of the Chinese merchants by substituting commodities for those of long-standing trade and by depreciating the value of keeping every line of their commercial relationship up to the standard. Despite the fact that Britain was one of the most involved nations in the war, no receding was to be found in the class of goods shipped to China nor the honor with which she met her obligations with this exacting country. This, said Mr. Meek, is indirectly of great value to Canada, and should be taken advantage of while the particular matters are still fresh in the minds of that great purchasing nation.

FRONTENAC BREWERIES BOND ISSUE

The Montreal house of Versailles, Vidricaire and Boulais have announced the offering of $400,000 32-year 6 per cent. bonds of the Frontenac Breweries, Ltd., at par and accrued interest, principal and interest payable in gold at the Bank of Montreal, Montreal. The offering carries with it a bonus of 10 per cent. of the common stock of the company. The new offering was authorized at a meeting of the shareholders on August 19 last, and at a meeting of the bondholders on September 20.

Messrs. Burdick Bros. and Brett, Ltd., Vancouver, B.C., have extended their office space to accommodate the investment department, a departure recently inaugurated by the firm, the activities of which will consist of buying, selling and underwriting bonds. Selected government, municipal and corporation issues will be dealt with by the new department which is under the management of Capt. J. C. Hogg, M.C., recently of the 2nd C. M. R. battalion.

VENDOR'S LIEN UPON REAL ESTATE

Transfer of Promissory Notes to Bank Did Not Destroy Lien

IN a recent appeal before the Appellate Division of the Alberta Supreme Court, the question was settled whether a vendor's lien upon real estate was lost by the endorsement of certain promissory notes to a bank. The case was that of Denny vs. Nozick and Brody, the necessary facts being as follows:—

On 27th of January, 1914, Denny sold to Nozick an hotel with all equipment for the sum of $15,200, all but $2,600 of which was paid at the time of making the agreement. The said $2,600 was to be paid in instalments, for which four promissory notes, two for five hundred dollars and two for eight hundred dollars, were given. The plaintiff received the notes and shortly after endorsed them over to the Royal Bank of Canada; the defendant paid the two first and part of the third; on July 30th, 1914, the plaintiff filed a caveat against the land, claiming an interest as unpaid vendor. On December 1st, 1914, Nozick transferred the land to Brody, subject to the plaintiff's caveat. On June 1st, 1916 the Royal Bank sued Nozick as maker and Denny as endorser of the last two promissory notes and judgment by default was entered against them. On January 3rd, 1917 the bank filed a caveat against the lands but allowed it to lapse. On December 28th, 1917 the plaintiff proceeded upon his caveat and the present action was begun.

The trial Judge dismissed the action on the ground that Nozick owed the money to the Royal Bank, that he owed no debt to Denny and that, therefore, Denny could have no lien upon the land. The plaintiff, Denny, appeals from this judgment.

Stuart J., in his judgment says that the notes were not to have been considered and cannot be considered as a cancellation of balance of the purchase money still due; that the unpaid vendor's right is in the nature of a charge or trust imposed upon the legal estate which has passed to the purchaser; that Denny, at any rate prior to the endorsement of the note to the bank, had a lien upon the property for his unpaid purchase money; that it is clearly stated by all the books that the mere taking of promissory notes or bills of exchange does not destroy the lien. Denny having endorsed the notes to the bank, the question comes up as to whether or not by that action he lost his vendor's lien on the lands. Mr. Justice Stuart, in answer, quotes sections from leading authorities, that from Dart on Vendors and Purchasers, 7th ed., vol. 11, at p. 733, being:—

"Prima facie, the taking of a mere personal security for the purchase money—e.g., promissory note, or a bill of exchange, even though negotiated, or a bond is not evidence of an intention to abandon the lien."

Decision of the Court

Mr. Justice Stuart sums up his decision in the following words:—

"With much respect I am unable to discern why upon principle the plaintiff should lose his lien by the negotiation of the notes. It is true that by the negotiation of them the defendant Nozick became indebted to the bank and thereupon owed no debt to Denny. But Denny was still liable to the bank for the money. He became, as endorser, a surety to the bank for Nozick although of course also directly liable at least for a part of the amount of the notes. Now it is a common thing for parties by their contract to create a charge or mortgage to protect a surety—i.e., to secure him against his liability as guarantor. In such case the debtor owes no debt to the surety. So I cannot see why a Court of equity should hesitate to recognize the existence of a species of security which Courts of equity have created even in a case where no debt may be due directly to the surety. It simply is reduced to this, equity recognizes the existence of a charge or trust in favor of an unpaid vendor who has taken notes. Is it at all inequitable or unjust that this charge or trust should continue to exist in his favor even if he has changed his position from that of a direct creditor to that of a surety of the debtor? I think every principle of equity is really in favor of continuing the protection to the unpaid vendor. True he may have raised some money by endorsing the notes but he may have to pay it back and in this case has a judgment against him for it. If he had assigned the debt entirely without guaranteeing that it would be paid and had got his purchase price for the debt, whatever it was, one can well understand how he at least, whatever might be the position of the assignee, could no longer have a lien. But that is not the case here. The simple facts still remain that Nozick has not paid for the land and that Denny is still a guarantor to the bank that he will do so. Why then should he lose his security?"

The Court advised the bank to apply to be added as a party plaintiff if it desired to enforce the lien as a creditor of the vendor or if the plaintiff pays the debt he should be at liberty to apply for an order for sale upon showing that he has done so. The appeal was allowed with costs and judgment below set aside and judgment entered declaring that the plaintiff was entitled to file his caveat and is entitled to maintain the same until payment of the amount of the debt and costs of this action.

WORK FOR QUEBEC LEGISLATURE

Among the subjects which will come up for consideration by the Quebec legislature at its coming session will be the application of the Guarantee Title Bond and Trust Co. for incorporation, with head office in Montreal and capital of $1,000,000. There is also a bill left over from last session for regulating industrial and financial firms in the province, and another to encourage colonization. Several municipal changes are also to be made.

PARLIAMENT BUILDINGS ESTIMATE EXCEEDED

The cost of the new parliament buildings at Ottawa will be $8,500,000 instead of $5,100,000, as originally estimated. The new structure replaces the central block, which was destroyed by fire. An effort is being made to have it ready for the next session. Already $6,000,000 has been expended, and it is believed that about $2,000,000 more will be required to complete the work and a half million to provide furnishings and fittings. Of the increase in cost, $1,500,000 is attributed to the increase in workmen's wages and $1,000,000 to the rise in the price of materials since reconstruction was begun. A half million dollars of the increase is accounted for by the fact that, owing to labor shortage and other causes, it was impossible last year to press the work forward as rapidly as was contemplated.

MAY BUILD INTERNATIONAL BRIDGE

Plans are being made to build a $28,000,000 suspension bridge, connecting Detroit and Windsor, and a company is to be incorporated for this purpose. G. L. Lindenthal, a Swedish engineer, of New York, will have charge of the work. A fund already has been provided for investigation purposes to collect data on the traffic possibilities. It is proposed to build a bridge supported from the towers on either side of the river with double-deck suspension, the span to be capable of handling railroad, street car, automobile and pedestrian traffic, and connecting on the Canadian side with the Essex Terminal Railroad and on the American side with the terminal tracks of the Fort Street Union Depot Co. There would be one span 110 feet from the water level, which would allow any of the Great Lakes carriers to pass through. It is understood there will be no opposition from the Lake Carriers' Association or from the Canadian or American authorities if this stipulation is carried out.

PUBLICATIONS RECEIVED

Executors' Accounts.—By C. H. Widdifield, judge of the Surrogate Court of Grey County, Ont. The Carswell Co., Toronto. (531 pages, with index; $6.50.) This is the second edition of this book, but since the first was published considerable legislation has been passed, altering the practice and procedure of the courts. Trust company officers will find the book exceedingly valuable, and a good index makes it convenient for reference.

Dr. Jonathan.—By Winston Churchill. Macmillan Co. of Canada, Toronto. ($1.25.) In the form of a play in three acts the author presents a concrete illustration of a step towards "industrial democracy." The scene is set in a New England town, where capital has reigned supreme. Circumstances arising out of the war, however, bring a change in the attitude of the head of the company, in which change Dr. Jonathan plays an important part.

Reminiscences, Political and Personal.—By Sir John Willison. McClelland and Stewart, Toronto. (351 pages, with index; $4.50.) "For thirty-six years," says the author, "I was engaged in political journalism in Canada. During all that time my pen was my only means of income." There is, in fact, no one better qualified to write about the political life of the country, past and present, than Sir John Willison through his long association, while a reporter, an editorial writer and an editor, with leading figures in this sphere. This volume is entertaining as well as instructive, and many of the questions dealt with have still to be settled.

British Supremacy and Canadian Self-Government, 1839-1854.—By J. L. Morison. S. B. Gundy, Toronto. (369 pages, with index; $2.50.) Imperial ascendancy and colonial autonomy are, as the author points out in his introduction, contradictory, and it was during the period under examination that responsible government, one of the important stages in the progress of Canada in the direction of autonomy, was achieved. Mr. Morison, who is professor of colonial history in Queen's University, Kingston, has studied the contemporary documents, and quotes from them extensively. His work is a valuable contribution to our constitutional history.

The Canadian Annual Review.—By J. Castell Hopkins, The Canadian Annual Review, Ltd., Toronto. (879 pages, with index; $6.00.) The 1918 edition of this valuable work of reference has just been issued, and is in keeping with the standard set in previous years. This is its eighteenth year of issue. The Review deals extensively with political, economic and social events not only in Canada, but also in those fields in which Canadians are interested. This year's edition discusses at length war activities in many countries, labor problems, etc. As regards Canada, the nationalization of railways and war-time control is described; much space is also devoted to the Canadian Pacific Railway and to leading financial institutions.

Labor in the Changing World.—By R. M. MacIver. J. M. Dent and Sons, Toronto. (230 pages; $2.00.) The recent output of books upon labor questions has been large, in proportion to the prominence of the subject. Most of them are written from a foregone conclusion, and are, therefore, contributions to a debate rather than an impartial examination. Mr. MacIver, who is associate professor of political economy in Toronto University, not only conducts an unbiased inquiry into the subject, but also reaches practical conclusions. He believes that it is the part of wisdom to take cognizance of all difficulties and all dangers rather than to speak smooth and comforting generalities; that, though the economic foundations of society remain intact, a change in the structure is necessary, and that revolution is the certain result of failure to accomplish this change peacefully.

Dominion Company Law.—By Thomas Mulvey. Ontario Publishing Co., Ltd., Toronto. (889 pages, with index; $12.50.) The author, who is Under-Secretary of State for Canada and an authority on company law in this country, sets forth thoroughly the law as it affects companies incorporated under federal charter. His synopsis of the Dominion Companies Act and of the practice thereunder, which occupies seventy-two pages of the book, will be particularly instructive to those not conversant with the subject, and will readily be understood by business men without legal training. The text of the Dominion Companies Act is set forth in full, and annotated, as are also the provisions relating to loan companies, British loan companies and British and foreign mining companies. The Dominion Winding-up Act is treated in the same way, and then the licensing and taxation legislation in the various provinces is taken up, in so far as it affects companies with Dominion charters. Finally, the Income Tax Act and the War Profits Tax Act are given and a list of forms to be used by companies. The book will be very useful not only to corporation lawyers, but also to the officers of any company which operates under Dominion legislation.

INLAND REVENUE

Inland revenue of the Dominion during the month of October, 1919, totalled $4,941,140, compared with the September figure of $4,636,314, an increase of $304,826. The following is the official unrevised statement:—

Source of Revenue.		
Excise.	Amounts.	Total.
Spirits	$ 662,547.86	
Malt liquor	3,680.20	
Malt	155,801.85	
Tobacco	2,767,685.13	
Cigars	164,509.66	
Manufactures in bond	13,223.46	
Acetic acid	410.13	
Seizures	22,191.70	
Other receipts	4,866.45	
Total excise revenue		$3,794,916.44
Methylated spirits		41,885.65
Ferry		....
Inspection of weights and measures		....
Gas inspection		....
Electric light inspection		....
Law stamps		921.85
Other revenues		219.65
War tax		1,103,197.07
Grand total revenue		$4,941,140.66

HYDRO MAKES OFFER FOR GUELPH RADIAL

A definite offer has been made by the Hydro-Electric Power Commission respecting the Guelph Radial Railway. The commission agrees to purchase outright the Guelph Radial Railway for $150,000 as on July 1st, 1920. It is presumed that if the radial is taken over it will become part of the Hydro System in that district.

In paying for the same, the commission agrees to issue Hydro-Electric Power Commission bonds to cover this amount, to be paid off by an amount equal to the interest and sinking fund each year until the whole has been paid. It is estimated that this would cover a period of about twenty years. It is stipulated that the road must be handed over free of all encumbrances.

The railway situation there now is that the city is included in the agitation to build the Elmira-Hamilton-Galt line; it will be a junction point if the G.T.R. north branch lines are ever handed over to the Hydro; it is a pivotal point in the Toronto to Windsor line, and it is not impossible that the C.P.R. may again try to link up the Grand Valley Railway there.

The National Board of Fire Underwriters of the United States has issued a list of inspected mechanical appliances as at July, 1919.

INDUSTRIAL EVENTS OF THE WEEK

Growth of Pulp and Paper Industry—Automobiles in Demand in Europe—Trade Within Empire Favored

NEW developments in the pulp and paper industry continue to take place. The plant of the Whalen Pulp and Paper Co., Ltd., at Port Alice, on the west coast of Vancouver Island, B.C., is now in active operation. About 500 persons are employed, and the turnout is 70 tons of pulp, and about 200,000 feet of lumber, every 24 hours. The Whalen company has three plants, one at Mill Creek, Howe Sound; one at Swanson Bay, and the other at Port Alice. The company has nine logging camps going on Quatsino Sound, Vancouver Island, and has brought Davis rafts from the Mainland.

The Fraser Companies, Ltd., have added another to their list of sawmills in New Brunswick, and Quebec, making a total of eleven lumber mills which they now own and will have in operation. The latest mill which they have acquired is that of the Hammond Lumber Company, of which A. E. Hammond, of VanBuren, Me., is president, recently purchased at Notre Dame du Lac, P.Q., a small town on the Temiscouata Lake, some twenty odd miles north of Edmundston, N.B.

The interests associated with the Macleod Pulp Co. in Nova Scotia have been endeavoring to enlist financial support to a plan for the further development of the property. It is understood that these plans have been successfully negotiated and that, with the mills at Milton, N.S., and additional large acreages of lumber and pulp properties, in which are embraced the Nova Scotia Central Railway lands, an enlarged operation can be anticipated.

There will be no hydro concessions for the Great Lakes Pulp and Paper Co., or any other industry, unless the people of both Fort William and Port Arthur approve. Premier Drury in an interview with Mayor Murphy of Fort William stated that as leader of the government he refused to sell the people's power to any industry for a cut-rate price. On the basis of power price, the Great Lakes Paper Co. has entered into an understanding with Port Arthur to erect a $4,000,000 plant at the north limits of the city, and change in power price or cancellation of the order-in-council would likely prevent the location of this big industry there.

Chance for Canadian Automobile Trade

There is a chance for Canada to strengthen its automobile trade with Europe, according to a statement by J. O. Linteau, president of the Montreal Automobile Trade Association, at a recent meeting. Mr. Linteau, who has just returned from a trip to England, France and Italy, states that there is a great field for Canadian and American automobile manufacturers, domestic production being quite unequal to the demand.

According to a statement made by an official of the Dominion Coal Co., the company is prepared to spend $4,000,000 in the development of the Bonar Point, N.S., mine. Up to the present time the company has not received permission to go ahead with the sinking of the shaft at Bonar Point, but as soon as the Provincial government grants this permission, the work will be rushed to completion. The company will expend this sum in laying out a model town at Bonar Point, with an up-to-date sewerage and water system.

Cluett, Peabody Opening New Plants

According to a statement made by F. W. Stewart, manager for Canada for the Cluett, Peabody Co., the company is investing $150,000 in additional plants in Canada. A new plant will be established in Sherbrooke, Que., shortly. The machinery for the new plant has already been shipped from St. John's, Que., where the parent plant of the Canadian interests is located. In addition to the new plant in Sherbrooke a subsidiary plant is being established at St. John's, Que., where only collars are being made. This plant will increase the St. John's output from two to four thousand dozens a week, and is quite an asset in the matter of production. A third site has been purchased in the north-east section of Montreal where the Cluett, Peabody people are establishing another new plant. Some 300 employees will be used in the Sherbrooke plant, and about 200 in the new branch in Montreal. The Montreal plant will not be in running order for some weeks yet. The parent plant at St. John's, will still remain the central unit. All the laundrying and packing for shipment of the company's output in this province will be done there while in the Sherbrooke and Montreal plants just the sewing operations will be carried on.

Other Notes of Industrial Interest

A company is considering the purchase of the Pembroke Iron Works, Pembroke, Ont. If negotiations result in a deal, and the town grants the concessions asked, a by-law will be submitted to the ratepayers.

Ratepayers of Woodstock, Ont., have voted for the bonusing of the Brunswick Canadian Products Co., Ltd., manufacturers of phonographs, and to grant a loan to the Warren Pipe Organ Co.

A plant for the manufacture of mattresses has been established in Owen Sound, Ont., by Messrs. P. and C. Lee. The plant is fully equipped for the line of work, with plenty of room for expansion.

A new oil company under the name of Anglo-Canadian Petroleum Co. has been formed in Winnipeg, Man., with an authorized capital of $100,000,000. The company owns leases covering millions of acres in Northern Alberta. The company is said to be independent of the Shell Oil Co., or the Standard Oil Co., both of which are operating heavily in Northern Alberta.

The Canadian Cooperage Manufacturing Company will establish a new industry in Smith's Falls, Ont., an up-to-date heading mill for making headings for stock barrels, cheese boxes, etc.

The warehouse which is to be erected in Regina, Sask., next spring by the Canadian Fairbanks-Morse Co., Ltd., will cost between $75,000 and $100,000, according to information from the company's headquarters in Winnipeg.

Pefer to Purchase Within Empire

"One of the most notable features of the trade situation is the desire of Canadian manufacturers and merchants to trade as far as possible within the British Empire," said F. W. Field, British Trade Commissioner in Ontario. "While the Made-in-Canada slogan is naturally of primary importance to the Canadian community, the larger policy now being followed, namely, first to try and buy goods made in one's own country and after, to endeavor to purchase in some part of the British Empire, is one which will build up a substantial volume of inter-imperial trade. This applies both to raw materials and finished products. India, for example, has an extensive variety of raw materials upon which manufacturers in other parts of the world can draw with advantage. The three British Trade Commissioners in Canada will be pleased to assist business men in developing the lines of British Empire trade."

Asked as to conditions in the United Kingdom, Mr. Field said that employment there had improved generally, and until the beginning of the railway strike, was better in September than in any previous month of the present year, being fairly good in all the industries reported on, except the linen trade, some branches of the textile bleaching, dyeing, printing and finishing trades, and the fancy lace trade. The railway strike, which began on 26th September, and was settled on 6th October, resulted in a large amount of unemployment in the coal mining industry and in the great coal-using trades, e.g., the pig-iron and iron and steel industries, which have not yet fully recovered from the effect of the stoppage; but many trades were not seriously affected.

Mr. Field added that a large number of manufacturers and other business men of the United Kingdom were visiting Canada, and that the frequency of these visits would undoubtedly improve next year when shipping conditions were better. "The number of inquiries received at the offices of the Trade Commissioners in Canada," concluded Mr. Field, "both from United Kingdom firms and from Canadian manufacturers and importers, is such as to raise considerable hope of a far larger volume of Anglo-Canadian trade and British Empire trade generally."

SECURITY ABOVE ALL
Whether with the intention of taking out insurance or associating yourself as representative with some company, you first look for security.

The figures for 1918 emphasize the unexcelled financial position of the North American Life. After a year of War and Pestilence, the Company emerges stronger than ever meriting its motto, "Solid as the Continent."

THE SECRET OF SUCCESSFUL SALESMANSHIP
If the salesman has unlimited confidence in the company he represents and in the goods he is offering, it will not take long to communicate that confidence to the prospect. And this applies to Life Insurance more than to any other article. Agents of the Mutual Life of Canada meet with extraordinary success for that simple reason—they devoutly believe in Life Insurance and above all in "Mutual" Life Insurance. The Mutual Life has been conducted for fifty years exclusively in the interests of its policy-holders. The result is an unprecedented demand to-day for Mutual Life Policies. With the Mutual "the secret of successful salesmanship" is simplicity itself—the Agent knows that he has the Company and the Policy that the prospect NEEDS. The rest soon follows.

BE A MUTUALIST.
The Mutual Life Assurance Co. of Canada
Waterloo Ontario

THE UNCERTAIN ELEMENT
in life—that is what makes Life Insurance so invaluable. If a man were certain of living a given time—if he could foretell the future—perhaps he could do without Life Insurance. But he cannot, and it is this uncertainty that makes Life Insurance of such vital importance. A Life Policy is the one certain way of providing for an uncertain future.

The Great-West Life Policies embody all the essentials of profitable Life Insurance; low premium rates are charged—these premiums may be paid annually or otherwise, as suits the insured; the Policy conditions are liberal and clearly expressed: and the profit returns are so highly satisfactory that seldom does a participant fail to express both gratification and surprise at the returns under his Policy.

Full particulars of suitable Policies will be mailed to any applicant.

EMPLOYMENT CONDITIONS IN CANADA

Reports from employers to Dominion headquarters of the Employment Service of Canada, Department of Labor, indicate that, apart from unemployment due to strikes, there was a considerable increase in the volume of employment during the week ended November 15th, which increase more than compensated for the decrease of the preceding week. Returns for the week ending November 15th were received from 4,742 firms, of which 2,149 were in Ontario, 1,064 in Quebec, 452 in the maritime provinces, 737 in the prairie provinces and 340 in British Columbia. These firms reported 677,669 persons on pay-roll as compared with 672,292 reported by the same firms during the preceding week, an increase of 5,377 persons, or .8 per cent. A decrease of 1,040 persons, or .2 per cent., was anticipated for the week ending November 22nd. Returns for the week ending November 8th were received from 4,915 firms, which firms had decreased their staffs by 4,600 persons, or .7 per cent. An increase of 1,352 persons, or .2 per cent., was anticipated for the week ending November 15th, which anticipation, as has been noted, was more than realized.

The plus industries—those that registered net increases in the number of persons employed—with their respective percentage increases, were: Building and construction, .9 per cent.; commercial and mercantile, .9 per cent.; lumbering, 7.0 per cent.; chemicals, 1.1 per cent.; food, drink and tobacco, 1.6 per cent.; leather and leather goods, 1.3 per cent.; metals, 1.1 per cent.; pulp, paper and printing, .3 per cent.; textiles, .6 per cent.; woodworking, .2 per cent., and quarrying and mining, .4 per cent. The most substantial increase, as during the preceding week, was thus in lumbering with a gain of 2,377 persons accounted for by the big increase in the number of men engaged in bush operations. Metals, textiles, food, drink and tobacco, commercial and mercantile, and quarrying and mining, which groups have been showing the strongest tendencies of late, all registered further substantial increases. With the exception of lumbering, vehicles, pulp, paper and printing, food, drink and tobacco. and chemicals, all groups anticipated further increases during the week ending November 22nd.

The only minus industries—those that registered net decreases in the number of persons employed—with their respective percentage decreases, were: Clay, glass and stone products, .4 per cent.; vehicles, .2 per cent.; railway construction, .4 per cent.; railway operation, .1 per cent., and miscellaneous, .9 per cent. Vehicles, railway construction and miscellaneous anticipated further decreases during the week ending November 22nd, while the other groups anticipated increases.

COBALT ORE SHIPMENTS

The following is a statement of shipments of ore, in pounds, from Cobalt Station for the week ended November 28th, 1919:—

O'Brien Mine, 65,850; Buffalo Mine, 110,000; Hudson Bay, 63,197; McKinley-Darragh, 84,274. Total, 323,321.

The total since January 1st is 23,031,853 pounds, or 11,515.92 tons.

The offices of the Canadian Bankers' Association have been moved from the Bank of British North America Building, Montreal, to the Dominion Bank Building, Toronto.

Purpose of Issue

This company has been incorporated for the purpose of building a theatre to supply the public of Buffalo with high-class vaudeville entertainment, at popular prices, coupled with the latest and best photoplays procurable. The theatre will be operated and managed in conjunction with Loew's well-known and successful houses in Toronto, Montreal, Hamilton, London, Ottawa and all the principal cities in the United States. A satisfactory agreement has been entered into with Marcus Loew's Booking Agency of New York to provide entertainments and to manage and operate the theatre.

Preferred Shares

The cumulative sinking fund preferred shares are preferred both as to assets and dividends, and at the option of the Company are redeemable at $110 per share and accumulated dividends. The company's by-laws provide that, commencing with the year 1923, 10 per cent. of the net earnings shall be set aside annually as a sinking fund for the redemption and cancellation of the preferred shares. These shares are offered with a bonus of 20 per cent. of common stock. As the amount of preference stock outstanding is reduced the holdings of common stock will be greatly enhanced.

Assets

The company has entered into agreements to purchase properties on Main and Washington Streets, between Mohawk and Genessee Streets, with a frontage on Washington of 187 ft. by a depth varying from 100 ft. to 108 ft.; and on Main Street a frontage of 25 ft. by a depth of 100 ft., which will be used as the entrance to the theatre. The excellent location of this property, with entrance from Main Street and in the heart of Buffalo's principal retail district, is a valuable asset and one that should continually increase in value. The locations heretofore selected in other cities have fully demonstrated the unerring judgment and foresight behind the Loew organization, and the same business acumen has been brought to bear in selecting the present site.

Plans now being prepared show that the theatre will be one of the finest on the continent, fireproof throughout, with the latest features known to theatre construction. The seating capacity of the theatre will be about 4,000. The total cost of the land and building will be in the neighborhood of $1,250,000, which will be financed out of the proceeds of this issue and by assuming mortgages bearing interest at 5 per cent. for approximately $350,000. The preferred issue will be amply secured as to tangible assets.

Earnings

The net earnings of the Company can be estimated with a reasonable assurance of accuracy by taking as a basis Loew's Theatres in the United States and in Canada, operating under similar circumstances. It is estimated that the net earnings should be in the neighborhood of $450,000, and after provision is made for taxes, interest on mortgages, preferred stock dividends, etc., there should be a surplus remaining which would provide a very substantial dividend on the common stock.

The citizens of Buffalo and the surrounding district have already subscribed for a large portion of this issue.

PRICE: $100 PER SHARE

With each 8 Per Cent. Preferred Share the Purchaser will receive a Bonus of Two Shares of Common Stock (Par Value $10.00.)

GOVERNMENT AND MUNICIPAL BONDS

Ontario, Toronto and New Brunswick Offerings Meet With a Favorable Reception—Newfoundland Wants $1,000,000—Other Debenture Notes

As a result of the announcement from New York that the interest on the $25,000,000 Imperial Russian government 5½ per cent. external loan had been defaulted during the past week the prices of the two Russian loans have fallen away about 6 points. A falling away of nearly 3 points is shown in the prices of the 1937 United Kingdom bonds. The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	95⅞	96⅛
United Kingdom 5½% (Nov. 1, 1921) ..	96⅞	97¼
United Kingdom 5½% (Nov. 1, 1922) ..	97¾	98
United Kingdom 5½% (Aug. 1, 1929)...	96	96¼
United Kingdom 5½% (Feb. 1, 1937) ..	87½	88
City of Paris 6% (Oct. 15, 1921)	94	95
Dominion of Canada 5½% (Aug. 1, 1921)	98	99
Dominion of Canada 5½% (Aug. 1, 1929)	95¾	96¼
Russian Govt. Ext. 5½% (Dec. 1, 1921)	30	33
Russian Govt. Ext. 6½% (July 10, 1919)	30	33
Swedish Govt. 6% (June 15, 1939)	92	94

The bond market is now getting back once more to a normal state. With apparent ease, the public is absorbing the three large issues which were placed on the market—viz., New Brunswick $2,282,000, Ontario $4,000,000 and Toronto $2,632,000. The Ontario offering of 5½ per cent. 10-year coupon gold bonds, by the Dominion Securities Corporation, A. E. Ames and Co. and Wood, Gundy and Co., was somewhat of a surprise, as the circular advertising the issue shows that the bonds are dated September 23. The issue is offered at 98.12 and interest, to yield 5¾ per cent., and the syndicate state that it is going well. Toronto's issue met with a favorable reception. The brokers handling these bonds inform *The Monetary Times* that the whole issue has been taken; $955,000 was sold in Canada at a price to yield 5¾ per cent., and the balance was sold in the United States. Practically all of the New Brunswick issue has been taken, according to the underwriters. The offering price is 98.12, to yield 5¾ per cent.

Included in the present offerings, of interest to Canadian brokers, is the government of Newfoundland's issue of $1,000,000 5½ per cent. bonds, due July 1, 1939, for which subscriptions are asked. Principal and interest will be payable in Newfoundland, Montreal, Toronto and New York. The following is a list of debentures offered for sale:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Fort Frances, Ont. ..	$ 4,000	6	10-instal.	Dec. 6
Walkerville, Ont. ..	63,343	5½ & 6	10 & 30-instal.	Dec. 8
Renfrew, Ont.	17,500	6	30-years	Dec. 8
Sandwich, Ont.	139,063	6	Various.	Dec. 8
Walkerville, Ont. ..	63,343	5½	10 & 30 instal.	Dec. 8
Port Colborne, Ont.	80,000	5½	20-instal.	Dec. 15
Barton Tp., Ont. ...	11,920	5½	20-years	Dec. 13
Barton Tp., Ont. ...	18,526	5½	10-years	Dec. 13

Fort Frances, Ont.—Tenders will be received until December 6, 1919, for the purchase of $4,000 6 per cent. 10-instalment debentures.

Sandwich, Ont.—Tenders will be received until December 8, 1919, for the following 6 per cent. debentures: $70,000, 30-years; $40,901, 25-years; $28,162, 10-years.

Township of Barton, Ont.—Tenders will be received until December 13, 1919, for the purchase of $11,920 5½ per cent. 20-year sidewalk debentures, and $18,526 5½ per cent. 10-year road debentures. (See announcement elsewhere in this issue.)

Walkerville, Ont.—Tenders will be received until December 8, 1919, for the purchase of $13,343 6 per cent. 10-instalment debentures, and $50,000 5½ per cent. 30-instalment debentures.

Debenture Notes

Whitby, Ont.—Ratepayers have passed a by-law to spend $60,000 on new school buildings.

Brantford, Ont.—A by-law will be submitted to the ratepayers to raise $185,000 for hospital purposes.

Brandon, Man.—The school board is going to submit a by-law at the next elections to raise $150,000 for school purposes.

Moose Jaw, Sask.—Ratepayers will be called upon to vote on a by-law for the raising of $200,000 for school purposes.

Meaford, Ont.—A by-law asking for the raising of $50,000 by way of 15-year debentures will be submitted to the ratepayers.

Toronto, Ont.—The board of control has approved the request of the Toronto Hydro Commission to issue debentures to the amount of $950,000. It now remains with the finance commission to sanction the issue.

Chatham, Ont.—A by-law asking for the raising of $600,000 for the Lake Erie water project will be submitted to the ratepayers at the January elections.

Lac du Bonnet R.M., Man.—A by-law to raise $50,000 by way of 6 per cent. 30-instalment debentures will be submitted to the ratepayers on December 17 next.

Grey R.M., Man.—A by-law asking for the raising of $93,000, by way of debentures for the purpose of road improvements, will be submitted to the ratepayers on December 16 next.

Calgary, Alta.—The ratepayers will vote on $1,000,000 of money by-laws at the coming municipal elections for sewage disposal $350,000, waterworks $372,316, hospital $135,000 and Louis bridge $155,968.

Ottawa, Ont.—The following money by-laws will be submitted at the municipal elections: $150,000 for the erection of a fire hall; $300,000 for the erection of a police station; $700,000 for the erection of a memorial hall.

St. Thomas, Ont.—The Board of Education requests the council to issue debentures to the amount of $75,000 for the erection of a new school. The debenture by-law for the purchase of the London and Lake Erie Traction Co.'s property in the city at $25,000, has been carried.

Winnipeg, Man.—Approximately $1,000,000 of debenture issues for road improvements will be voted on at the forthcoming rural municipal elections at Dauphin, Westbourne, Sifton, St. Andrews, Ellice, Birtle, Macdonald, Albert, Springfield and Gilbert Plains. Provincial highway commissioner, A. McGillivray.

Halifax, N.S.—The finance committee has recommended that the city borrow from the Royal Bank of Canada a sum not exceeding $500,000, at 5½ per cent. interest, to meet debentures falling due on January 1, 1920. It was decided by the council to test the market first to see if better terms could be obtained.

Portage la Prairie, Man.—At the municipal elections on December 16 the following money by-laws will be submitted: The first is water works debentures for $20,000, dated January 2nd, 1920 and payable January 2nd, 1940, interest at 6 per cent., payable half-yearly. Second, electric light debentures for $34,000, the same debentures as above, and the third is $32,000 school debentures, payable one debenture of $1,600 each year for twenty years, interest at 6 per cent. payable half-yearly.

Hamilton, Ont.—The city council has decided that the following money by-laws will be submitted to the ratepayers: $70,000 for the purchase of fire-fighting apparatus; $50,000 for the development of Mountain highways; $150,000 for the development of Scott Park as an athletic field; and $850,000 for the construction of a central storm overflow sewer. It was decided to issue debentures for $15,000 for the purchase of a school site on Concession Street in the township. The by-law for the $607,173 bond guarantee, which is Hamilton's share, has been given its third reading and passed.

Toronto, Ont.—The following money by-laws will be submitted to the ratepayers at the January elections: To authorize the issue of debentures for the sum of $1,000,000

In the erection of a livestock arena at the Exhibition Grounds; authorizing the proposed Transportation Commission to raise $5,000,000 by debentures to cover extensions and equipment for the street railway system; authorizing the deposit with the provincial hydro commission of debentures to the amount of $4,000,000 as the city's share of guarantee for the securities issued covering the erection of the proposed Toronto and Eastern hydro-radial railway to Bowmanville.

The ten municipalities from Toronto to Bowmanville are asked to guarantee bonds up to about $8,000,000, to take over and electrify the Toronto and Eastern, on which the Hydro-Electric Power Commission have secured an option from the Federal government. All the municipalities which have voted so far have endorsed the radial scheme, and there remain only Toronto, York Township and Darlington Township still to vote.

Montreal, Que.—Notice has been given of a by-law to authorize the city to borrow $8,000,000 in anticipation of the collection of next year's revenue. By the system prevailing here the city administrators are obliged to borrow temporarily in this city, as is explained in the opening clauses of the by-law as submitted by the administrative commission.

Verdun, Que.—Five tenders were received on the city's issue of $225,000 5½ per cent. 20-year debentures, the highest being 94.298, which is on a 6 per cent. basis. A council meeting was held on December 2, and by a vote of four to three, all bids were turned down. When the debentures were offered in September, one bid of 97.87 was received, but this was also turned down. The following is the list of tenders received:—

Rene-T. Leclerc and Credit Canadien, Lté.	94.298
Versailles, Vidricaire and Boulais	93.50
Foster, Barrett, Riepert and Low	92.83
A. E. Ames and Co.	92.06
Municipal Debenture Corporation	91.6155

Edmonton, Alta.—When the city council met on November 28 to discuss the bids received on the $3,000,000 5½ per cent. 10-year bond issue, it was found that only one bid was submitted, and that the price stipulated was not altogether satisfactory to the city. An adjournment was called for December 2, and during that period tenders were again receivable. Further word as to the result has not yet been received.

Bond Sales

Ontario.—The province has once more this year completed a successful sale of its bonds. Private arrangements were completed last week with a Toronto syndicate comprising the Dominion Securities Corporation, A. E. Ames and Co. and Wood, Gundy and Co., whereby an issue of $4,000,000 5½ per cent. 10-year coupon gold bonds was disposed of. The bonds are dated September 23, 1919, and are in denominations of $1,000. Interest and principal are payable in Toronto, or at the Bank of Montreal, New York. Interim certificates will be issued pending delivery of the definitive bonds.

YIELDS ON INVESTMENTS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. Morrow & Jellett, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

NEWS OF MUNICIPAL FINANCE

Montreal Budget Calls for $20,500,000—Plans for Equalizing Assessment in London—Saskatoon Ten Months' Surplus

New Toronto, Ont.—The village has been made by the Ontario Railway and Municipal Board a town. Its population is 2,700.

Medicine Hat, Alta.—A summary of the city treasurer's report of the sinking fund is as follows: Total cash or securities held by sinking fund, as at December 31st, 1918, exclusive of amounts owing by the city, $68,750; total amount actually paid into sinking fund in cash since January 1st, 1919, $59,088; total cash or securities held by sinking fund on October 31st, 1919, exclusive of amounts owing by the city, $130,723.

London, Ont.—Plans are under way for the equalizing of assessment in the city. The assessment department has adopted the new plan of arriving at the value of a residence by cubing. Cubing is finding the frontage, depth and the height. The number of cubic feet in the building is then determined from these figures. According as the house is placed in the first, second or third, or even a lower class, the basic valuation is used. Thus for a house of the first class 25 cents a cubic foot is taken as a fair valuation. The lowest valuation is taken at four cents a cubic foot.

Brantford, Ont.—Assessment Commissioner Ludlow has announced the result of the work of his department in the new district of Belleview, which will be annexed to the city before the first of next year. The new district has a population of 1,612, which will augment the population of 1920 to 32,161. The total assessment, which has not been fully completed as yet, will reach $500,000. The figures thus far secured are: Assessment of realty, $434,650; business assessment, $2,550; income, $10,000; exemptions, $42,500; total, $489,700.

Edmonton, Alta.—The statement of the city's utilities for the month of October shows that the net result of the operation is a net surplus of $15,453 as compared with a deficit of $8,333 for the corresponding month of last year after providing for capital and depreciation charges.

A statement of the city's financial position has been handed out by the comptroller. The general debentures debt is $25,475,957, and the total sinking fund amounts to $5,057,687. General administration expenditure for nine months to September 30th totalled $611,147.

Woodstock, Ont.—The amount of unpaid taxes of the regular collection period for 1919 is the smallest in many years. Altogether, the sum of $125,079 has been paid in out of a total municipal tax of $133,937. The total amount paid in is further supplemented by remissions amounting to $136. The total unpaid balance on November 17th was $8,721. According to the new ruling of the city council, only 2 per cent. will be added to overdue amounts that are settled up during November. This rate will be increased to 3 per cent. in December and to 5 per cent. at the beginning of the year. Last year the unpaid taxes after the due date amounted to $9,744 after allowing for deductions of $413. The total municipal tax in 1918 amounted to $143,412, and of this amount $133,254 was paid in before the collection period expired.

Montreal, Que.—The civic budget for 1920 has been made public. It calls for the expenditure of $20,504,173, which is summarized as follows: Interest, schedule A, $6,216,891; sinking fund, schedule B, $768,405; school tax, $4,552,278; reserve fund, 3 per cent., $615,125; probable loss in revenue collection, $160,000; salaries and wages, schedule C, $5,118,568; maintenance cost and general expenses, $2,997,905; pensions and annuities, $95,000. The report of the Administrative Commission says:—

"The votes for the year 1920 total $20,942,292, from which we have deducted $438,119, the amount in excess of available resources, which should be attributed to the May supplementary budget. From the balance of $20,504,173 there must be deducted $4,532,278, the sum that must be paid to the school commissions as school tax, leaving a net amount of $15,951,895.

"The item of salaries shows an increase of $923,635 over the 1919 budget. This increase is made up of the sum of $550,000, representing the increase in salaries in the police, fire and incineration departments as arbitrated by the Citizens' Committee, and a sum of $373,585, representing the increase distributed each year among the various departments following the salary scale established by the experts of the Civil Service Commission.

"The probable revenue for the fiscal year 1920, as determined by the city comptroller and auditor, amounts to $20,504,173, provided that the council adopts the money bylaws submitted by the Administrative Commission."

Toronto, Ont.—The council has adopted the report of the Board of Control dealing with the future administration of Toronto's street railway. The following questions will be submitted at the January elections:—

1. The operation of the Toronto Railway system by a commission of three ratepayers, resident in the municipality, to be appointed by the city council, and to act without salary.

2. The city's applying for legislation enabling it to borrow money without a further vote of the electors to acquire the property of the Toronto Railway Co., which the city is entitled to take over under the agreement between the city and the company, and for the purposes of the Transportation Commission, and to make arrangements for the operation thereof.

Money for the use of the commission is to be raised by the sale of city debentures under the authority of council, which will thus retain control of financial arrangements, although the commission will otherwise be free of its influence. The legislation to be applied for provides that such debentures as are issued for this purpose will not be included in the city's debt in estimating its borrowing powers.

Saskatoon, Sask.—A surplus in earnings of $51,000 is shown in the statement of the city's finances for ten months of 1919. In submitting the statement, Commissioner Yorath gave warning in regard to the capital expenditure. He stated that the per capita debt was $150, and proposed building for 1920 would mean $1,100,000 more debt and a jump of 12 mills in the tax rate. The total debt of the city is $10,406,291, and the net general debt, $3,665,473. The amount of interest and sinking fund which is required to be raised annually on the present general and school debts is $302,534, which is equivalent to 10.6 mills.

The total revenue required during the current year to carry on the administration of the city's services, including public and high schools, is $1,181,327. Of this amount, $928,986 is obtained by means of a direct tax on land and buildings, the former being assessed at its actual value and the latter at 25 per cent. of their value. The revenue from the business tax or license fees is $38,500. The city council has decided to increase this rate in 1920 to 28 mills, which will mean an increase of approximately $10,000 in revenue from this source.

The total expenditure of the civic administration is $1,181,327, including that of the schools. The chief item of expenditure is the sinking fund and interest payable in respect to the city and school debts, i.e., $302,534. This amount does not, of course, include the sinking fund and interest on the debts of the public utilities, which are self-supporting. This item represents an expenditure of $10.79 per capita and is far in excess of what it should be.

On October 1st, interest on the city's debt, $89,550, fell due in London. As the rate of exchange had fallen to 4.35 in August, it was thought advisable to immediately transmit the money to London. As a result a net saving of $10,019.79 was made after allowing for interest on the bank loan from August 27th to September 30th. The auditor's statement for the first ten months shows that the expenditures amount to $646,554.34, as against appropriations of $726,750 for the year.

The city borrows from the Bank of Montreal, to finance current expenditures pending the collection of taxes and at the 31st day of October owed the bank the sum of $465,550.25, made up as follows:—Loans advanced during 1918 still outstanding, $43,000; current year's loan, $422,550.25; total amount of loan, $465,550.25.

DEBENTURES FOR SALE

PORT COLBORNE, ONT.

Tenders will be received by the undersigned up to December 15th, 1919, Debentures of the Town of Port Colborne for the amount of $80,000, described as follows:—

Public School Debentures, $40,000, bearing five and a half per cent. interest, twenty-year, equal instalments, interest due Nov. 15th each year.

Hydro-Electric Debentures $40,000, bearing five and a half per cent. interest, twenty-year, equal instalments, interest due Nov. 15th each year.

DAVE ALAIR,
Treas., Port Colborne.

21

DEBENTURES FOR SALE

Sealed tenders addressed to the undersigned, and marked on the outside, "Tenders for Debentures," will be received up to noon of Monday, December 8th, 1919, for the purchase of the following debentures and accrued interest:—

$13,343.66—Local Improvements. Nine instalments, balance of $14,439.13 payable in ten instalments at 6 per cent. interest.

$50,000.00—Public School Debentures. For building addition to King George School. Debentures payable in thirty instalments with interest at 5½ per cent.

Debentures will be delivered, and must be settled for at the office of the Town Treasurer, Walkerville, Ont.

All debentures are Coupon, Bearer, and carry interest from 14th of December, 1919. Principal and interest payable at the Canadian Bank of Commerce, Walkerville, on 14th December in each year.

The highest or any tender not necessarily accepted.

For any further information address:

A. E. COCK,
Town Clerk,
Box 329, Walkerville, Ontario.

22

DEBENTURES FOR SALE

Sealed tenders, marked "Tenders for Debentures," will be received by the undersigned up to Saturday, December 13th, 1919, for $11,920 debentures for the cost of construction of cement sidewalks, bearing interest at 5½ per cent. payable half-yearly; for 20 years. Principal payable at end of term, and

For $18,526 debentures bearing interest at 5½ per cent. payable half-yearly for 10 years for the cost of construction of stone roads. Principal payable at end of term.

The highest or any other tender not necessarily accepted.

ALFRED G. E. BRYANT,
Township Clerk.
Rool Court House, Hamilton.

29

EXCHANGE RATE BRINGS INVESTMENT BARGAINS

In their weekly comment on the unlisted securities market, A. J. Pattison, Jr. and Co. say: The recent break in sterling exchange has caused heavy liquidation in Canadian securities held abroad and at the same time offered to investors in this country opportunities to purchase at bargain prices the very best securities. This fact is probably best demonstrated by the present price of Dominion Iron and Steel 5 per cent. consolidated mortgage bonds due September, 1939, which have been selling around 78. Large blocks of these bonds have been bought here by houses having London connections and have been readily absorbed. The results of this week's trading are by close observers considered to be highly satisfactory. The demand for good investments yielding from 5½ per cent. to 7½ per cent. has improved.

DIVIDEND NOTICES

THE TORONTO MORTGAGE COMPANY

QUARTERLY DIVIDEND

Notice is hereby given that a Dividend of Two per cent., being at the rate of Eight per cent. per annum upon the paid-up Capital Stock of this Company, has been declared for the current Quarter, together with a Bonus of One per cent., and that the same will be payable on and after

1st January, 1920,

to shareholders of record on the books of the Company at the close of business on 15th inst.

By Order of the Board.

WALTER GILLESPIE,
Manager.

Toronto, 4th December, 1919.

THE CANADIAN CROCKER-WHEELER CO., LTD.

DIVIDEND NOTICE

The Directors of The Canadian Crocker-Wheeler Company, Limited, have declared a One and Three Quarter per cent. (1¾%) dividend on the preferred stock of the Company for the three months ending December 31st 1919, to shareholders of record December 21st, 1919. Also a dividend of One and Three Quarters per cent. (1¾%) on the common stock of the Company for the three months ending December 31st, 1919, to shareholders of record December 21st, 1919.

The stock books will be closed from the 21st to the 31st of December, both days inclusive.

Checks will be mailed to shareholders on December 31st, 1919.

By order of the Board.

H. C. HOWELL,
For Secretary-Treasurer.

St. Catharines, December 5th, 1919. 31

Condensed Advertisements

"Positions Wanted," 2c per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement 50c per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

The sixth annual convention of the Pacific Coast Association of Port Authorities opened in San Diego, Cal., on December 1. Vancouver is represented in this association, and the 1916 convention was held in that city.

INVESTMENTS AND THE MARKET

Windsor Hotel Company Has Good Year—Lake of the Woods Stock Issue—Winnipeg Electric Railway Valuation—La Rose and Northern Customs Deal

Acadia Sugar Refining Co.—Shareholders of the company have authorized the directors to enter into negotiations regarding new financing of the company. A meeting will be held on December 11th, when the report of the directors will be presented, and the action that shall have been taken, shall come up for confirmation.

William Davies Co.—The company has acquired a large American packing plant, which deal makes the business international. Sir Joseph Flavelle, president of the company, has retired, and in doing so has sold his share of the stock, which has gone into the hands of the general manager, E. C. Fox, and a group of associates. The figure at which the stock was sold is said to be $3,000,000.

Porto Rico Railways Co., Ltd.—The following is a comparative statement of earnings for October, 1919:—

	1918.	1919.	Increase.
Gross	$ 86,047	$ 95,171	$ 9,124
Net	35,546	43,261	7,714
For ten months:			
Gross	$865,213	$935,476	$70,263
Net	362,533	365,813	3,280

Twin City Rapid Transit Co.—The following is a statement of revenue and expenditure for the ten months ended October 31st last, with comparisons:—

1919.	1918.	Per cent. inc. or dec.
$9,231,465	$8,051,211	+ $14.66
6,623,961	5,774,824	+ 14.70
2,607,504	2,276,387	+ 14.55
1,748,102	1,628,273	+ 07.36
859,401	648,113	+ 32.60

Winnipeg Electric Railway.—The present value of the company's holdings exclusive of land, rolling stock, gas properties and "intangible capital," according to the appraisal just completed by the Manitoba Public Utilities Commission experts, is $12,934,293. To replace the holdings, however, would cost $15,724,501, thus showing that the experts have allowed $2,790,207 for depreciation since the plant was constructed. The J. C. White report, which covered a valuation of the company's holdings in 1915, gave $23,995,860 as the actual value and $27,187,322 as the cost to replace.

La Rose Consolidated Mining Co.—A deal between the La Rose Co., and the Northern Customs Co., to do with the purchase of the former, is pending. No details have yet been given, but negotiations are under way, it is understood. It is reported that provided the La Rose Co. succeeds in selling its original holdings it will concentrate attention on its Violet property, the operation of which appears to be quite favorable. The Violet is situated adjacent to the O'Brien Mine, and a decision in connection with litigation over the correct location of the boundary between it and the O'Brien is pending. The O'Brien Co. has just discovered rich ore on the boundary of the disputed property.

Southern Canada Power Co.—The following is a statement of the earnings of the company and its subsidiaries for October, 1919, showing an increase over the previous year:—

	October, 1919.	Increase.
Gross	$53,270	$8,222
Operating expenses and purchased power	25,777	1,318
Net earnings	$27,492	$6,904

The industrial department of the company, in charge of a mechanical engineer, for the purpose of locating new industries in the territory served by the company, has during the past two months located six manufacturing establishments, mostly branches of large American companies.

Lake of the Woods Milling Co.—A circular has been issued to shareholders of the company setting forth the terms and conditions of the new common stock issue of the enterprise. Rights to subscribe at par to the new stock on the basis of one share of new for each three shares of old held, will expire on January 30th next. Subscriptions are to be made in two payments of 50 per cent., the first being payable on January 30th next, and the second on or before February 27th. If shareholders so elect, payment of one or both of the instalments may be made before the due dates, but it is stated that no interest will be allowed on such payments.

It is not the intention of the company to issue the new stock in fractional shares, and shareholders are advised that if certificates of subscription for fractions of a share cannot be obtained in the market to make up the whole shares, the fractions held should be disposed of. In order to participate in the dividend for the quarter ending May 31st, 1920, the fully paid-up certificates of subscription to be issued for the new stock must be sent to the Crown Trust Co., Montreal, for exchange for share certificates of the common stock of the company, on or before that date.

Canadian Pacific Railway.—The earnings statement of the company for October shows that gross for the month rose to a new record level, the monthly figures of $18,296,652 representing an increase of $2,613,872, or 16.7 per cent. over those for the corresponding period a year ago, and nearly $800,000 in excess of the gross for the month of September, which had previously stood at the high-water mark in the company's history.

Net profits for the month of October last are reported at $5,347,781, an increase of $261,964 over those of October, 1918, the substantial increase of nearly 17 per cent. in gross earnings being partially offset by a rise in working expenses, which at $12,948,870 were higher by $2,351,926, or in excess of 23 per cent. over the total for the corresponding period last year.

The returns for the ten-months' period ending with October show gross was increased this year by nearly $16,000,000 in comparison with 1918, the total of $142,536,626 being higher by approximately 12½ per cent. than the 1918 aggregate. Working expenses rose $15,664,723, or nearly 16 per cent., in the period. The ratio of costs to gross earnings in the 1919 period was 80 per cent., compared with 77.6 per cent. in 1918.

Windsor Hotel Company.—The statement of finances of the company for the year ended October 31st last, shows improvement in net earnings, net working capital, cash and total assets. After deduction of bond interest and dividends paid, net earnings amounted to $100,177 as compared with $41,283 in the year ended in 1918. In other words, net earnings on the paid-up capital of $1,500,000 were at the rate of about 6.61 per cent. as compared with little better than 2 per cent. in the previous year. During the year, it might also be noted, the company paid 3 per cent. in dividends as compared with 2 per cent. in 1918.

Total operating profit for the year was $172,177 as compared with $68,283 in the previous year. After all deductions, surplus amounted to $55,177 as compared with $11,283 in 1918, making total credit at balance of profit and loss account $522,400 as against $467,223 in the previous year.

The balance sheet shows current assets at $349,139 as compared with $167,177 in the previous year, and current liabilities at $177,023 as against $96,329 in the previous year, leaving net working capital at the end of the year at $172,116 against $70,848 at the end of October, 1918. Principal changes in the balance sheet included an increase in cash from $31,852 in 1918 to $239,895, and in accounts receivable of from $32,207 to $47,871. Inventories underwent a healthy paring down, being given at $61,373 as compared with $103,118 in 1918. Among the liabilities there is a large increase in accounts payable of from $53,154 to $144,981, while accrued wages at $23,042 compared with $11,188.

DIVIDENDS AND NOTICES

THE ROYAL BANK OF CANADA

FIFTIETH ANNIVERSARY BONUS

Notice is hereby given that to commemorate the Fiftieth Anniversary of the founding of the bank, a bonus of 2% upon the paid-up capital stock of the bank has been declared, and will be payable at the bank and its branches on and after Saturday, the 20th day of December next to shareholders of record at the close of business on the 29th day of November.

By order of the Board.
C. E. NEILL,
General Manager.
Montreal, Que., November 11th, 1919. 14

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of two per cent. (2%) on the Common Stock of the **Dominion Textile Company, Limited,** has been declared for the quarter ending **31st December, 1919,** payable **January 2nd, 1920,** to shareholders of record **December 15th, 1919.**

By order of the Board.
JAS. H. WEBB,
Secretary-Treasurer.
Montreal, 17th November, 1919. 16

RECENT FIRES

Many Large Conflagrations This Week—Insurance on Laval University

Dover Township, Ont.—November 22—Barns and outbuildings of J. Cadotte and season's crop of hay, grain and tobacco were destroyed.

Gladstone, Man.—November 29—The Gladstone Echo Mill was completely destroyed. Cause unknown. Estimated loss, $200,000.

Haileybury, Ont.—November 24—Three-story building on Ferguson Avenue, owned by F. Askar, was damaged. Loss covered by insurance.

Harrowsmith, Ont.—November 20—Poolroom, barber shop and dwelling of A. W. Cowdy were destroyed. Estimated loss, $2,000, with $1,000 insurance.

Kitchener, Ont.—December 2—Garage of A. Lockhart and Co. was damaged. Cause is unknown. Estimated loss, $30,000.

Leaside, Ont.—November 27—Plant owned by F. G. Ericson was damaged.

Montreal, Que.—November 29—Building of the Beaver Printing Co. was damaged. Estimated loss on the contents is $2,000 and on building $700. Total loss, $2,700. Both losses are covered by insurance.

Moose Jaw, Sask.—November 30—Premises of the Moose Jaw Furriers, owned by J. D. Clard, were damaged. Cause, explosion of an oil stove. Estimated loss, $200.

December 2—The oatmeal mill of the Robin Hood Flour Mills Co. was damaged.

Mortlach, Sask.—November 28—Drug store of Dr. Milton was destroyed. One death.

New Glasgow, N.S.—December 2—The Norfolk Hotel was damaged. Cause, from a defect in the kitchen. Insurance carried, $40,000.

Ottawa, Ont.—November 25—The Scottish Rite Building was damaged. Estimated loss, $6,000. R. McGiffin, Ltd., is the chief loser, sustaining a loss of about $5,500. Blouses, Ltd., sustained a loss of about $500, while the Daffodil tea rooms were slightly damaged. The loss is fully covered by insurance.

Ottawa, Ont.—November 27—Building and stock of McDougall, Ltd., Sussex Street, were damaged. Estimated loss, $25,000.

Quebec, Que.—December 1—A municipal building was damaged. Fire is believed to have started in furnace. Estimated loss, $15,000.

December 2—Building occupied by the Quebec and Levis Ferry Co., baggage room and ticket office of the Grand Trunk Railway, and ticket office of the C.N.R., on Dalhousie Street was damaged. Cause, overheated furnace. Estimated loss, $13,000. The building is owned by the city and is insured for $10,000.

Toronto, Ont.—November 27—The building occupied by Samuel Pitts at 106 Esplanade, a wholesale fish merchant, was damaged. Cause unknown. Estimated loss, $400. The building of the Canada Carpet Comforter Co., situated at 360 Dufferin Street, was damaged. Cause, sparks from a picking machine falling on some rags. Estimated loss, about $200. Building owned and occupied by Nicholson and Curtis at the rear of 1105 and 1107 Yonge Street was damaged. Estimated loss, $750.

November 28—Plant of the Kellogg Cereal Co. was damaged. Cause, overheated oven. Estimated loss, $300.

December 2—Premises owned by Dean Brothers at 156 Richmond Street were damaged. Cause, defective wiring. Estimated loss, $1,500.

December 3—Building at 42 Melinda Street was damaged. Cause, unknown. Estimated loss is as follows: Toronto General Trusts Co., $5,000; Century Press, $2,500; Royal Coffee Co. and Reed, Shaw and McNaught's storeroom, $500; Henderson Brothers, $5,000; Dewdney Jewellery Co., $1,000. Total loss, $14,000.

Vancouver, B.C.—November 29—The Nasmyth shingle mill was completely destroyed. Estimated loss, $10,000. Cause, sparks from the open burner.

December 1—The building of the Stirling Hotel was damaged. Estimated loss, $40,000.

Verigin, Sask.—November 26—The village of the Christian Community of Universal Brotherhood was damaged. Estimated loss, $42,000. Loss is partially covered by insurance.

Winchester, Ont.—November 26—The residence of S. C. Utman was damaged. Estimated loss, $2,000.

Windsor, Ont.—November 22—British American Hotel, Minto's store and Stoke's tobacco store were damaged. Estimated loss, $2,500. Cause, electrical defect in hotel block.

Winnipeg, Man.—November 30—The building of the West Hotel was damaged. Cause, defective chimney. Estimated loss, $2,500. It is covered by insurance. Premises of Buckler and Co., 84 Princess Street, were damaged. Cause, defective electric motor.

ADDITIONAL INFORMATION CONCERNING FIRES

Belleville, Ont.—November 19—Residence of R. E. Lazier was damaged. Cause, defective chimney. Estimated loss, $1,015. Insurance carried, $9,000.

Hamilton, Ont.—November 14—The John Lennox Building was damaged. Estimated loss, $10,000. Insurance carried, $70,000. Contents were damaged to the extent of $30,000 and insurance was carried to the amount of $238,500. The tailoring and pressing stock of R. S. Babb in the same building was also damaged. Estimated loss, $6,000. Insurance carried, $5,000.

Montreal, Que.—November 20—Insurance was carried to the amount of $150,000 on the Laval University. The following companies are interested: Royal, $20,000; Queen, $20,000; Phœnix of London, $20,000; Liverpool and London and Globe, $20,000; Commercial Union, $10,000; North British and Mercantile, $30,000; London and Lancashire Fire, $10,000; Sun, $10,000; Fabriques, $10,000.

Muenster, Sask.—November 14—The building of the Bank d'Hochelaga was damaged. Cause, fire from the next building. Estimated loss, $1,500. Insurance was carried to the amount of $600 in the Canada National, of Saskatoon, Sask.

Capital Investments and Trade Balances

How Loans Abroad Affect Course of Trade — Other Invisible Factors Entering Into a Nation's Financial Balance Sheet — Illustrations from Debtor and Creditor Countries—Effects of the War on United Kingdom, United States and Other Countries

By THEODORE H. BOGGS

IT has long been recognized by students of world commerce that there is a close relation between foreign trade and foreign investments of capital. With the close of the world war, however, this relationship has come to enjoy a wider recognition. Many have become persuaded of the truth of this principle when confronted by the prospect of altered conditions in the foreign trade of their own country, the changes coming in large part as a result of the vast lending and borrowing operations of the war. We are beginning to see, as perhaps never before, that the foreign investment of capital brings in its wake many trade consequences. The popular notion that "trade follows the flag," may be paraphrased to fit the case more accurately by saying that trade follows the dollar.

This important principle, that finance is a pioneer of trade, may be supported by evidence drawn from the experience of Great Britain. Although her pre-eminence in international trade has been powerfully furthered, it is true, by her merchant marine and extensive colonial empire, yet, in the final analysis, we shall find the principal key to her commercial supremacy in the vastness of her overseas investments. British capital invested abroad has been variously estimated as amounting in 1914 to $15,000,000,000 to $20,000,000,000. While functioning as a great silent factor, it none the less has served effectively to insure both imports of raw material for her industries and foreign markets for her exports. Commenting on this general principle, Sir George Paish declared, in 1909, that "the investment in the last sixty years of about £2,500,000,000 of British capital has occurred simultaneously with a vast growth of British trade and prosperity, and in my opinion this growth of our trade and prosperity is largely the result of our investment of capital in other countries."[1]

Both the volume of a nation's foreign trade and the nature of its trade balance are alike affected by the international flow of capital. Generally speaking, the trade balance reflects the net position of a country as a lender of capital for overseas investment or as a borrower of foreign capital for domestic investment. This principle applies equally to countries with an excess of imports, such as the United Kingdom, France and Germany, and to those with an excess of exports, such as the United States and India. Moreover, as is at once obvious, a nation's trade balance may in time undergo a transition to conform to changes which may appear in its position as a lender or a borrower of capital.

As generally used the term trade balance is applied to a country's foreign trade in merchandise. It is used for the purpose of indicating the excess value of the merchandise exports over merchandise imports or the excess value of such imports over exports. In financial circles the term is employed to denote the condition of foreign trade which enables a country to import supplies of the precious metals, or the reverse condition, which necessitates the exportation of the same.

Through the modern development of commerce and international banking we have learned to recognize the fallacy inherent in the "Mercantile Doctrine" so widely accepted during the sixteenth, seventeenth and eighteenth centuries. It was then believed that a country must secure a favorable balance of trade, a balance, that is to say, of merchandise exports over imports, if it would escape the ruinous consequence of having its stock of the precious metals totally drained away. To the statesmen and financiers of that time it was accordingly a matter of supreme concern to attain and retain a balance of exports over imports. Much legislation therefore was passed for the purpose of restricting imports and stimulating exports.

In modern times we have come to see, as Sir George Paish has pointed out: "That a nation could under certain circumstances purchase goods of a greater aggregate value than it exported, without sustaining any drain upon its stock of the precious metals or suffering any inconvenience whatsoever; and in recent time no one has paid any great amount of attention to the question of the trade balance, other than for the purpose of ascertaining the factors which caused the imports of certain countries largely to exceed their exports, or of discovering the reason for the exports of certain countries largely exceeding their imports." It is now recognized that a nation's foreign trade will adjust itself more or less quickly to the needs of that country, and that under normal conditions the effect of some disturbing factor which may reduce temporarily its exporting ability may be counteracted by financial operations in the international money markets. Thus, save under the stress of some abnormal influence on the scale of the European war, no apprehension need be felt that an excessive drain can occur of the precious metals.

Yet evidence still abounds that the dictum of Sir Robert Giffen that "the 'balance of trade' and 'the excess of imports over exports' are pitfalls for the amateur and unwary," has lost little of its pertinency. Recognizing alike the plausibility and widespread popular acceptance of the "favorable balance" doctrine and its relation to conditions of trade, let us consider first the general underlying principles. Later, for the purpose of illustration, we shall turn to the trade balances of the United Kingdom and the United States.

Generally speaking, those countries of the world which have an excess of merchandise imports over merchandise exports are the capital-lending countries, whereas those whose exports exceed imports are the borrowing countries. This is so, because the lending country must secure payment, in the guise of imports, not only for its merchandise exports, but also for the interest upon its capital invested abroad in earlier years. Similarly, if we exclude other factors from consideration, the capital-borrowing country must export more goods than it imports in order to offset the merchandise imported as well as to meet the interest charges upon the capital which it has previously borrowed. True, during the early stages of capital investment the lending country will normally show an excess of exports. Were these capital investments to extend over one year only, the excess of merchandise exports of the lending country during the period in question would approximately measure the amount of the capital loaned abroad. As time elapses, however, the total capital invested in other countries increases, although at a diminishing percentage rate, while at the same time the annual interest charges owed to the creditor nation show a more than corresponding percentage increase. Eventually, the time will arrive when the annual payments which the lending country receives as interest on its foreign investments will exceed the new and additional capital which it may lend each year. The same reasoning may be employed to show that the borrowing country, during the early stages, will normally import a larger amount of merchandise than will be exported, and that here too the passing of time brings in its wake a change in the trade balance. Ultimately the annual interest payments of the borrowing country on account of capital previously obtained will surpass in amount the new capital which it borrows each year. Thus, in the end, its merchandise exports will overtake and then exceed its imports.

---

[1] Paish, Great Britain's Capital Investments in Other Lands, Journal of Royal Statistical Society, September, 1909.

Classification of Countries

From the foregoing summary therefore we note that on the basis of their capital investments and trade balances there are four general groups of countries. They are as follows:—

1. Countries which have begun to invest capital abroad in other lands. These we may call the immature lending countries. Their trade will normally be marked by an excess of exports. England during the early years of the nineteenth century typified this group. At that time she regularly exported goods to a greater value than she imported. These represented the goods she was lending abroad. The United States during recent years may also be considered an immature lending country.

2. Countries which have in the past invested abroad so large a volume of capital that the annual interest payments thereon owed to them exceed the new and additional capital that they may continue to lend each year. These we shall designate as mature lending countries. Their trade balance will be marked normally by an excess of imports. England for a half century or more has been the great example of this type of country. And we may anticipate that in the not distant future the United States, having become a mature lender, will find her trade balance marked also by an excess of imports.

3. Countries which are in the habit of borrowing capital from abroad, but whose volume of capital thus borrowed is not so large that the resultant annual interest charges thereon shall equal the new and additional capital that they may import each year. These countries, the immature borrowers, have trade balances marked normally by an excess of imports. Canada, prior to 1914, was in this stage of borrowing. The United States, likewise, prior to 1873, was in the same stage.

4. Countries that have borrowed from abroad so large a volume of capital that the annual interest charges exceed in amount the new capital that they may annually procure from abroad. To such countries we may apply the term mature borrowers. Their balance of trade will show an excess of exports. India typifies this group. The United States reached this stage about 1873, and has recently, largely as a result of the financial operations of the war, emerged therefrom into the position of the immature lending country. Canada is now passing from the condition of an immature borrower to that of a mature borrowing country.

The above classification may perhaps be made more clear by an analogy from the field of individual investment. Let us imagine the case of an eccentric investor, A, who determines to purchase one one-hundred dollar bond of a corporation, X, each year for an indefinite period. Let us assume that the interest payable annually on the bond is at the rate of 4 per cent. During the first year, therefore, under these circumstances, A will invest $100 in the securities of the corporation, and in turn will receive $4 in the form of interest. During the second year A's investment again is $100, while his interest now amounts to $8. In the twenty-fourth year A's investment is still $100 but his interest return now has reached $96. From the twenty-sixth year onward the annual interest payable to A is obviously larger than his new annual investment, and increasingly so.

In applying the analogy it is of course recognized that the use of the terms "mature" and "immature" as attached to investors and borrowers is arbitrary. Yet such use, even in a restricted sense, is not without merit. The term "mature" is used as a convenient substitute for the clause "in the later stages," while the term "immature" implies "in the earlier stages." We may therefore consider our investor, A, an immature investor or lender during the first twenty-four years of the hypothetical transaction. During this period A's new annual investment exceeded the interest which he annually received. In and after the twenty-sixth year, A became a mature investor. His new investment each year was now surpassed by the annual interest received by him. It is in this sense that England is referred to above as an immature lender during the early years of the nineteenth century and as a mature lender in recent decades. Likewise, Canada's status as an immature borrower prior to 1914 may be likened to the position of corporation X during the first twenty-four years, a period in which the corporation borrowed, or obtained, from A a larger amount of capital each year than the corporation was called upon to pay to A in the form of interest. Henceforth for an indefinite period Canada may be looked upon as a mature borrowing country; in the same sense in which corporation X became a mature borrowing concern in the twenty-sixth year, from which time onward X borrowed, or obtained, from A a smaller amount of new capital each year than the volume of interest payable to A.

It is of course recognized that in the ebb and flow of international capital investments the process of lending and borrowing does not proceed on so uniform and arbitrary a basis as that depicted in the above transaction. The volume of capital which a country may lend or borrow varies from year to year and the interest rate is not uniform on all loans. And, moreover, the same country may engage in both lending and borrowing operations. Yet the essential fact remains that in the career of a lending country a time will be reached sooner or later when the new capital loaned abroad each year will be equalled and later surpassed by the amount of interest payable annually to that country on account of its earlier foreign investments. By the same form of reasoning, the point will be reached some time in the career of a borrowing country when the new annual capital borrowings will be surpassed by the volume of interest payable abroad on the capital already imported.

How a Loan is Made

In view of the importance of international borrowing and lending as a factor in the determination of the balance of trade, let us consider more concretely the manner in which the lending of capital overseas works out its effects. The vast sums of capital invested by England in India, Egypt, the United States, the Argentine Republic, etc., for railway development, harbor construction, irrigation works and other purposes are now represented by national or private debts of all kinds, such as government stocks and bonds, railway and land companies' shares, and all other forms of public and private indebtedness. "The method and the effect of the creation of these huge items in the balance sheet of nations are," we are reminded by Professor Todd, "of a double character. When, in the first place, a loan is raised in London, say, for the construction of an Argentine railway, the amount of the loan is not exported in boxes of gold to the borrowing country. As a matter of fact the bulk of the money never leaves England, but is simply placed to the credit of the foreign government, or company, in the books of the Bank of England, from which it is almost immediately paid out again in the form of cheques to the engineers or bridge builders who have already supplied the goods for which the loan was intended to pay. Thus the loan is given in the form of goods which appear in the customs returns of the exports of the lending country, and go to swell the statistics of exports for that year, without any corresponding entry of imports in payment therefor. There is, therefore, for the time being an apparent excess of exports by the lending country, and a corresponding excess of imports by the borrowing country. But in subsequent years interest will require to be paid on the loan, and at some future date it must be repaid either in a lump sum or by instalments spread over a period of years, and this repayment, whether of interest or capital, can only be made in the form of goods. . . . Thus the effect upon the borrowing country's balance of trade is to create in the year that the loan is raised, an apparent excess of imports which is balanced by the invisible export of the debt in the form of the loan certificates. But in future years the borrowing country's exports must be in excess of its imports, to an amount sufficient to meet the interest charges on the debt, which thus becomes an invisible import (of interest coupons) to that amount. Again, when the loan comes to be repaid, this also will tend to swell the exports of the debtor country for that year."[2]

So far, it will be noted, we have in our study of trade balances, considered but a single factor apart from trade in merchandise—namely, that of capital investments and payment of interest thereon. Were it possible to exclude all other influences the balance of trade would be determined in accordance with the foregoing principles. There are, however, several other important factors which must be taken into account and which will be considered in detail later. The most important of these, at least so far as Great Britain is concerned, is the service of ocean transport rendered by those countries possessing great fleets of merchant ships to those which possess little or no shipping. Another class of services is that rendered by marine and other insurance companies, commission merchants and the elaborate financial system, all of which facilitate the handling of foreign trade. Another factor, of importance to certain countries, is the item to which the term "boarding expenses" is aptly applied. This includes the expenditure of tourists and of others who have occasion to travel or live outside of their own country. Among other influences are the ebb and flow of immigrants, the seasonal and temporary migration of workers from one country to another, and remittances by immigrants or by others.

Before attempting an analysis of the trade balance of Great Britain let us revert for a time to a consideration of the meaning of the term "balance of trade." It has been stated that during the seventeenth century it was believed generally that a country should maintain an excess of merchandise exports over imports, to the end that its stock of the precious metals should be maintained if not augmented. An adverse balance, an excess of merchandise imports, was looked upon with apprehension. This attitude rested for its explanation on the importance attached to the precious metals by the early mercantilist writers. The extraordinary importance attached to gold and silver "was perhaps justified," declares Professor William Smart, "in times when there were no bankers; when Europe was starving for a sound currency, and industry hampered by the want of it. All countries took strong measures to attract and retain gold and silver; even Spain—the depot of these metals—prohibited their export under the most drastic penalties. When in time it was seen that such measures were useless, it was conceived that there was a more natural way of effecting the same object; if encouragement were given to exports while imports were handicapped, there would tend to be a 'favorable balance'—that is, the excess of value would come in gold and silver; hence bounties on exports and duties on imports."[3] Referring to this action, Adam Smith stated that "the attention of government was turned away from guarding against the exportation of gold and silver to watch over the balance of trade as the only cause which could occasion any augmentation or diminution of these metals. From one fruitless care it was turned away to another, much more intricate, much more embarrassing, and just equally fruitless."

The mercantilist view of the balance of trade has been discarded because of the gradual recognition of certain fundamental principles. In the first place, we look upon gold as something not to be consumed, but rather as a thing or instrument for facilitating trade. No longer do we think of associating the prosperity of a country with the per capita amount of gold possessed by that country. In the second place, it is now recognized that "every importation when it takes the form of a regular current, necessarily provokes and determines a corresponding exportation, and conversely."[4] This law of the balance of trade operates and exerts its influence in the first instance through the variation in the rate of foreign exchange and in the long run through its effect on general prices. We have here two automatic checks, in the rate of exchange and general prices, which will prevent a permanent or excessive flow of gold either into or out of a country. As a consequence, we have come to see, in the third place, that total exports and total imports of every country must approximately balance each other. The terms "total exports" and "total imports" are used advisedly. The most casual examination of the actual customs returns of exports and imports of any country will reveal the fact that they do not appear to bear out this law at all. The apparent discrepancy grows out of the practice of including among exports and imports only merchandise goods, and, at times, specie and bullion also. In the ordinary statement of foreign trade, no account is taken of the export and import of services, of capital, interest, boarding expenses, etc. In the interest of clearness, therefore, let us refer to these items as invisible exports and imports, as Sir Robert Giffen first called them. The term "visible" may quite naturally be applied to merchandise exports and imports. Now although merchandise, or visible, exports and imports are not likely to balance for any country, we may none the less rest assured of an approximate equivalent between the total (including both visible and invisible) exports and total (both visible and invisible) imports. Under normal conditions this must inevitably be the case on account of the operation of the automatic checks mentioned above.

In attempting to apply this principle to the foreign trade of the United Kingdom we are struck at once by the wide disparity between the value of merchandise exports and imports. During the six years preceding the war the average annual excess of imports over exports, in the United Kingdom, exclusive of bullion and specie, amounted to approximately $730,000,000.[5] It is at once evident that such enormous balances could never be paid in gold. It is the more significant when one recalls that this general condition of excessive imports has prevailed for decades. Thus, as we may note from the following summary, the excess of imports over exports steadily increased during the half-century prior to 1910.

TRADE OF THE UNITED KINGDOM[6]

(Gold and silver included)

Year.	Average yearly excess of imports, million £
1855-60	34.2 ($171,000,000)[7]
1861-70	63.1
1871-80	96.1
1881-90	97.6
1891-00	150.5
1901-10	161.3 ($806,000,000)
1911-13	141.8 ($709,000,000)

Save in the case of a country like South Africa, which produces gold, it is impossible for a country to be always importing more than it exports and paying for the excess in gold. We are led to anticipate therefore that in the case of the United Kingdom there must be a large excess of invisible exports or credits over invisible imports or debits.

BANK BRANCH NOTES

Fewer Branches Now Being Opened—Royal Continues Extensions in South

The following is a list of branches of Canadian banks recently opened:—

Vancouver, B.C.	Merchants Bank
Toronto, Ont. (cor. Roncesvalles and Neepawa)	Home Bank
Miranda, Cuba	Royal Bank

It has been recently announced that the Royal Bank of Canada will soon open a branch at Sao Paulo, Brazil. A branch of the Home Bank will also be opened on Dundas St., London East, early in the new year.

New Bank Buildings

The Continental Hotel has been purchased by the Banque Nationale, of Sherbrooke, Quebec, and they will either have it repaired or erect a new building. The manager is A. E. Couet.

The Royal Bank of Canada has leased property in Westville, N.S., and will enter into possession as soon as possible. They have also leased part of the new Olivier block, at Sherbrooke, Que., and will establish an office at the corner of King and Wellington Streets. The premises leased occupy the whole Wellington Street frontage of the block, and include the corner entrance. They expect to open these offices in the spring.

Personal Appointments

Mr. J. H. Morrison, manager of the Home Bank at Cabri, Sask., has been transferred to the management of the branch in Tantallon, Sask.

Mr. W. W. Regan has been appointed manager of the Sterling Bank at Glenella. Mr. Regan was formerly at Regan.

Mr. W. M. Blackstock, manager of the Canadian Bank of Commerce, of Nakusp, B.C., has been transferred to the branch in Trail, B.C.

Mr. J. C. Scott, formerly of the Standard Bank in North Lethbridge, has been appointed manager of the Winnipeg branch.

Mr. John C. Vradenburg has been appointed manager of the Royal Bank of Canada at Miranda, Cuba.

Mr. F. L. MacGachen has been transferred to the management of the Merchants Bank branch in Quebec City.

Mr. Windsor, manager of the Union Bank at Blairmore, Man., has been transferred to the branch in Boissevain, Man.

PRIVATE WIRE TO SASKATOON

Willoughby, Sumner, Ltd., one of the oldest financial firms in Saskatoon, have installed a private wire connection with Logan and Bryan, New York. This is the only private wire service to northern Saskatchewan. G. H. Payson, formerly of Halle and Steiglitz, Atlantic City, N.J., is now in charge of the bond and stock department of Willoughby, Sumner, Ltd.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first week of December:—

	1919.	1918.	Inc. or dec.
Canadian Pacific Railway.			
December 7	$3,797,000	$3,480,000	+ $ 317,000
Grand Trunk Railway.			
December 7	$1,294,019	$1,379,502	— $ 85,483
Canadian National Railways.			
December 7	$2,070,372	$1,714,173	+ $ 356,199

HOW FORTY MILLION WILL BE SPENT

The Canadian Patriotic Fund will have charge of the money voted at the extra session of parliament for unemployed returned soldiers. The agreement with the government provides as follows: (1) The government will be represented on the organization of the Canadian Patriotic Fund at Ottawa as well as on each of its provincial organizations. (2) Representatives of returned men will be attached to local committees dealing with the problem. (3) Assistance is to be given only because employment is not available. Before making any payment the organization will secure the necessary certificate in each case, showing that the applicant is unable to secure employment. It is also provided that assistance may be rendered where the income derived from any employment is insufficient to maintain the applicant and his family. In cases where employment may be secured at some place other than where a man ordinarily resides, provision is made for his transportation.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	8 pm	8¼ pm	....
Mont. funds	par	par	⅛ to ¼
Sterling—			
Demand	$4.08	$4.09	....
Cable transfers	4.09	4.10	....

Rate in New York for sterling demand, $3.77.

Bank of England rate, 6 per cent.

Exchange on New York, it will be noticed, has jumped by over 2½ per cent. during the past week. This is in spite of heavy subscriptions to the Victory Loan and other investments in Canada. Sterling quotations in New York have reached a new low record.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended December 11, 1919, compared with the corresponding week last year:—

	Week ended Dec. 11, '19.	Week ended Dec. 12, '18.		Changes.
Montreal	$125,529,725	$139,320,268	—	$13,790,543
Toronto	110,131,836	75,477,598	+	34,654,238
Winnipeg	63,081,116	76,186,826	—	13,105,710
Vancouver	15,598,088	11,978,265	+	3,619,823
Ottawa	12,454,386	12,323,401	+	130,985
Calgary	9,857,302	8,020,597	+	1,836,705
Hamilton	6,857,302	4,965,670	+	1,891,632
Quebec	6,099,587	5,646,541	+	453,046
Halifax	5,480,300	4,093,823	+	1,386,477
London	4,347,859	3,249,222	+	1,098,637
Victoria	2,444,075	2,801,797	—	357,722
Saskatoon	2,497,027	2,425,149	+	71,878
Moose Jaw	2,028,068	2,554,387	—	526,319
Brantford	2,102,640	1,117,928	+	984,712
Brandon	1,058,664	906,802	+	151,862
Fort William	1,000,312	929,601	+	70,711
Lethbridge	749,185	816,181	—	66,996
Medicine Hat	589,256	529,132	+	60,124
New Westminster	529,508	502,205	+	27,303
Peterboro	878,647	949,614	—	70,967
Sherbrooke	1,018,442	798,199	+	220,243
Kitchener	1,407,646	756,404	+	651,242
Prince Albert	580,553	366,594	+	213,959
Totals	$376,321,524	$356,716,204	+	$19,605,320

THE TARIFF AND LIVING COSTS

AFTER investigations into numerous branches of industry, extending over several months, the Board of Commerce will now turn its attention to the tariff and its effects on the cost of living. No matter to what field the Board turned, producers appeared ready and able to show that they were not making undue profits. The farmer even maintained he was putting some products on the market at a loss; manufacturers showed that prices had not been raised out of proportion to labor, material and other costs; wholesalers and retailers proved the usefulness of the part they play in distribution, and undue profits were not found to be general. While high profits are made in the most successful concerns in all lines of industry, the Board was unable to specify any line as being subject to general "profiteering." Some attempts have been made to reduce profits by limiting the "spread," or profit, realized. This cannot succeed, however, as a market price must rule, and profits be determined by the difference between cost and this price. This spread must vary in proportion to the ability of a concern to produce cheaply, but by taxation at least a part of the profits of success may be appropriated for the public benefit.

While the tariff is an impersonal object of investigation, many will arise to defend it, because some measure of protection is necessary to Canadian industry in its present form; for most industries which have been built up within the tariff wall could certainly not be maintained without it. The needs for national revenue is another weighty argument in favor of the tariff. If the Board of Commerce chooses to include this subject within its field, special sessions are not necessary, for the effect of the tariff in increasing living costs is undisputed. No more effective method could be adopted, for reducing prices in Canada, than an "immediate and substantial" reduction in the tariff, but the advantages gained in this way would be more than offset by the hardship caused in manufacturing centres, which could not fail to react upon the country as a whole.

The announcement of H. A. Robson, chief commissioner of the Board, made on December 10th, is as follows:—"The cost of necessaries of life is enhanced in many cases by the customs tariff. This tariff may be protective or revenue-producing. If merely protective, it is a question whether an increase in cost of necessaries thereby is, in present circumstances, warranted. If a particular duty is revenue-producing, then it is a question whether that revenue cannot otherwise be raised and necessaries to that extent relieved. The Board of Commerce can inquire into all items making up cost. It is specifically authorized to see if the tariff is made use of to unreasonably enhance prices.

"In the course of inquiries, instituted by the Manitoba and Saskatchewan governments through J. F. Frame, K.C., it has appeared that there is reason to investigate further into the cost item brought about by the payment of customs duties and into cost enhancement by reason of tariff protection. The board is therefore instituting inquiries in this direction. It is accumulating information, and it is fully expected that early in the new year public meetings will be held at appropriate points to go fully into these questions. This information is given so that any person may make representations who desires to do so on any phase of the question.

"Necessaries of life are defined as any staple and ordinary article of food (whether fresh, preserved, canned or otherwise treated), clothing and fuel, including the products, materials and ingredients from or of which any thereof are in whole or in part manufactured, composed, derived or made, and such other articles of any kind as the board may, from time to time, by special regulations, prescribe. This now also includes drugs and medical supplies. The matters to which Mr. Frame particularly devoted attention were boots and shoes and textiles; that is a wide field, but it will be seen that there is even wider ground that may be covered."

The tariff, in fact, is an issue the settlement of which must remain in the political field in Canada. A special commission might appropriately investigate it, or work out in detail a plan specified by the government, but numerous questions, such as national finances, the relative merits of different methods of taxation, and the extent to which a diversification of industry is desirable, must be considered, which questions lie outside the work of the Commerce Board.

SELLING ORDERS DOMINATE MARKETS

ALTHOUGH minor recoveries have taken place in the stock market, the general tendency appears to be still downward. Call money rates, after going down to around normal, rose again this week to 12 per cent. The tone of the markets in Canada continues heavy, in sympathy with New York. McCuaig Bros. and Co., of Montreal, in their review for November, analyse recent developments as follows:—

"A marked change has come over the tone of the stock markets during the past three weeks. From an ultra bullish aspect they have taken on a dull and depressed one. This applies with greater force to Wall Street but what affects the New York market is bound to have its influence on the local exchange. The turn in a big bull market, such as has been going on for months past, is usually brought about by the refusal of the big bankers to further finance it. They know that after a long upward swing stocks are likely to be left in weak hands, bull pools having cashed in and left their stocks in the hands of the general public.

"At several stages of the advance in the United States the public was warned by the Federal Reserve Board that monetary conditions were such that a more conservative attitude was desirable, but these warnings were ignored. The public was in the temper to follow the professional bulls all the way and finally when rates for call money went to prohibitive levels the market at last realized that the bull movement had reached its limit. This turned the balance of trading from the buying to the selling side, liquidation being supplemented by professional operations for short account. With bull support withdrawn and bear traders hammering the market, prices melted away rapidly and margins were wiped out by the thousands. After three days of acute selling the market deluge was stayed only to be renewed a week later by a secondary wave of liquidation. Stocks may be cheap now but the public is timid about buying after such a break, and the professional element may be able to, and probably will, force prices below a fair level. Apart from the fact that stock prices had been advanced to unwarranted levels and that money was used as the weapon to correct this condition of affairs, the fundamental situation in the United States cannot be regarded as greatly changed, apart from the still unsettled labor situation, which still has threatening possibilities. It must be remembered, however, that all this trouble existed whilst prices were soaring.

"In Canada fundamental conditions are still as satisfactory as they were some months ago, if not more so, owing to the marked success of the Victory Loan, which puts the governemnt in a position to help finance export trade where necessary, in addition to meeting its own obligations. Prices here have had a setback but most people are hopeful that when Wall Street gets through its process of readjustment the local situation will improve and better markets ensue. It is doubtful whether the resumption of the bull movement on anything like the former scale should be expected for some time, but it is likely that there will be excellent trading opportunities in various stocks so that the market will be by no means bereft of interest."

CANADIAN MUNICIPAL CREDIT

THOUSANDS of holders of Canadian municipal bonds, in Canada, the United States and Great Britain, are watching with keen interest a number of municipalities which are seeking to have the burden of their capital charges made easier. Some Alberta municipalities, which have made application to the board established under the act passed at the last session of the provincial legislature, are claiming special attention at present, but these are not the only ones which are in difficulty. Prince Albert, Sask., has already in force an arrangement with the city's bondholders, whereby the interest burden is lightened for some years to come, after which it will be correspondingly heavier.

The financial record of Canadian municipalities has been excellent and until a few years ago it could be truthfully said that no Canadian municipality had defaulted on its obligations. The present experience is therefore a new one, and it is important that a sound policy for repairing municipal finances should be worked out. Efforts are continually being made both by municipalities and by bondholders, to have the provinces come to the rescue where necessary, and Hon. A. G. MacKay, minister of municipal affairs in the Alberta government, has taken the commendable stand that while the province may appropriately help make an adjustment, it will not make good debts incurred by municipalities. A province creates municipalities, and enacts the legislation under which they transact business, but it is not responsible for their obligations any more than for those of companies incorporated under its companies' act. Purchasers of municipal securities are presumed to be familiar with this legislation, and to use their influence to see that any changes are along sound lines.

EMPLOYMENT CONDITIONS IN CANADA

REPORTS for the week ending November 22nd were received from 4,634 firms, of which firms 2,215 were in Ontario, 898 in Quebec, 464 in the maritime provinces, 697 in the prairie provinces, and 360 in British Columbia. These firms reported 680,197 persons on pay-roll as compared with 676,256 during the preceding week, an increase of 3,941 persons, or .6 per cent. A slight reduction, however, was anticipated for the week ending November 29th. During the week ending November 15th reports from 4,742 firms with 677,669 persons on pay-roll showed that they had increased their staffs by 5,377 persons, or .8 per cent., and anticipated a decrease of 1,040 persons, or .2 per cent., during the week ending November 22nd. The anticipated decrease did not take place, but on the other hand, an actual increase took place as shown by the return for that week.

The plus industries—those that registered net increases in the number of persons employed—with their respective percentage increases, were: Commercial and mercantile, 1.4 per cent.; lumbering, 1.6 per cent.; chemicals, .4 per cent.; leather and leather goods, .7 per cent.; metals, .9 per cent.; pulp, paper and printing, .2 per cent.; textiles, 1.2 per cent.; vehicles, 2.3 per cent., and quarrying and mining, .1 per cent. The most substantial increases were those registered in textiles, metals, commerical and mercantile, lumbering and vehicles, the tendencies of these groups having, with the exception of the vehicle group, been strong during preceding weeks. The increase in the vehicle group does not reflect conditions accurately, being due to some extent to irregularity in returns, the increase having been spread more largely over the past three weeks. Wtih the exception of the vehicle group, all plus industries expected further increases during the week ending November 29th.

The minus industries—those that registered net decreases in the number of persons employed—with their respective percentage decreases, were: Building and construction, 1.6 per cent.; clay, glass and stone products, .2 per cent.; food, drink and tobacco, .1 per cent.; railway construction, .2 per cent.; railway operation, .7 per cent.; miscellaneous, .1 per cent., and woodworking, a nominal decrease only. With the exception of railway operation and building construction, the decreases were not marked. Food, drink, tobacco and railway construction groups anticipated further decreases during the week ending November 29th, while the other groups anticipated increases.

The "accepted" stamp upon a certified cheque cannot be regarded as final proof of its value, as several recent experiences have shown. Frauds perpetrated on bond dealers in Toronto and Montreal were all accomplished by stamping with a stolen rubber stamp; on November 7th, marked cheques were presented to the Bank of Commerce, Moncton, N.B., drawn on the Banque Provinciale, St. John, to a total of $12,500. Before cashing them, however, the manager telephoned to St. John, discovered that the cheques were worthless, and the culprit was arrested.

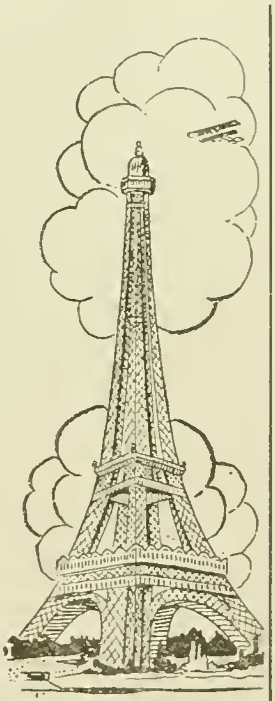
PARIS

The Heart of Brave France



JUST as London is the heart of the British Empire, so is Paris the heart of loyal France.

Just as Paris is the centre of art, music, science and government of the French nation, so it is also the centre of French finance and commerce.

Canadians who wish to enlarge their trade relations with the French people, will find it distinctly advantageous to be in intimate touch with the heart of France through the Paris Branch of the Park-Union Foreign Banking Corporation.

Viscount de Breteuil is Chairman of the Advisory Board in Paris, and the Branch under the management of M. Carrere, formerly manager for the Far East of the Russo-Asiatique Bank.

Officers at all our 380 Canadian branches will be glad to advise with Canadian importers and exporters doing business with French houses.

UNION BANK OF CANADA

Park-Union Foreign Banking Corporation jointly owned and controlled by National Park Bank of New York and the Union Bank of Canada.

387

EXPORT TRADE

The extensive foreign connections of this Bank enable us to place at the disposal of our customers the best existing world-wide banking facilities.

Our local Manager is in a position to give you both assistance and advice.

IMPERIAL BANK OF CANADA

CANADA'S POSITION AS TO FUEL SUPPLY

Dependent Upon the United States, But Latter Uses Nova Scotia and British Columbia Coal—Substitution of Water Power.

(Special to *The Monetary Times*)

Ottawa, December 10th, 1919.

ALTHOUGH a settlement of the coal strike in the United States has been reached, supplies are near exhaustion, and this question continues to give the Dominion government some concern. The United States has treated Canada generously, considering the near-famine conditions that have prevailed there. The lever that C. A. Magrath, fuel controller, has been using upon the American authorities is that the Atlantic and Pacific American seaboards draw large supplies from the Nova Scotia and British Columbia mines. In view of the fact that the only argument Canada has for coal is the question of reciprocity on the two coasts, the cabinet has been watching anxiously the growing restlessness among the miners of Cape Breton and Alberta and British Columbia. There is no doubt efforts were made to have them walk out in sympathy with the American miners, and information from Alberta indicated that the One Big Union was growing active again.

Efforts to Increase Supply

The annual struggle for a sufficient fuel supply is bringing home to Ottawa as never before the need for the Dominion developing sources of its own in order to make Canada independent of the United States. Several years ago, at the initiative of Hon. Arthur Meighen, minister of the interior, an organization was formed called the Dominion Power Board, which was specifically charged with investigating the question of fuel and power in Canada. Recognized engineer experts in the Dominion departments affirm that, by a proper use of her own domestic requirements, Canada may be made practically independent of imported fuel. It is felt that Manitoba and the prairies should in future not have to draw on the east for coal supplies by a proper use of the coal of Alberta and the prairie lignites. A lignite Utilization Board was established and supplied with funds by the Dominion for the purpose of developing a commercial process for carbonizing and briquetting western lignites to meet the needs of Manitoba and Western Canada. A plant is being erected at Estevan, Saskatchewan, and will be ready for operation next season.

Government investigations already indicate the possibility of producing a fuel equal to the Pennsylvania anthracite for the supply of eastern Ontario and Quebec by bringing Nova Scotia coal to Montreal by boat and there carbonizing it. It is also possible that if the valuable by-products can be recovered and marketed the cost will enable this fuel to compete successfully with the imported article. Further, the Peat Committee appointed jointly by the federal and Ontario governments has succeeded in demonstrating on a commercial scale that a peat fuel in the form of bricks suitable for domestic use and for certain power purposes, can be placed on the market at $3.50 per ton f.o.b., the peat bog at Alfred, Ont.

Use Water Power to Utmost

In addition to these government activities the power board is looking for the development of water power on an enormous scale in eastern Canada in order to supply power for industry in place of coal. The board is investigating the possibilities of the development of power along the St. Lawrence River. This is, of course, an enormous scheme, and is also international in character. The problem is a tremendous one, and its successful solution would be a triumph fit to rank with the Panama canal and other great feats of engineering. Before a solution can be reached, however, a great deal of engineering data must be secured and the obtaining of this data, together with its consideration and the necessary planning, must, of course, take considerable time. The work of gathering data has been in progress for some time, and under the auspices of the Dominion Board several federal and provincial organizations are engaged in making extensive surveys and investigations. These studies are sufficiently far advanced to justify the assurance that a preliminary scheme will be submitted for the consideration of the Dominion Power Board within a few months.

Simultaneously with the progress of the Canadian studies the international phase of the problem is under consideration, and for some time past representatives of the governments of Canada and the United States have been in consultation on the subject, and reference has been made to the International Joint Commission in regard to a joint report on the utilization of the St. Lawrence River for navigation and power.

PERSONAL NOTES

MAJOR JOHN S. LEITCH, mining broker, has reopened his office in Winnipeg, Man., after an absence of five years overseas.

MR. A. H. WALKER, general manager of the Sterling Bank of Canada, has been appointed to the directorate of that bank.

CAPT. J. C. HOGG has been appointed manager of the bond department of Messrs. Burdick Bros., and Brett, Ltd., Vancouver, B.C.

SIR JOHN EATON has been elected to the directorate of the Canadian Pacific Railway, to fill the vacancy caused by the death of the late W. D. Matthews.

MR. J. A. L. ROBINSON has been appointed to the post of district manager at Calgary, Alta., of the North American Life Assurance Company. He was formerly inspector of the company at Regina.

MR. RAYMOND F. CASTLE, who for some time has been in the bond department of Messrs. Pemberton and Son, Vancouver, B.C., has been placed in charge of the bond department in their Victoria office.

MR. D. M. CHRISTIE, formerly attached to the superintendent's office of the British Columbia department of the Bank of Montreal, has become associated with the Alexander Hamilton Institute as British Columbia representative.

MR. JAMES THOMSON, one of the oldest officials of the Hudson's Bay Company, has retired from the management of both the departments at present under his charge. Mr. Thomson is a member of the Canadian Advisory Committee.

MR. L. A. LACEY, who has been traveling auditor for the Canada Life Assurance Company for some time has been appointed supervisor of accounts at home office, Toronto, to audit branch accounts and also home office accounts and statements. Mr. A. C. Wainwright, who before leaving for overseas was chief accountant at home office, and who since his return has been joint traveling auditor, will assume the duties of traveling auditor for the company.

OBITUARY

MR. W. F. NEILSON, manager of the Lethbridge branch of the Alberta Loan and Investment Company, died in that city last week. With the exception of one year at Calgary, he had been representing the firm at Lethbridge for the past eleven years.

TRADING IN NEW VICTORY LOAN

Bonds of the 1919 Victory Loan are now being handled by dealers under an arrangement made by the special committee of the Bond Dealers' Association, as in the case of the other Victory Loans. Dealers working under this arrangement are selling at 100 and interest for both five and fifteen-year bonds. Other dealers outside of the association are, of course, not restricted as to price. It is the intention that the bonds will in due course be listed on the exchanges.

LUMBER INDUSTRY IN CANADA, 1918

Capital Invested, $180,017,178, Production, $144,908,864—Salaries and Wages Almost $50,000,000

A PRELIMINARY report on the lumber industry in Canada has just been completed by the Dominion Bureau of Statistics covering the returns of 3,086 operating plants for the year 1918. A detailed report by provinces is in course of preparation. The total capital invested in the industry amounted to $180,017,178, of which logging and timber plants contributed $36,516,701, mill equipment $53,791,373, materials on hand, stocks in process, finished products and miscellaneous supplies $54,147,889, and cash, trading and operating accounts and bills receivable $35,561,215.

The number of persons employed on salaries was 3,550, of whom 3,270 were males and 280 females and the total salaries paid were $4,911,735. The average number of persons working for wages totalled 56,816, of whom 26,736 were employed in operations in the woods and 30,080 in the mills. The total amount paid in wages was $44,490,917, apportioned as follows: Wood operations, $19,985,553; mills, $24,505,364.

The total cost of materials, fuel and other items was $68,498,520, the cost for each being respectively $45,335,527 for materials, $22,570,487 for miscellaneous expenses and $592,506 for fuel.

Production

The aggregate value of production for the year was $144,908,864, comprising the following principal items: Sawn lumber, $102,335,772; shingles, $8,124,968; lath, $1,560,136; pulpwood, $18,416,438; and miscellaneous products including cooperage stock, poles, cross ties, posts, veneer, etc., to the value of $14,471,550. The principal kinds of lumber cut during the year were in order of the cut: Spruce, 1,140,063 m. ft.; white pine, 783,482 m. ft.; Douglas fir, 707,373 m. ft.; hemlock, 255,356 m. ft.; cedar, 230,204 m. ft.; red pine, 99,780 m. ft.; balsam fir, 94,774 m. ft.; and all other varieties, including custom sawn lumber, 618,426 m. ft.

Ontario in Lead

Lumber cut by provinces was as follows:—

	Quantity m. ft., b. m.	Value.
Alberta	22,388	$ 473,694
British Columbia	1,141,197	27,992,976
Manitoba	54,047	1,240,052
New Brunswick	439,625	12,189,312
Nova Scotia	166,332	4,089,039
Ontario	1,182,328	33,165,137
Prince Edward Island	6,393	136,336
Quebec	841,084	20,916,604
Saskatchewan	75,835	2,122,307
Yukon	229	10,315

MANITOBA GRAIN GROWERS HAVE GOOD YEAR

The annual meeting of the United Grain Growers, Ltd., of Manitoba, was held recently in Winnipeg. On the year's operations ending August 31 last, the profit was $148,549, a decrease as compared with the previous year. The decrease in the profits of the company, as explained in the president's address, was due to the fact of a very great reduction in the grain crop, the post-war readjustments in business, and also the serious handicap caused by the tie-up of business owing to the general strike in Winnipeg last May and June. Considered from every standpoint the president's message to the shareholders expressed satisfaction at the standing of the company's business. A 6 per cent. dividend totalling $141,500 was paid to the shareholders during the present month. The paid-up capital of the company is now $2,415,000, while the amount of the reserve fund is $1,500,000, and in addition the amount at the credit of the profit and loss account is $256,000.

LOEW'S TORONTO THEATRES BONDS

Messrs. W. A. Mackenzie and Co. and Brent, Noxon and Co., Toronto, are offering the unsold balance of a $600,000 bond issue of Marcus Loew's Toronto Theatres, Ltd., which amounts to $172,000. The bonds are first mortgage 6 per cent., serial gold, dated June 1, 1919, and maturing in various amounts from 1922 to 1932. They are offered in denominations of $100, $500 and $1,000. The interest is payable half-yearly, and both principal and interest are payable at the Merchants Bank of Canada in Toronto, Montreal or New York.

WILLLIAM DAVIES STOCK OFFERED

An offering of 85,000 Class A shares of the William Davies Co., Incorporated, is being made by a syndicate of Toronto houses—the Dominion Securities Corporation, Messrs. Osler and Hammond and Messrs. R. C. Matthews and Co.—acting in conjunction with Messrs. Kissel, Kinnicut and Co., of New York City, and Messrs. Otis and Co., of Cleveland, Ohio. Details will be found elsewhere in this issue. The capital of the reorganized enterprise, which will have plants in Toronto, Montreal and Chicago, and will distribute its output throughout Canada, the United States and Great Britain, will consist of 100,000 shares of Class A stock and 66,000 shares of Class B, all of which is to be outstanding. The new stock is preferred as to cumulative dividends at the rate of 4 per cent. per annum, and participate share for share after the Class B, or founders' shares have received dividends to an amount equal to $5 per share for all preceding years. The securities are also preferred as to assets with the Class B stock and are being issued on a no-par-value basis. There will also be outstanding $1,183,500 of 6 per cent. sinking fund being due in 1926, secured by a mortgage on the Canadian plants and a real estate mortgage of $140,000 on the Chicago property of the company.

CAPITAL INVESTMENTS AND TRADE BALANCES

(Continued from page 7)

This excess of invisible credits will approximately balance or offset the above-mentioned excess of visible or merchandise imports (debits).

Britain's Invisible Credits

Prominent among the invisible credits is the payment to England of interest on British capital invested overseas and repayments of principal under old loans. It was estimated by Giffen in 1898, that England was receiving about $450,000,000 per annum in the form of interest from abroad. According to the estimate of Paish in 1909, the British people were receiving over $690,000,000 a year from their foreign investments. Immediately prior to the war England's interest returns probably amounted annually to at least $650,000,000. In the opinion of Todd the repayment of loans yielded an annual payment to England of approximately $500,000,000.[8]

A second important invisible credit is the sum earned by the British merchant marine in ocean transport service throughout the world. According to the estimate of Giffen in 1898, this amounted to about $450,000,000. An independent calculation by the Board of Trade on quite different lines, in 1903, made it only slightly less. In considering this item it is necessary to bear in mind the important fact that in the Board of Trade returns the values of imports include cost, insurance, and freight; whereas the values of exports include cost and only the charges of delivery on board ship. That is to say the exports are entered in the trade statistics on the value basis of "Free on Board," or F.O.B., while imports are valued on the basis of "Cost, Insurance, and Freight," or C.I.F. As a result of this practice an apparent mystery arises in the fact that the world's total figures of exports are less than the world's total imports. Obviously this is impossible, for it cannot be believed that more goods arrive in port than ever set sail. The Board of Trade explanation must be taken that the balance is to be accounted for by shipping charges; costs, that is to say, incurred after the goods have left any shore as exports. The Board of Trade in 1903, found an excess balance of the world's imports over exports of about $1,120,000,000. It was looked upon as representing freights, insurance, and certain incidental charges, such as harbor dues, cost of stores purchased abroad, etc. After making adequate deductions to cover these incidental charges and also the earnings of the ships of the British colonies, the Board of Trade arrived, as mentioned above, at a figure only slightly less than $450,000,000, as the share to be credited to the British merchant marine. It was probably clearly over $500,000,000 at the time of the outbreak of the war.

Another invisible credit, taking the form of earnings from abroad received by British commission houses, insurance companies, and other financial institutions, is estimated by Todd at approximately $100,000,000 for the year 1913.[9] He ventures the belief, based on independent investigations, that a further credit in favor of Britain, on account of the so-called "boarding expenses" chargeable against foreigners, roughly balances at $50,000,000 a year against a corresponding debit against Britain on account of expenses abroad of British tourists and other travellers.

On the side of invisible debits there is but one important item. It represents the outflow of new British capital seeking investment overseas. That this item should be counted a debit rather than a credit will at once be recognized if we bear in mind that a loan abroad conveys to the foreign borrower a claim on our goods or services. The outflow of British capital, during the four years 1910-13, inclusive, amounted, it has been estimated by the London "Economist," to about $850,000,000 per annum. In the opinion of Mr. Hartley Withers it amounted to $1,000,000,000 or more. We may therefore perhaps quite safely agree on the figure $950,000,000 as approximately accurate.

Trade and Financial Balance Sheet

Let us now proceed to gather together the various invisible items along with the visible items of trade in the form of a balance sheet, based on the average annual figures for the years immediately preceding the war,

(Figures denote $ millions)

Visible Credits:		Visible Debits:	
Exports, home produce (annual average: 1911-14)	$2,371	Imports (total) (annual average: 1911-14)	$3,613
Re-exports (foreign and colonial) (annual average: 1911-14)	525	Imports of bullion and specie (annual average: 1911-14)	346
Export of bullion and specie (annual average: 1911-14)	282		
	$3,178		$3,959

Average annual excess of Visible Debits—$781.

Invisible Credits:		Invisible Debits:	
Interest on loans abroad	$ 650	New loans abroad	$ 950
Repayment of loans	500	Boarding expense charges	50
Shipping receipts	500		
Commissions	100		
Boarding expense receipts	50		
	$1,800		$1,000

Average annual excess of Invisible Credits—$800.

Thus we have secured inductive evidence from the experience of the United Kingdom in support of our contention, reached deductively in the first instance, that there must be an approximate equivalence for every country between total credits and total debits.

It is perhaps scarcely necessary to emphasize the obvious fact that both the invisible and visible factors alike have an effect upon the foreign exchange rate. Thus the overseas investment of $500,000,000 of capital in the course of a year would exert the same influence upon the foreign exchange situation as that imparted by the importation of $500,000,000 worth of foreign goods. This general truth appears clearly in a statement of Mr. Hartley Withers on foreign exchange operations. In his explanation of the variation in the price of sterling exchange, he states that "the only reason why anyone in New York should want to buy pounds in London is because he has payments to make on this side. He has money in hand in New York, but of course it is all in dollars, and he has to pay a debt in England, and in order to do so he must buy pounds in England with his dollars in New York, because his English creditor will, naturally, only take payment in pounds. The reasons why he may have to pay a debt in England are manifold. He may be the New York banker to a great American railroad which has a large number of its bonds or shares held in England, and has to remit hither to pay interest or dividends; or he may be an importer of English goods which he sells in America and pays for in England, or he may be the American father of an English duchess who has to remit her dowry, or he may be an Irish peasant, working and earning wages in America and sending home money to his father to help him to pay his rent. All the hundreds of reasons which make Americans pay money to England make them want to buy English money in New York with American dollars."[10]

The change which has appeared in England's balance of trade during the past century may be summed up on the authoritative phrase of Hartley Withers. Since the early years of the nineteenth century, "the account has been complicated," he declares, "by the growth of the amount that her debtors owe her every year for interest, and by the huge earnings of her merchant navy, which other countries pay by shipping goods to her, so that, by the growth of these items, the trade balance sheet has been turned in the other

direction, and in spite of her lending larger and larger amounts all over the world she now has a balance of goods coming in. Interest due to England and shipping freights and the commissions earned by her bankers and insurance companies were estimated before the war to amount to something like 350 millions (pounds sterling) a year, so that she was able to lend other countries some 200 millions or more a year and still take from them a very large balance in goods."[11]

Credit Balance Now Greatly Reduced

What the effect of the war will be on this state of affairs it is not necessary in this study to consider in detail. Suffice it to say that while the United Kingdom extended large loans to her Dominions and allies, the larger volume of her own war borrowing from the United States cannot fail in the future to affect, in a measure at least, the British balance of trade. Moreover the sale back to the United States, during the war, of large blocks of American securities, which represented English savings invested in the United States in former years, will work in the same direction. In refutation of the claim, however, advanced in some quarters that England has ceased to be a creditor country as a result of the financial operations incident to the war, the London "Economist" has quoted with approval certain estimates of Edgar Crammond, the well-known statistician. He has declared that before the war Great Britain held investments abroad valued at about $20,000,000,000, of which approximately $5,000,000,000 have been sold. British borrowings abroad of about $7,000,000,000 during the war would reduce the credit balance to $8,000,000,000; but to this should be added loans to her allies and other foreign assets placed at $5,000,000,000 or more.[12] While England, therefore, still remains a creditor nation, with net foreign investments amounting, it is thus estimated, to $13,000,000,000, her former comfortable position has suffered some alteration.

Having observed certain of the principal features of the trade balance of the United Kingdom, the great creditor and importing nation, we may now turn to a consideration of the trade balance of the United States, the great exporting and, until recent years, debtor country. The relative position of these two in their respective groups may be noted in the following summary of trade conditions in the principal capital-lending and borrowing countries.

FOREGIN TRADE OF COUNTRIES THAT RECEIVE A CONSIDERABLE INCOME FROM THEIR FOREIGN INVESTMENTS OF CAPITAL[13]

		Merchandise		Excess
Country	Year	Imports (consumption)	Exports (domestic)	of imports over exports.
United Kingdom	1913	$3,207,801,000	$2,556,106,000	$651,695,000
Germany	..1913	2,563,354,000	2,403,311,000	160,043,000
France	1913	1,642,117,000	1,326,950,000	315,167,000
Netherlands	1913	1,574,990,000	1,239,360,000	335,630,000
Belgium	...1913	974,623,000	717,152,000	257,471,000

FOREIGN TRADE OF COUNTRIES THAT HAVE BORROWED HEAVILY FROM OTHER NATIONS

		Merchandise		Excess
Country	Year	Imports (total)	Exports (domestic)	of exports over imports
United States (including Alaska, Hawaii and Porto Rico)	1914	$1,893,926,000	$2,329,684,000	$435,758,000
India (Brit.)	1914	594 521,000	792,359,000	197,838,000
Argentina[14]	1913	406,805,000	466,582,000	59,777,000
Mexico[15]	..1913	93,020,000	129,971,000	35,951,000

We should expect that the imports of the first group of countries would exceed their exports as a consequence of their large excess of invisible credits over debits. The case of the United Kingdom has already been considered. Germany and France were estimated before the war to have $8,000,000,000 or more each invested abroad. While the investments of Holland and Belgium are much smaller yet they are nevertheless considerable. These importing countries, in addition to their receipt of interest, also enjoy in varying degree large payments on account of shipping services and tourist expenditures.

Prominent among the other importing countries are Switzerland, Norway, Italy, and China. A large excess of imports characterized the trade balance of each of these countries in 1913. In the case of Switzerland, Norway, and Italy the import balance is to be explained, in large part, respectively by tourist expenditures, merchant marine earnings, and receipt of immigrant remittances from abroad. China is a country in the process of borrowing large amounts of foreign capital. Canada, prior to the war, as has been stated elsewhere, was likewise an immature borrowing country and therefore an importing country as well.

The export balance which marks the trade of the second group of countries naturally arises as a result chiefly of the large interest payments on foreign capital invested within their borders. Among the other reasons which apply, especially in the case of the United States, are expenditures of citizens abroad, remittances by citizens and others to relatives and friends in other lands, and shipping charges for ocean transport service.

In our consideration of the visible trade balance of the United States, we shall reduce values to the basis of annual averages for the three years 1911-13. The statement may be presented in tabular form.

FOREIGN TRADE OF THE UNITED STATES, FISCAL YEARS 1911-13[16]

Merchandise:	
Excess of exports over imports (average annual value)	$575,000,000
Gold:	
Excess of imports over exports (average annual value)	34,000,000
Silver:	
Excess of exports over imports (average annual value)	22,000,000
Total net excess of merchandise, gold, and silver exports over imports (average annual value)	$563,000,000

This large credit balance was offset by an excess of invisible debits over invisible credits. The United States has probably borrowed a larger amount of capital from other countries than any other nation. Accordingly let us note first among the invisible items the interest payments due to foreign countries. The importation of capital into the United States from Europe dates from the sixteenth and seventeenth centuries. The purpose at that time was the development of sugar, tobacco, and cotton plantations and the extension of mercantile undertakings. Later large amounts of British capital were invested in the securities of the United States government and the state and municipal authorities. Still later the chief American borrowers were the railroads, although much capital has also been invested in the shares of land, mining, and industrial ventures. It is estimated that, in the aggregate, European capital invested in the United States at the time of the outbreak of war amounted to probably more than $6,500,000,000. Of this about $2,500,000,000 represented German, French, Dutch, and other non-British capital. The annual interest charge upon these investments of foreign capital amounted, it is estimated, to $325,000,000. As an offset, however, against this item must be placed the interest received by Americans on their capital invested in Canada, Mexico, Cuba, the Philippines, South America, and elsewhere. United States capital

18-22 KING STREET EAST, TORONTO

thus invested amounted in 1914, to at least $1,500,000,000, yielding an annual income of $75,000,000. Deducting this from the interest payments that the United States had to make to foreign lenders, it will be seen that, prior to the war, the American people were subject to a net payment of about $250,000,000 a year to other countries for interest and dividends upon capital.

The other important invisible items may be briefly summarized. It was estimated in 1910 by Sir George Paish that the United States had a net balance to pay to other countries of about $170,000,000 a year on account of the expenditures of tourists and other citizens; that at least $150,000,000 annually was being sent abroad by people in the United States to friends and relatives; and that the net freight charges against the American Republic amounted to about $25,000,000 a year.[17] Although these several items had doubtless varied somewhat by 1913, yet, for our purpose of general illustration, the estimates of Paish may be used without incurring the risk of a large margin of error. The balance of trade may now be set forth.

APPROXIMATE BALANCE SHEET OF THE UNITED STATES, YEARS 1911-13

Visible Credits and Debits:	
Average annual excess of merchandise, gold and silver exports over imports (visible credits)	$563,000,000
Invisible Credits and Debits:	
Capital investments and interest payments thereon: annual net debit	$250,000,000
Tourists and other expenditures: annual net debit	170,000,000
Remittances to friends, etc.: annual net debit	150,000,000
Ocean freight charges: annual net debit	25,000,000
Average annual net (invisible) debit	$595,000,000

The resultant unexplained balance of $32,000,000 may be attributed, in part, to the margin of error arising from the use of Sir George Paish's figures of 1910 for the period of 1911-13, and, in part, it may represent new investments in the United States of foreign capital.

It has already been mentioned that the trade balance of the United States was subject to a transition about 1873, and that again in the not distant future it is likely to undergo a further change. As is well known, the regular American merchandise import balance down to 1873, was attributable chiefly to the heavy annual borrowings from abroad by the United States. It is also true that, prior to 1860, the United States, as an important shipping and freight-carrying country, was in receipt of considerable payments in the form of ship earnings. Since 1873, American trade has been normally marked by an excess of exports. As already suggested, although borrowing abroad continued, sometimes on a great scale, the annual interest and dividends payable to foreigners on earlier loans came about 1873 to more than offset the new capital inflow. Moreover since the middle of the nineteenth century freight charges have become a debit item against Americans and remittances of immigrants and travelling expenses of Americans abroad have grown to large proportions.

That a further transition is likely to occur in the American trade balance in the years to come has been presaged by the growth of American investments abroad, even before the war. It is estimated that, during the ten years ending in 1906, approximately $250,000,000 of the securities of nine American railroads were returned to the United States from Europe.[18] In 1899, a large part of the four per cent. bond issues of certain Swiss cities was subscribed by two American insurance companies. The diversion of considerable American capital into the construction of London tube railways, the flotation of Japanese and Chinese loans in the United States, and the establishment of American branch banks in South America bear witness to this growing tendency of American capital to seek investment abroad. In 1914, it is estimated that American investments in Mexico surpassed $700,000,000 while in Canada they amounted to not less than $600,000,000. Recalling the estimate given above that at the outbreak of the war foreign investments in the United States amounted to $6,500,000,000 and American investments abroad equalled $1,500,000,000, it will at once be noted that the United States at that time was a net debtor nation to the extent of about $5,000,000,000. The net interest charges annually payable at that time by the United States amounted, it will also be recalled, to $250,000,000.

Since 1914, that country has become a creditor nation. It appears that the United States has bought back some $3,000,000,000 worth of American securities which were foreign-owned when the war began. In addition to this, American capital has been invested abroad during the past five years at an unprecedented rate. By the late spring of 1919, the United States government had loaned $9,500,000,000 to its allies and the total of private capital invested in other countries probably exceeded $2,000,000,000. Accordingly the United States has become a net creditor nation, with an excess of American investments abroad over foreign capital invested within its borders of approximately $8,000,000,000. As a result there is now a net interest payment of about $400,000,000 due annually to the United States. It is necessary also to bear in mind that through the war-induced expansion in shipbuilding in that country the pre-war debit on account of shipping charges is likely to disappear. Indeed it is quite conceivable that the United States may soon come to enjoy shipping receipts through foreign earnings of her own ships.

This altered status of the United States cannot fail to affect her position in world trade. At once the question arises as to its effect on her merchandise trade balance. The large excess of exports which for so many years has marked the American trade balance cannot continue unless some method be discovered for offsetting the growing volume of credits. Already American manufacturers and exporters have noted the financial obstacle in their path in the form of foreign exchange rates.

Thus the large excess of American exports to Great Britain has reduced the price of sterling exchange in New York to far below par and has kept it there for a long time. This fall in the rate of exchange on England acts, as is well known, as a check on exports to England and a premium on imports. Thus when London exchange with a par value of $4.86 is down to $4.30, it means that the Englishman's pound has lost 11.5 per cent. of its purchasing power over American goods. And conversely the American importer can buy English goods at 88.5 cents on the dollar. This condition obviously cannot continue indefinitely without reducing the foreign sales of the American exporter.

Commenting on the exchange relations between London and New York, the "Statist" declared during May of 1919, that the sterling exchange rate must continue to remain adverse to London, as regards the net movement of gold between the two countries, "until such time as we are in a position to pay off something like £1,000,000,000 which we have obtained for urgently needed imports, and which we are neither able to liquidate by means of exports from this country, by rendering services or by sending gold. Nor is this," it adds, "the whole of the story. We shall have to continue importing from the United States and importing from the United States on credit, because we are in need of food and certain raw materials for our manufactures which only the United States can supply. . . . We shall hope gradually to reduce our indebtedness to the United States partly by exports, which the state of exchanges should tend to assist, partly by services rendered, and partly by the large number of visitors who may be expected from the United States to Europe in the future."[19]

As is well known, the large pre-war excess of merchandise exports which normally marked the American trade balance has been enormously increased as a result of the war. Thus during each of the two fiscal years 1917-18, the excess of exports over imports amounted to over $3,000,000,000. In the fiscal year ended June 30, 1919, this export balance

surpassed $4,000,000,000. This vast credit balance has for the most part been offset and made possible through the extension by the United States of huge loans to the countries of Europe.

The obvious ways in which the task of offsetting exports may be accomplished are by importing gold in payment, by increasing imports, and by investing American capital in foreign government and private enterprises. It is clearly impossible, even though it were desirable, for the United States to insist on payment in gold for her enormous volume of exports. Such action would still further weaken the credit of other nations where the situation is already precarious as far as reserve stocks of gold are concerned. The second means, whereby exports would be counterbalanced and foreign exchanges stabilized, is that of increasing American imports from abroad. European countries, however, for some time will scarcely be in a position to send goods to the United States on a scale sufficiently large to offset the vast store of commodities available for American export. Yet there must be an offsetting factor if the volume of exports is to be maintained. Although we cannot escape the conclusion that in the end American imports of goods must serve as the counterbalancing factor, yet it is true that relief for the time being may be found in the third means mentioned above.

If foreign countries cannot sell goods to the United States in sufficient volume, they will have to give their credit by selling their securities. The extensive investment of American capital abroad will serve the end for the present. Capital is abundant in that country and it is sorely needed in most other countries of the world. The export of capital for foreign investment will further serve as the invisible debit to counterbalance the large invisible credit, which has arisen since 1914, in the form of interest and dividends due the United States on its recent loans and investments. The balance may be maintained in this way for the present. If the United States would retain and increase its present scale of exports it must therefore make large investments of capital in foreign countries. An American authority has stated this truth as follows: "If we of the United States want to sell our goods, we must supply the world with both goods and dollars."

A number of plans have been suggested. There is the investment trust for the purchase of foreign securities to be sold later to American investors. It has also been proposed that American industries invest a part of their profits in the foreign securities of those nations in which the respective industries are most interested.

Through the investment of its capital abroad, the United States will tend of course to become more and more of a creditor country. Although such investment will, it is true, make possible the continuance of large exports, yet at the same time, it cannot fail to hasten the time when the American trade balance must come to be marked by an excess of imports. Applying the form of reasoning outlined in the foregoing pages we recognize that probably the next chapter in the rapidly moving events of American commercial history will be an abnormal increase in the volume of imports. Exports may not decline in value. They may merely increase less rapidly than imports. The United States will then come to occupy a position comparable to that of England, Germany, and France, which as lending countries have normally shown an excess of merchandise imports.

BUSINESS FAILURES IN CANADA

The following shows the number of business failures in the Dominion since the week of November 14 last, as reported by R. G. Dun and Co., Toronto:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1918.
Dec. 5th ..	1	7	2	0	4	0	2	0	0	16	16
Nov. 28th ...	3	6	2	0	1	1	6	0	0	19	9
Nov. 21st ...	7	9	0	1	4	0	0	0	0	21	12
Nov. 14th ...	1	6	2	1	1	0	0	3	0	14	12

FURTHER GROWTH OF THE GUARANTY TRUST

The statement of the Guaranty Trust Co., of New York, as at November 12th, shows resources of over $966,500,000 as compared with resources of a little less than $831,000,000 on September 12th, or an increase of over 15 per cent, in a period of two months. In the same period deposits increased from $684,000,000 to over $705,000,000. The growth of this company under the presidency of Charles H. Sabin has been remarkable. It has been a moving spirit in organizing more than half the corporations recently formed and authorized under the Webb Law to carry on foreign business. The company has also established a special bureau to assist manufacturers of the country to reach foreign markets. A valuable feature of this service is a Foreign Credit Department, which gives authoritative ratings on commercial houses in every country throughout the world; this service has been placed at the disposal of exporters absolutely free of charge.

The forty odd departments of the bank are placed at the immediate disposal of its clients and friends by the establishment of correspondent offices in all the principal cities in the United States and Canada. These offices are connected with the parent office by private wire, in this way giving practically the same service to their clients as if they were in New York City. The Canadian correspondent is Mr. Edward N. Wilkes, with temporary offices at 711 Temple Building, Toronto.

STANDARD RELIANCE INVESTIGATION

At the inquiry into the Standard Reliance Mortgage Corporation, which was resumed on December 2, W. S. Dinnick, the chief witness, stated that he had not been able to find his old cheque books of 1903-1904 which might throw light on who got the $10,000 paid by him in connection with the purchase of the Ontario Industrial Loan by the Standard Loan. As to the $7,500 paid in connection with the taking over of the $134,000 block of stock in the Huron and Bruce, held by a syndicate of five persons, he stated that this sum was paid for power of attorney to make sure that this block of stock would vote right when the question of the merger came up. No notice was given to shareholders of the Huron and Bruce that this sum had been paid to the directors. The evidence dealt with the $134,000 of assets of the Standard Loan which was disbursed in connection with the taking over of this syndicate's block of stock, and with the $25,000 paid out in connection with the taking over of the Acme Loan.

With reference to a statement by George H. Kilmer, K.C., counsel for the liquidator, at a previous session of the investigation, to the effect that $134,000 of Standard Reliance assets were missing, Mr. Dinnick testified that in the form of securities, they were now in the hands of the London Loan Co. and M. J. Kent, manager of that company. Mr. Kent owned about $134,000 stock in the Huron and Bruce, and before he would allow those shares to be voted on, a power of attorney obtained security for his loan. Mr. Dinnick produced documents to show Mr. Kilmer that the transaction was the result of negotiations between the late S. C. Smoke and Senator Proudfoot, at that time solicitor for the Huron and Bruce. Witness admitted that the amount was never treated as a debt by the Standard Co. to the Dovercourt Land Co., nor did the Dovercourt ever credit the Standard. There should have been something on the records, he said, to show the sale of $134,000 in mortgages, but he believed that was not done.

On December 4, M. J. Kent, manager of the London Loan and Savings Co. and principal in the transfer of Huron and Bruce shares to the Standard Loan Co., in 1905, denied at the investigation of the defunct Standard Loan that he knew anything concerning the disposition of the $7,500 cheque, which former Manager Dinnick declared was sent by him to a London solicitor for payment to somebody in consideration of the selling out of the controlling interest.

FRATERNAL SOCIETY MAY INCREASE RATES

The Dominion Commercial Travelers' Mutual Benefit Society, Montreal, is faced with the necessity of raising its assessments, as the only alternative to remaining actuarially unsound. The society commenced business in Quebec province in 1875, and operates under provincial license. The rate question was brought up at a quarterly meeting on December 6, and will be submitted at the annual meeting on January 17. As older members would be required to pay much higher rates to make up for the insurance they have been carrying too cheaply, considerable opposition is anticipated.

ASSOCIATION OF LIFE INSURANCE PRESIDENTS

Canadians present at the 1919 convention of the Association of Life Insurance Presidents, held in New York, December 4th and 5th, were: Charles R. Acres, secretary, Canada Life Assurance Co., Toronto; Sir Henry Drayton, minister of finance, Ottawa; L. Goldman, president and general manager, North America Life Insurance Co., Toronto; E. S. Macfarlane, secretary, Manufacturers' Life Insurance Co., Toronto; J. A. Macdonald, secretary, Confederation Life Association, Toronto; E. M. Saunders, treasurer, Canada Life Assurance Co., Toronto; J. F. Weston, managing director, Imperial Life Assurance Co. of Canada, Toronto.

Frederick Frelinghuysen, president of the Mutual Benefit Life Insurance Co. of Newark, New Jersey, was elected a member of the executive committee to succeed the late George E. Ide. The executive committee for 1920 is as follows: George T. Wight (chairman), Louis F. Butler, Jesse R. Clarke, George I. Cochrane, W. A. Day, Forrest F. Dryden, Haley Fiske, Alfred D. Foster, Frederick Frelinghuysen, Charles A. Peabody.

The officers of the association for 1919 were re-elected as follows: George T. Wight, secretary and manager; John E. Hedges, general counsel; Frederic G. Dunham, attorney; Orlow H. Boies, statistician; Mott A. Brooks, assistant secretary.

Two important resolutions were passed. One reaffirmed the action of the two previous conventions relative to government insurance of soldiers and sailors and urged all present and former service men to retain their insurance therein. The other resolution related to the railroads, and was as follows:—

"Whereas, abnormal economic conditions, induced by disturbance of finance, industry, transportation and normal production due to the war, still exist; and

"Whereas, normal conditions can be restored only through the conservation of resources, enhanced production and the rigid practice of economy;

"Resolved, that life insurance men throughout the nation should respond to the present imperative demand for high national service by giving, and by urging upon policyholders to give effective support, directly or through appropriately constituted organizations, to the promotion of the following objects:—

"1. The rehabilitation of the railroads and establishment by law of rates adequate to provide for the present and future demands of our growing commerce and to stabilize the credit and securities of the roads.

"2. The adoption of a national budget system and the general curtailment of governmental expenditures and consequent reduction in taxes.

"3. The exertion of special and vigorous efforts to encourage the saving habit and generally to inculcate the principles of thrift."

COBALT ORE SHIPMENTS

The following is a statement of ore, in pounds, from Cobalt Ore Station, for the week ended December 6th, 1919:—

McKinley-Darragh, 108,145; total, 108,145.

The total since January 1st is 23,139,998 pounds, or 11,569.99 tons.

PUBLIC MUST PAY FOR UTILITIES

At the sitting of the Board of Railway Commissioners in Winnipeg last week regarding the application of the telegraph companies for increased rates, the point was emphasized by Hon. F. B. Carvell that the public must realize that it could not have competent railway and telegraph service or other utilities unless it was prepared to pay more as operating expenses and wages increase.

Ald. F. O. Fowler, secretary of the Northwest Grain Dealers' Association, stated that he did not begrudge capital a fair return on its investment when fairly and honestly made, but the public wants to be satisfied on that point, and in many cases it is not satisfied, which is accountable for much of the present trouble. "The agitated state of the public mind now must be taken into consideration," he said.

The board returned to Ottawa on December 6th. Telegraph rates will be further considered in Halifax on December 15th, in St. John on December 16th, and in Ottawa on December 18th.

CANADIAN MINING INSTITUTE

The Canadian Mining Institute held its annual convention in Vancouver, B.C., November 26th to 29th. The president, R. McDougall, did not attend, and the chair was occupied by other members. In addition to technical questions, the subject of taxation was also discussed, one of the addresses being by F. Bradshaw, of San Francisco. An address on the relations which should exist between governments and the mining industry was given by R. W. Brock, of Vancouver, B.C. F. W. Gray, of Montreal, spoke on the iron and steel industry and expressed the opinion that the outlook in British Columbia was good.

At the final session several resolutions were passed, including the following:—

"That some suitable plan whereby returned soldiers may be given government aid to do prospecting work in the summer of 1920 be urged upon the government;

"That the policy of the C.M.I. council, in arranging an annual meeting in western Canada, be the subject of the appreciation of the meeting, and that the appreciation of the secretary, Mortimer Lamb, be expressed. Mr. Lamb, it was pointed out, has served for 15 years, not only to the benefit of the institute, but to the national good of the industry.

"That appreciation be expressed of the policy of the federal minister of mines in organizing a branch of the geological survey in B.C., under Charles Camsell and in Alberta under Mr. Stewart, in that this policy has been most beneficial to the development of the mineral resources of the provinces;

"That it be suggested to the government that all machinery used in a basic industry, when imported by the user, should be allowed to enter duty free unless it is made in Canada, of an equal quality, and offered at reasonable prices;

"That the council appoint a committee to act in conjunction with other interested bodies, to secure information on the taxation of gold mines, this data to be laid before such governing bodies as is considered advisable;

"That the use of platinum in jewelry in view of the shortage for industrial uses, together with the question of the taxation of the metal, be referred to the committee on the taxation of gold mines. It was pointed out by Dr. Hodge that platinum was in great demand and the supply was limited. He suggested that it should be used for technical purposes rather than for the decoration of human beings.

"That the unification of the mining laws of the various provinces, particularly in relation to the tenure of mining leases, is desirable."

The North American Life Assurance Co. has increased its maximum limit from $20,000 to $25,000 in the case of male lives under 45 years of age, who are in all respects first-class lives. The company, however, reserves the right in all cases to determine what portion of any risk shall be reinsured.

A Store is Judged Largely by its Delivery

"WHEN can you send it?" "Can I get it to-day?"—these are the questions you hear day in and day out from your customers.

"It will be there before noon — before 5 o'clock." "It will be there before you get home." These are the answers that please your customers and bring them back to trade at your store.

When you buy a Ford One-Ton Truck you will surprise your customers by prompt delivery. It will take the place of three horses and three men, and for the occasional long trip to the next town, to the outlying country, for delivering and bringing in supplies—it will prove invaluable.

CAPITALIZATION	TO BE OUTSTANDING
Class A Shares	**100,000 Shares***
Class B, or Founders' Shares	**66,000 Shares***

*Both Classes of no par value.

There will also be outstanding $1,183,500 of 6% Sinking Fund Bonds, due 1926, secured by a mortgage on the Canadian Plants and a real estate mortgage of $140,000 on the Chicago property.

Mr. E. C. Fox, President, has written us a letter which he summarizes as follows:

Business established over 50 years, comprising full line of packing house products with plants in Toronto, Chicago and Montreal, and distributing its products throughout Canada, the United States, England and Continental Europe.

Gross sales $68,000,000 for the twelve months ending March 31, 1919. The fourth largest exporters of hams and bacon in the United States and Canada.

Purpose of financing is to acquire stock of men who have for some time past been inactive in the management, add to present properties and secure additional working capital.

The present management, which since 1914 has trebled the capacity and output of the properties, is to continue.

Average net profits after all interest, taxes and depreciation for 4 years, ended March 31, 1919, amounted to $1,218,902, equal to over 3 times the cumulative dividend of $4 per annum on the Class A Shares, or at a rate of more than $7 per share on both classes of stock.

Net tangible Assets aggregate $10,259,230, an amount equal to $102 per share on the Class A Shares. Net quick assets, $4,305,616—an amount equal to $43 per share on Class A Shares.

It is planned to make application to list these shares on the New York, Chicago, Cleveland, Toronto and Montreal Stock Exchanges.

Price: $50 per share

NOVEMBER BOND SALES

Total Made Up Chiefly of Four Large Issues—Very Little Municipal Financing During the Month—Bank Loans Show Seasonal Decline

Canadian bond sales in November, 1919, which are given in detail below, totalled $12,043,521. They are made up as follows.

Provincial	$ 6,282,000
Municipal	2,811,521
Corporation	2,950,000
	$12,043,521

The total, which is the fourth highest this year, notwithstanding the fact that about half the month was taken up by the Victory loan, is made up chiefly of four large issues—viz., Ontario, $4,000,000; New Brunswick, $2,282,000; Toronto, $2,632,000; Montreal Public Service Corporation, $2,550,000. Very few municipal deals were transacted.

The city of Edmonton's $3,000,000 issue, which was offered for sale, was held over on account of unsatisfactory bidding, and arrangements will probably be made with the Imperial Bank. Two or three other municipal issues were also held over, presumably for the same reason as Edmonton. The prices that were paid, however, were satisfactory, in view of the uncertain conditions of the market.

Bond brokers do not expect a very busy time during December, although a number of issues are up for sale. The outlook for the beginning of the New Year is considered bright.

Bank Loans to Municipalities

The usual seasonal falling off is shown in the bank loans to municipalities, although the total is nearly $10,000,000 more than last year. As is usually the case at this time of the year, tax payments come in in large volume and permanent financing is fairly well completed. The following table shows bank advances to municipalities since January, 1916:—

	1916.	1917.	1918.	1919.
January	$32,015,371	$24,487,272	$40,015,466	$32,640,198
February	35,149,915	26,121,324	43,535,628	36,830,183
March	38,649,462	29,877,911	50,652,061	41,993,305
April	44,371,050	35,931,996	55,685,350	47,911,199
May	43,924,036	39,700,191	57,728,226	50,356,227
June	46,773,032	42,757,673	58,000,424	52,349,353
July	42,385,096	43,989,207	56,589,173	54,455,738
August	39,882,811	43,940,176	56,662,931	57,536,867
September	38,708,745	42,721,563	47,977,472	57,033,309

DOMINION WORKMEN'S COMPENSATION MEETING

As stated in these columns last week, a convention of representatives of workmen's compensation boards in Canada was held in Vancouver on December 4th. An Association of Canadian Workmen's Compensation Boards was formed, and S. Price, chairman of the Ontario Workmen's Compensation Board, was elected president. E. S. H. Winn, chairman of the British Columbia board, was chosen vice-president, while M. B. Wormith, of Toronto, was elected secretary. The executive will be composed of the president, vice-president, and J. T. Stirling, of Edmonton, Alta., chairman of the Alberta board. Toronto was chosen as the place of meeting in October, 1920. The boards will endeavor to bring about uniform legislation throughout the provinces. A resolution asks to have the benefits of compensation laws extended to all wage-earners whose average annual earnings are less than $2,000. Another resolution passed advocates the vesting, through legislation, of the enforcement of accident prevention measures in the various boards.

ROYAL SECURITIES OPENS WINNIPEG OFFICE

An indication of the growing importance of the Canadian west as an investment field is the opening of an office by Royal Securities Corporation at 500 Electric Railway Chambers, Winnipeg, under the managership of Lieut.-Col. A. L. Saunders, late officer commanding the 8th Canadian infantry battalion.

MAGNET METAL AND FOUNDRY COMPANY

Preferred stock in the Magnet Metal and Foundry Co., Ltd., Winnipeg, to the amount of $50,000 is being offered by Business Builders, Ltd., of that city. The company is a going concern, engaged in the manufacture of farm implements, for which there is a steady demand. The property and plant are valued at over $100,000; this issue is being made for further extensions. Further particulars will be found elsewhere in *The Monetary Times*.

NOVEMBER FIRE LOSSES ARE HEAVY

Two Large Conflagrations Add Over $1,000,000 to the Total—Loss for the Year Greatly Reduced—Fewer Fatalities—Large Fires Still Responsible for Most of Loss

The Monetary Times' estimate of Canada's fire losses for November, 1919, is $2,339,870, compared with $1,023,288 in October and $1,059,580 in November a year ago. The following is the November estimate:—

Fires of $10,000 and over	$2,114,200
Small fires reported	90,400
Estimate of unreported fires	135,270
Total	$2,339,870

A considerable increase is shown in the losses. Two large fires, both in the province of Quebec, were chiefly responsible for this increase. The Brown lumber mills at Trois Pistoles, with a loss of $800,000, and the Laval University at Montreal, with a loss of $350,000, added $1,150,000 to the total.

As can be expected at this time of the year, a great number of fires originate from heating apparatus. Of the causes reported to *The Monetary Times* for November, which are fairly representative of the whole total, about 45 per cent. started in this way, and there is no doubt that later reports will show this percentage greatly increased.

Total for the Year Down

With just one more month to go, fire losses for the year are still over $10,000,000 under those of 1918. The loss is still high, however, as compared with the totals for 1915, 1916 and 1917.

The Monetary Times' record of the past three years and this year to date shows the following monthly losses:—

Month.	1916.	1917.	1918.	1919.
January	$ 1,649,217	$ 1,918,660	$ 2,688,556	$ 3,915,290
February	3,275,600	2,009,953	2,243,762	1,091,834
March	1,406,501	2,050,650	1,682,286	2,154,095
April	1,460,437	1,317,714	3,240,187	1,080,070
May	1.850 205	1.163,110	3,570,014	1,785,030
June	494.557	1,184,627	3,080,982	3,337,530
July	3,039,634	1,101,734	3,369,684	1,118,377
August	1,057,109	1,230,183	3,110,445	1.374,495
September	981,703	1,301,700	917,286	1,940,272
October	1,077,815	704,605	5,119,145	1,023,288
November	923,235	959,049	1,059,580	2,339,870
December	3,271,496	5,144,100	1,733,917	....
Totals	$20.487,509	$20,086,085	$31,815.844	$21.060,151

$10,000 or Over

The following is a list of fires at which the loss amounted to $10,000 and over:—

Kensington, P.E.I., November 2, packing plant of the Imperial Canning Co., $15,000.

Nelson, B.C., November 3, garage of Nelson Transfer Co., $19,700.

Belmont, Man., November 4, Trafalgar Hotel, $45,000.

Halifax, N.S., November 5, business building on Hollis Street, $30,000.

Walkerville, Ont., November 5, factory of the American Auto Trimming Co., $20 000.

Millerton, N.B., November 7, farm buildings of E. Betts, $15,000.

Lambton Mills, Ont., November 7, coal sheds and garage of the Lambton Golf Club, $16,500.

Hillhurst, Que., November 7, garage of W. S. Waite and fifteen cars, $25,000.

Griswold, Man., November 9, Western Manitoba Hotel and the Purdy Block, $25,000.

Olds, Alta., November 9, business block, $30,000.

Fort William, Ont., November 13, city car barns, $175,000.

Bedford, N.S., November 14, sawmill and box factory of Moirs, Ltd., $50,000.

Hamilton, Ont. November 14, the John Lennox Building and R. Babb's tailor store, $46,000.

Muenster, Sask., November 14, business block, $40,000.

Oshawa, Ont., November 15, Simcoe Methodist Church, $60,000.

Sabrevois, Que., November 16, church, presbytery, several barns and outhouses, $25,000.

Toronto, Ont., November 16, building occupied by the Thomas Claxton Co., and owned by the National Trust Co., $12,000

Campbellton, N.B., November 20, Rosebury Street school, $25,000.

Trois Pistoles, Que., November 20, mill of Brown Lumber Corporation, $800,000.

Montreal, Que., November 22, University of Montreal, $350,000. Garage of the Montreal Warehousing Co., with many autos and trucks, $30,000.

London, Ont., November 25, planing mill of Wm. Gerry, $23,000.

Ottawa, Ont., November 25, building and stock of McDougall, Ltd., $25,000.

Verigin, Sask., November 26, section of village, $42,000.

Gladstone, Man., November 29, Gladstone Echo Mills, $175,000.

Vancouver, B.C., November 29, Nasmyth shingle mill, $10,000.

Destroyed or Damaged

Among the structures damaged or destroyed last month were: Hotels, 5; stores, 7; plants, 4; sawmills, 5; garages, 7; barns, 16; factories, 5; residences, 14; livery, 1; laundry, 1; car barn, 1; lumber mill, 1; oatmeal mill, 1; shingle mill, 1; business buildings, 6; warehouses, 3; tannery, 1; hospital, 1; churches, 4; business blocks, 2; boathouse, 1; office, 1; university, 1; printing plant, 1; baggage room, 1.

Among the causes reported were: Incendiarism, 1; defective wiring, 2; spontaneous combustion, 3; overheated furnace, 3; defective stovepipes, 2; oil boiling over, 1; defective heating system, 1; spark from passing locomotive, 1; starting gasoline engine, 1; defective chimney, 1; boys smoking, 1; playing with matches, 1; explosion of oil stove, 1; defective furnace, 1; overheated oven, 1.

Fatalities Decrease Slightly

The following is a list of fires last month at which fatalities occurred:—

Belmont, Man., Nov. 3, trapped in burning hotel	2
Wilkie, Sask., Nov. 5, trapped in burning house	1
Murray Township, Ont., Nov. 6, trapped in burning house	2
Dorion Township, Ont., Nov. 7, trapped in burning house	2
Chatham, N.B., Nov. 10, playing with matches	1
Brewer's Mills, Ont., Nov. 13, playing with fire	1
Charlottetown, P.E.I., Nov. 13, fire from oil lamp	1
Venn, Sask., Nov. 14, trapped in burning store	1
Quebec, Que., Nov. 15, lighting fire with oil	1
St. Cyprien, Que., Nov. 22, sparks from fire	1
Mortlach, Sask., Nov. 27, trapped in burning office	1
Total	14

The following table, compiled by *The Monetary Times*, shows deaths caused by fire during the past seven years and this year to date:—

Month.	1912.	1913.	1914.	1915.	1916.	1917.	1918.	1919.
January	27	14	26	3	10	21	28	13
February	11	21	18	11	23	19	87	26

Canada to Centralize Fur Sales—Montreal to Be Auction Market—$2,000,000 Match Plant for Quebec—Winnipeg to Look After Small Companies

CANADA is about to centralize her fur sales, and Montreal has been selected as the centre. An announcement from Charlottetown, P.E.I., states:—

"At a meeting of a hundred fox men held recently at Summerside, a resolution was passed favoring the holding at Montreal of public auction sales of raw furs. Lorne Webster, of Montreal, president of the Quebec Railway, submitted to the meeting the proposal of Montreal capitalists, including Lord Shaughnessy, Sir Herbert Holt and others, to form a $5,000,000 company for the sale of furs. The suggestion was made that stock in the company should be held by production, the latter to have preferred participating shares. As a large proportion of furs sold at American auction sales are produced in Canada, it was pointed out at the meeting that Canada should have a central selling organization of her own.

"The island is deeply interested, as a large percentage of the world's silver fox furs come from this province. The new corporation represented at the meeting by Mr. Webster has bought up the Holt, Renfrew Company, the A. and C. Pierce Company, and other big Montreal concerns."

The company, which will be capitalized at $5,000,000, will be known as the Montreal Fur Auction Sales Co. The bulk of the shares of the company will be offered to the fur trade. The company, it is officially stated, is largely co-operative in nature and has been organized for the purpose of holding fur auctions in that city at the company's premises three times each year for the disposal of Canadian furs, each sale to last from one to two weeks, as may be necessary. At the present time, the valuable Canadian fur catch is going to American and other foreign sales, and is in many cases being bought back by Canadian manufacturers. It is probable that the first sale will be held in March of 1920.

Some of the names mentioned in connection with this new development are: Lord Shaughnessy, chairman, C.P.R. board; Lorne C. Webster, president, Quebec Railway; Sir Herbert Holt, president, Royal Bank of Canada; W. A. Black, vice-president and general manager, Ogilvie Flour Mills, Ltd.; J. W. McConnell,' St. Lawrence Sugar Refinery Co.; A. Pierce of A. and E. Pierce; R. S. Coltart, president, Holt, Renfrew Co.; E. E. Cummings, president of Cummings and Cummings; A. J. Brown, K.C.; F. Gnaedinger; Wm. Coristine; and F. Cooper.

Winter Hinders Building

Winter weather which has set in nearly all over Canada has caused the building trade to fall off considerably. This affects to a large extent the opening of branch plants. Increased activity in this connection is expected when spring arrives, and preparations are under way.

It is estimated that building permits in Toronto for the year 1920 will amount to $24,000,000. Baldwin's, Ltd., have plans for a $200,000 steel plate mill at Ashbridge's Bay, the first of a series of buildings for the firm, the total expenditure to be about $1,500,000. The Dunlop Tire and Rubber Goods Co., is building a factory at Queen and Booth Sts., at a cost of $450,000. The Prest-O-Lite Co., intends the erection of a factory in the city at a cost of $410,000 Work on construction will begin in the New Year.

The Ames-Holden Tire Co. announce that their building at Kitchener, Ont., is practically completed and that all machinery is either in place or en route. The company expects to be producing by January and in a position to deliver tires for the spring trade. It is also stated that so far all construction has been carried on ahead of schedule.

The Grosch Felt and Shoe Co., of Milverton, Ont., have taken over the plant of the Stratford Flax Co., at Stratford, Ont., which was badly scorched in a recent fire. Work will commence at once on the necessary alterations. It is not the intention of the Grosch Co. to close the Milverton factory, but to operate the two plants. The local plant will employ from 50 to 100 hands.

The lumber business of Henry Lindop and Son, St. Thomas, Ont., has been purchased by Messrs. W. K. Cameron and A. E. Ponsford, and the plant has been taken over for the manufacture of cardboard and wooden boxes. The deal is the outcome of the growth of Nobility Chocolates, Ltd., at which plant the manufacture of boxes will be discontinued.

A resolution has been passed by the Gananoque Board of Trade, to the effect that the manufacturing committee take energetic steps to influence one of a number of prospective manufacturers to locate in the municipality at the W. J. Gibson plant, and that effort be made for further industries.

It is possible that Cobourg, Ont., will secure the Canadian branch of a Rochester, N.Y., furniture company. The company has asked for a certain site on favorable terms, and also for a loan of $50,000 to be paid back on the instalment plan. Providing the council passes the requests, a by-law will be submitted to the ratepayers at the January elections.

Quebec Province Active

A large match factory is to be built at Berthier, Que., at the cost of $2,000,000. The promoters of the company are Americans. Over 1,000 hands will be employed. The factory of the Sanborn Mfg. Co., Ltd., of Canada, a branch of the American company, has been opened at Ayers Cliff. The company will manufacture "weather wear" garments for men, women and children. Quebec City has secured two new industries. One is the Prince Rupert Cigar Co., a branch of the Montreal plant, and the other is a branch of the British American Oil Co. Application has been made by many prominent men to the Montreal city commissioners for permission to erect a large hotel in the city at the cost of over $3,000,000.

On December 17th, Sherbrooke ratepayers will vote on by-law granting exemption from municipal taxation to the Canadian Connecticut Cotton Mills and the Julius Kayser company's plant in view of the new plant extensions to be built by those industries. Approximate cost of Canadian Connecticut Cotton Mills' new plant, $1,500,000, and that of the Kayser Co., $200,000.

The Birks Co., of Montreal, silversmiths and goldsmiths, are building a new ten-story factory at the corner of St. Monique and Cathcart Sts. The firm hopes to include in the new building a crafts school on a higher plane than any yet developed, where Canadian boys will receive not only the technical training of the goldsmith's and silversmith's trade, but where they will receive that higher education and all-round development which will fit them for higher citizenship.

Nova Scotia Fisheries' Products

The East Coast Fisheries Products Co., of Rockland, Me., has decided to enlarge its plant at St. Peter's, N.S., which has been in operation since August, when the Stewart Fish Co.'s plant was taken over. The extensions will cost about $1,000,000. The company intends to acquire if possible the land and water front lying west of St. Peter's canal, the only property suitable in area and location, and erecting thereon wharves and buildings.

"Incubator of Infant Industries"

The erection of a manufacturing plant at Winnipeg to take care of small industries is contemplated. The industrial bureau of the board of trade has been instructed to look into the matter. The city has a great number of inquiries in connection with the establishment of small industries and the members of the bureau agreed that erection of a factory in units would solve the problem of locating these industries there and would provide an attraction for manufacturers and industrial workers.

In explaining the idea, a member of the committee said: "A plant of this nature is known in the United States as an 'Incubator of Infant Industries.' In Toledo, Ohio, a splendid factory building has been successfully operating for

THE SECRET OF SUCCESSFUL SALESMANSHIP

If the salesman has unlimited confidence in the company he represents and in the goods he is offering, it will not take long to communicate that confidence to the prospect. And this applies to Life Insurance more than to any other article. Agents of the Mutual Life of Canada meet with extraordinary success for that simple reason—they devoutly believe in Life Insurance and above all in "Mutual" Life Insurance. The Mutual Life has been conducted for fifty years exclusively in the interests of its policy-holders. The result is an unprecedented demand to-day for Mutual Life Policies. With the Mutual "the secret of successful salesmanship" is simplicity itself—the Agent knows that he has the Company and the Policy that the prospect NEEDS. The rest soon follows.

BE A MUTUALIST.

Address: ALBERT E. AWDE, Supt. of Agencies.

a number of years, having been erected through the efforts of the chamber of commerce of that city, as a solution of the difficulties confronting small manufacturing concerns in finding suitable factory sites for carrying on their business under favorable conditions.

"The small manufacturer must be cared for and it is he who needs to profit by every possible facility for lowering the cost of production. Doing business on a restricted scale he feels the need of making every cent count and the fact that in nine cases out of ten he finds it practically impossible to secure adequate factory space, operates greatly to his disadvantage.

"A central factories building would provide floor space for a relatively large number of small concerns under conditions approaching the ideal and would offer a satisfactory and definite solution to the small manufacturer's problem."

NEW INCORPORATIONS

Simmons, Ltd.—Trans-Canada Theatres, Ltd.—Robert Simpson Eastern, Ltd.—Western Wheel and Foundries

EXPORTS OF CANADIAN PRODUCTS DECLINING

Twelve Months' Total Less Than Last Year—Imports from United Kingdom Higher, but Those from United States Are Less

A COMPARATIVE statement of Canada's trade for the year ended October 31st, 1919, shows an increase in imports and a reduction in exports. Imports from the United Kingdom are increasing and exports decreasing. A reduction of nearly $300,000,000 in exports since October, 1917, is shown. Imports from the United States are on the decline, while, on the other hand, exports show substantial increases. Exports to British colonies are on the incline, while trade with foreign countries is advancing rapidly. The fact that sterling exchange for some months has been at a heavy discount, while exchange on New York has been at a premium for some months past, has no doubt had an important influence in bringing about this readjustment in Canadian trade. The following are the twelve months' figures in detail:—

	Twelve Months ending October		
	1917	1918	1919
IMPORTS FOR CONSUMPTION	$	$	$

GOVERNMENT AND MUNICIPAL BONDS

Ontario Makes Another Sale—Edmonton to Call for Loan at a Later Date—Montreal to Lessen English Debt

THE most interesting event of the week was the sale of $6,000,000 5½ per cent. 10-year Ontario bonds to Messrs. Æmilius Jarvis and Co., of Toronto, at 97.76, which is on a basis of about 5.80 per cent. The bonds are payable in Canada and New York. This is the second issue of the province's bonds in two weeks, the first being sold towards the end of November, in accordance with arrangements made by the late government. The money is to be used for general purposes, and this is the first call for funds by the Drury government.

Another announcement of interest was made concerning Edmonton's issue of bonds. As was stated in these columns last week, only one bid was received, Messrs. Ross, Alger and Co., Edmonton, bid 92.73 for $500,000 of the $3,000,000 issue, and an option on the balance for three months. At this price the city would have had to pay 6½ per cent. for its money. The only difficulty in not selling the bonds was that the city had advertised that $1,000,000 of tax arrears debentures would be taken up next January. It had been intended to use proceeds of the $3,000,000 sale towards this purpose. Now, the question was whether the city would be considered a defaulter if it advertised that the $1,000,000 of bonds would not be taken up. At a later meeting, however, the city council decided not to redeem the bonds next January, although this course had been previously decided on and advertised in financial papers. Neither will the council accept the offer made on the $3,000,000 consolidated bond issue Alderman Martin, chairman of the special finance committee, reported to council that the Imperial Bank had advised the city that the withdrawal of the notice of redemption would not be considered a default on the part of the city and would not injure its credit. It was felt that it would be more advisable to take up the bonds on the next interest due date, which will be in July, when the financial markets will be more favorable.

A large number of by-laws are to be submitted to the ratepayers at the January elections, promising an active time for brokers at the beginning of the year. Many bond issues are also up for sale this month, among which the following are included:—

The following is a list of debentures for which tenders are asked. Particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Picton, Ont.	9,000	6	15-instal.	Dec. 13
Barton Tp., Ont. ...	$ 11,920	5½	20-years	Dec. 13
Barton Tp., Ont. ...	18,526	5½	10-years	Dec. 13
Port Colborne, Ont.	80,000	5½	20-instal.	Dec. 15
Prescott & Russell Counties, Ont. ...	50,000	6	25-ser.	Dec. 15
Alberta Schools	23,000	6½	10 & 15-years	Dec. 22
Verdun, Que.	225,000	5½	20-years	Dec. 22
Nanton, Alta.	6,000	6½	10-instal.	Jan. 15

Picton, Ont.—Tenders will be received until December 13 for the purchase of $9,000 6 per cent. 15-instalment debentures.

St. Anne R.M., Man.—The rural municipality contemplates selling an issue of $61,495 5½ per cent. 30-instalment debentures.

Verdun, Que.—The city is again offering its $225,000 5½ per cent. 20-year issue of bonds. Tenders will be received until December 22.

Nanton, Alta.—Tenders will be received until January 15, 1920, for the purchase of $6,000 6½ per cent. 10-instalment debentures. (See announcement elsewhere in this issue.)

Prescott and Russell Counties, Ont.—The united counties have failed to dispose of their $50,000 6 per cent. issue of 25-year serial bonds. The highest bid received was 100.15. Tenders will be again received until December 15.

Walkerville, Ont.—The town council has decided to readvertise for tenders on its bonds. Bids were asked on a total issue of $63,343, in two blocks of $13,343 6 per cent. 10-instalments, and $50,000 5½ per cent. 30-instalments. It is understood that the highest bid was 95.89, and was submitted by the Dominion Securities Corporation, Toronto. This was considered too low. It is reported, however, that the $13,343 block has been disposed of to the Canadian Bank of Commerce at par.

Alberta School Districts.—Tenders are being received until December 22, 1919, for the purchase of twelve blocks of 6½ per cent. rural school district bonds as follows: Baintree, 10-years, $4,000; Jarvis, 10-years, $3,000; Redland, 10-years, $2,800; Vimy Ridge, 15-years, $2,000; Lotus, 10-years, $1,800; Snake Valley, 15-years, $2,500; Kensington, 10-years, $600; Pine Grove, 15-years, $700; Flying Shot, 10-years, $1,800; Paddy Springs, 10-years, $2,500; Tulliby Lake, 10-years, $500; Purple Ridge, 10-years, $800; total, $23,000.

Debenture Notes

Prince Rupert, B.C.—Ratepayers have endorsed a by-law authorizing the raising of $150,000 for school purposes.

Almonte, Ont.—The council will submit a by-law to the electors to raise $25,000 to purchase the Wiley power plant.

Vancouver, B.C.—The city council has decided to spend $75,000 on street improvements and water and sewer extensions.

Hamilton, Ont.—A by-law to raise $50,000 for necessary improvements at the Mountain Sanatorium, will be submitted to the electors.

Township of Goulburn, Ont.—A by-law authorizing the raising of $7,000 for the construction of a town hall will be submitted to the electors on December 29.

County of Lambton, Ont.—The council has passed a by-law authorizing the borrowing of $20,000 for the maintaining and building of good roads in the county.

Chatham, Ont.—A by-law for the raising of $600,000 for inauguration of a waterworks scheme with Lake Erie as a source of supply, will be submitted at the January elections; $10,000 for an athletic park and $17,300 for a steel bridge, are two other amounts also needed.

London, Ont.—Ratepayers will be asked to approve a debenture issue of $1,328,600 at the coming municipal elections. The two largest items on the list are $300,000 for Western Fair grounds extension and $200,000 for the London and Port Stanley acquirement. The sum of $200,000 is also needed for storm sewers.

Ottawa, Ont.—The total of the money by-laws to be submitted to the ratepayers at the January elections will be $1,150,000. The proposition for the expenditure of $2,000,000 for a combined new city hall, memorial hall, police station and courts was turned down by the council and will not be submitted to the ratepayers.

Victoria, B.C.—No decision as to the financing of the building of the Johnson Street bridge has been reached yet. City Comptroller Raymur submitted a statement showing the cost of the proposed bridge. If the bonds are issued on a serial 30-year basis, the total cost will be $778,050. If on the sinking fund plan, $917,659.50. If they are issued on a serial plan, 40-years, it will cost $893,550, and if on the sinking fund plan $1,100,794.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from November 15 to 29, 1919:—

Telephone Companies.—For 15-years 8 per cent. annuity —Marshall, $2,600; Luseland West, $7,000; New Deloraine, $1,600; Round Plain, $4,500; Longlaketon, $2,600; Duval and Longlake, $7,400; Narrow Lake, $8,800; Currie, $250.

School Districts.—Rereshill, $3,500 14-years 8 per cent. instalment; Bonnie Hill, $1,200 5-years 8 per cent. annuity; Venice, $9,000 10-years 8 per cent. instalment.

Villages.—Wilcox, $7,000 10-years 7 per cent. instalment; Gliddon, $3,500 15-years 7 per cent. instalment.

Montreal, Que.—According to a statement by E. R. Decary, chairman of the Administrative Commission to the

WINNIPEG - - MANITOBA

Chambre de Commerce last week, the commission is going to liquidate the city debt of $15,000,000 held in England at the present moment, by floating another loan in the United States or Canada, and by taking advantage of the present rate of exchange, the city will reduce its actual debt by $7,000,000.

The plan of the commissioners in taking advantage of the drop in the exchange rate between Canada and England from $4.85 to $3.90, and of floating a new loan which could be paid off in twenty years, proper provision being made for its repayment, is considered by the Chambre as wise. This repayment of loan principals was one of the points emphasized by Mr. Decary, who declared that the enormous debt of $122,000,000 was due in part to the failure of past administrations to provide a sinking fund for the repayment of loans. He also spoke of the school commission administration and the debt of $24,000,000 owed by those bodies, which was also charged against proprietors and urged a keener interest in this branch of administration. Mr. Decary dwelt on the assessable value of the city, and declared that they could not borrow any more money for improvements as they were up to the limit of their borrowing power, but despite the increases made in taxation Montreal was the lowest taxed city of any size in the country.

Barton Township, Ont.—A by-law will be submitted to the ratepayers calling for the raising of $35,000 for the erection of a township memorial hall.

St. Catharines, Ont.—The council has passed a by-law for the issuance of debentures to the amount of $668,539, which is the proportion of cost allotted to St. Catharines in the hydro-radial scheme.

Winnipeg, Man.—It has been announced that plans have been completed for the issuance of $5,700,000 debentures for road building in the municipalities of the province of Manitoba.

Sales of the Week

Collingwood, Ont.—Messrs. C. H. Burgess and Co., have been awarded the issue of $8,650 6 per cent. 10-instalment debentures at 99.04.

Niagara Falls, Ont.—An issue of $18,000 6 per cent. 20-year hydro-electric debentures, has been awarded to R. C. Matthews and Co., at 99.65.

Sandwich, Ont.—Messrs. R. C. Matthews and Co., Toronto, have purchased three blocks of the town's 6 per cent. bonds at 99.17. The blocks are: $70,000, 30-years; $40,901, 25-years; $28,162, 10-years.

Renfrew, Ont.—The town has awarded to Dyment, Anderson and Co., Toronto, two issues of bonds as follows: $25,000 5½ per cent., 20-years; $17,500 6 per cent., 30-years. The price paid for the total was 96.63. Tenders were received as follows:—

Dyment, Anderson & Co.	96.63	$41,070
Brent, Noxon & Co.	96.13	40,859
A. E. Ames & Co.	95.91	40,761
R. C. Matthews & Co.	95.90	40,757
Wood, Gundy & Co.	95.34	40,519
National City Co., Ltd.	95.16	40,445
C. H. Burgess & Co.	94.86	40,315

Walkerville, Ont.—The Canadian Bank of Commerce has been awarded a block of $13,343 6 per cent. 10-year bonds at par. The $50,000 5½ per cent. 30-year block was not sold. The following are the tenders for the total, which amounts to $63,343.66:—

Dominion Securities Corporation	$60,740.86
Dyment, Anderson & Co.	60,341.78
R. C. Matthews & Co.	60,176.48
Geo. Carruthers & Son	60,091.90
Wood, Gundy & Co.	59,779.00
C. H. Burgess & Co.	59,771.71
Brent, Noxon & Co.	59,739.00
A. E. Ames & Co.	59,638.06
National City Co.	59,463.45

Saskatchewan.—The following is a list of sales reported from November 15 to November 29, 1919, by the Local Government Board:—

Rural Telephone Companies.—Laurie, $12,275, Theodore-Whitesand, $4,100, Lanigan, N.W., $2,700; Harris, Read and Co. Richburg, $7,700, Luseland East, $6,000, Tullis, $14,200; W. L. McKinnon and Co. Silverwood, $3,200; H. C. Hamill, Wawota, $1,300, Eastend, $21,900; Geddie McKay, Ltd. Glenavon South, $2,400; G. T. Brander. Viscount, $11,600; W. D. Craig. St. Louis, $20,000; E. S. Channel.

Schools.—Dundalk, $3,500, Lake Lillian, $2,550, Hay Meadow, $3,200, Riverstone, $4,000, Kabrud, $2,500; Waterman-Waterbury Manufacturing Co., Regina. Corofin, $500; W. Patterson, Preeceville.

Ontario.—The province of Ontario has disposed of a block of $3,000,000 5½ per cent. 10-year bonds to A. Jarvis and Co., Toronto, at 97.76 and interest, at which price the province pays about 5.80 for its money. This is the second issue in two weeks which has been disposed of by private sale. Public tenders were not called for, but a few bond dealers were invited to bid privately. It is not expected that any of the bonds will be sold here, but that the whole issue will be disposed of across the line.

In addition to the bid from Jarvis and Co., which was accepted, two others were received. R. C. Matthews and Co., Toronto, bid 97.65 and interest, and Wood, Gundy and Co., Toronto, bid 97.57 and interest. The sale was made at short notice, as the provincial treasurer, Hon. Peter Smith, considered it advisable, in view of the uncertainty of the market, to close as soon as possible. The sale of $4,000,000 of 5½ per cent. bonds which was made two weeks ago to a Toronto syndicate, under arrangements made by the late government, realized 94.48 and interest.

ROYAL SECURITIES IN THE WEST

Arrangements have been completed by the Royal Securities Corporation, Montreal and Toronto, for the opening of a new western office in Winnipeg, Manitoba. A suite of offices has been engaged at 500 Electric Railway Chambers, Winnipeg, and the new office will be under the management of Lieut.-Col. A. L. Saunders, D.S.O., M.C., late officer commanding the 8th Canadian Infantry Battalion.

NEWS OF MUNICIPAL FINANCE

Prince Albert Bond Settlement Meeting With Success—Calgary Finances Show Improvement

St. Thomas, Ont.—So far this year taxes amounting to $311,317 have been collected, leaving a total of $66,317 outstanding.

Canora, Sask.—The statement of finances for the first ten months of 1919, shows receipts of $83,967 and expenditures of $72,946. The balance of cash on hand and in the bank is $11,021. Municipal and school taxes collected amounted to $38,625. The balance of uncollected municipal, school and public revenue taxes amount to $41,045.

Montreal, Que.—A draft of the bill for amendments to the city charter, to be submitted to the legislature, has been completed. The city asks for authority to levy a tax not exceeding $1,000 on foreign brokers, which means all firms or persons dealing in bonds, shares, etc. The city asks for power to borrow money in anticipation of revenue with which to purchase merchandise and material required for administration up to $500,000, and also power to purchase machinery and other apparatus needed for the carrying on of municipal works provided the amount borrowed does not exceed $200,000. Many other clauses are included.

The total value of property in Montreal for the current year as determined by the city assessors is $856,548,846. Of this amount the value of property exempted from taxation being $223,145,771, the net valuation on which realty tax is levied is $633,403,075.

Prince Albert, Sask.—A statement of the city's finances for the ten months of 1919 has been issued. The revenue and expenditure account shows a surplus of $50,259. On the revenue side are the following amounts: Tax revenue, $143,684; sundry general revenues, $12,673; board of works, $128; markets and parks, $254; police, $2,094; electric light and power, $62,833; waterworks, $28,084. The expenditure side shows: Sundry general expenditure, $40,604; committee on finance and assessment, $16,317; board of works, $21,492; fire committee, $15,359; health and relief committee, $10,080; markets and parks, $4,358; police, $7,619; electric light and power, $56,860; waterworks, $26,259. The debenture debt totals $3,796,846.

Prince Albert, Sask.—The city's bond settlement seems to be working out successfully. From November 1 to December 1, property owners paid arrears up to the amount of $95,000. During the year the amount paid up on the old arrears and current taxes totalled $340,000. According to the agreement with the bondholders, property which went into arrears prior to 1918 could be held by the payment of one-tenth of the amount of arrears on or before December 1, the balance to be paid in nine more yearly instalments, including current taxes. This arrangement was made on March 17, 1917. Having arranged this concession the city was entitled to clear title on all property not so redeemed, so that any city property which had arrears outstanding prior to 1918, and which arrears were not paid before midnight on November 30, has now reverted to the city, which will secure the title clear and absolute.

Since the announcement was made of the ten-year spread in the payment of these old arrears there has been a steady inflow of cash into the city treasurer's office. Quite a number of payments were made clearing off the whole indebtedness, but the majority of property holders took advantage of the ten-year spread and payment of the first tenth was made on practically all the inside property. All property owners registered with the city were notified of the settlement and subsequently circularized as to the conditions under which their property might be held.

The total amount of outstanding taxes antedating 1918 was, on November 30, about $700,000. Ten per cent. of this amount would be $70,000 and as $95,000 was paid in November alone, it will be seen that the settlement is working out satisfactorily.

Calgary, Alta.—Five charts of the city's income and expenditure have been issued. Complete information of the handling of the city's income of $5,721,520 is given. The income is divided as follows: General revenue contributes the percentage of 47.339, showing an increase of .669, as compared with the general revenue of 1918. Business tax gives a percentage of 2.92; sundry revenue, 5.99; provincial war tax, .99; special levy for uncollectable taxes, 1.02. The following percentages are indicated by the utilities: Electric light and power, 11.85; market and weigh scales, .20; paving, 1.89; street railway, 13.02; waterworks, 7.201; local improvement taxes, property share, 7.58.

The distribution of the income is arranged in a paragraph under the heading of "Where It Goes," showing that fixed charges take a percentage of 16.29, being the largest percentage; while education ranks second with a percentage of 13.392, followed by a rate of 12.9 for the street railway. Electric light requires a percentage of 11.794, with the balance accounted for as follows: Protection, persons and property, 7.169; waterworks, 7.234; hospitals, 3.704; discounts on taxes and refunds to soldiers, 3.589; local improvements, 7.55; administration, 3.91; with several smaller expenditures.

Under the caption entitled, "How It Goes," personal services take the highest place with a percentage of 26.858, followed by debenture interest, 18.27. Debenture sinking fund takes 10.381, and schools 13.923. Bank interest is 3.9 and hospitals 3.704. Charities take 1.201 and the provincial war tax .997.

Under the heading, "Who Spends It," the heaviest percentage is debenture interest, sinking fund and bank interest, showing 32.46. Public school board takes 12.63 and separate schools 1.28. General hospital 1.635 and the Holy Cross hospital .285. Fire department 3.64 and police 1.83, and administrative department 2.19, sanitation 2.92 and health 4.3. The street railway takes a percentage of 9.24, engineering .66 and highways 1.626.

Last year this time the city owed local banks the sum of $950,000. This year this debt has been disposed of. The debt to the school board has also decreased $100,000. The amount of $100,000 has been paid into the sinking fund for the first time since 1915. The reason of this improvement in the city's finances is largely due to the successful flotation of a $1,500,000 loan this year.

Taxes collected by the city this year up to November 24 exceed the total collection of 1918 by more than $360,000, the total collected in 1918 being $2,751,021.55, as compared with $3,113,420.02 collected in the first ten months of the current year. While the increased returns are due somewhat to the increased levy the collections for this year also show an increase on the percentage basis, the increase being 2 per cent. The percentage for 1918 was 66, while for this year it is 68.23. All taxes paid before January 1 will be accepted as assessed, and payments after January 1 will be penalized at 10 per cent.

CANADIAN MUNICIPAL STATISTICS

Messrs. Wood, Gundy and Co., Toronto, have just issued a book entitled "Canadian Municipal Statistics," for the year 1919-20, which will prove of great interest to those interested in municipal securities. The edition is more comprehensive than previous editions, and presents financial statements from practically all borrowing municipalities in the Dominion. A summary of municipal law has been prepared by Alexander Bruce, K.C., of Toronto, and covers all recent legislation in the various provinces in regard to municipal debentures. This, together with concise articles on "Trust Investments," "Canada's War Effort" and "Income Tax Requirements," should be valuable to municipal investors and civic officials.

Subscriptions to the 1919 Victory Loan, received in Brandon, Man., totalled $2,127,000. The figure, $665,250, given in *The Monetary Times* of November 21, was obtained before the campaign was completed.

New Publications

—giving specific information on important foreign trade subjects

THERE is today a greater demand than ever for specific information by those who wish to enter foreign markets or to extend their present business with other countries. To help meet this need we have published the following booklets:

Shipping's Share in Foreign Trade

Gives the fundamentals of ocean transportation; details of how shipments are handled; explains methods of procedure, shipping documents, factors governing rates, insurance, etc.

How Business with Foreign Countries is Financed

Describes, by means of reproductions of actual forms and documents, the banking procedure and methods used in financing exports and imports.

Trading with China

Describes commercial customs in China, and methods found successful in dealing with the Chinese.

Canada

Discusses the economic position and plans for commercial and industrial development of Canada.

Banking Service for Foreign Trade

Outlines the various world-wide services offered by this Company and its connections in the financing of business with other countries.

These booklets are available on request. Manufacturers and merchants desiring data relating more specifically to the export possibilities of particular products are invited to write our FOREIGN TRADE BUREAU for detailed information.

INVESTMENTS AND THE MARKET

Consumers' Gas Improves Position—Winnipeg Electric Valuation Only Partial—Canada Iron Foundries' Report

The Western Power Co. of Canada, Ltd.—The company, with office at Vancouver, B.C., reports for October operating revenue of $12,291 and net earnings $26,673. For the twelve months ended October 31st operating revenue amounted to $168,888 and net earnings $298,672.

Provincial Paper Mills Co.—The company has increased the dividend on its $2,181,300 common stock from 4 to 6 per cent. The company owns mills at Mille Roches, Ont., Thorold, and two mills at Georgetown, Ont. It also controls the Port Arthur Pulp and Paper Co.

Trinidad Electric Co., Ltd.—The following is a statement of the earnings of the company for October, 1919:—

	Gross.	Net.
Railroad	$14,511	$2,706
Light and power	11,357	1,186
Ice and refrigeration	5,245	1,417
	$31,114	$5,310

Wasapika Gold Mines, Ltd.—Shareholders of the company have ratified new consolidation plans. According to the statement subsequently issued, more than 900,000 shares were represented out of a total of 980,000 shares, and it was voted unanimously to consolidate with the three properties to the north ,and a $6,000,000 company will be formed. The Wasapika sells its property to the Wasapika Consolidated for $3,000,000, each shareholder in Wasapika getting the equivalent of three shares for one.

Winnipeg Electric Railway Co.—The valuation of the company of $12,934,293, as reported in these columns last week, is only partial. The report has been forwarded to Winnipeg, but will not be made public until experts have had an opportunity to study and report on it.

The appraisal, completed by the Manitoba Public Utilities Commission experts, does not include rolling stock, gas properties, "intangible capital," nor land. The partial valuation is $12,934,293, with a replacement value of $15,724,501, showing an allowance of $2,790,207 for depreciation since the construction or installation of the properties included.

Consumers' Gas Co.—An audit of the books of the company, presented to the Toronto Board of Control, shows that the gross earnings of the company were $5,506,215 as compared with $5,095,006 last year. The net earnings increased from $805,335 to $980,418. Average net yearly additions to the company plant and building renewal fund are $115,979; as against this it must be borne in mind that no depreciation has been provided for on the real estate and equipmnt account of $10,444,795.

"In the report of 23rd September last on the increase in the price of gas which I made in conjunction with the Commissioner of Finance," said the auditor, "we estimated the probable deficit for the year ended 30th September, 1919, at $196,170. The deficit as stated in the final accounts for the year was $127,064, showing a better result than was expected."

Canada Iron Foundries, Ltd.—The earnings for the year, before providing for depreciation, amounted to $489,943, as compared with $508,824 last year. The addition of $99,098, received from interest, discount and exchange (including profit on securities sold) and of $6,866 balance carried forward from last year, gave a total of $595,908 at the credit of the profit and loss account. The amount charged to depreciation amounts to $195,059, as against $141,472 last year. It has been decided to transfer the new reserve fund of $45,088, thus bringing that fund up to $650,000.

The "A" debenture stock has been completely redeemed, and the authorized common stock of the company has been reduced from $2,000,000 to $1,800,000 by the cancellation of $200,000 of unissued common stock.

A new debenture stock, limited to $1,000,000, with a possible increase under certain conditions to $1,500,000, has been authorized. Of this amount, $809,298 par value has been subscribed, the balance remaining in the company's treasury. The amount issued on September 30th last was $793,298 par value, this being the amount appearing in the balance sheet. The following gives the comparison of some of the principal items in the balance sheet:—

	Sept. 30, '18.	Sept. 30, '19.
Real estate and buildings	$5,297,085	$5,197,763
Cash on hand and in bank	61,278	129,993
Investments	728,180	683,859
Current assets	2,078,475	2,390,418
Reserve fund	147,508	650,000
Current liabilities	178,658	153,284
Profit and loss account	6,866	166,356

London Street Railway.—No action has yet been taken by the city of London, Ont., for the purchase of the street railway system until further information has been secured from the Hydro-Electric Commission. The following valuations' have been made:—

Net earnings (net) 1919		$ 96,594
Interest on bonds and notes outstanding	$29,391	
Taxes	6,371	
Depreciation	26,000	
Amount available for annual charges in valuating stock	34,832	
		96,594
Bonds at 6 per cent. with 1 per cent. S.F.		497,600
Estimated earnings (net), 1920, with fares based on six tickets for 25 cents and increased operating expenses, as of July to October, 1919		79,000
Fixed charges on outstanding bonds ($531,000) at 5 per cent.	$26,550	
Taxes	6,500	
Depreciation	26,000	
Balance available for fixed charges or stock value	19,950	
		79,000
Forty-year bonds at 6 per cent. with 1 per cent. S.F.		287,000
Amount of capital stock outstanding		637,480

Value of stock, based on No. 2 valuation, is equal to 45 cents on the dollar, or 70.8 cents on No. 1 valuation.

In 1920, with tickets at seven for 25 cents, the net earnings are estimated at		$ 5,000
Interest on bonds ($531,000) at 5 per cent.	$26,550	
Taxes	6,500	
Depreciation	26,000	
		54,050
Deficit	$59,050	$ 59,050

RECENT FIRES

Heavy Losses at Moose Jaw, New Glasgow, Niagara Falls, Regina and St. Malachie—Verigin Has Second Large Fire

Deep Brook, N.S.—December 1—Barn owned by Avard Barrill was destroyed. Contents, consisting of 50 tons of hay, 300 bushels of grain, a large auto and all the farming implements and carriages, were, burned. Estimated loss, $8,000.

Edmonton, Alta.—December 2—Residence of A. R. Wilson, 10942 90th Avenue, was damaged. Cause, overheated stovepipe. Estimated loss, $2,000.

Kingston, Ont.—December 9—Building of the Hotel Dieu Hospital was damaged. Estimated loss, $600.

Mitchell, Ont.—December 7—Barn of Fred Sherbarth, Logan township, containing 400 bushels of wheat, was destroyed. Cause, a lantern exploding.

Moose Jaw, Sask.—December 1—The cooper shop attached to the Robin Hood mills was damaged. Cause, overheating of the drying kiln. Estimated loss, $15,000.

New Glasgow, N.S.—December 2—Building of the Norfolk Hotel, owned by J. L. Alexander, was damaged. New wing and annex escaped damage. Cause, defect in the kitchen flue. Insurance carried, $40,000.

Niagara Falls, Ont.—December 10—Local car barn of the Niagara, St. Catharines and Toronto Street Railway, two of the newest new-type cars and a snowplough were destroyed. Cause unknown. Estimated loss, $40,000.

Ponteix, Sask.—December 6—Several places were destroyed. The principal losses were as follows: Ponteix Theatre, $4,000; law office of Mr. Marcotte; Pelletier bakery $4,000; Gauthier's store, $30,000; Freedman's store, $15,000; Lupiers' drug store, $15,000. Total loss about $75,000.

St. Henry, Que.—December 8—Building partly occupied by Joseph Bechard and family was damaged. One death.

St. Malachie, Que.—December 4—Warehouse and grain elevator owned by Dorchester Co., Ltd., were totally destroyed. Estimated loss, $150,000, with partial insurance.

Timmins, Ont.—December 2—A business block was damaged. Estimated loss, $35,000. Cause unknown. The following places were damaged: Terrill's store, Smith's lunch, Bridger's book store, Theriault's tailor shop and the Oddfellows' hall.

Toronto, Ont.—December 6—The paint and wallpaper establishment of H. Brooker, 856 Bloor Street West, was damaged. Cause, unknown. Estimated loss, $450.

December 9—Building situated at 64 Temperance Street, owned by A. W. Carrick, was damaged by fire. Cause unknown. The firms which suffered are as follows: National Cloak Co., $14,000; British-American Cloak Co., $100; Wheaton Shirt Co., $500; Carborundum Co., $200; Gill Bros., $100; Peake and Whittingham, $100, loss being covered by insurance.

Township of Sandwich East, Ont.—December 10—Lakeview Hotel was destroyed. Cause, overheated furnace. Estimated loss, $20,000.

Verdun, Que.—December 3—Block partially destroyed by fire. Cause, defective chimney.

Verigin, Sask.—December 4—Building occupied by two Doukhobor families was damaged. Cause, overheated stovepipe. Estimated loss, $40,000.

Victoria, B.C.—December 10—The lumber mill of Moore and Whittington was destroyed. Estimated loss, $90,000.

Winnipeg, Man.—December 2—Residence of John Rowles, 1111 Ingersoll Street, was destroyed. Cause, overheated stove. Insurance carried, $500.

Woodstock, Ont.—December 9—Oxford Garage building and a barn were damaged. Cause, a spark from a motor being repaired ignited the gasoline on the floor. Five or six cars were damaged beyond repair. Contents of the barn were rendered valueless by water and fire.

Cambray, Ont.—December 9—Barn owned by Mr. William Marsh, containing a large quantity of grain, feed and various articles, was destroyed. Cause unknown. Estimated loss, $15,000, partially insured.

Harrietsville, Ont.—December 10—Residence of Victor Dunn was completely destroyed. Cause, started from kitchen stove. Estimated loss, $4,000, one half of which is covered by insurance.

ADDITIONAL INFORMATION CONCERNING FIRES

Campbellton, N.B.—November 20—The Roseberry Street School was destroyed. Estimated loss, $48,000. Insurance carried, $58,000.

Kitchener, Ont.—December 2—Garage of A. Lockhart and Co. was destroyed. Cause, cleaning parts of motor car with gasoline. A storage battery was close by, and the car containing the gasoline came in contact with battery, which caused a spark which set fire to gasoline. Estimated loss, $25,000. Insurance carried, $24,200.

Manitoba.—Manitoba's fire loss for the month of October amounted to $147,833. A total of 147 fires were reported during this period. Winnipeg contributed $98,511, or about 67 per cent. of the total, with 78 fires, or about 51 per cent. of the total number of fires occurring in the province during the month. The following is the report to date: Number of fires reported, 1,304; estimated value, $24,223,797; amount of insurance, $18,869,438; estimated loss, $1,281,537; loss ratio per capita, 2.0904; fatalities reported, 7.

Ontario.—According to the fire marshal's report for September, fire losses amounted to $677,867. The insurance loss was $480,629, and the loss not covered by insurance, $197,238. For the nine months the loss amounted to $7,383,538; insurance loss, $4,701,942, and loss not covered by insurance, $2,681,596.

Sharpton, Ont—November 22—Residence of Geo. W. Bell was destroyed. Cause unknown. Estimated loss on property and contents, $3,200. Insurance carried in Dominion Fire Co., $1,600.

Sudbury, Ont.—November 18—The Sudbury High School was damaged. Cause, overheated stovepipe setting fire to ceiling paper. Estimated damage to building, $50. Insurance carried, $3,000. Estimated damage to contents, nothing. Insurance, $1,000.

Canadian Railways and Railway Statistics

Analysis of Physical and Financial Condition of Roads as a Whole — Traffic has Increased in Density as Well as in Volume—Large Additions to Gross Revenue Eaten up by Expenses—Capital Liabilities Indicate Railway Expansion since 1900

By W. T. JACKMAN, M.A.

THE recent publication of the *Railway Statistics* of the Dominion of Canada for the year ended June 30, 1918, gives a favorable opportunity for a review of the condition and operations of our railways during the last two decades, and especially during the past ten or twelve years; and I trust that I may be pardoned if I use the comparative method in analysis, since it is only in this way that the tendencies may be fully exemplified. It must be borne in mind that we are not now speaking of the conditions appertaining to a single railway system, but that we are endeavoring to get a view of the railways as a whole, so that we may see the most important elements in the entire mechanism of rail transportation and may thus be enabled to understand the directions in which the present forces are tending. In some respects the statistics of a particular railway system show the lines of development better than do the statistics of the *tout ensemble*; but, on the other hand, the conditions upon any one system may be open to the objection that as a subject of study they are not typical of all lines and that, therefore, we cannot generalize from one special case and form conclusions which are applicable to all. It will be desirable, then, to consider the picture as a whole, with all special particulars eliminated, in order to be able to gauge the trend of the chief factors in railway operation and finance.

The physical factors, while deemed by many as subordinate, are nevertheless very important in the consideration of the economies of operation. As it is of moment to know the details about the country through which railways run and the nature of the traffic, so it is important to know the full facts regarding the rolling stock with which this business is carried on. This equipment is constantly wearing out and being replaced; old cars and engines are being removed from the field and new ones are substituted. How much is spent in the repairing of cars and locomotives; how many of these are discarded year by year and replaced by others—these and many other details concerning the equipment of the railways are not included in the government statistics; and when the latter are revised in the course of another year, it is to be hoped that such facts will be given to the public.

Freight Car Equipment

The capacity and the numbers of freight cars are worthy of consideration and for the purpose of comparison we give the following table of freight cars in service:—

	1907.	1909.	1911.	1913.	1915.	1917.	1918.
Box	68,149	74,477	79,412	128,511	145,307	145,290	150,156
Flat	20,477	21,188	21,069	25,177	25,290	25,322	23,540
Stock	4,817	5,518	5,809	6,745	7,553	7,883	8,556
Coal	10,358	11,721	13,768	14,746	15,703	15,649	16,949
Tank	132	197	277	479	560	731	485
Refrigerator..	1,917	2,466	2,807	3,911	4,713	5,234	5,893
Other	1,557	2,212	4,016	2,712	2,556	3,390	3,664
Totals ..	107,407	117,179	127,158	182,221	201,690	203,499	209,243

It will be noted that in each case there has been a constant increase in the numbers of cars employed. This is what we should naturally expect in the case of a developing country which is showing a healthy growth. It will be of interest to note also in this connection the proportionate increase of each kind of car in service; and when we compute the percentage increase of each variety during this twelve-year period, we find that the number of box cars increased by 120 per cent., flat cars 15 per cent., stock cars 78 per cent., coal cars 64 per cent., tank cars 267 per cent., refrigerator cars 207 per cent., and other cars 135 per cent. The relative rates of increase will indicate the relative demands for equipment; and from these we see that the greatest demand is for specialized equipment, like tank and refrigerator cars, and then for box cars for the movement of the crops. The importance of oil, gasoline, etc., for the rapidly increasing numbers of engines, motor trucks, automobiles, tractors, etc., as well as of the perishable foodstuffs in the national economy comes out with clear emphasis from these figures. Moreover, the fact that this specialized equipment is much more costly than the other kinds of rolling stock shows the increasing burdens which the railways have had to bear in furnishing the facilities required for these rapidly expanding kinds of traffic.

Average Capacity Has Increased

But it is not alone the increase in the *number* of cars which must be taken into consideration; the progressive advance in the *capacity* of the cars must also enter into our calculation. The following table will be found instructive:—

Capacity and Number of Freight Cars.

Capacity (lbs.)	1908.	1910.	1912.	1914.	1915.
10,000	771	393	77	.....	1

It is evident that there has been a steady progress in the use of larger and larger units; smaller cars are becoming fewer and larger cars becoming greater in number. Those which have a carrying capacity of 30,000 pounds or less are disappearing very rapidly from the field of active employment. They are too small to be economical; the tare is too great in proportion to the paying load which they can carry; and, moreover, the cost of construction of a 40,000-pound car is but little more than that of a 30,000-pound car, while the revenue from the car when fully loaded is much greater than that from the smaller car loaded with the same kind of freight. From every standpoint, therefore, there is economy in displacing the smaller by the larger cars. From the table it is clear that the standard car, of which those of the largest number, is not less than thirty tons. But even this does not tell the whole story, for in the eight years, from 1908 to 1915, there was an increase of 555 per cent. in the number of 40 ton cars and an increase of 150 per cent. in the number of 50 ton cars; in other words, the railways were increasing the numbers of their 40-ton cars by about 70 per cent. per year and of their 50-ton cars by about 20 per cent. per year. The greater and greater cost of this heavier equipment and the heavier engines to go along with it, together with the larger capital outlay rendered necessary along other lines, such as heavier rails, improvements in ties and ballasting, stronger bridges, etc., made serious inroads upon revenues which were, in the case of most companies, wholly inadequate to the maintenance of equipment at the highest point of efficiency. The use of these larger cars intended for heavy loading required their construction to be of steel rather than of iron or of wood; for by the employment of steel for construction the strength and the carrying capacity of the cars were increased more than in proportion to the increase of the tare. With the greater purchases of these cars, in the building of which higher priced materials and higher-wage labor entered, it is evident that the railways were incurring very heavy capital charges in order to keep up with the increased demands upon them. A peculiar situation will be noted in this table—namely, that above 40,000-pound cars the large purchases are concentrated on the even numbers, 60,000, 80,000 and 100,000, while relatively few purchases of the odd numbers are given. This seems to have been due to the fact that the amount of freight to be carried has increased enormously, and in order to provide the increased facilities there has not been a gradual increase by stages of 10,000 pounds each, but a series of abrupt increases of 20,000 pounds each. Statistics regarding the larger size of locomotives would be illuminating, but they are not yet available; having never been collected by the department.

Traffic is Becoming Denser

Another element to be considered in determining the economies of operation is the volume and density of the traffic. It would be natural in this country of such wide extent and diffused population that the density of the traffic should be low by comparison with that which would prevail in a country which was well settled and abundantly provided with ample traffic of all kinds. Yet the relation of the volume of business done by the railways to the revenues of the companies is direct and immediate. Very few people ever stop to think of the vital relation of these physical factors to the earning power of the properties, and yet even the best management cannot secure results apart from favorable conditions of traffic. But it is not the number of ton-miles alone (that is, the number of tons carried one mile), which is the expression of the total amount of business done, that tells the entire story of the extent to which the property is utilized. The important fact in railroad operation, the significant and vital question back of the earning power of a railway, and therefore back of its securities, is the intensive development of its operating capacity. In order to know this we shall have to find the traffic density, that is, the number of ton-miles per mile of line. It is the density figures which bring out very strongly the condition of this development; and when the figures for traffic density are examined in connection with those for gross revenue, for maintenance expenditures and for net revenue, they assume great importance. The more work (that is, ton-miles per mile of road) that can be obtained from a given mile of railway operated, as computed on the average, the more satisfactory is the income account likely to be.

In the United States, during the past decade or more, the great majority of the railroads show a steady increase in traffic density, which reflects concisely the greater and greater degree of utilization of the properties. The same situation is shown in the case of the Canadian railways. Of course, there has been wide diversity in this general trend, some properties showing density increases far in excess of others. But, if we would get a knowledge of this for all the lines of railway, in order to ascertain the progress for the country as a whole, we must take the average for those which are most advanced in this particular and those which are less advanced. By so doing, we may set down the traffic density, along with other features, of the Canadian railways in the following table:—

Year.	Train load.	Traffic density (tons hauled one mile per mile of line).	Average No. of loaded cars per freight train.	Average No. of tons per loaded car.	Average capacity of box cars in tons.	Percentage of utilization.
1907	260	518,486	16.92	15.37	28	55%
1908	278	564,378	16.04	17.33		
1909	278	545,991	16.37	16.98		
1910	311	635,321	18.15	17.13	29.1	58%
1911	305	631,829	18.03	16.91		
1912	325	731,775	18.19	17.87		
1913	342	785,820	18.00	19.01		
1914	363	716,859	18.40	19.18		
1915	344	496,355	18.05	18.43	33.2	55%
1916	411	753,202	19.65	20.91		
1917	436	807,948	19.59	22.24		
1918	457	798,093	19.77	23.09	34.1	67%

It will be seen that the traffic density in the last twelve years has increased by 54 per cent., or an average of 4½ per cent. per year. This clearly indicates that there has been a rapid increase in the intensity of employment of the railway facilities of the country. In this respect our railways stand about on a par with those lines in the United States, like the Atchison, Rock Island and Northern Pacific, which pass through the great farming section west of the Mississippi.

Average Train Load

Another factor in economical operation must be considered with reference to the train load, or the average number of tons per train. Under ordinary conditions of operation about one-third of all the expenditures are for fixed charges (returns on capital, rentals, taxes, etc.); and of the operating expenses about one-half are fairly constant and do not vary much with changes in the volume of business done. It would be natural, therefore, for the railways not only to endeavor to distribute its expenses over a larger and larger volume of traffic, thus making the unitary expense progressively lower, but also to reduce the entire burden of expenses by concentrating the work in larger and larger train loads.

The economies from the increasing of the train loads come from several sources which we need not stop to consider, but chiefly from the fact that the wages of the crews may be spread out over a larger amount of paying traffic, since the same number of men who can handle a train of sixteen cars can handle a train of thirty cars or more by the aid of the modern air brakes. It is inevitable, then, that the railways should seek ever larger loads of freight, so long as the weight of rail, the ballasted roadway, the strength of bridges, etc., will permit it. From our figures as to train load in the preceding table, we can calculate that, in the twelve-year period here considered, the average number of tons per train load increased by about 80 per cent., or about 7 per cent. per year. When we compare this with the increase in traffic density already shown the change in loading is all the more remarkable. In this respect the Canadian roads compare very favorably with those in the United States which are similarly situated with regard to traffic. Of course, in the case of the great wheat-carrying roads of the western provinces, the train load is much greater than that indicated by the average in this table, for it is not uncommon to have trains each carrying 1,500 to 2,000 and more tons of wheat. The extent to which this may go must be determined by the character of the roadway, the tractive power of locomotives, the terminal facilities and other similar factors. In the case of the Canadian Pacific Railway, for example, it has been found that after a certain point has been reached in augmenting the train load, it is better to increase the number rather than the loading of trains. It is for this reason that on this line we sometimes find a wheat train leaving Winnipeg for the elevators at Port Arthur and Fort William every fourteen minutes during some of the exceptionally busy days of the crop-moving season. The contrast between the average Canadian train load of 457 tons in 1918 and the best train loads of 78 to 80 tons on the Lon-

(Continued on page 18)

CHOOSING A GOVERNMENT LEADER

Matters Now Under Discussion at Ottawa Affect Parties as Well as Individuals—Decision on Fiscal Policy Must be Reached

(Special to *The Monetary Times*)

Ottawa, December 18th, 1919.

THE political world was turned into a turmoil this week by the news that Sir Robert Borden had decided to resign as Canadian prime minister. While a few of his intimate friends knew that his health was such that an early retirement was likely, yet the usual wiseacres at Ottawa were unprepared for the announcement. The facts are that the final decision was not taken until a week ago, after Sir Robert had visited Montreal and been thoroughly examined by a famous physician. His advice was so imperative that the prime minister must drop out of the turmoil of politics, if he was not to suffer a complete breakdown, that Sir Robert at once decided to resign, and so informed his colleagues.

Who Will Succeed?

That Sir Robert's retirement at the present juncture will set the political pot fairly seething is undoubted. There is no outstanding figure in the government or in parliament who can step into his shoes and with certainty hold the government supporters together and command the respect of the country. If Sir Thomas White had remained in the cabinet and had his old-time vigor he would without doubt be the choice; he may return in any case, although he has informed his closest friends he is out of politics for good. If ever there was a time for sane, steady leadership it is now.

There is a growing feeling that there will be an election. An election after all might clear the atmosphere. That the new farmers' and labor party would be a powerful element, if not the dominating factor in a new house is certain. There are many predictions that Hon. T. A. Crerar will be the next Prime Minister of Canada, and judging by the way the wind is blowing, this is no idle guess.

Tariff Issue Postponed

An announcement was made this week by Sir Henry Drayton that the general revision of the tariff had been postponed. The reasons advanced were that the general world-situation, economically and industrially, had not settled down or improved since the war, but if anything had grown worse. In view of this situation an immediate and hurried revision would be unwise. In the meantime statements in regard to need for tariff revision along various lines would be welcomed. This is only half the truth. The facts are that the change in finance ministers and the general political turmoil, combined with the Victory Loan campaign shoved consideration of the tariff and a tariff commission completely out of the minds of the cabinet. When the ministers did get down to the subject they found that there was no time to appoint a ministerial commission which should thoroughly inquire into the question in time for action this coming session. In view of this it was decided to postpone the whole problem. How the low-tariff elements of the Unionist party will take this announcement remains to be seen; it will give impetus to the cross-bench movement and will add to the troubles of the successor of Sir Robert Borden.

One thing is certain; if the Unionist party is long to survive, it will have to decide on some definite policy. At present no one knows what its fiscal policy is—as a matter of fact it has none—it is neither fish, flesh nor devil. If it is to have a future it would seem that it must be a protectionist party. The Liberals have already committed themselves to a platform little short of free trade, while the farmers are, of course, out and out free trade.

The government seems to have at last awakened to the possibilities of commercial air navigation. Under a bill passed last session an Air Board was created with power to make regulations and to control the new transportation system. The board was authorized to investigate means by which aerial transportation could be used to advantage in public undertakings.

UNION OF QUEBEC MUNICIPALITIES

Constitution of New Organization Has Many Innovations—Good Support Indicated by First Convention

(Special to *The Monetary Times.*)

Montreal, December 16, 1919.

THAT the province of Quebec, which was the birthplace of the Union of Canadian Municipalities, should be the only province (except Prince Edward Island) that did not possess a provincial union, seems strange. It is true that such a body was organized some years ago, but it died a natural death, for there was no one sufficiently interested in the work after Major Papineau went overseas, and so left the secretaryship vacant.

However, a small meeting of local mayors decided that such a union was necessary, and a provisional committee called a two-days' convention in Montreal, for Monday and Tuesday this week. The city authorities rose to the occasion, and not only allowed the use of the council chamber, but also invited all the delegates to attend a banquet on Monday evening. Evidently the psychological moment had arrived, for over 380 delegates registered, from some 220 of the varied municipalities that are found in the province.

Fees Based on Assessment

On Monday morning, the provisional committee discussed the constitution, which contains some very radical ideas, not found in that of any other provincial union. First, the fees are not based upon population, as elsewhere, but on the assessed value of the municipality, which is quite an innovation, and is claimed to be more equitable.

Then the constitution calls for a board of trustees, who shall not necessarily be municipal officials, but men of acknowledged standing, and these are elected for a term of years, so as to secure that permanence that has proved so necessary, because of its absence in other similar bodies. This, it is understood, means that incorporation will be sought.

The question of what the fees should be was argued at length, but it was finally decided to make the minimum $10, and the maximum, $200, so that even the smallest rural municipality might not find it too expensive to become a member.

An Information Bureau

Then a further, and very striking feature, is the creation of the executive committee into a body that shall be a source of information to the municipalities that become members. The committee will give, or secure, legal, engineering, financial, or other advice for its members, the aim being to save the small municipalities from heavy expenses, such as sending down lawyers to the legislature at Quebec, or being misled by unskilful engineers.

The election of officers resulted as follows:—

Patron, Hon. Walter Mitchell, Minister of Municipal Affairs; hon. president, Mayor Martin, M.L.C., Montreal; hon. first vice-president, Mayor Henri Lavigueur, Quebec; hon. second vice-president, Mayor White, K.C., Sherbrooke; hon. treasurer, C. A. Furse, Montreal; president, Mayor Joseph Beaubien, Outremont; first vice-president, Mayor Alexandre Thurber, Longueuil; second vice-president, Mayor P. T. Bouchard, Ste. Hyacinthe; third vice-president, Mayor P. W. McLagan, Westmount; secretary-treasurer, Mayor R. Prieur, Pointe-aux-Trembles.

Board of Directors—Mayor A. E. D'Artois, Farnham; Mayor Archambault, Hull; Ald. Brodeur, Montreal; Ald. Nault, Grand'Mere; Fred. Wright, Canadian Municipal Journal; Mayor Laroque, Ste. Zotique; Ald. Bedard, Quebec; Ald. Brunelle, Chambly; Mayor Paris, St. John, Deschaillons; Mayor Lefebvre, St. Philip; Mayor Raymond, Sixteen Island Lake; Ald. Verge, Quebec; Mayor A. B. Hunt, Bury; Ald. Jos. Rheault; Mayor L. Magnan, Plessisville.

On Tuesday afternoon Mr. Morin explained the working of the new Municipal Act, answering numerous questions. In the evening, Harry Bragg, of the Canadian Municipal Journal, gave a talk on "Housing and Slums." Dr. Nadean, Provincial Director of Housing, also gave a long address.

ROYAL BANK MAKES GOOD SHOWING

Over $[illegible]000,000 of assets are shown in the statement of the Royal Bank of Canada for the year ended November [illegible] 1919. The gain for the year was over $100,000,000. Liquid assets are $273,908,862, an increase of close to $50,000,000; the percentage of liquid to total assets is 55 per cent., compared with 56.6 per cent. for 1918 and 53.2 per cent. for 1917. Profits for the year were $3,423,264, compared with $2,8[illegible]846 in 1918, or equal to 21.74 per cent. on the average capital employed during the twelve months. This compares with 20.4 per cent. in 1918 and 18 per cent. in the preceding year.

The capital of the bank was increased by $3,000,000 during the year, an issue of $2,000,000 par value being made to shareholders at 150 early in the current calendar year, while a second additional issue was sold to the London County, Westminster and Parr's Bank, Ltd., with which the Royal formed a close working arrangement, in April last at a price of $200 per share. These increases brought the outstanding capital of the Canadian institution up to $17,000,000.

After all deductions, which included disbursements among shareholders during the year in the way of dividends and the anniversary bonus, amounting to $2,206,196, there remained a balance at the credit of profit and loss account of $1,096,418, or over twice the amount carried into the 1919 accounts from the previous year.

The balance sheet shows that total deposits are $419,121,399, which is $86,529,682 in excess of previous year, saving accounts contributing over $62,000,000 to the increase and demand deposits $24,000,000. Circulation showed a small increase over the 1918 figure, the total of $39,837,265 being less than half a million in excess of that of a year ago.

Current coin, Dominion notes and foreign currency on hand at the end of the year aggregated $55,681,547 as compared with $42,124,658 in 1918, the greater part of increase, presumably, being in United States currency and other foreign money, shown separately in the statement under review for the first time, these totalling over $11,300,009. Holdings of Federal and provincial government securities show an increase of nine millions, standing at $45,323,598, while other stocks and bonds, at $52,815,433, were higher by over eight millions. Call loans in Canada grew from $10,067,481 at the end of the 1918 period to $16,435,614 at the end of November last, while loans of a similar category outside the Dominion were higher by some 9½ millions, at $33,812,751. Current loans in Canada are given in the statement at the record total of $143,259,519.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks recently opened:—

Montreal, Que. (St. Lawrence and Craig Streets)	Royal Bank
St. Williams, Ont.	Sterling Bank of Canada
Birnie, Man.	Sterling Bank of Canada
Windsor, Ont.	Canadian Bank of Commerce
Winnipeg, Man. (Lilac and Corydon)	Merchants Bank of Canada
St. Boniface, Man. (Norwood)	Dominion Bank

It has been announced that the Bank of Nova Scotia will open a new branch on Front Street, at Sarnia, Ont., early in the new year.

Hugh B. Anderson, manager of the Bank of Nova Scotia at Edmonton, has been transferred to the Elgin Street branch, Ottawa.

Chas. Gordon, manager of the Dominion Bank at Brampton, Ont., has been transferred to the city of Toronto branch. J. G. Hall has been appointed to succeed him at Brampton.

W. J. Savage has been promoted to manager of the Canadian Bank of Commerce at Saskatoon, Sask. J. Cameron, of Gleichen, Alta., has been appointed manager of the Swift Current, Sask., branch.

BANQUE D'HOCHELAGA ASSETS GROW

Assets of the Banque d'Hochelaga, according to the financial statement for the year ended November 30, 1919, show an increase of $14,500,000, the total at the end of the bank's fiscal year being $71,517,806, compared with $56,985,995 in 1918 and $51,429,017 in the preceding statement. Profits for the year are shown at $611,105, against $595,187 a year ago and $565,433 in 1917, the twelve months' showing in this respect representing earnings at the rate of 15.27 per cent. on the paid-up capital of the bank, compared with 14.9 per cent. in 1918 and 14.1 per cent. two years ago. Deductions for the year were much the same as in the previous statement, the principal change being an increase of $20,000 in federal taxes, which amounted to $60,000 in the 1919 exhibit, compared with $40,000 a year ago. After all deductions, a balance of $76,064 was carried forward into the current year, against $62,959 in 1918 and $45,021 at the end of the previous year.

The balance sheet shows liquid assets of $33,907,261, a gain of $5,721,699 over a year ago, representing approximately 53.5 per cent. of liabilities to the public, compared with about 57 per cent. a year ago and 51 per cent. in 1917. In direct bearing to this position was an increase of almost $11,000,000 in total deposits, which grew from $39,588,808 in 1918 to $50,475,296 at the end of November last. Current loans at nearly $35,500,000 are higher by over $8,500,000 than the 1918 aggregate, indicating that the bank is playing its full share in the transition process now under way in the industrial and commercial fields of the province and elsewhere in the Dominion. Call loans are higher by almost three millions, being shown in the statement at $5,356,711. Circulation increased during the year by $677,884, with deposits in the central gold reserve $300,000 higher than in 1918 at $3,600,000.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended December 18, 1919, compared with the corresponding week last year:—

	Week ended Dec. 18, '19.	Week ended Dec. 19, '18.		Changes.
Montreal	$134,239,366	$138,706,888	—	$ 4,467,522
Toronto	112,749,437	76,129,013	+	36,620,424
Winnipeg	66,275,206	68,413,684	—	2,138,478
Vancouver	14,707,108	12,312,836	+	2,394,272
Ottawa	11,472,186	9,704,413	+	1,767,773
Calgary	8,659,600	7,378,182	+	1,281,418
Hamilton	7,391,834	5,351,662	+	2,040,172
Quebec	7,029,969	5,198,508	+	1,831,461
Edmonton	6,369,755	3,868,404	+	2,501,351
Halifax	5,230,592	4,745,902	+	484,690
London	3,793,167	2,749,412	+	1,043,755
Regina	4,525,450	4,548,932	—	23,482
St. John	3,437,561	2,546,268	+	891,293
Victoria	3,048,032	2,001,892	+	1,046,140
Saskatoon	2,261,575	2,133,310	+	128,265
Moose Jaw	1,778,669	2,332,796	—	554,127
Brantford	1,490,899	965,571	+	525,328
Brandon	1,027,328	768,833	+	258,495
Fort William	1,218,021	971,161	+	246,860
Lethbridge	826,620	1,083,166	—	256,546
Medicine Hat	655,169	511,673	+	143,496
New Westminster	537,053	538,188	—	1,135
Peterboro	899,427	883,078	+	16,349
Sherbrooke	1,390,009	1,085,841	+	304,168
Kitchener	1,159,917	842,919	+	316,998
Windsor	2,948,667	1,251,431	+	1,697,176
Prince Albert	558,627	356,455	+	202,172
Totals	$405,681,184	$357,380,418	+	$48,300,766

Reports from London, Eng., state that an amalgamation of the Norwich Union Fire Insurance Society with the Phoenix Assurance Co. has been arranged. It is understood that the business of each will be carried on separately.

LICENSE FEES OF INSURANCE AGENTS

EFFORTS are being made to have the license fee for insurance agents increased in Ontario. The present fee is $3 per annum for all branches of insurance and it is understood that in some quarters a fee as high as $100 is favored. This subject was discussed at a meeting of the Life Underwriters' Association of Toronto, December 18th, and while no unanimous opinion was expressed the general sentiment was that a very high fee would prevent newcomers entering the business and would also be an undue tax upon the earnings of the agents. E. W. Pratt, president, was in the chair.

John A. Tory, manager of the Sun Life for western Ontario, outlined the growth of the present system of licensing. Some of the provinces, he said, had had no license system until a few years ago. When a new Dominion Insurance Act was being prepared about ten years ago, a committee of insurance men requested that the Dominion issue licenses which would be valid in any province in which the agent's company was authorized to do business. The government took the stand, however, that the division of legislative powers under the B.N.A. Act made this impossible. Parliament, therefore, did not include it in the Act. The main thing which had been considered in adopting licenses, he said, was additional revenue for the provinces, whereas the important consideration, if licensing were adopted at all, should be the protection of the public and of the agent. The issue of license should mean that a man is qualified for the work; this would give the agent something in return for his money. "When the provinces tax the companies and policyholders as they had now," said Mr. Tory, "they have no right to tax the agents also unless value is given in return to the public and to the agents."

When asked as to his opinion regarding the proposed increase, he said he was strongly opposed to it, considering that it was not only unfair, but also practically impossible in the case of industrial insurance. In the discussion which followed, one agency manager stated that he would leave the business if such a change were adopted, as the difficulties in the organization of an agency force would be greatly increased. It was finally decided that a committee of three be appointed to frame a resolution, to emphasize the fact that the association was not responsible for the agitation for increased fees; to go on record as being in favor of discrimination in the issue of licenses; and to take a stand on the question of how much the fee should be. This resolution will be presented at an early meeting of the association.

The administration of the insurance department of the provincial government also came in for discussion, and the association is planning to urge the appointment of a man of high standing and of wide experience in the insurance world, as superintendent, when the time comes for such an appointment to be made. Some criticism of insurance administration in several provinces was also made, because no discrimination is exercised as between honest and unprincipled agents. At the same time the members are not desirous of creating a monopolistic profession; agency managers especially are in favour of as much freedom as is consistent with the maintenance of a high standard in agency work.

SASKATCHEWAN ARREARS OF TAXES ACT

LEGISLATION will, it is expected, be brought down during the present session of the Saskatchewan assembly to amend the Arrears of Taxes Act to simplify the procedure to be followed by the cities in securing title to property bought in by the municipalities at the tax sales and which has not been redeemed. Under the Act as it now stands the onus is upon the applicant municipality to furnish proof that the property for which title is sought is not owned by a soldier and that no soldier is interested in the property. The cities have found it difficult if not impossible in many cases to furnish this proof and as a result applications have had to be suspended. Conferences have been held with the minister by representatives of cities and of the soldiers and as a result a mutual agreement has been reached which, while protecting the interests of the soldiers, will facilitate the cities in making application for title under the provisions of the Act.

PARTICIPATION IN INDUSTRIAL CONTROL

INDUSTRIAL disputes of the past year have demonstrated that the exclusive control of industry by capital cannot be maintained. So long as labor has no voice in this control or no responsibility for the success of business ventures it will continue to demand higher returns irrespective of the effects upon the general public. Professor R. M. MacIver, of the University of Toronto, in a recent book entitled, "Labor in the Changing World," takes the view that economic revolution is the only alternative to voluntary concessions of this kind. Such a change would be a radical one, but there would be nothing extraordinary in the employees of an industrial concern being represented on, say, its directorate. The important thing is that it should be brought about gradually, so that the necessity of a return upon capital, commensurate with the risks and with the prevailing interest rates, be fully appreciated.

Views of this kind were also expressed by prominent speakers at the international labor conference at Washington, and they were not all on the labor side. In an address before the Canadian legislative board of the Brotherhood of Locomotive Firemen and Engineers, at Ottawa, on December 8th, Sir Robert Borden intimated that the representation of employees of the Canadian National Railways on the board of management was a possibility. After referring to methods of settling international difficulties, he said:—

"In any country, but especially in a country of vast area and scattered communities, the problem of transportation is all-important. The efficiency of transportation in Canada is an essential factor in the national life. Railways, waterways and highways all have their part. From conditions which have gradually developed during many years has arisen the result that about one-half the total railway mileage of Canada is, or shortly will be, in the ownership of the state. You must realize, and I hope you will agree, that this condition emphasizes the importance of devising some means by which this great essential and national activity shall not be interrupted or prejudiced by disputes between employers and employed. Even as between a private corporation operating a great public utility and its employees there should be more reasonable methods than the imposition upon the general public of the inconvenience, the loss and the suffering which are occasioned by strikes. If, between jealous and sometimes antagonistic nations, the principle of settling international disputes by peaceful methods has been acknowledged and adopted, surely disputes between employers and employed can be investigated and adjusted by means other than those which may bring upon the whole people distress and suffering comparable to that entailed by war. So far as railways in the ownership of the state are concerned, there is one additional consideration of which you should not lose sight. Those responsible for the administration of state railways are not actuated or influenced therein by any motive of private interest. Their duty is on the one hand to the public whom they serve, and on the other hand to the employees, who also serve the same public. So that in this instance employers and employed alike serve the people as a whole.

"I commend to your most thoughtful consideration the results which have been obtained in this country by the establishing of the tribunal known as the Board of Adjustment No. 1 in connection with the Canadian Railway War Board. The board has given decisions in 52 cases, as well as six supplementary cases, or in all 58 disputes which have thus been settled without resort to strike. In addition about a dozen potential disputes have been adjusted through the good offices of the board without the necessity of a formal hearing. Disputes have also been adjusted for organizations which were not parties to the agreement. It is open to any class of railway or transportation employees to present a case to the board provided they agree to be bound by its decision.

"Is there not in this record food for the most careful reflection and consideration as to the future determination of disputes between organizations of railway employees and those responsible for the administration of the railways? In other countries there have recently been legislative proposals for the prohibition of strikes. It would not be my purpose to have the question approached in that way. The members of the railway organizations are cousins of this country, interested like others in its development, its progress and its orderly government. Any movement to make permanent and still more efficient the methods which have had such good results during the past eighteen months might well originate with them. This obligation is imposed and this responsibility is created not only by the power and influence of the organizations in question, but by the duty which their members owe to the state as good citizens. On our part we must not be unmindful of corresponding obligations. The problem of administering about 22,000 miles of railways in this country is one of exceptional moment and difficulty. Upon its successful solution probably depends the success of state ownership not only in Canada. but upon the whole North American continent. We must give earnest attention to some means by which the employees shall have just representation in the executive administration of this great system. I have given to this question some study in the consideration of the problem as a whole, and you may be assured that such appeal will command my entire sympathy."

THE FADING CANADIAN DOLLAR

EXCHANGE on Canada has now fallen in New York to the remarkably low figure of around ninety cents per dollar, and the effects of this change will probably be seen in trade returns for the present month. Our exports to the United States are increasing, and our imports from that country are decreasing. For the twelve months ended September 30th, 1919, the exports were $433,337,935, compared with $420,865,838 for the preceding twelve months. The corresponding import figures were $701,087,586 and $739,463,574, respectively, showing a substantial reduction.

The present exchange situation gives about ten per cent. additional protection to Canadian-made goods in Canada, and a preference of about ten per cent. over domestic products in the United States. In other words, it encourages the purchase of Canadian-made goods in both countries. It is as effective as the customs duty, but its field of operation is wider, for it applies to financial as well as commercial transactions. For instance, it encourages the investment of United States capital in Canada, and investors here are tempted to dispose of securities which have a ready market across the border, just as British investors have sold large quantities of securities payable in Canada.

Many of the commodities which we have been freely buying in the United States are luxuries, such as motor cars, musical instruments and some kinds of clothing. Coal, on the other hand, must still be imported in large quantities, and the premium on New York funds must increase the price of coal here, even if the settlement of the miners' strike does not do so. The difficulty is that so many of these comforts and luxuries have, in the wave of prosperity which has been experienced, come to be regarded as necessaries, that efforts will no doubt be made to have them included in the "cost of living."

The remedy is a drastic one, but it appears to be the natural method for reducing expenditures to purchasing power, with countries which have used paper credit too freely. Canada's position is relatively good, as compared with that of European countries. The financial strength of the United States is, in fact, making it increasingly difficult for that country to maintain its exports, which already show a falling off. The slackening of the demands upon American industries will doubtless be followed by a fall in prices, as already indicated by successive breaks of the stock exchanges. Canada's industrial life is so closely related to that of the United States that such an exchange situation can be only temporary and trade adjustments coupled with further investments in this country should soon reduce the heavy discount now prevailing.

PARIS

The Heart of Brave France

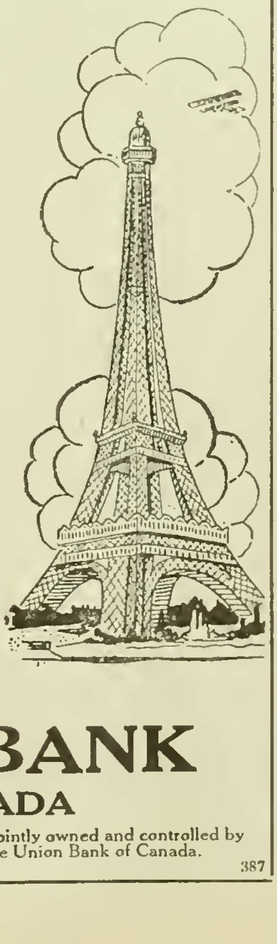
JUST as London is the heart of the British Empire, so is Paris the heart of loyal France.

Just as Paris is the centre of art, music, science and government of the French nation, so it is also the centre of French finance and commerce.

Canadians who wish to enlarge their trade relations with the French people will find it distinctly advantageous to be in intimate touch with the heart of France through the Paris Branch of the Park-Union Foreign Banking Corporation.

Viscount de Breteuil is Chairman of the Advisory Board in Paris, and the Branch under the management of M. Carrere, formerly manager for the Far East of the Russo-Asiatique Bank.

Officers at all our 380 Canadian branches will be glad to advise with Canadian importers and exporters doing business with French houses.



UNION BANK OF CANADA

Park-Union Foreign Banking Corporation jointly owned and controlled by National Park Bank of New York and the Union Bank of Canada.

387

Real Banking Service

All branches of this Bank are in a position to give the most comprehensive Banking service.

Government and Municipal Securities are dealt in. Foreign Exchange bought and sold.

Money Orders and Letters of Credit issued. Collections made on all points in Canada or overseas.

IMPERIAL BANK OF CANADA

180 BRANCHES IN CANADA

Agents in Great Britain:—England — Lloyds Bank, Limited, London, and Branches. Scotland — The Commercial Bank of Scotland, Limited, Edinburgh, and Branches. Ireland — Bank of Ireland, Dublin, and Branches.
Agents in France:—Credit Lyonnais, Lloyds and National Provincial Foreign Bank, Limited.

203

PERSONAL NOTES

Mr. John Baillie, of Montreal, has been elected to the directorate of the Dominion Glass Company.

Mr. Percy B. Wilson, vice-president of the Spanish River Pulp and Paper Mills, Limited, has returned to Canada from his trip to Europe.

Mr. E. E. Campbell who was recently manager of the Imperial Canadian Trust Company and the Great West Permanent Loan Company branches at Calgary, Alta., is now associated with the Canada National Fire Insurance Company as manager at Vancouver, B.C.

Mr. W. P. Hughes, who for the past three years has been secretary of the Montreal branch of the Canadian Manufacturers' Association, has resigned to enter business on his own account as an importer and exporter. He will be succeeded by Mr. R. W. Gould, who has been engaged in newspaper work in Montreal for some time.

Mr Colin E. Sword has been appointed Canadian manager of the Law Union and Rock Insurance Company, Limited, to succeed Mr. J. E. E. Dickson, who has retired. Mr. Sword has been connected with the London and Lancashire Fire Insurance Company, Limited, for the past twenty-four years and is now manager of the Montreal branch, which position he will retain in conjunction with his new duties. Pending completion of other arrangements the business of the two offices will be conducted at their respective locations, No. 277 Beaver Hall Hill, and No. 164 St. James Street, Montreal.

Mr. D. H. McDougall, president of the Nova Scotia Steel and Coal Company, has returned to Canada after having spent several weeks in Europe in the interests of the company. Mr. McDougall was accompanied on his trip abroad by Mr. W. D. Ross, vice-president, and Mr. Thos. Cantley, chairman of the board of directors. He stated that the results of their visit to Europe from the standpoint of future business for the company, were very satisfactory. The prospects of export trade especially in heavy forgings, axles and other finished products of the New Glasgow plants were very encouraging, the company having formed most valuable connections in the British Isles and on the continent.

OBITUARY

Mr. L. H. Gaudry, president of the L. H. Gaudry Company, and director and promoter of a number of important industries in Quebec, died unexpectedly in that city last week.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first two weeks of December:—

Canadian Pacific Railway.

	1919.	1918.	Inc. or dec.
December 7	$3,797,000	$3,480,000	+ $ 317,000
December 14	3,935,000	3,780,000	+ 155,000

Grand Trunk Railway.

	1919.	1918.	Inc. or dec.
December 7	$1,294,019	$1,379,502	— $ 85,483
December 14	1,341,590	1,385,902	— 44,312

Canadian National Railways.

	1919.	1918.	Inc. or dec.
December 7	$2,070,372	$1,714,173	+ $ 356,199
December 14	1,918,932	1,800,902	+ 118,030

At the regular meeting of the board of directors of the National Trust Co., held on December 3, the quarterly dividend at the rate of 10 per cent. per annum was declared.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	7½ pm	8⅝ pm	....
Mont. funds	par	par	⅛ to ¼
Sterling—			
Demand	$4.08	$4.17	....
Cable transfers	4.09	4.18	....

Rate in New York sterling, demand, $3.81 to $3.86; high, $3.91.

QUEBEC PROVINCE SURPLUS

In the Quebec legislature on December 17, Hon. Walter Mitchell, provincial treasurer, presented the financial statement for the year ended June 30, 1919. A surplus of $393,676 is shown. Mr. Mitchell gave a statement of the direct liabilities and available assets of the province of Quebec at June 30, 1919. He showed that the liabilities formed a total of $43,965,512, while the assets aggregated $10,930,221, leaving the excess of liabilities over assets at June 30, 1919, at $33,035,290. The net balance of the funded debt of the province was $37,716,286. The net balance of the funded debt on June 30, 1919, was $299,367 less than the net balance of the funded debt of June 30, 1918. This decrease was accounted for by the redemption of $165,856 of bonds of the loan of 1880, and $178,211 invested on account of sinking fund, less $41,300 debentures issued under the authority of the Act 8, George V, Chap. 7, and $3,400 debentures issued under the authority of Act 6, George V, Chap. 2.

On June 30, 1919, the unfunded debt, consisting of temporary loan, trust deposits, outstanding warrants, etc., amounted to $4,167,298, but against this the government had at the same date in the form of cash claims against individuals and corporations for advances, Quebec's share ($1,169,009) of the common school funds, etc., a total of $8,848,295, leaving a surplus of assets over the unfunded debt of $4,680,996.

Dealing with the current year the provincial treasurer stated that the receipts from ordinary revenue for the five months ended on November 30, 1919, were very satisfactory.

SASKATCHEWAN SEED GRAIN LOANS

As already stated in these columns, the Saskatchewan government's plan for the assistance of farmers whose crops failed this year, is that advances for seed grain should again be made by the loan companies, as was done last year. The new bill, which was given its second reading on December 11th, also provides that where the security is regarded as inadequate, the government may guarantee the loan. The amount of the advance, whether guaranteed or not, is added to the loan already made by the company, which is also permitted to attach a lien against the ensuing crop, for the recovery of these advances.

Messrs. Fox and Morris, Board of Trade Building, Montreal, have been appointed chief agents for Montreal of the British General Insurance Co., of London, now about entering Canada under the management of Mr. T. F. Dobbin.

The Canadian Bank of Commerce has declared a cash bonus to the staff of 10 per cent. to those receiving salaries up to $5,000 per annum and 5 per cent. to those receiving salaries upwards of $5,000, with a minimum of $500. In addition, a general increase in salaries has been granted on an approximate scale of 10 per cent., exclusive of the highest salaried officers.

VIEWS REQUESTED ON CANADIAN TARIFF

Finance Minister Carrying out Intimation of Sir Thomas White, Asks for Written Suggestions First

INDICATION that the government intends to carry out an investigation of the Canadian tariff, as suggested by Sir Thomas White in his budget speech last June, is contained in a request issued on December 14, by Sir Henry Drayton, for written suggestions. In order that the national revenue may not be overlooked, proposals are to be accompanied by methods for raising the money lost by any reductions suggested. The statement says:—

"Since the signing of the armistice, a little over a year ago the government and parliament have been devoting attention to peace and reconstruction problems. Among the many questions that have received consideration is that relating to a general revision of the tariff. Dealing with this subject, my predecessor, Sir Thomas White, in the last budget speech is reported in Hansard, June 5 last, as follows:—

Sir Thomas White's Intimation

"'It would not be practicable at this time to make a sound general revision of the tariff. International trade is most unsettled, still hampered by war restrictions and prohibitions and by exchange conditions, which are, and may long continue to be, subject to violent fluctuations. Prices are unstable, and labor conditions, internationally speaking, most uncertain. Until peace is restored and the world is upon a more stable basis with respect to capital, labor, prices, markets and exchange. the tariff cannot be revised intelligently.

"'It is my hope that within a year conditions will have become so stabilized as to permit of a general revision of the tariff, which is long, but, owing to the war, unavoidably overdue. Preceding such revision, there should be a thorough inquiry conducted by the minister of finance and two or more of his colleagues representing the different geographical sections of Canada. Such inquiry should afford all interests, agricultural, industrial, fishing, lumbering, mining, commercial and financial, producers and consumers alike, an opportunity of expressing their views and opinions and urging their particular needs and requirements. The result of such inquiry should be a body of information which will enable the government to effect a general revision of the tariff, fair to all parts of the community, and effectually promoting the national welfare of Canada. This inquiry should proceed with its work just as soon as conditions are sufficiently stabilized to permit. My own view is that it might well be commenced about autumn of this year.'

Business Not Yet Normal

"Unfortunately, international and economic conditions are not only far from normal, but in many respects are worse than they were six months ago, or at any time during the entire war period. International exchanges in particular are not only unstable, but erratic. Tariff considerations of necessity have largely to be based on international and economic conditions, and the result is that the different countries of the world are still refraining from any general tariff rearrangement, waiting until some appreciation may be possible of the future conditions under which their tariffs will operate. Inasmuch, however, as any general tariff revision must be based upon as complete a knowledge as possible of the conditions and relations one to another of our various national industries and productive agencies, and as it is also desirable to obtain the views of as many persons as possible whose practical knowledge and experience would be most valuable, it is considered advisable to begin the collection of information relative thereto.

"In order to obtain proper results from public hearing, and in order to give all those interested the best opportunity of presenting their cases, it has been decided that the inquiry shall be started by written statements, which should cover each particular issue as each interested claimant for relief sees it. These statements ought to show the particular complaint in each instance, a full statement of the grounds on which that complaint is based, the remedy proposed, and a statement of the grounds leading to the conclusion that such remedy proposed is effective. The issue is really, of course, not merely not a tariff issue from the standpoint of protection or otherwise, but is also a revenue issue, and in like manner, the submissions of those desiring reductions in tariff should at the same time show methods by which compensating revenues can be obtained. The preparation of these statements will necessarily require much careful consideration. Those desiring to make representations as to the problems involved, are therefore asked to undertake the preparation of the same without delay and forward their statements, addressed to the Minister of Finance at Ottawa. Upon receipt of the statements they will be systematically analysed and classified for the purpose of making them a basis of the general public inquiry to be held throughout the country as indicated by Sir Thomas White."

LARGE GOLD SHIPMENT TO STATES

The Dominion government is shipping $20,000,000 in gold to New York, according to an announcement made on December 12th by the finance minister. In connection with this shipment, Sir Henry Drayton said:—

"The depreciation in Canadian currency in New York is entirely owing to the unfavorable balance of trade between the two countries. There always has been an unfavorable balance because we have been heavier buyers on the American market than sellers. Formerly Canada had sold the bulk of its products overseas and settlement was made in dollars cash. This not only wiped out the adverse balance with the United States, but in certain times brought the Canadian dollar to a premium in New York. The situation is now entirely different. The overseas buyers are unable to make settlement in cash and must resort to national credits. Canada has not now the benefit of concurrent cash remittances, which in normal times maintained a proper rate of exchange. In other words, we must pay cash for what we buy and take credit for what we sell, and the people are continuing to make heavy purchases from the United States.

"A whole lot has been said about inflation. There has been inflation everywhere, but probably less in Canada than anywhere else. Canadian currency is in a very, very satisfactory condition. We hold gold covering 47 per cent. of the eight note issues of the banks and of Dominion note issues. That this is a satisfactory condition of affairs is indicated from the fact that the gold reserve called for by the Federal reserve system of New York is only 40 per cent."

PLATE GLASS PRICE STILL HIGHER

Dealers have announced a further increase, averaging 66⅔ per cent., in the price of plate glass. This follows an advance of over 40 per cent. since November 1st, 1918. Labor charges for setting have also greatly increased. These advances are hard on the companies writing plate glass insurance, as the contracts provide for indemnities at the market value. Premiums are already recognized as being inadequate.

FINANCING MINING DEVELOPMENT

A meeting of the Manitoba branch of the Canadian Mining Institute in Winnipeg a few days ago was addressed by J. A. Campbell. Referring to developments in the northern part of the province, Mr. Campbell said that most of the capital came from the United States. He also referred to frequent criticisms of stock flotations, and expressed the opinion that careful judgment on the part of the investor, and protection, such as that afforded by the Manitoba "blue sky" law, were adequate.

CUBAN-CANADIAN SUGAR SECURITIES

[illegible] are now available of the Canadian enterprise [illegible] incorporated, was planning to operate and develop a [illegible] Cuban sugar plantation. The name chosen for the new company is the Cuban Canadian Sugar Co., in connection with which the Royal Securities Corporation announces an issue of $4,000,000 of 8 per cent. cumulative preferred stock, with a common stock issue of $5,000,000.

The new company is taking over an established plant and sugar mill. The price of Cuban raw sugar has risen from two cents before the war to over eight cents, and may go higher. On a conservative basis the profits of the Cuban Canadian Sugar Co. for the fiscal year ending September 30, 1920, are estimated at $1,127,000, which would pay the preferred dividends nearly four times over. The production of the company has tripled in the last four years, and since the grinding of last year's crop large sums have been expended to increase the company's output and lower the costs of production. With the world shortage not likely to be relieved for several years to come the company is now in a position to take full advantage of favorable conditions.

More than $3,000,000 of the $4,000,000 of preferred shares have already been placed privately with clients of the Royal Securities Corporation. A public issue is to be made about the first of the year and it is understood that a substantial bonus of common shares will be one of the features of the offering.

IMPERIAL TRUSTS MAY BE ACQUIRED

Shareholders of the Colonial Investment and Loan Co., Toronto, are in receipt of a circular from the management, stating that an opportunity has arisen to acquire the stock of the Imperial Trusts Co., the head office of which is also in Toronto at $150 per share. A special general meeting of the shareholders of the Colonial Investment will be held in Toronto on December 30, to consider the proposal, and, if thought advisable, to confirm a by-law passed by the directors providing for the purchase of such stock.

The Imperial Trusts Co. was established in 1887, being the first trusts company in Canada incorporated by special act of the Dominion parliament. The authorized capital is $500,000 and the subscribed capital $400,000, upon which $205,526 has been paid up. The reserve is $50,000. Dividends of from 2½ to 6 per cent. have been paid since 1905, and in 1913 a special payment of 100 per cent. of paid-up capital was made. There are 4,000 shares, which will be fully paid up by the time of transfer. Regarding the distribution of the shares the circular says:—

"Three directors of the Colonial Investment and Loan Co., who are also directors of the Imperial Trusts Co. of Canada hold stock in the Imperial Trusts Co. of Canada, respectively, as follows: Arthur J. Jackson, 1,679 shares; Brig.-Gen J. H. Mitchell, D.S.O., 1,799 shares; A. C. McMaster, 187 shares, in all more than three-quarters of the issued capital stock of the Imperial Trusts Co. of Canada. The Trusts Co. own a large amount of permanent preference stock of the Colonial Investment and Loan Co., which it is desirable that they should part with, when the control passes to this company, and the said holders of the majority shares in the Trusts Co. have agreed concurrently with the sale and transfer of their shares to purchase from the Trusts Co. for their individual account at the value of same as they stand on the books of the Trusts Co. all its Colonial shares, paying for same, either with trustees' securities or cash."

A financial statement of the Imperial Trusts Co. shows capital assets of $263,232, made up principally of office premises, $85,093; stocks and shares, $45,903; agreement of sale, $98,000; cash on hand and in bank, $20,202. Guaranteed accounts total $1,172,685, under which heading the principal item is stocks, debentures and war bonds totalling $1,037,549. The estates, trusts and agencies under administration total $3,365,146.

CANADIAN MANUFACTURERS' MEMBERSHIP

A membership campaign, held by the Canadian Manufacturers' Association commencing December 1st, and still being carried on in some cities, has resulted in 357 new members. Ontario and Quebec are each credited with over 130 applications.

CANADIAN SURETY CO. INCREASES CAPITAL

At a meeting of the directors of the Canadian Surety Co., held in Toronto on December 17, the regular quarterly dividend of 1¾ per cent. was declared, and the paid-up capital stock of the company increased from $225,000 to $250,000. A bonus equal to 10 per cent. of the salary received during the year by each officer and employee of the company at Toronto and branch offices, Montreal and Winnipeg, was voted because of the prevailing high cost of living and in recognition of the efficient manner in which the largely increased volume of business during 1919 has been conducted.

PACIFIC COAST COLLIERIES BONDS OFFERED

An offering of $200,000 6 per cent. 20-year prior lien first mortgage and collateral trust gold bonds of the Pacific Coast Collieries, Ltd., is being made by L. C. Herdman and Co., Montreal, at 87½ and interest, with a bonus of 25 per cent., common stock. The bonds are part of a total authorization of $1,500,000, and are first charge of all the assets of Collieries Company. Proceeds of the issue will be used to increase the company's output to approximately 2,500 tons per day.

The company controls 9,000 acres of coal lands and leases on the Island of Vancouver, B.C., which are estimated to contain over 75,000,000 tons of high-grade bituminous coal, which even at 10 cents per ton in the ground gives a total of $7,500,000. The company's plant and equipment has an appraised value of $1,225,000.

CANADIAN FIRE UNDERWRITERS' ASSOCIATION

The semiannual meeting of the Canadian Fire Underwriters' Association was held on the 9th and 10th inst., at Ottawa, and was attended by a large number of insurance men from Montreal, Toronto and New York. A good number of matters brought before the meeting were discussed, and in many cases referred to committees for further attention.

Owing to the retirement of J. E. E. Dickson, manager of the Law, Union and Rock Insurance Co., from the insurance business, he tendered his resignation as vice-president, and the vacancy was filled by the appointment of John Jenkins, Canadian fire manager of the Employers' Liability. Maurice Ferrand, Canadian manager of the Union Insurance Co. of Paris, was elected a member of the executive. Mr. Ferrand was for three years acting in various capacities for the French government in connection with the war, and has recently returned to Canada.

An informal dinner was held on the evening of the first day, presided over by the president of the association, John B. Laidlaw, the guest of honor being G. D. Finlayson, Dominion superintendent of insurance.

"The effect of the war on European neutrals" is the title of a booklet just issued by the Guaranty Trust Co. The effects have been varied, it is pointed out, depending upon the nature of a country's industries and trade.

David S. Kerr, C.A. (Scot.), C.A. (Can.), and Gordon S. J. Payne, C.A., announce that they have formed a partnership and will conduct business under the name and style of Kerr, Payne and Co., chartered accountants, at 232 St. James Street, Commercial Union Building, Montreal.

CANADIAN RAILWAYS AND RAILWAY STATISTICS

(Continued from page 6)

don and North Western Railway in England is surely instructive. With the increased loading of trains there must necessarily be increased power of the engines employed; but as our railway statistics give no information along this line we must be content with merely drawing attention to the fact, without showing the relation of one to the other.

Utilization of Cars

One phase of the problem of economy of operation which can be studied to some extent from the statistics, is that of the extent to which the car capacity is utilized. This is one which has been receiving increasing attention in recent years, particularly during the war, by the officials of the roads. Efforts have been put forth in every direction to load full cars wherever possible, not only because of the greater service which the lines can perform by this means, but also because of the greater revenues of the companies due to more economical employment of the facilities. There is always the pressure on the part of the shippers of goods for increased speed in the movement of their shipments, and this militates against the full loading of the cars, for, in order to secure the latter, delay, sometimes of many days, must occur in order that goods of similar kinds or destined to the same place may be given by shippers in such quantities as to make possible the loading of cars to full capacity. With the railway management it is a nice problem of adjustment, to favor the shippers by sending their shipments as soon as possible after they are received, while endeavoring to load the cars to fullest degree possible under the conditions.

Importance of Utilization

The fact that the railways are not able to use all their space or weight capacity does not arise from the volition of the management but from the demand on the part of the business public for the best service which the lines can render. Yet the degree to which all car space is utilized frequently makes the difference between profit and loss on the part of the company. In the case of roads which run through a well-settled and densely populated country, with an abundance of heavy freight, it is much easier to accomplish the full loading of cars; but in a country like this, with a sparse population and usually comparatively light shipments of a great variety of commodities, to be transported sometimes very short and sometimes very long distances, it is inevitable that much car space should be empty in every train. Referring now to the foregoing table, if we divide the train load (column 1) by the average number of loaded cars per freight train (column 3) we shall get the average number of tons per loaded freight car (column 4); and by comparison of this average load per car with the average capacity of the cars when loaded (column 5), we shall get the proportion of the car space which is actually used in the work of transporting freight (column 6). I have made this comparison for several years, as shown in the table, using the box cars as the basis of computation, since these constitute two-thirds to three-fourths of the number of freight cars actually in use, and they furnish the means for the transportation of the great majority of the tonnage. From the figures shown it is clear that the cars are not loaded to more than one-half to two-thirds of their capacity. But when we take into our computation *all* the different kinds of cars in use, we are compelled to realize that in the everyday conduct of their business the railway companies are utilizing their cars to not more than forty or forty-two per cent. of their capacity. To the public, who know very little in regard to railway operation and who are constantly clamoring for reduced rates, this may appear incredible; but it is an actual fact that ordinarily about three-fifths of the car space goes empty. This, taken in conjunction with the further fact that expenses of conveying a car one-third to two-fifths full are almost as great as for the same car fully loaded, will indicate some of the difficulties which the railways encounter in making ends meet and leaving a balance of profits.

Operating Expenses

In the subdivision of the operating expenses of railways there are five chief sections—namely, maintenance of way and structures, maintenance of equipment, conducting transportation, traffic expenses (such as superintendence, advertising and other expenses directly incurred in securing business) and general expenses (such as office salaries and expenses, general supplies, law expenses, etc.). But in the year 1916 a slight change was made in this classification by dividing the third into two divisions, transportation by rail and transportation by water, and by separating a special class called "miscellaneous operations" from the general expenses. The slight change which this made in the scheme of operating expenses is inappreciable, so far as the statistics are concerned, as will be seen in the table at the foot of this page.

From a comparison of these figures over a series of years—we have taken a ten-year period as a sufficient length of time—we see that there is a wonderful similarity year by year. In general, we may say that, of the total operating expenses, 20 per cent. go for maintenance of way and structures, 20 per cent. for maintenance of equipment, over 50 per cent. for conducting transportation (that is, expenses for the actual movement of traffic), 3½ per cent. to 4 per cent. for traffic expenses, and 3½ per cent. to 4 per cent. for general expenses. It seems remarkable that, in the case of the country's railway system as a whole, there should be such a uniformity as this in the distribution of expenditures for operation; and what we have said as to the railways of this country applies in the same way and to the same extent to the railways of the United States. There is the same allocation of these expenses among the five great subdivisions. We may also say that under ordinary conditions any *one* of the great railway systems will show the percentages which we have noted above for the various classes of expenditure. This is the more significant when we remember that under the circumstances of prosperity or adversity the railways are the first to realize the change.

Some Reducible Expenses

But although the above proportions hold for the operating expenses as a whole for any one year or for a series of years, yet there is still left a wide field for the exercise of the discretion of the operating officials. When years of misfortune come and the traffic offered to the railways is much reduced, so that revenues are correspondingly reduced, the tendency is to reduce for those years some of the operating expenses, and those which lend themselves most easily to reduction are the first two divisions. Certain expenses, such as those for renewal of ties, reballasting, renewal of rails, repairs of rolling stock and repairs of buildings, may be in part postponed until revenues become greater; and, consequently, we notice the alternations of good and bad times, of abundant and meagre traffic, in the statistics of the expenditures for maintenance of way and maintenance of equipment. The best method by which to make a compari-

GENERAL REALTY CORPORATION, LIMITED
Whalen Building, PORT ARTHUR, Ontario

of these expenses over a certain period is on the basis of the mileage of line operated, and in the following table we have computed them upon this basis:—

		Maintenance of way expenses.		Maintenance of equipment expenses.	
	Mileage	Total	Per mile.	Total.	Per mile.
[illegible]	22,452	$20,887,091	$ 930	$21,666,373	$ 965
[illegible]	22,966	20,778,609	904	20,273,626	882
[illegible]	24,104	21,153,274	877	21,510,803	892
1910	21,7[illegible]1	27,035,603	1,093	26,002,301	1,051
1911	25,400	29,245,093	1,151	26,127,638	1,028
1912	26,727	31,514,098	1,179	29,811,510	1,115
1913	29,336	35,933,322	1,224	38,289,718	1,271
1914	30,795	35,292,226	1,146	36,375,330	1,181
1915	35,582	28,762,906	808	28,156,261	791
1916	37,434	36,040,045	962	35,822,484	956
1917	38,601	41,154,193	1,066	46,371,178	1,201
1918	38,879	51,614,857	1,327	57,304,234	1,473

It will be noted in this table that during the years 1907 to 1909, when both Canada and the United States were passing through hard times, this was reflected in the curtailment of the expenses for maintenance of way and maintenance of equipment, but with the advent of better times during the next four years there was a progressively greater amount spent per mile of line for these two purposes. With the advent of the war and the reduction of the railway traffic, which would be shown in the statistics of the years 1915 and 1916, there is again manifested a very pronounced reduction in the expenditures per mile of line for these objects; but with the vast increase in the amount of freight in the two following years accompanied by a corresponding increase of revenue and the need for putting the roadway and rolling stock into the best condition for handling this greatly augmented business, there was a constantly heavier expenditure along these lines. The vast increase per mile of line in 1918 shows distinctly the effects of the much higher prices paid for materials and the advanced scale of wages, which were concentrated upon that year. As we have already said there is no other part of our industrial mechanism which responds so quickly and insistently to the general conditions of the country as do the railways; any change is registered immediately in the traffic and the finances of the railways. In periods of adversity there is usually the postponement of a large share of those expenses which can be reduced with the least injury; but these must be made up upon the restoration of normal conditions. How great these changes may be will be apparent from the contrast of the years 1914 and 1915; a reduction of $338 per mile in maintenance of way expenses in 1915 means a total reduction of $12,026,716, and a decrease of $390 per mile in maintenance of equipment expenses means a total reduction of $13,876,980 for the entire mileage of the country. It is seen, therefore, how drastic are the changes which the railways must make from year to year according to the variations in prosperity which prevail.

(To Be Continued)

HELPING BANK BUSINESS GROW

Local Manager Should Lay Solid Foundation For Future Growth—Eastern and Western Fields

The responsibility of the branch bank manager both to the institution to which he is attached, and to the public whom the bank serves, is stressed by B. B. Carter, eastern superintendent of the Union Bank of Canada, in an article entitled, "Banking—East and West," which appears in the current issue of the "Union Bank Monthly."

"Banks enjoy very special privileges granted by the Dominion government, and it is consequently the duty of all bank managers to realize the responsibilities of their positions both as custodians and administrators of public funds and as tutors to those for whose training they are responsible," declares Mr. Carter, continuing:—

"A manager is usually expected not only to familiarize himself with local conditions pertaining to his own business, but also to endeavor to obtain a broad knowledge of general conditions and to be able to express himself with some degree of certainty on public affairs. After all, a man whose thoughts do not go beyond the confines of his office is narrow and not in any sense a developer. To be successful a manager should be a public-spirited citizen, interested in his local board of trade, local charities and patriotic societies. In my judgment no man who does not take an active part in such things will ever be broad enough to make a first-class banker.

Establishing Branches

"As a matter of fact men hold divergent views as to the best means of properly establishing themselves upon being appointed to a branch. Some feel that by talking of what they will do, decrying their opposition and generally waving the big flag they will make a good impression. I take the contrary view. A man should go slowly at first, taking pains to cultivate the best men in the community and thus establish a spirit of confidence between the bank and the customer. After all, people are prone to follow the men they look up to in the community. If you secure their confidence and let them know that the bank is there to assist them, you will find the chief difficulties overcome. The remainder is easy."

Reminiscing in an interesting vein Mr. Carter recounts how twenty-one years ago when he was in charge of a western branch of the Union Bank of Canada he had "as customers half-breeds, including the once famous giant from Willow Branch, ranchers and traders from as far west as Swift Current, and farmers from as far away as the valley of the Saskatchewan." At that time, he says, "our equipment was small and our office a one-story, leaky-roofed building, but we thought little of these things, our aim was to lay the foundation of a good branch."

Contrasting the Canadian banking situation in the east and the west Mr. Carter continues:—

"In the east we have no such opportunity for advancement as there is in western Canada. Our part of the country has been settled for a number of years, and the population during the past few years has shown no great tendency to increase; moreover, in all towns and villages the banks have had branches for years, and except in the smallest places there is little room for a new branch, and the making of a new branch pay is a slow process.

In Western Canada

"Against this, western Canada is a continually developing country, a land of untold wealth and endless possibilities, a land into which immigrants will be pouring just as soon as the gates controlling immigration are once more opened. Moreover, while western business largely consists in assisting the raising and marketing of wheat and cattle, our efforts are along the line of stimulating and financing manufacturers in the purchasing of raw material and turning such material into the finished product, for our farmers, generally speaking, are in such a position as not to require much assistance, except in connection with the acquiring of and feeding of stock.

"While we in the cities of the east see more of the commercial end of the business, I must be permitted to say that east of the great lakes a very large quantity of grains, beans, hay, etc., is produced, as the following comparative figures will show:

Values for Fiscal Year 1918

	East.	West.
Total crops	$757,000,000	$617,000,000
Cattle, hogs, etc.	385,000,000	67,000,000
Butter and cheese	287,000,000	75,000,000
Totals	$1,429,000,000	$759,000,000

"I am aware of the enormous growth which has taken place in the bank's business in western Canada during the past few years. I am proud to say that I spent fifteen years in western branches and there is no question that the training a man gets out there is broadening, has a tendency to make one self-reliant, and is a tremendous asset to any banker afterward moved to the more settled and less romantic east. In amplification of this, I might add that in most of the banks in Toronto you find that the men at the head of affairs have had many years' experience in western Canada."

THE BEST EXECUTOR

never dies
is always available
is financially responsible
is satisfied with moderate compensation, and
is experienced in all the duties of
estate management.

We meet all these requirements. Write to us.

DIVIDEND NOTICE

Notice is hereby given that a Dividend at the rate of Six per cent. per annum on the paid-up Capital of this Company has been declared for the year ending December 31st, 1919, and the same will be payable at the Head Office, 1031 Rosser Avenue, Brandon, Manitoba, on January 2nd, 1920.

Transfer Books will be closed from December 15th to the 31st, inclusive.

By Order of the Board,
JOHN R. LITTLE,
Managing Director.

ADMINISTRATOR OR EXECUTOR?

If a man dies without having appointed an executor, the Court appoints an *administrator* to wind up his affairs. The administrator, where no will is left, distributes the estate among the legal heirs. The previous owner's wishes are not consulted.

An *executor* carries out the owner's wishes, but receives no more for his services than the administrator.

This Company acts as executor under wills. Our officers are glad to have you write for booklets, or better still, to have you consult them about the ways in which the Company may serve you.

COMMERCE BOARD EXONERATES INDUSTRY

Finds no Widespread Profiteering but Stands Ready to Prosecute Cases

As mentioned editorially last week, the Board of Commerce has found no industry guilty of making undue profits, although individual cases have been discovered. A statement to this effect was issued on December 12, as follows:—

"The Board of Commerce of Canada having completed its first quarter year of existence as a fully organized independent commission, with supervision and control over the profits of dealers in necessaries of life, and over combines, including trusts and mergers, affecting articles of commerce, considers that it is now sufficiently informed to enable the formulation and statement of its policy in the administration of the Combines and Fair Prices Act, which administration has, by statutory enactment, been committed to it.

"It was necessary that the board should first acquaint itself with its task and with the scope of it, before reaching or stating conclusions as to its policy. Few can appreciate either the magnitude of that task or the efforts which the board has already made in preparation for its execution. Broadly stated, the jurisdiction of the board as to profits is over food, fuel and clothing.

Public and Private Hearings

"Of the many public hearings had by the board in the various provinces the public has become aware, but of the far greater number of investigations conducted by interrogatory and questionnaire nothing has yet been heard or said.

"There has been established at Ottawa, under the direction of the board, certain investigation machinery by means of which the board keeps itself continuously acquainted with the manufacturing and production costs of the commodities over which the board exercises jurisdiction. By this means the board may at any time inform itself without delay whether in any particular case there has or has not been excessive charging. This investigation machinery, which is being constantly augmented, will, when completed, it is fully expected, constitute an encyclopedia of all costs of necessaries of all classes whatever, including even costs of transportation. The orders and declarations of the board are made in the light of the information thus gleaned, so that it is dangerous, if not futile, for sellers of necessaries to assert ,as they sometimes do, that the board acts without full knowledge of the various items of cost of the commodities in which they deal, whether these be overhead charges or other costs of doing business or otherwise. The board has at its disposal always a great fund of data of which its critics cannot know.

Individual Complaints Few

"Supplementing the board's inquiries there have been a few—a very few—reports or charges made by private individuals. All reports or charges made have been carefully followed up. In some cases the allegations made have not been established. In other cases the matters have been referred for criminal proceedings. In other cases restitution has been required and made to obviate further action on the part of the board, which continues ready to receive particulars of cases of alleged profiteering, to investigate them, to pronounce upon the guilt or innocence of those charged and to cause punishment where the facts justify it.

"The board is not itself authorized to impose penalties, but the adjudication of the board to the effect that in a particular case there was profiteering forms the basis of a criminal prosecution; and the board's declaration to that effect is conclusive proof of the offence when the offender comes to be tried in the criminal courts. The charge in the criminal courts against the offender may be laid either by the attorney-general of the province or by any private individual with the consent of the board. In any case, where the board has adjudicated that there has been profiteering, the board will give its certificate so as to enable any private individual to commerce a prosecution. In extreme cases the board will endeavor to see the proceedings carried to the stage of committal for trial, whereupon the matter will take the shape of an ordinary prosecution and will be taken in charge in the ordinary way by the crown officers of the province, as is done in all other criminal matters. It is inconceivable that the attorneys-general will treat these offences as in any way different from other but ordinary breaches of the criminal law.

Notify Secretary of Board

"The preceding brief statement of the procedure to be followed in case of alleged profiteering is made so that the public may know exactly what measures to adopt in case any consumer feels that he has been imposed upon. All that need be done is to communicate the facts to the secretary of the board at Ottawa, whereupon arrangements will be made for hearing. It is, of course, utterly impossible for a board of three commissioners to be personally present at every point in the Dominion to hear all charges of this nature that may be advanced. Every matter must, however, ultimately reach the board for its decision. The board, therefore, must, sooner or later, consider each case. The evidence will, in most cases, be obtained through a local officer appointed for the purpose. The officer will have no authority except to take the evidence under oath. He will then transmit it to the board which will adjudicate, whereupon, if the offence is considered proved, a criminal prosecution will be commenced.

"In order to remove any misapprehension in the public mind, the board would point out that it has no machinery of a police character to detect offences, nor can it set up prosecuting agencies all over the Dominion. Even if that were otherwise practicable the fact is that the financial vote for the board provides for nothing more than its existence and office management. Nevertheless, the acts under which it works are so drawn that all things necessary can be done if, in addition to the employment of an examining officer by the board for each particular case, the board can have the aid of the public and local authorities. The board submits that the assistance of the public and local authorities should be rendered freely and should not entail any expense. Local prosecuting machinery for the punishment of all criminal offences already exists. That machinery will not need to be augmented in order to discharge the additional work that will be involved in occasional profiteering charges.

Deals with Supplies

"The board also points out that in addition to the matter of reasonable profits its jurisdiction extends to the matter of unreasonable accumulation of necessaries. A certain amount of storage is, in this country, absolutely necessary. This applies both to imported goods, and to those whereof, because of the winter, stocks in preservation must be kept on hand. This necessary storage may in certain cases be taken advantage of to enhance prices by restraining supply. In short, it may involve the 'cornering' of food in order to raise prices, or the hoarding of it until prices materially advance. The board has jurisdiction to order the release and placing upon the market of foodstuffs so unreasonably hoarded. All cases of this kind, as well as those of excessive profits, ought to be brought to the attention of the board by some person who is willing either to prove the offence or take charge of a proceeding under the act by summoning witnesses, etc. The board cannot be expected to be always and instantly aware of infractions of the acts which are under its jurisdiction. As above stated it cannot set up a local police or detective force in every community in Canada. Persons who are hoarding necessary food commodities in the face of public want should inform themselves as to the heavy penalty provided by the act for their so doing. If charges of hoarding are laid and established before the board, or if the board itself becomes otherwise aware of the commission of this offence, offenders may look for relentless imposition of the appropriate penalties.

"The board deems it advisable to declare that its investigations to the present stage have not been confined to any one class of trade or industry, but have extended to many manufacturers, wholesalers, jobbers, retailers, and to

some extent to farmers. Several very exhaustive inquiries into foods, fuel and clothing, including boots and shoes, have been in progress for some time. These inquiries follow the commodity from its origin as raw material to the counter in the retail store. Such inquiries necessarily consume much time. Meanwhile, as and when the board considered itself sufficiently informed to enable just action, it has issued applicable declarations and orders. The processes of retail traders being simplest, it has naturally resulted that orders affecting the retail trade have issued first, and so, to the present time, a majority of the board's orders affect only that trade, but to the thoughtless and unreasonable demand that the board make no orders against any class of trade until it is ready to make orders against all classes of trade at once, the board has replied that it must and will perform its duty as it, charged with the responsibility, and in possession of the full facts, may determine. The orders already issued to bind retailers do not imply that they as a class have been guilty of either offence or impropriety. These orders fix maximum profits and enable the easier identification of the future profiteer. The board, indeed, has found among retailers generally a wholesome desire to avoid even the appearance of overcharging. It is believed that hereafter, as a result of the board's investigations and orders, such cases of profiteering, if any, as do occur, will be simply and readily detected, exposed and punished. There is one species of undoubted profiteer, who seemingly can be convicted upon his own confession, and that is he who claims the right to use the board's orders as to maximum profits as justification for the raising of his prices. No orders of the board so justify, and the board will welcome particulars of such prostitution of its orders.

"The board is pleased to be able to observe as a result of its preliminary survey of business conditions that, despite high prices undoubtedly prevailing, profiteering, so-called, that is the taking of unjust profits, is not, in the board's opinion, as common, nor nearly as common, as many have charged or claimed. Business is in the main sound and honest, and the board has a confident hope that business men will be as the board's right hand in the new imminent business of tracing and punishing those among them, who, according to the new business ethics of this era, have dishonored their brethren."

ATTEMPTS TO DEFRAUD CREDITORS

The Prosecution Committee of the Canadian Credit Men's Association reports two recent successful prosecutions, which will have a salutary effect on traders who are inclined to be dishonest with their creditors. The first case is that of L. W. Putnam, until recently trading as a butcher in Toronto. Putnam sold out his business, and being advised of the provisions of the Bulk Sales Act, furnished the purchaser with a statutory declaration, as required by the Act, claiming that he had no creditors. It subsequently developed that, at the time of the sale, he owed approximately $1,800 to $2,000. Six hundred of this was owing to a clerk in his store, and Putnam had the purchaser pay this claim in full, stating that it was all he owed, and supporting his statement with the statutory declaration above referred to. The purchaser then paid him the balance of the purchase price, some $500. A charge of perjury with intent to defraud creditors was laid by the association, and a conviction secured.

The other case is that of S. Joseph, Sault Ste. Marie, Ont. He, having been in business at the Soo only about nine months, made an assignment, and upon a statement being prepared, there was found to be a very large deficit. The case was followed up by the association, and while it was found impossible to secure direct evidence of fraud, it was suspected that he had committed perjury in connection with his examination for discovery. He was arrested on this charge and was also charged with failure to keep proper books of account. He was tried before a jury in November, and acquitted on the perjury charge, but convicted on the other.

BOOT AND SHOE INDUSTRY IN CANADA

Over Thirty Million of Capital Invested, and Production in 1918 Exceeded Forty Million

A PRELIMINARY survey of the boot and shoe industry in Canada has been completed by the Dominion Bureau of Statistics for the calendar year 1918, covering returns of 152 establishments. In addition, returns were received from 33 establishments which manufactured boots and shoes but which were classified among repairing establishments as their repairing exceeded their manufacturing operations.

Capital Invested

The total capital invested in the industry was $31,493,152, of which land, buildings and fixtures constituted $5,306,982, machinery and tools $3,313,338, materials on hand, stocks in process, finished products and miscellaneous supplies $14,829,317, and cash, trading and operating accounts and bills receivable $8,043,515.

The number of employees on salaries, according to sex, was 1,065 males and 381 females, and the total salaries paid them was $2,037,529.

The average number of persons employed on wages, by sex, was 6,760 males and 4,128 females, and the total of their wages $6,787,760. In addition to these there were 94 males pieceworkers receiving $57,557 and 296 females who received $101,238.

The total cost of fuel used in the industry was $160,398, of which $68,008 was of Canadian origin and $92,390 of foreign origin. The cost of the items of miscellaneous expense was $2,967,477.

The cost of raw and partially manufactured materials used in the industry was $25,227,448, to which leather of all kinds contributed $18,009,401 and supplies $7,218,047.

Products

The total value of production in the industry for the year amounted to $43,332,932, itemized as follows:—

Kind.	Pairs.	Value.
Men's boots and shoes	4,354,585	$17,049,789
Boys' and youths'	1,227,772	3,597,852
Women's shoes	3,368,737	11,153,267
Misses' and children's	2,413,768	4,647,178
Men's, boys' and youths' slippers	132,903	178,272
Women's, misses' and children's	1,214,541	1,893,658
Infants' shoes and slippers	354,989	399,979
Moccasins	315,328	883,836
All other (value only)	......	3,419,723
Construction and repair work	......	109,378

SASKATCHEWAN CO-OPERATIVE ELEVATOR CO.

The ninth annual meeting of the Saskatchewan Co-operative Elevator Co., was held in Regina recently. The directors in their report show a net profit of $193,599, and provide for a cash dividend at the rate of 8 per cent., which accounts for $89,700. The balance, together with the amount carried forward from last year, a total of $179,663 is placed in reserve, $51,949 being placed to elevator reserve account and $51,949 to reserve account. The total elevator reserve account now stands at $993,826, and the total of the reserve account at $179,663.

Within nine years, the company has expanded from 46 elevators with 2,580 shareholders, to 316 elevators, with 63,813 shareholders. Last year 21,841,556 bushels of grain were handled by the farmers' own company, the elevator at Estlin holding the record for the season with 238,750 bushels.

Messrs. Fairbanks, Gosselin and Co., members Montreal Stock Exchange, have purchased the Cooper Building on the north side of Notre Dame Street, Montreal, Que., and it is the intention of the firm to remodel it to meet the requirements of a modern brokerage and banking office.

NEW ISSUE

$4,500,000

The Goodyear Tire & Rubber Company of Canada, Limited

(Incorporated under the Ontario Companies Act).

7% Sinking Fund Cumulative Preferred Stock

Quarterly Dividends payable 1st January, April, July and October. Preferred as to both dividends and assets, callable as a whole or in part at the Company's option at 110 and accrued dividends on any dividend date on thirty days' notice. Provision has been made for the annual retirement, commencing during 1923, of an amount equal to 2½% of the largest amount of Preferred Stock which has been at any one time outstanding.

No bonds may be issued, nor mortgage nor lien given on the fixed assets, without the consent of 75% of the Preferred Shareholders.

Transfer Agents:—Chartered Trust & Executor Co., Toronto; Montreal Trust Co., Montreal.
Registrar: Standard Bank of Canada, Toronto and Montreal.

CAPITALIZATION

(Upon completion of the present financing).

	Authorized	Issued
Preferred Stock	$15,000,000	$4,500,000
Common Stock	15,000,000	5,331,000

(No Bonds)

The following information is summarized from a letter from Mr. C. H. Carlisle, General Manager and Treasurer of the Company:—

1. The Company is the largest manufacturer of tires in Canada. It also manufactures a wide line of mechanical and other rubber goods.

2. The Company's business has had a most remarkable growth as shown by the following figures:

Year ending Sept. 30—	Sales	Net Earnings	Year ending Sept. 30—	Sales	Net Earnings
1915	$2,370,914	$188,730	1918	$ 8,514,557	$ 760,997
1916	3,446,683	298,413	1919	12,839,123	1,324,328
1917	5,509,433	422,928			

(The above figures are after making provision for depreciation and Business Profits Tax, and without any benefit accruing from the present large addition of capital).

Preferred Stock Annual Dividend requirements	$ 315,000
Net Earnings, year ending September 30, 1919	1,324,328

Net earnings are therefore over 4 times the requirements.

3. (a) The Company at all times is to maintain net liquid assets to not less than 115% of the Preferred Stock outstanding.

(b) The Company also agrees to maintain net tangible (including liquid) assets of at least 200% of the Preferred Stock outstanding.

(c) Where owners of stock reside in countries other than Canada, dividends will be paid at par of exchange in such countries, provided the premium involved does not exceed 5%. Where the premium exceeds 5%, the holder will be given the benefit of 5% premium.

4. No dividends will be paid on Common Stock unless all Preferred Stock dividends have been paid and unless the Company has surplus undivided profits equal to at least two years' dividends on the Preferred Stock then outstanding.

The Company's books have been examined and statements certified by Messrs. Price, Waterhouse & Co., Toronto, etc., and Bowers and Suffern, New York. The Company's Plants have been appraised by the Canadian Appraisal Company, Limited, Toronto, etc., and all legal details relating to the formation of company and issuance of stock have been passed upon by Messrs. Blake, Lash, Anglin & Cassels.

Certificates are on file and may be examined at any of our offices.

$1,500,000 of this issue having been appropriated for exchange with the old preferred shareholders at 97½, we offer the remainder for subscription.

PRICE: $97.50 per share ($100 par value each)

Payable as follows: $10 per share on application, $87.50 per share on January 5th, 1920

Shares carry dividends from January 1st, 1920.

The right is reserved to allot all, none, or a portion only of the amount applied for. In event of partial allotment, the balance of the deposit will be applied towards payment of amount due on allotment. Interim Certificates will be issued pending preparation of definitive certificates.

Applications will be made to list these shares on the Toronto and Montreal Stock Exchanges.

Orders may be telegraphed or telephoned at our expense.

SILVER AND SILVER CURRENCY

High Price of Silver at Present Makes Melting Profitable Under Certain Circumstances—How Supply of Subsidiary Currency Might Be Maintained

By A. B. Barker

WHATEVER may be the cause of the rise in the price of silver, whether reduction in the output of producing countries, as many think, or actual increase in the value of the metal, as others claim, the result, so far as the coinage is concerned, will be the same. If the bullion value of the metal in the coins is greater than their nominal value, they will disappear, to be hoarded at home or shipped abroad as bullion and melted. They may even be melted at home, though there is a law against it, if there is a chance of profit in the transaction.

This is due to Gresham's law, which is simply a statement of the fact that, where two sorts of money come into circulation together, and one sort is better or more desirable than the other, people will hoard the better and use the least desirable; or, as it is more broadly put, bad money will drive out good money. This principle was first stated by Sir Thomas Gresham, a London merchant, and the financial adviser of the government in Queen Elizabeth's time, when adverse foreign exchanges were as troublesome as they are to-day.

Silver as Subsidiary Currency

Coined money in every country consists merely of pieces of metal with the government stamp, which certifies that each coin contains a quantity of metal of a certain weight and fineness. Gold and silver are the chief metals used, and in all the civilized countries gold is the standard of value, the prices of commodities being expressed in terms of gold, whether in dollars, pounds, francs, marks or lire, these names meaning simply certain definite weights of gold. In this way money is simply a measure. This measure is also in itself a commodity, and its value fluctuates. Silver is now used as the metal for subsidiary coins—small change, in other words. Formerly it was used also as a measure of value along with gold, and, as it fluctuated, compared with gold, and also as compared with other commodities, the efforts to work with two standards caused much disturbance. Finally, by common consent, gold was adopted as the sole standard. Following this, the price of silver fell, or, as the silver advocates claimed, the price of gold rose, but whichever was right, the extent of the disturbance caused by two standards was reduced.

When silver was relegated to a subsidiary place and the price fell, the metallic content of the silver coins in circulation was below the nominal value of the coins, and, in order to avoid the effects of Gresham's law and keep it in its place as a purely subsidiary coinage, its legal tender value was limited. In Canada this limit is $10. Conditions change, however, or it may be that there are fashions in money as in other things. In 1897 the London Statist, a high authority, stated that "the reduction in the price of silver is not due to an increase in supply, but to a change of opinion by the civilized world," which is merely a more scholarly way of saying that silver had gone out of fashion. Possibly the present rise in silver may be due to a similar cause.

Amount of Metal in Coins

Each country, for, no doubt, good and sufficient reasons, has adopted a slightly different weight of metal in its standard coin. Economists have pointed out the advantages of adopting a standard weight in the various coins representing the units of value in the different countries, but, except for the countries of the Latin Union as one group and Canada and the United States as another, this has had little effect. On one occasion it was suggested in the British House of Commons to reduce the gold content in the sovereign so that twenty shillings would equal twenty-five francs. The change was so slight that the new coins would still have been heavier than the old coins of, say, ten years' service, and still of legal tender weight, but Lord Goschen, for the government, announced that such a change would be a breach of faith with the national creditors, and could not, therefore, be considered

The silver advocates claimed that the rule should work both ways, and that if the rights of the creditors were so carefully considered, the value of the standard should not be unduly enhanced by legislation, and that its value when the debt was created should be considered. However, a stable factor was the essential thing, and there is much wisdom in Walter Bagehot's remark that, while the "cake of custom" should be of such consistency as to make change difficult, it should not be such as to make it impossible.

The present price of silver, $1.31 an ounce in New York, will, however, be likely to force a change of some kind, and the present abnormal rates of exchange will also be a great factor.

Sterling in New York is at a discount of 25 per cent., francs and lire over 50 per cent. and Canadian funds 10 per cent. The British shilling contains 87.2727 grains of silver, 37/40 fine, or 80.72 grains pure silver, worth, at its bullion value, roughly, 23 cents in New York. Sent over as bullion, it would yield this amount, which would give 1s. 3d. converted into sterling.

A franc and lira each contain 64.43 grains pure silver, worth, roughly, 17 cents. Franc and lira exchange are at a discount of over 50 per cent., which would yield a good profit on the transaction, provided, of course, the coins could be obtained for export.

The Canadian Situation

Canadian silver coinage is based on 360 grains to the dollar, .925 grains fine, or 333 grains of pure metal, worth as bullion 90 cents in New York. Canadian funds are at a discount of 10 per cent. there, so the conversion would not be profitable. Should silver rise, and also the rate of exchange, sufficiently to show a profit on the transaction this is what would happen. The result, however, would not be serious except for the certain shortage of change which would follow. In any event, the remedy is easy. A new issue with a smaller silver content, well below the export price, would have the desired effect. Our silver coins were intended as token coins. When first issued they were actually worth just about one-half of their nominal value, and when issued at par there was a large profit to the government. Their issue was limited strictly to the actual demand for such currency for its legitimate use, that is, as small change for the convenience of the public, and if the issue is as rigidly controlled as in the past, the new coins will do the work quite as well as the old. The total silver coinage of Canada from 1858 to 1915 was $19,848,323, and since then $7,908,458, or $27,756,781 in all, or about $3 to $3.50 per head of population.

Present Circulation of Silver Coins

How much of this is at present in circulation it is impossible to say, as there was, even under former conditions, when the coin was over-valued, a certain percentage which disappeared. Under present conditions, of course, this percentage will likely increase unless the silver content is reduced.

The American silver dollar, the "cartwheel" of 412 grains, or 371.25 pure silver, is worth as bullion when new approximately $1.01½. In 1902 this silver content at the current price was between 40 and 41 cents, and it has long been suspected that a considerable volume of coins of the same weight and fineness as the government issue had been put in circulation by counterfeiters. These coins passed every test and could not be distinguished from the true coin. Now there is no reason why they should be, as they are actually worth more than they purport to be worth.

Much was heard of Gresham's law some years ago during the "free silver" agitation in the United States, but then it was used as an argument against silver. It would be the irony of fate if it should now be invoked against gold and in favor of silver.

TELEPHONE COMPANY WANTS HIGHER RATES

The Ingersoll, Ont., Telephone Co. has applied for an increase of 15 per cent. in rates. The Ontario Railway Board heard the application on December 16th, but reserved judgment. H. E. Robinson, manager of the company, pointed out that wages had increased by 50 per cent. and some materials by over 100 per cent.

SUN INSURANCE MONTREAL OFFICE

The Sun insurance office is opening a branch in Montreal, and Andrew Hamilton has been appointed manager for the province of Quebec. Mr. Hamilton entered the service of the Union Assurance Society at its head office for Canada in Montreal as junior clerk in 1900. He has served the company continuously since that date, and was chief clerk at the date of his new appointment.

BUSINESS FAILURES IN CANADA

The following shows the number of business failures in the Dominion for the four weeks ended December 12th, as reported by R. G. Dun and Co., Toronto:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1918.
Dec. 12th ...	6	8	2	0	0	0	0	0	0	16	21
Dec. 5th ...	1	7	2	0	4	0	2	0	0	16	16

Nov. 21st ...	7	9	0	1	4	0	0	0	0	21	12

OFFERING OF GOODYEAR TIRE STOCK

The Goodyear Tire and Rubber Co. of Canada, Ltd., is making an issue of $4,500,000 7 per cent. sinking fund cumulative preferred stock through a syndicate comprising Messrs. A. E. Ames and Co., Dominion Securities Corporation, Ltd., and Nesbitt, Thomson and Co. Of the total issue, $1,500,000 has been appropriated for exchange with the old preferred shareholders at 97.50, and the balance of $3,000,000 is being offered to the public at 97.50 per share of $100 par value each.

One of the most interesting features of the issue is that provision has been made for the annual retirement, commencing during 1923, of an amount equal to 2½ per cent. of the largest amount of preferred stock which has been at any time outstanding. No bonds may be issued, nor mortgage nor lien given on the fixed assets without the consent of 75 per cent. of the preferred shareholders.

Sales of the Goodyear company have increased nearly $10,000,000 since 1915. Net earnings for the year ended September 30th, 1919, amounted to $1,324,328, compared with $188,730 in 1915. As the preferred stock annual dividend requirements amount to $315,000, net earnings are, therefore, four times the requirements.

JANUARY DIVIDENDS

Should be reinvested in Interest-Bearing securities.

Particulars of suitable investments will be furnished upon request.

FRAUDULENT SALE OF SHARES

British Columbia Court Rules that Insurance Companies Must Comply with Regulations Before Sale of Shares

A RECENT case before the Court of Appeal of British Columbia concerned the sale of shares by the company before the company had complied with all the regulations incident to incorporation thereof. The case was that of Vancouver Life Insurance Co. vs. Richards and the facts as reported in the Dominion Law Reports are as follows: Together with other applicants, a Mrs. Richards agreed to take twenty-five shares of the company's stock, paying for them partly in cash and partly by two promissory notes of $250 each. The company experienced some difficulty in raising the necessary $50,000 to be deposited with the Dominion government before beginning business, and in order to keep Mrs. Richards' application alive, obtained a renewal note from her for $500. The company later went into liquidation because of the impossibility of its complying with the statutory regulation requiring the deposit with the Dominion government.

The question then arose as to whether the company could collect on the promissory note, the trial Judge holding that it could, whereupon this appeal was lodged. McPhillips and Eberts JJ.A. allowed the appeal, deciding that the company had no right to collect on the notes, which should be delivered up. The reasons for this decision are given in the following parts of the judgment:—

"This appeal discloses a manifest case of fraud and misrepresentation and the fraud and misrepresentation continued throughout the whole time and in connection with all the dealings of the agents of the respondent with the appellant

Company Was Not Organized

"The organization of the company, so far as it went, which was no distance at all (as it never was in the position to have a meeting of shareholders nor had it in any way complied with the statutory requirements) was the launching upon the public of a professed company capable of doing business, a wholly fictitious position, and in fraud of the investing public, the appellant being one, moneys were obtained on the sale of shares to the extent of $65,000, of which all, or nearly all—viz., $57,000, was taken by the agents of the company for commissions and not devoted to the purpose for which such moneys should have been legitimately devoted—i.e. the establishment of the company upon the basis called for by statute. The company never achieved the position of being able to write insurance and failed to make the necessary statutory deposit which, amongst other things, required to be done.

"The appellant has met the action by the allegation of fraud and counterclaimed for rescission and delivery up of the promissory note and return of the money paid and in my opinion the appellant has, upon the facts, established her right to this form of relief."

Dissenting Judgment

Galliher J.A., in dissenting from the above judgment, held that the renewal of the notes, which was signed by Mrs. Richards, after learning of the irregularities, was an agreement to go on with the transaction, evidently in the hope that the necessary deposit would be secured; and further it was declared in dissent that, "in the case at Bar the stock was allotted, notice of allotment given, and the defendant was entered in the books of the company as entitled to the stock. It is true no certificate of title to the stock has been issued, but it has been held that stock is issued when allotment is made, notice given and the transaction entered in the books of the company. The position then is that the defendant purchased stock in the company and had that stock issued to her. It turns out that the stock is worthless and that the company failed to qualify to do business and in fact cannot qualify, as the Dominion government from which the charter was obtained have refused an extension of time. I do not think it can be said the defendant did not get what she purchased." The appeal was allowed and decision of trial Court reversed.

BUILDING PERMITS

Employment in the building trades as indicated by the value of building permits issued in thirty-five cities showed a decrease during October as compared with the preceding month, the total value of building permits falling from $11,645,456 to $9,469,567, a decrease of $2,175,889, or 18.7 per cent. Nova Scotia, Quebec and Alberta were the only provinces to record increases in this comparison. As compared with the corresponding month in 1918, there was an increase of 232.2 per cent., the value for October, 1918, being $2,850,428. In this comparison all the provinces recorded substantial increases.

Of the larger cities, Montreal, Toronto and Edmonton recorded increases, both as compared with September, 1919, and with October, 1918. Winnipeg and Vancouver show declines in comparison with September of this year and increases over October of last year.

Of the smaller centres, Halifax, St. John, Quebec, Westmount, Guelph, Peterborough, Calgary and New Westminster all show gains, both as compared with September, 1919, and with October, 1918. The Department of Labor, Ottawa, estimates the cost of business work, as indicated by building permits issued in thirty-five cities, as follows:—

DEPARTMENT OF LABOUR FIGURES	September 1919	October 1919	October 1918	Octr. 1919, compared with Octr. 1918 Increase + Decrease − Amount	Per Cent.

CANADA'S DEBT INCREASES $33,000,000

Canada's net debt at November 29th, 1919, totalled $1,-[illegible]17,7[illegible],871, compared with $1,781,876,807 at October 31st, 1919, an increase of $32,963,063. Ordinary expenditure by the Dominion last month exceeded ordinary revenue by $11,-[illegible]021. The heavy expenditure, however, is largely accounted for by a large payment on November 1st of interest on war loans. During the eight months' period closing with the end of November, ordinary revenue was $218,027,495, and ordinary expenditure $202,536,128. The following is a complete summary of the Dominion's finances as at November 29th, 1919:—

PUBLIC DEBT	1919		1919
LIABILITIES	$ cts.	ASSETS	$ cts

MORE RAILWAYS IN QUEBEC

In his speech at the opening of the Quebec legislature on December 10th, Sir Charles Fitzpatrick, Lieutenant-Governor of the province, intimated that a new railroad would probably be built into the Temiskaming district.

GOVERNMENT CURRENCY

The statement of circulation and specie for the month of October, 1919, shows that gold held by the minister of finance totalled $127,303,441, compared with $126,554,280 in September. Gold held for the redemption of Dominion notes amounted to $122,633,554. Dominion notes outstanding at October 31st totalled $146,020,000, compared with $133,-780,000 in September. The following is the official statement of all government currency:—

"The Fabric of Civilization," a short survey of the cotton industry in the United States, is the title of a booklet just issued by the Guaranty Trust Co. It is well illustrated and describes the growing, manufacturing and marketing of cotton. An interesting price-chart shows that the price dropped by about 50 per cent. at the outbreak of war, but commencing about December, 1914, it advanced to a high record of 38 in August, 1918, compared with 14 in July, 1914.

STATEMENTS OF MONTREAL SAVINGS INSTITUTIONS

Leading Industrial Events of the Week

Lake Huron Steel Corporation Will Locate at Sarnia, Not Goderich—Dunlop Tire Announces Entrance to United States—Big Nova Scotia Timber Deal—Abitibi Paper Company to Double Output.

THE announcement has been made that the Canadian branch of the Lake Huron Steel Corporation will not be at Goderich, Ont., but plans are under way for the establishing of the plant at Sarnia. When the plans were announced last August for the location at Goderich, the Lake Huron Steel Corporation, which is a $15,000,000 American concern, promised to spend more than $2,000,000 in the next twelve months and an additional $6,000,000 in the second year in establishing the plant, which will include six electric furnaces and other special equipment for the manufacture of high-class steel products. It is presumed that the plans for the location at Sarnia will be along the same line. Reports from Sarnia state that preparations are under way for the erection of the plant on the property next to that of the Wills Lee Automobile Corporation.

The following are the names of the men interested in the new deal: J. J. Mahon, Newark, late chief inspector, Imperial Munitions Board, formerly of the Crucible Steel of America; J. A. Durfee, Pittsburg, late general manager of the British Forgings Company, Toronto; J. C. Jones, Cleveland, president of the Cleveland Steel Co.; Charles R. Talbot, Detroit, vice-president of the National Bank of Commerce, Detroit; Harry S. Hall, Detroit, general manager of the Lewis Hall Iron Co., and president of the Hall Motor Truck Co.; Stuart A. Howard, Detroit, representing New York and Detroit financial houses; Alan Warren, Cleveland, representing New York financial interests; C. F. Megow, St. Paul, president of the Charles Megow Tractor Co., recently of the Ford Motor Co., Detroit.

Dunlop Rubber in United States

It has been announced that a new company, under the name of Dunlop America, Ltd., has been formed in the United States, and will be a subsidiary of the Dunlop Tire and Rubber Goods Co., which company was incorporated March 1st, 1899, as Dunlop Tire Co., Ltd., and took over the Canadian business of the American Dunlop Tire Co., a branch of the original Dunlop Pneumatic Tire Co., Ltd., of London, Eng. The parent company has head office in Toronto and branches in fourteen leading cities in Canada, besides having working arrangements with Dunlop in England, France, Japan and other world centres.

Plans have been consummated to commence production of tires on a greatly increased scale. An appropriation of $1,500,000 has been set apart for building and equipping another factory in Toronto. This latest factory will be devoted especially to the manufacture of Dunlop cord tires, "Traction" and "Ribbed," the success of the present Dunlop cord tire having been so instantaneous.

Lumber Industry in the Maritimes

It is estimated that New Brunswick's lumber cut this year will exceed all records. Reports have been received from twenty-nine forest rangers, and they estimate the cut of logs in their districts at 229,000,000 feet, and there are thirteen other rangers whose reports have not yet been received. When all the reports are received it is expected that the cut will exceed 300,000,000 feet. The record cut was reached about ten years ago, when the cut amounted to some 307,000,000 feet, and it is predicted that with good weather this season the record will be passed. Last year the cut amounted to 202,000,000 feet of sawlogs, with about 19,000,000 feet of poles, ties, pulp, etc., bringing the total cut up to 221,000,000 feet. This year the cut will probably be over 300,000,000 feet, and it is estimated that the revenue from stumpage alone would amount to upwards of a million dollars.

A large timber lands deal has been completed in Nova Scotia. The transaction involves 15,000 acres of land in the counties of Pictou, Antigonish, Colchester and Hants. It is estimated that there are 45,000,000 feet of lumber on the properties, which were owned by Rood and McGregor, Ltd., New Glasgow, N.S.

The Nova Scotia Steel and Coal Co. have purchased the areas in Pictou county, which are at Sunny Brae, and J. C. Purdy, R. B. Atkinson, Amherst, and J. T. Cornell, St. John, have purchased the others, in which Mr. D. J. Purtell, Halifax, retains an interest.

Other Notes of Industry

The Abitibi Power and Paper Co., which now develops 20,000 horse-power at Iroquois Falls, Ont., and owns a model townsite, with a population of 2,500, is planning large extensions. The company is now turning out 300 tons of paper a day, and it is said that they will more than double the output and spend about $3,000,000 in additional mills, power development, etc.

Three real estate deals, involving an expenditure of $330,000, have been put through in Toronto. The Willard's Chocolates, Ltd., have purchased property on Dupont Street for $30,000, and will erect a $140,000 building, which is to be used as an ice cream plant. On the opposite corner to the Willard site the Ward Baking Co., of New York, have purchased a $150,000 site, and will erect a bakery at the cost of about $150,000. In the spring the Kinnear Wholesale Grocery Co. will erect on the north side of Dupont Street a $150,000 warehouse.

The Canadian Aladdin Co., Ltd., which manufactures ready-cut houses, a branch of the parent company in Bay City, Michigan, will erect a $70,000 plant on part of the property immediately south of the Henry Hope Co., Peterboro', Ont., which the city will give them, together with a fixed assessment of $5,000 for ten years, providing the ratepayers express their assent to the proposition, which will be presented to them in a sanctioning by-law at the January elections.

The Wiarton Casket factory, which has been lying idle for the past two years, has been bought by a syndicate of Wiarton, Ont., business men and will be turned into a furniture factory. The plant was, for a number of years, run as a furniture factory.

A Walkerville manufacturing firm, which will put up a big foundry, has purchased the E. Rinaud property on Sandwich Street, Amherstburg, Ont., alongside the Michigan Central Railway.

The Industrial Commissioner of the Canadian National Railways wants the co-operation of Sudbury, Ont., Board of Trade in inducing the United Charcoal Co., of Chicago, which proposes to establish a branch of its industry in the North Ontario country, to locate same at or near Sudbury and along the Canadian Northern Railway lines. Another industry, the Kersch Manufacturing Co., an American concern, whose chief product is curtain poles, has also written the board for suggestions as to location, inducements, etc. They require 16,000 square feet of land and suitable buildings.

Secretary H. Westoby, of the Guelph, Ont., Chamber of Commerce, has received a letter from the solicitor of the Jericks Manufacturing Co., of Massachusetts, who were contemplating locating in Guelph. The letter stated that the firm would very likely go to some place in Quebec, not far from the United States line, where labor was cheaper, and also power.

Announcement that arrangements have been made for a manufacturing company to erect a site on the Murray

THE SECRET OF SUCCESSFUL SALESMANSHIP

If the salesman has unlimited confidence in the company he represents and in the goods he is offering, it will not take long to communicate that confidence to the prospect. And this applies to Life Insurance more than to any other article. Agents of the Mutual Life of Canada meet with extraordinary success for that simple reason—they devoutly believe in Life Insurance and above all in "Mutual" Life Insurance. The Mutual Life has been conducted for fifty years exclusively in the interests of its policy-holders. The result is an unprecedented demand to-day for Mutual Life Policies. With the Mutual "the secret of successful salesmanship" is simplicity itself—the Agent knows that he has the Company and the Policy that the prospect NEEDS. The rest soon follows.

BE A MUTUALIST.

Can Always Be

WELL PLACED

Much desirable territory is ready for Agents who can deliver policies in satisfactory volume. Inquiries about localities will have careful attention.

Union Mutual Life Insurance Co.

Portland, Maine

Address: ALBERT E. AWDE, Supt. of Agencies.

[illegible] Brockville, Ont., in the coming spring was made at the annual meeting of the Board of Trade. The industry will employ about 100 hands, with an approximate pay-roll of [illegible].

The McClary Manufacturing Co., Wellington Street, Montreal, Que., is extending the plant now occupied. The approximate cost is $45,000.

The Sarnia, Ont., city council, at a brief special meeting this week, passed by-laws that will be presented to the people early in January for fixed assessment on the new Wills Lee Auto Corporation plant and that of the Lake Huron Steel Corporation. The fixed assessment on the Wills Lee plant will be at $150,000, while that of the steel corporation will be a fixed assessment of $300,000.

The Belleville city council will communicate with the Hydro Electric Power Commission, through the local manager, and inquire what is the Hydro's attitude toward the development of further power in this district, and whether there is any reason why power development should not be commenced at once from Ranney's Falls in order to relieve a situation that will become serious at an early date. Ranney's Falls are below Campbellford, with a drop of 48 feet, and a possible development of 10,908 horse-power, according to the report of the Commission of Conservation. All that power is now running to waste, while factories are asking for locations where there is power to supply their needs.

Western Industry

The Moose Jaw, Sask., Board of Trade intends to advertise the city's advantages. The board has made arrangements for the issuance of pamphlets descriptive of the city, its industries and opportunities, and the agricultural wealth of the surrounding districts.

Three large oil companies, the Standard, the Shell and the Anglo-Canadian, are strongly interested in the oil fields of the Great Slave Lake and Peace River districts, Alberta. By the end of next summer it is expected that the northern oil fields will have been tested to a large extent.

POST-OFFICE SAVINGS BANKS

During the month of August, 1919, withdrawals from the post-office savings banks exceeded deposits by over $700,000. The balance at the credit of depositors at the end of the month was $38,388,667. Details are as follows:—

AUDITORS' CERTIFICATE

We report to the Shareholders of The Royal Bank of Canada:

That in our opinion the transactions of the Bank which have come under our notice have been within the powers of the Bank.

That we have checked the cash and verified the securities of the Bank at the Chief Office at 29th November, 1919, as well as at another time, as required by Section 56 of the Bank Act, and that we found they agreed with the entries in the books in regard thereto. We also during the year checked the cash and verified the securities at the principal branches.

That the above Balance Sheet has been compared by us with the books at the Chief Office and with the certified returns from the Branches, and in our opinion is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us and as shown by the books of the Bank.

That we have obtained all the information and explanations required by us.

JAMES MARWICK, C.A.,
S. ROGER MITCHELL, C.A.,
of Marwick, Mitchell, Peat and Co.
J. W. ROSS, C.A., of P. S. Ross & Sons, } Auditors.

Montreal, Canada, 18th December, 1919.

GOVERNMENT AND MUNICIPAL BONDS

York Township Asking for $562,000—New Westminster Purchases Own Bonds—Three Ontario Municipal Sales—Other Notes

TWO issues of Ontario bonds, which were offered across the line, have met with a very favorable reception. Messrs. A. Jarvis and Co., who purchased last week the $3,000,000 5½ per cent. 10-year securities report that the entire issue has been sold. The issue of $3,000,000 5½ per cent. short-term bonds, maturing April 15, 1922, purchased by a Toronto broker last April, was taken over by the National City Co., Ltd., and offered in the United States. The underwriters state that the sale is meeting with fine results.

Three municipal sales were effected during the week—viz., Barton Township, Prescott and Russell Counties and Trafalgar Township. Instalment bonds were sold on about a 6 per cent. basis, while the straight term brought a price on a basis of approximately 5.90. New Westminster, B.C., for the first time invested sinking funds in its own bonds, to the amount of $36,000.

Two large issues are up for sale before the end of the year, Verdun, Que., asking for $225,000 on December 22, and York Township, Ont., asking for over $500,000 on December 29. Other small issues are also due this month. The following is a list of debentures which are offered for sale:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Alberta Schools	$ 23,000	6½	10 & 15-years	Dec. 22
Verdun, Que.	225.000	5½	20-years	Dec. 22
York Tp., Ont.	562,564	Various	Various	Dec. 29
Sherbrooke, Que. ..	342,500	Various	Various	Jan. 5
Nanton, Alta.	6,000	6½	10-instal.	Jan. 15
La Tuque, Que.	50,000	6	25-instal.	....

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	95⅜	95⅝
United Kingdom 5½% (Nov. 1, 1921) ..	95¾	96¼
United Kingdom 5½% (Nov. 1, 1922) ..	97¼	98
United Kingdom 5½% (Aug. 1, 1929) ..	95¾	96¼
United Kingdom 5½% (Feb. 1, 1937) ..	87½	88
City of Paris 6% (Oct. 15, 1921)	91¾	92¼
French Cities 6% (Nov. 1, 1934)	92¼	92½
Dominion of Canada 5½% (Aug. 1, 1921)	98½	99
Dominion of Canada 5½% (Aug. 1, 1929)	93¼	95¼
Russian Govt. Ext. 5½% (Dec. 1, 1921)	25	28
Russian Govt. Ext. 6½% (July 10, 1919)	25	29
Swedish Govt. 6% (June 15, 1939)	88	90

La Tuque, Que.—The town of La Tuque asks for tenders for sale of $50,000 of its debentures, with interest coupons, dated September 1st, 1919, maturing yearly up to September 1st, 1943, bearing interest at the rate of 6 per cent. per annum, payable semiannually September 1st and March 1st, at the offices of the Banque Nationale, at La Tuque, Quebec and Montreal.

Sherbrooke, Que.—Tenders will be received until January 5, 1919, for the purchase of the following debentures: $50,000 3½ per cent., maturing October 1st, 1940; $150,000 5 per cent., maturing November 1st, 1947; $142,500 5 per cent., maturing June 1st, 1939; interest payable on coupons half-yearly at Sherbrooke, Montreal and New York.

York Township, Ont.—Tenders will be received until December 29, 1919, for the purchase of many blocks of bonds, totalling $562,564.68, as follows: $211,314.68 6 per cent. 10-instalments, for local improvements; $38,600 5½ per cent. 25-years, for public school purposes; $60,000 5½ per cent. 25-years, for school purposes; $172,650 5½ per cent. 25-instalments, for public school purposes; $80,000 6 per cent. 25-instalments, for waterworks.

Debenture Notes

Orillia, Ont.—The town will issue debentures to the amount of $24,000 for waterworks.

Alliston, Ont.—Debentures will be issued to the amount of $8,000 for hydro-electric extensions.

Kenora, Ont.—At the coming elections ratepayers will be asked to vote on a by-law authorizing the raising of $25,000 for road improvements.

Toronto, Ont.—The expenditure of $4,000,000 on harbor works has been approved by the Board of Harbor Commissioners. Bonds to meet this expenditure were recently guaranteed by the city.

Penticton, B.C.—The municipal council is contemplating the passage of loan by-laws to raise $125,000 for expenditure upon the municipal irrigation system and $30,000 on the domestic water system.

Quebec, Que.—Authority has been given the city treasurer to issue treasury bonds to the amount of $100,000 to pay off a temporary loan to the Bank of Montreal. The bonds will be redeemed with the proceeds of the sale of the city property at the Palais.

Calgary, Alta.—Ratepayers have endorsed four money by-laws as follows: $350,000 for a sewage disposal plant; $278,316 for extensions to waterworks system; $155,978 to be added to another by-law for building a concrete bridge over the Bow River, and $155,000 for a fireproof hospital addition.

Fort William, Ont.—The following money by-laws will be submitted to the ratepayers at the January elections: $20,000 5 per cent. collegiate debentures; $10,000 5 per cent., 10-year memorial debentures; $10,000 5 per cent. 20-year market debentures. The council has authorized the temporary borrowing of $75,000 from the Bank of Montreal for collegiate purposes and public schools, on account of certain debentures authorized by by-laws 1923 and 1924. The bank asked for a by-law covering this loan. It is only temporary, and does not need popular endorsation.

Port Arthur, Ont.—The city treasurer received an offering of 93.25 for $150,000 5½ per cent. 10-year bonds, with accrued interest, payable half-yearly. At a recent meeting of the council the treasurer stated that there must have been some misunderstanding, as the city was only offering $150,000 in school bonds; they were not ten or twenty-year bonds, but were on the sinking fund basis. It was thought a higher bid could be got on a sinking fund basis. The mayor wrote advising the city treasurer to place the $150,000 on the market at once and call for tenders, but the treasurer, supported by the aldermen present, thought it would be better to hold them off for a month or two until the Algoma Street extension bonds were ready, which would mean an addition of $100,000, while the north end fire station would add another $7,000. He advised offering the whole in one block the middle of February.

Saskatoon, Sask.—That the school board be asked to consolidate their issues with the city and that arrangements be made whereby the city and school board go on the debenture market at the same time next year, was a suggestion adopted by the finance committee at its meeting last week. In connection with the proposal, a letter from the Bank of Montreal was read, proposing that the city sell its debentures through the bank. It was felt that the city could deal direct to good advantage.

The estimated requirements for December have been forwarded to the Bank of Montreal, and total $118,663.58, which includes $78,148.59 debenture interest due January 1, 1920. The amount of bank loan, 1919, is $369,550.25, balance in sinking fund $5,097.87 and balance in debenture fund $123,965.18.

The city has a bill with the private bills committee for consideration, which must be in force by the end of the year. Four by-laws, passed in 1913, authorized debentures which have not yet been sold. The Act prescribes that such shall be sold within four years of the by-law's passing. The city secured one extension of two years and now wants three more, bringing the time up to 1922.

Lethbridge, Alta.—The city stands to lose a considerable amount of money in the discount of debentures, as they become due, if the present exchange situation continues. There are $50,000 worth of interest coupons on bonds coming due towards the end of the month to be paid in New York. According to the present rate of discount on Canadian money on Wall Street, there will be a discount of 9 cents on every dollar, which would mean a loss to the city of $4,500.

Joliette, Que.—The city has sold $86,000 6 per cent. 5-year bonds to Messrs. Versailles, Vidricaire and Boulais at 100.25¼. Other tenders were:—

Credit Canadien, Ltd.	99.62
La Corp. des Obligations Municipales	99.60
N. G. Kirouac	98.22
Rene-T. Leclerc	98.16

Port Colborne, Ont.—Messrs. Wood, Gundy and Co. have purchased an issue of $80,000 5½ per cent. 20-instalment debentures at 94.73. The highest bid was put in by the National City Co., Ltd., who offered a price of 94.98, but, owing to a small deficiency, the debentures were refused. The following is the list of tenders:—

National City Co.	$75,984
Wood, Gundy and Co.	75,784
C. H. Burgess and Co.	75,608
A. E. Ames and Co.	75,520
Turner, Spragge and Co.	75,512
R. C. Matthews and Co.	74,848
Brent, Noxon and Co.	72,859

Sales of the Week

New Westminster, B.C.—For the first time in its history the city has invested sinking funds in its own debentures. The city council has ratified a deal by which $36,000 of the city's bonds, due in July, 1930, were bought in at 91.27. They are 5 per cent. bonds and at that discount will yield about 6.1 per cent. interest, this being much better than keeping the sinking fund in the savings bank.

Barton Township, Ont.—Messrs. T. S. G. Pepler and Co. have been awarded $11,920 5½ per cent. 20-year bonds, and $18,526 5½ per cent. 10-year bonds at 96.75. The following are the tenders:—

T. S. G. Pepler and Co.	$29,457
National City Co., Ltd.	29,298
Dominion Securities Corporation	29,294
C. R. Clapp and Co.	29,247
Macneill, Graham and Co.	29,109
Dyment, Anderson and Co.	29,070
C. H. Burgess and Co.	29,016
Turner, Spragge and Co.	29,016
R. C. Matthews and Co.	29,006
Wood, Gundy and Co.	29,005
A. E. Ames and Co.	28,960
Housser, Wood and Co.	28,938
United Financial Corporation, Ltd.	28,850
Brent, Noxon and Co.	28,737

Prescott and Russell Counties, Ont.—Messrs. R. C. Matthews and Co. have purchased $50,000 6 per cent. 25-year serial bonds at 99.85. The following bids were received:—

R. C. Matthews and Co.	99.85
Wood, Gundy and Co.	99.57
Brent, Noxon and Co.	99.06

Trafalgar Township, Ont.—Messrs. Wood, Gundy and Co. have been awarded $82,000 6 per cent. 20-instalment bonds at 100.07. The following are some of the tenders:—

Wood, Gundy and Co.	100.07
R. C. Matthews and Co.	100.00
C. H. Burgess and Co.	99.06

FEDERAL EXPENDITURE ON HIGHWAYS

Regulations have been approved by the Governor-General in Council, giving effect to the Canada Highways Act, passed at the first 1919 session of parliament. This Act appropriated $20,000,000 for construction and improvement of roads in the different provinces. The Dominion will pay forty per cent. of the cost, exclusive of overhead expenses. Each province must submit a five-year program, showing its plans for road building, before becoming eligible for a grant.

YIELDS ON INVESTMENTS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. Morrow & Jellett, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

NEWS OF MUNICIPAL FINANCE

Hamilton Finances Satisfactory—Montreal Revenue Increases Substantially—Assessment Revision in London—Readjustment of Taxes Chief Concern of Victoria

Brandon, Man.—The city has made a profit of about $28,000 on the sale of Victory bonds through the Imperial Bank of Canada.

Orillia, Ont.—Up to the last day for the 5 per cent. discount on taxes, over $151,000 had been paid, out of a total on the roll, including local improvement rates, of $181,000. About $7,500 comes off for discount, leaving about $20,000 still to come in. Last year a little less than $140,000 was paid in.

Hamilton, Ont.—It is estimated that Hamilton will end the year with a surplus of over $100,000. The city, with an actual revenue of $3,811,905 for the year is $134,699 better off than was estimated earlier in the year, as it was expected that the revenue would not total more than $3,677,206. Against this added income is a total of $25,483 for authorized expenditures, leaving a surplus of $109,261.

Montreal, Que.—According to figures supplied by assistant treasurer Collins, the revenue from realty taxes up to December 1, exceeds by $849,464 the amount for the whole of last year. The amount received in realty taxes, from September to December 1, was $8,696,622, as compared with $7,847,158 collected in 1918. Revenue from all sources so far collected during this year reaches the sum of $16,720,895.

In addition to the $8,696,622 already referred to, the city has collected this year arrears of the property assessments for 1918, amounting to $3,563,729. Further, the city has also collected up to December 1, the sum of $1,063,436 on the 1917 realty tax arrears. The corporation of Montreal has collected $28,074 on the 1916 property arrears. Some of this latter amount was derived from the sheriff's sales of property for unpaid taxes. Finally, the sum of $3,369,034 was taken in from January to December of the current year in water rates, business taxes, etc., all of which makes the grand total already given.

London, Ont.—Efforts are being made to adopt a different taxation system. Under the present system it is stated that the city is losing a large amount of money annually. During the last few years the percentage of the assessment in reference to the sale price has steadily decreased. A report prepared by the chamber of commerce some time ago showed that in some instances the property was assessed at a great deal less than half the selling price. This is true, not only of improved property, but vacant lots also. For some time this question has been discussed in aldermanic circles. It has been stated repeatedly in council and committee meetings that there is a great need of a change in the assessment. Assessment Commissioner Stephen Grant is now endeavoring to equalize the assessment as far as possible. It is reported that in many cases the assessment will be increased. The work will not be completed for some time.

The present system of income taxation assesses the income in one year based on the previous year's earnings, and the collection is finally made in the following year. This is said to be all right so far as people who are permanent residents are concerned, but the more or less transitory resident of the city is thus enabled to escape the payment of his due share of the civic burden.

Victoria, B.C.—In a statement made public recently, Alderman Sargent explained to a large extent, the tax conditions and the difficulties confronting the civic officials in that connection. "The city's experience to date in the money market indicates that our finances are o.k. Our general sinking funds are intact, and every cent of interest on our total indebtedness is met as it falls due, and the securities offered in the past year were bought up at prices which compare favorably with any municipal securities sold in western Canada during the year," he said. "Locally conditions are not so satisfactory, and the chief concern at the city hall for the past three years has been how to best readjust tax conditions, and the end is not yet.

"Arrears of taxes have been piling up at the rate of over half a million dollars yearly, and we have been falling behind in local improvement, sinking funds and current expenditures to a degree that is anything but reassuring. At the beginning of the present year there were accumulated arrears of taxes amounting to $2,510,387; we owed the bank $345,000 on current expenditure, and we were short $1,982,348 on local improvement sinking funds.

"These conditions have been brought about by the cessation of tax sales during the war, and the endeavor to collect more taxes from land than the reduction in value warrants. The chief obstacles now to a satisfactory reconstruction of the city finances as outlined, among other things, in a recent report of the finance committee of the city council, dealing with the present acute situation are: Collection of arrears of taxes and the burden of land levies.

"The city endeavored to collect $794,627 of arrears of taxes during the current year by the tax sale method, and was able to realize but $42,542 from the purchasing public. The balance, $752,084, had to be bid in by the city. The lands on which this last sum is owing are now paying nothing towards city management, and if they are not redeemed within the year they will revert to the city and cease to contribute anything toward the city's revenue. The owners of these lands lose their properties, and the remaining owners must make up the consequent shortage. These figures do not include the taxes that were paid before the sale began.

"The city council recently decided to seek legislation bringing the relief method up to date, with the reduction in interest on future instalment payments from 7 per cent. to 6 per cent., and we are now preparing to anticipate this legislation to the extent that owners may be able to arrange with the city treasurer to pay their arrears of taxes."

ANOTHER COMPANY WRITING FIRE INSURANCE

Messrs. Dale and Co., Ltd., have been appointed general agents for the Yang-tsze Insurance Association, Ltd., for the transaction of fire insurance business, and a license has been granted to the association for the province of British Columbia. The Yang-tsze is one of the old British companies incorporated in Hong-Kong and was established in 1862.

CHANGES IN BRITISH COLUMBIA BROKERAGE FIRM

Some changes have been announced in the firm of Burdick Bros. and Brett, Ltd., financial agents, with offices at Vancouver and Victoria, B.C. The company has disposed of all real estate and insurance interests to Messrs. R. E. Brett, R. H. B. Ker and B. R. Ker, and a new company under the name of Brett and Ker, Ltd., will be incorporated to carry on the business of real estate and insurance, and will continue to occupy the same premises in the Pemberton Block, Fort Street, Victoria. Burdick Bros. and Brett, Ltd., it is announced, will in the future devote attention to the stock and bond business only.

INVESTMENTS AND THE MARKET

Scotia Steel to Control Acadia Coal Company—Dominion Glass Issues First Report Since 1914—Sherwin-Williams Company Has Good Year

Stemwinder Gold and Coal Mining Co., Ltd.—A meeting of the shareholders of the company is called for December 3rd next, for the purpose of voting on a resolution which calls for the winding up of the company.

Winnipeg Electric Railway Co.—The city of Winnipeg's experts will check over the valuation of the company's holdings. The finance committee will not accept in whole the figures of the company or the Public Utilities Commission as to the appraisal without having their own expert go over them.

Nova Scotia Steel and Coal Co.—The company has acquired for $2,000,000 a controlling interest in the Acadia Coal Co., formerly owned by a Belgian syndicate, with head offices in Brussels. The deal was effected by Thomas Cantley, chairman of the board of the Nova Scotia Steel and Coal Co.; D. H. McDougall, president, and W. D. Ross, vice-president, who have been visiting Europe.

The change in ownership will make little difference in the actual operation of the workings, because the Acadia mines will continue to supply the New Glasgow steel works of the acquiring corporation as formerly.

Acadia Sugar Refinery Co.—Shareholders of the company have authorized the directors to issue debentures to the amount of $3,000,000 and a corresponding amount of preferred and ordinary shares. Interest on debentures will be at the rate of 7 per cent., and the securities will be issued at about 90 per cent. of par. With the debentures will go a substantial bonus of preferred and ordinary shares.

It is not the intention to issue in the meantime more than $2,000,000 of debentures. The new securities will be taken by American interests, and they will give the refinery an important New York connection. The control of the company will remain in the hands of the present shareholders, who will still have a voice of two to one in the direction of its affairs.

Brazilian Traction, Light and Power Co.—The following is statement of the earnings of the company, in milreis, for the month of October, 1919, and since January 1st, with comparisons:—

	1919. Milreis.	1918. Milreis.	Inc. Milreis.
Total gross earnings.......	9,980,000	8,052,000	1,928,000
Operating expenses	5,017,000	3,751.000	1,266,000
Net earnings	4,963,000	4,301,000	662,000
Aggregate gross earnings from January 1st	93,539,000	85,782,000	7,757,000
Aggregate net earnings from January 1st	48,596,000	44,141,000	4,455,000

The above figures are approximated as closely as possible, and will be subject to final adjustment in the annual accounts of the subsidiary companies.

Howard Smith Paper Mills, Ltd.—At a special general meeting of shareholders in Montreal this week the sale of the enterprise as a going concern to a new company, recently incorporated under the same name, was confirmed. About 90 per cent. of the issued capital stock was represented at the meeting, and the proposal recommended by the board of directors was adopted without a dissenting vote.

Under the conditions of the sale one share of 8 per cent. cumulative preferred stock of the new company, participating up to 10 per cent., will be given for each share of the 7 per cent. non-participating preferred stock of the old company, while holders of the old common stock will receive two shares of new for each one presently held by them. The new company undertakes to pay the common shareholders of the old company the dividend of 5 per cent. recently declared for the year 1919. No change in the management or executive is involved in the transaction.

Sherwin-Williams Paint Co.—The annual statement of the company for the year ended August 31st, 1919, shows that earnings, before providing for depreciation and interest on bonds, amounted to $990,919. After providing for depreciation of $125,830, bond interest $130,070, and preferred dividends $239,750, and after deductions for government war taxes of $144,497, there remained $350,769 as net earnings for the year, which are equal to about 8¾ per cent. on the common stock.

The sinking fund, started five years ago at $40,000, now amounts to $216,200 for the five years, and there is also in the hands of trustees cash and bonds of $78,528.

The amount carried to surplus is $350,769, making a total surplus of $2,684,051, to which should be added the special reserve fund of $100,000, making $2,784,051 available for dividends, or about 70 per cent. on the common stock. Reserves and surplus now amount to $3,546,030, a gain of $446,590. Corporations were burdened with expenses owing to the late war to the extent of about $200,000.

Dominion Glass Co., Ltd.—The profits of the company for the fiscal year ended September 30th, 1919, amounted to $631,724. As this is the first report made public by the company since 1914, no comparisons with last year are possible. Following deduction of bond interest, sinking fund requirements and preferred dividend disbursements amounting to $352,000, unchanged from 1914, there remained available for application to the common stock issue outstanding of $4,250,000 the sum of $279,724, compared with $273,748 at the end of the fiscal year of the company on September 30th, 1914, an increase of slightly less than $6,000. In the year dividends at the rate of 4 per cent. were paid, reducing the balance to $109,724, but profit and loss account shows balance carried forward from the 1918 period, amounting to $879,831, had been increased in the five-year period by $665,379, the total at the end of September last being $989,555. This made it possible for the directors to set aside $500,000 in order to create a new general reserve fund.

DIVIDENDS AND NOTICES

THE REAL ESTATE LOAN COMPANY OF CANADA, LIMITED

DIVIDEND No. 66

Notice is hereby given that a Dividend at the rate of Three and One-half Per Cent. for the half-year ending 31st inst. has been declared upon the Capital Stock of the Company, and that the same will be payable at the Offices of the Company in Toronto on and after 2nd January, 1920, to Shareholders of record of 18th December inst.

Toronto, 11th December, 1919.
By Order of the Board.
E. L. MORTON,
36 Manager.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and three-quarters per cent. (1¾%) on the Preferred Stock of the Dominion Textile Company, Limited, has been declared for the quarter ending 31st December, 1919, payable January 15th, 1920, to shareholders of record December 31st, 1919.

By Order of the Board.
JAS. H. WEBB, Secretary-Treasurer.
Montreal, 15th December, 1919. 42

THE STEEL COMPANY OF CANADA, LIMITED

ORDINARY DIVIDEND No. 12

Notice is hereby given that a dividend of one and three-quarters per cent. has been declared for the quarter ending December 31st, 1919, together with a distribution of three-quarters of one per cent. on the issued and fully paid Ordinary shares of the Company, making a total dividend of seven per cent. on the Ordinary shares for the year ending December 31st, 1919.

PREFERRED DIVIDEND No. 34

Notice is also given that a dividend of one and three-quarters per cent. on the issued and fully paid Preference shares of the Company has been declared for the quarter ending December 31st, 1919.

The above dividends and distribution are payable February 2nd, 1920, to shareholders of record at close of business, January 10th, 1920.

By Order of the Board.
H. H. CHAMP, Treasurer.
Hamilton, Ontario, December 11th, 1919. 37

EASTERN ONTARIO HYDRO-ELECTRIC

At a meeting held in Brockville, Ont., on December 8, attended by about 150 municipal representatives, the Eastern Ontario Hydro-Electric Municipal Union was formed. The object is to develop water powers and to furnish electricity at lowest possible rates.

DEBENTURES FOR SALE

CITY OF EDMONTON, ALTA.

Notice is hereby given that in view of the adverse financial market conditions, the city will not exercise its option as stated in a former notice to take up the following debentures:—

Issued Under By-Law.	Series.	Maturity.	Next Interest Due Date.
683	A	July 1, 1920	Jan. 1st, 1920
684	B	July 1, 1920	Jan. 1st, 1920
700 & 3 1918	C	July 3, 1922	Jan. 3rd, 1920
27 1918	F	July 15, 1923	Jan. 15th, 1920
2 1919	G	Feb. 15, 1924	Feb. 15th, 1920

F. BARNHOUSE,
34 City Treasurer.

TENDERS FOR $6,000.00 DEBENTURES

Tenders will be received by the undersigned up to January 15th, 1920, for the purchase of $6,000.00 Debentures of the Town of Nanton.

Said Debentures bearing 6½ per cent. interest payable in ten equal annual instalments of principal and interest.

33 WM ROBERTSON,
Town of Nanton, Alberta. Secretary-Treasurer.

Condensed Advertisements

"Positions Wanted," 2c per word: all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

EXPERIENCED appraiser and valuator open for engagement beginning of year with Loan, Trust or Mortgage Company. Can take coast to coast or Winnipeg west. First-class references. Box 245, *The Monetary Times*, Toronto.

BUSINESS MAN, going to New York latter part of December is willing to transact any form of business. References or bond furnished. Box 257, *The Monetary Times*, Toronto.

WANTED.—Inspector for Ontario for British Tariff Company. One with connection desired. Replies treated confidentially. Box 261, *Monetary Times*, Toronto.

NON-TARIFF COMPANIES SEEK CITY INSURANCE

Non-tariff insurance companies have offered to write up to $250,000 of Edmonton's insurance at $1.47 per thousand, as compared with the present schedule rate of $1.60 per thousand, on the annual schedule. The total to be written is about $800,000. Writing to *The Monetary Times* under date of December 5, D. Mitchell, the city comptroller, stated that it had not been decided what course to pursue.

The city's insurance for 1919, totalling $807,550, with a premium income of $15,064, was distributed among 47 local firms of brokers, receiving from ½ to 4 per cent. of the total; the city's brokers, Chauvin, Allsopp and Co., Ltd., received 20 per cent. Included among the brokers were two who represented non-tariff companies.

RECENT FIRES

Rapid Succession of Large Fires Follows Advent of Winter Weather—Month's Losses Will Probably be Large

Blenheim, Ont.—December 10—Residence of Robert Inch was completely destroyed. Cause unknown. Estimated loss, [illegible]. Insurance carried, $3,500.

Brown's Flats, N.B.—December 10—Residence of William [illegible] with contents was destroyed.

Burlington, Ont.—December 17—Cottage adjoining the Brant Hospital used as officers' quarters was damaged. Estimated loss, $2,500.

Cranbrook, B.C.—December 10—Slaughter house belonging to P. Burns and Co., with contents, was destroyed. Estimated loss, $15,000.

Duck Lake, Sask.—December 7—Bank of Montreal with contents, and the residence of the manager, at Duck Lake, were totally destroyed.

Fort James, B.C.—December 10—The Hudson Bay Co.'s store was destroyed.

Halifax, N.S.—December 10—Building of Bristers' garage and auto stores was destroyed. Cause unknown. Five automobiles and a motor truck were burned. Estimated loss, $35,000.

December 14—Building occupied by Messrs. George and Clifford Ramey, manufacturers of mineral waters was destroyed. Estimated loss, $5,000.

Huntingdon, B.C.—December 16—Residence of H. Irwin, on Fourth Street, was destroyed. Cause unknown.

Kitley Township, Ont.—December 9—The barn and smaller buildings on the farm of Elliott Ballantyne were destroyed. Eighteen head of cattle, one horse and 40 tons of hay were burned.

Mongolia, Ont.—December 12—Residence of Mr. Lehman, and the barn, stable and outhouses of John Lowry, were destroyed. Cause unknown. Partial insurance carried.

New Waterford, N.S.—December 11—Book store owned by Thomas A. Guy was destroyed. One death. Estimated loss, $5,000.

Outremont, Que.—December 10—Building of the Joffre apartments, situated at 1105 Bernard Street West, was damaged. Estimated loss to tenants, $1,600, and to building, $10,000, covered by insurance.

Peardonville, B.C.—December 15—Van Gueider shingle mill on the international boundary line was destroyed. The horses in the barn were saved but two automobiles were burned.

Petrolia, Ont.—December 13—Petrolia Town Hall was damaged. Supposed to have originated from a cigar or cigarette stub thrown under the stage. Estimated loss, $184, covered by insurance.

Sarnia, Ont.—December 15—Plant of the Asbestos Covered Metal Corporation was damaged. Cause unknown. Estimated loss, $25,000, covered by insurance.

Sault Ste. Marie, Ont.—December 16—Wholesale fruit and grocery storehouse of the Gamble-Robinson Co. was destroyed.

Souris, P.E.I.—December 12—Building occupied by James C. Ferguson's drug store and D. McEachern's barber shop, also an adjoining store and restaurant owned by M. J. Paquet were destroyed. Buildings occupied by Dr. F. S. MacDonald and H. Lavie, barber, were damaged. Estimated loss, $8,000, partly covered by insurance.

St. John, N.B.—December 11—Apartment house on City Road was destroyed. Two deaths.

St. Thomas, Ont.—December 13—Large cafe and boarding house owned by Wellington Hella, building owned by T. Finnegan, of St. Thomas, and two smaller buildings were completely destroyed. Several other structures were damaged. Cause unknown. Partially covered by insurance.

Toronto, Ont.—December 12—Two houses situated at 260 and 262 Rhodes Avenue were damaged. Cause, gas explosion. Estimated loss, $685.

Toronto, Ont.—December 16—Warehouse owned by Dominion Glass Co., Sudbury Avenue was destroyed. Cause unknown. Estimated loss, $100,000, covered by insurance. Residence of R. Sims, 330 Poulton Avenue, was destroyed. Cause unknown. Estimated loss, $3,500. Two buildings owned by C. Roebuck at 127 and 129 Chestnut Street were damaged. Estimated loss, $600.

Vancouver, B.C.—December 9—Building of the Hastings shingle mill, 1355 Powell Street, with one of the dry kilns and a quantity of shingles was damaged. Estimated loss, $1,000.

Woodstock, Ont.—December 9—The Ontario Garage was destroyed. Estimated loss, $15,000.

Woodville, Ont.—December 17—Knox Presbyterian Church was totally destroyed. Cause, thought to be due to overheating of new furnace. Estimated loss, $25,000. Insurance carried, $10,000.

ADDITIONAL INFORMATION CONCERNING FIRES

Brandon, Man.—Up to the end of October this year Brandon had twenty-four fires with a total loss of $11,690, according to the provincial fire commissioner's report. Brandon stands third in the province for fires. Winnipeg had 624 up to the end of October, St. Boniface thirty-four, St. James twenty-two, with a fire loss of $23,185, and Portage la Prairie had seventeen, seven less than Brandon, but with a loss of $42,067.

Kingston, Ont.—The fire loss for Kingston, from January 1 to December 15 of this year was almost $10,000 greater than for the entire year of 1918. According to the report of Fire Chief Armstrong, the loss on buildings up to December 15 this year was $30,538, while the loss on contents was $24,731, making a total of $55,270, as against $47,815 for the year 1918. Insurance on buildings in 1918 amounted to $1,108,200, as against $1,578,300 the previous year.

Moose Jaw, Sask.—December 2—The cooper shop of the Robin Hood Mills was damaged. Estimated loss, $12,000, fully covered by insurance. Slight damage was done to the adjoining property occupied by the Moose Jaw Furriers. Insurance carried, $4,000.

St. Malachie, Que.—December 4—Warehouse and grain elevator owned by Dorchester Co., Ltd., were totally destroyed. Estimated loss, $100,000. Insurance carried was as follows: Phœnix of London, $11,521; Home, $5,000; Liverpool-Manitoba, $5,000; Mount Royal, $7,500; Globe and Rutgers, $5,000; Connecticut, $5,000; Sun, $5,500; Yorkshire, $5,000; British Empire, $2,500; Canada, $5,000; National of Paris, $5,000; Strathcona, $2,500; Royal, $5,000; total, $69,521.

Timmins, Ont.—December 2—A business block, including P. McCormick, E. Bridger, J. R. Gordon, Tirrils, Theriault's tailor shop, Oddfellows' hall, Orangemen, Smith's Lunch, Fat's Lunch, was damaged. Estimated loss, $18,050. Insurance carried, $15,000. Insurance paid, $9,500.

Vancouver, B.C.—Fire Chief Carlisle submits the following report to *The Monetary Times* for the month of November:—

"The total loss by fire for the month was $3,308, of which amount, $3,023 was covered by insurance, leaving the property loss above insurance at $285. The total value of the property at risk was $1,072,600.

"The following shows the cause of fires for the month: Awning (carelessness with cigarettes), 1; backfire, carburetter, 1; carelessness with cigarettes, matches, etc., 1; defective chimneys, 2; defective fireplaces, 2; defective oil feed pipe, 1; electrical origin (defective wiring), 5; fire breaking out again, 1; overheated bearing, 1; overheated shaft, 1; overheated stove pipe, 1; rubbish fires, 1; smoke scares, 5; spontaneous combustion, 1; tar pot on fire, 1; wood left on top of boiler, 2; wood left in oven to dry, 1."

The following is the report for the eleven months ended November 30, 1919: Total value of property involved by fire, $12,555,515; total insurance carried, $6,124,793; total loss, $575,752; total insurance paid, $366,371; loss above insurance, $209,381. (All fire losses adjustments have been completed to date.)

Canadian Railways and Railway Statistics

Derivation of Railway Revenue—Passenger Business Grew Relatively Less in Recent Years — Increase in Rates More Than Absorbed by Higher Operating Expenses—Canadian Northern Expense Ratio Shows Big Jump—Other Conclusions From Latest Railway Figures.

By W. T. JACKMAN, M.A.

(Concluded from last week.)

THE sources of the railways' revenues are an important subject for our consideration, if we would obtain a true conception of the function which the railways fulfil in our national life. In order to see these in their proper light, we present the following table which shows for a nine-year period the percentages which the freight, passenger and other earnings bear to the gross earnings for the years mentioned.

Percentage of Gross Earnings for the Years

Sources.	1910.	1911.	1912.	1913.	1915.	1918.
Freight	67.54	67.07	68.35	68.99	66.3	69.1
Passenger	30.44	30.90	29.65	28.99	25.0	20.3
Other sources ..	2.02	2.03	2.00	2.02	8.7	10.6

The freight business is by far the most important source of the railways' revenues, amounting to about two-thirds of the total, and it will be seen that this proportion remains fairly constant throughout. On the other hand, the passenger revenues show a relative decline of one-third in the period between 1910 and 1918. Most of this change has taken place in the last few years, and may be explained, perhaps, by the high passenger rates which have been put into effect during the war to discourage passenger travel and by the phenomenal increase in the use of the automobile. Of these, probably the latter is the more significant of the two. But we must not base too confident assertions upon the statistics which are the indications of the troublous conditions during the war. We can be fairly certain that there has been a *relative* decrease in passenger business in the period shown and there are good reasons why this should be so; but in order to see things in the right perspective, we must also place alongside of the above another table showing the *absolute* changes in the amounts of freight and passenger revenues during recent years. In this table we include the last year of peace as a basis of comparison with the five years of war:—

Sources of Railway Earnings (omit cents).

Year.	Freight.	Index No.	Passenger.	Index No.	Other Sources.	Index No.
1913	$177,089,372	100	$74,431,994	100	$ 5,181,336	100
1914	165,753,730	94	72,564,203	97	4,765,605	95
1915	134,488,303	76	60,699,934	82	4,654,833	78
1916	185,806,167	105	53,097,642	72	22,984,843	102
1917	217,625,962	123	61,290,290	82	31,855,225	121
1918	231,813,388	131	88,192,056	118	10,214,704	129

Using the last entire year of peace (1913) as the base of our calculation and taking the figures of that year in each case as 100, we have derived our index numbers accordingly. From these we see that, during this last six-year period, the earnings from freight increased 31 per cent., the earnings from passengers increased only 18 per cent., and the earnings from other sources increased 29 per cent. While, therefore, there was a *relative decline* in passenger earnings there was an *absolute increase*; and, we learn, on competent authority, that the passenger earnings of the great railways in the fiscal year ended June 30, 1919, have been much larger than ever before, notwithstanding the high fares and the oppressive burden of the high cost of living which occupies such a prominent place in public attention.

A few words by way of comparison with the conditions in the United States may not be out of place. As a whole, the railroads of that country show practically the same percentages as the Canadian lines. But there are wider diversities there than here for particular roads, due to the greater density of passenger traffic in certain sections and greater density of freight traffic in others. The New York Central Lines pass through a more densely populated section than the Pennsylvania Lines, but the latter, east of Pittsburg, have an immense traffic in coal and heavy and costly manufactures. Consequently, while the New York Central Lines' freight earnings are only 59 per cent. of the total, those of the Pennsylvania Lines are 73 per cent. In the Eastern States, the New York, New Haven and Hartford Railroad Company, which depends largely upon passenger business, shows an average of only 50 per cent. for freight, while the Long Island Railroad, the traffic of which is confined to a very limited area, reported a freight percentage averaging but 28 per cent. of the whole. On the contrary, the Pittsburg and Lake Erie Railroad Company shows only a limited amount of passenger business, but its freight traffic goes up to 90 per cent. In Canada, we have variations like those of the United States but not to anything like the same extent, for population does not show the same concentration in certain sections and our industrial development is not upon the gigantic scale which is seen across the border. Moreover, our three great systems of railway are transcontinental and there is no segregation of their eastern from their western business, so that we have no statistics by which to compare the east and the west in this respect.

Some Are in Financial Difficulties

It is a common impression that, with the great development of traffic in this country and the increased rates which the railways have been permitted to charge, there must have been a proportionately great increase in the net returns to the companies. Yet two of our chief companies have been subjected to increasing financial embarrassment, until one has been taken over by the government and the other is being operated under a government receiver. To show some explanation for this state of things we have drawn up the following table showing the gross earnings, operating expenses and net earnings per mile for the last twelve years. We have taken this protracted period so as to get a good background for the present-day conditions. Then, in order

To simplify matters, we have used the year 1907 as a base and have represented the figures for that year as 100, so as to secure the index numbers for each subsequent year:—

Year	Gross earnings per mile (omit cents)	Index No.	Operating expenses per mile (omit cents).	Index No.	Net earnings per mile (omit cents).	Index No.
1907	$6,535	100	$4,620	100	$1,914	100
1908	6,397	98	4,672	101	1,724	90
1909	6,017	92	4,339	94	1,678	88
1910	7,033	108	4,868	105	2,165	113
1911	7,430	114	5,158	112	2,271	119
1912	8,209	123	5,639	122	2,569	134
1013	8,750	134	6,204	134	2,511	131
1914	7,893	121	5,811	126	2,081	109
1915	5,616	85	4,152	90	1,464	76
1916	6,943	106	4,823	104	2,120	111
1917	8,051	128	5,774	103	2,277	119
1918	8,493	130	7,046	153	1,447	76

This table puts before us some valuable data as a basis of certain conclusions which seem to be inevitable. While the gross earnings per mile increased 30 per cent., the operating expenses increased almost twice as much—namely, 53 per cent., and the net earnings suffered a reduction of 24 per cent.; in other words, while the gross earnings from operation increased by 30 per cent., the net earnings are only three-fourths of what they were in 1907, due to the fact that the expenses of operation have been increased by more than half what they were in that year. It cannot be wondered at, therefore, that, since operating earnings have increased only 30 per cent., while operating expenses have increased 53 per cent., there should be a state of decadence over the railway field as a whole. Of course, these greater operating expenses have been due to the fact that the increase in rates allowed did not begin to keep pace with the vastly higher prices paid for materials and higher wages paid to labor. Yet every time there has been an attempt on the part of the railways to secure an increase of rates, there has been a loud and voluminous outcry against it. Another important thing which is revealed by this table is the sudden changes which may occur in net earnings from one year to the next. Note the change in the index numbers for net earnings, for instance, from 88 in 1909 to 113 in 1910, and the still more spectacular changes from 109 in 1914 to 76 in 1915, and from 119 in 1917 to 76 in 1918. These facts indicate with intense emphasis that in the case of the railways there are abrupt changes from favorable earnings to very real distress.

Operating Ratio is Now High

One of the most valuable indexes in regard to railway operations is the operating ratio, that is, the proportion which the gross expenses of operation are of the gross earnings of operation. Knowing how much of the gross earnings is expended in the working of the property, we have a good guide as to the efficiency of the management; for if, under normal conditions, two roads traverse the same territory and have the same kinds of business, and the operating ratio of one is 70 per cent., while that of the other is 80 per cent., it is at once an indication that the former is managed with much greater economy than the latter. Similarly, if the average operating ratio of the railways of the country at one period is lower than that at another period, the indication is that the conditions for economical operation are more favorable at the former than at the latter period. To show the trend in Canada since 1875, we present the averages for all the railways as follows:—

Railway Operating Ratio by Periods

Years.	Average by 5-year periods.	Average by 10-year periods.
1875-1879	80.7	77.4
1880-1884	74.2	
1885-1889	72.8	71.9
1890-1894	71.0	
1895-1899	67.4	68.6
1900-1904	69.8	
1905-1909	72.1	71.2
1910-1914	70.3	
1915-1918	74.5	74.5

In the early years, the amounts of traffic offered to the railways, and consequently the gross earnings of the railways, were very small, while the expenses for upkeep of roadway, structures and equipment were large. It was inevitable, therefore, that the operating ratio should be high. In the first three years of our railway history, beginning with 1875, it was over 81 per cent., while in the first five years after that date, it was 80.7 per cent. But with the filling up of the country and the increase of traffic the revenues were augmented, the operating expenses began to decline, relatively, and, as a consequence, the operating ratio became lower and lower until the lowest point was reached in the last years of the century—in 1899 it was 65.3. Since 1900 the movement has been gradually upward, with occasional yearly relapses. In 1915 it was 73.9 per cent.; in 1916, 69.5 per cent.; in 1917, 71.7 per cent.; and in 1918, 83 per cent. This latter figure shows very clearly the vast changes during that fiscal year, as compared with previous years, in regard to higher wages and higher cost of materials. But if we look at the figures for 10-year averages, we note the steady decline in the operating ratio down to 1899 and the continuous advance since that time. These figures show clearly that for the railways the cost of doing business is steadily advancing and that their outlay for operation is increasing far more than the increase in their gross earnings. This is an additional confirmation of what we have already shown when considering the increase of operating expenses and the decrease of net earnings. It will be universally granted that this increase in operating ratio is not due to less efficient management of the railways as a whole, but is due to the fact that the earnings of the roads are no longer sufficient to pay the extremely high wages and prices required in the upkeep and operation of the properties and still keep net earnings that are high enough to tempt new capital into the field.

Comparison of Roads

Turning from the operating ratio of the railways as a whole, it is instructive to examine the facts in this respect for the five great systems of railway in the country. How do they compare with one another in regard to this vital point, the operating ratio? We have set down the facts in the following tabular form:—

Operating Ratio for the Years

Railways.	1913.	1914.	1915.	1916.	1917.	1918.
Canadian Pacific	57.8	68.2	66.3	62.8	65.9	74.2
C.N.R. system	70.6	68.7	82.6	71.1	71.7	87.4
G.T.R. "	69.1	72.3	75.8	73.5	71.9	84.9
G.T.P. "	89.1	92.1	110.8	84.8	103.1	105.3
C.G. Rys.	101.3	102.3	100.8	85.0	90.9	116.7

In the first place, the facts here shown for individual systems of railway confirm what we have shown above for the railways as a whole—namely, the great increase in the operating ratio, particularly for the last year for which we have complete statistics. From information privately gathered it is indubitable that this higher operating ratio was continued for the fiscal year ended June 30, 1919. Until the last few years any railway in Canada or the United States which showed an operating ratio above 69 or 70, had to justify that higher ratio in order to stand well in the eyes of the investing public; and it will be seen that the Canadian Pacific was well below that normal or standard. The Canadian Northern and the Grand Trunk usually approximated closely to this standard. But when we look at the figures for the Grand Trunk Pacific and the Canadian Government Railways we find that both these had an operating ratio far in excess of the others. In the case of the Grand Trunk Pacific, the line was put through long stretches of new territory, with only a small amount of traffic to offer, in order to open up these sections of the hinterland to settlement. It was natural, therefore, that the revenues of this line should be meagre, while at the same time a large expenditure was required for even the small amount of traffic. This would explain in a large measure the high operating ratio of this western line. As for the Canadian Government Railways, their high operating ratio is due to the fact that they are badly located for the development of traffic and for economical operation, that their rates have been kept too low, and that all the evils of patronage, political corruption and financial debauchery have been manifested in connection with them. It will be noted that, in the case of the Grand Trunk

Pacific and the Canadian Government Railways, their revenues have frequently been insufficient to meet even the operating expenses, much less pay any return upon the capital embarked in them.

Government Operating Cost is High

But one more fact must be noticed before we leave this subject, a fact which is very significant in the light of recent events, and one upon which the writer commented in *The Monetary Times* Annual, 1919. In the case of the Canadian Northern system, the highest operating ratio of which, up to 1917 was but 71.7 (except in the unfortunate year 1915, which was disastrous to all the railways), we note an enormous change in 1918 when the operating ratio jumped to 87.4. This was the first year of government operation of this railway system. In extenuation of this increase, it may be said that the operating ratios of, say, the Grand Trunk and Canadian Pacific, also showed great increases. This is true; but it is remarkable that the increase in the case of the Canadian Northern, in this first year under the government and with a large proportion of the old operating staff, should have been so much greater than in the case of its nearest competitors. We shall close this paragraph by asking the question: Is government management as efficient and economical as private management?

Rapid Growth Illustrated by Capital

Our final inquiry is in regard to the finances of the railways. From the table which is given below, it is apparent that there has been since 1900 an increase of outstanding stock amounting to 166 per cent., an increase of funded debt amounting to 142 per cent., an increase of total railway capitalization (stock and funded debt outstanding) of 154 per cent., an increase of gross earnings of 367 per cent., and an increase of mileage in operation of 120 per cent. These are very large increases in every case, when we think of the short interval in time, and there is no other country which can show a record so proportionately great. It must be remembered that in order to provide facilities for a population scattered over a country three thousand miles in width, there must be the outlay of enormous amounts of capital. As the country has been filling up and rapidly developing both in industry and agriculture, the railways have been under the necessity of increasing their terminal facilities, their rolling stock and the amount of double track; and with the increase of 54 per cent. in traffic density and 80 per cent. in train load since 1907, there has been the necessity of rebuilding large portions of roadway, laying heavier rails, especially on the main lines, reconstructing or reinforcing many bridges and providing heavier and more expensive cars and locomotives. All these things have been carried out at a time when wages have been increasing and the purchasing power of the dollar has been decreasing, so that the railways have had to expend large amounts to purchase the requisite materials and services for these improvements and extensions. Was it wise to spend such great amounts? We have been frequently told that Canada has overbuilt in the matter of railways. But it seems as if this were an entirely erroneous statement. It is true that we have had wasteful duplication of lines in some parts of the country and this kind of prodigality should have been and should be prevented. Nevertheless, when the country can show since 1900 an increase in gross earnings of 367 per cent., with an increase in capitalization of only 154 per cent., there is good reason for saying that there has not been an overdevelopment of railway facilities. Then, the capitalization per mile of line operated shows likewise very conservative financing on the part of the roads as a whole; for this was in 1900, $44,404 and in 1918, $51,438. Even at this latter figure we are still far below many of the lines in the United States in this respect.

The relative increase in the amounts of stock and bonds issued for purposes of capital is worth notice. Up to the year 1912, there was a considerably larger amount of bonds put out than of stock to take care of capital expenditures; and this movement in Canada seemed to run parallel to some extent to a similar trend in the United States. But by the issuing of large amounts of bonds there is an increase in the amount of fixed charges which must be paid if the roads are to remain solvent; and it is impossible to foresee what the conditions may be from year to year in the railway world. Since that time, beginning with the year 1913, a safer method seems to be in course of application—namely, the use of stock to a greater extent than bonds, so as to make the annual charges on this capital conditional rather than fixed. In this way it is easier to keep the roads from being bankrupt, since the fixed charges are kept down.

Lastly, what return have the stockholders received upon the amount of share capital they have owned? For the last six years, including the last pre-war year (1913) the figures stand as follows:—

Year.		Stocks, including debenture stock.	Net corporate income after payment of all fixed charges and operating expenses.	% net corporate income of total stock.	Amount of dividends paid, common and preferred.	Actual average rate of dividend on stock.
1913	....	$ 918,573,740	$59,697,011	6.4	$33,670,560	3.6
1914	....	1,026,418,123	38,712,916	3.7	37,240,120	3.6
1915	....	1,024,085,983	41,123,124	4.0	39,360,278	3.8
1916	....	1,024,554,370	68,813,546	6.7	43,503,785	4.2
1917	....	1,089,114.876	51,721,679	4.7	37,196,696	3.4
1918	....	1,093,885,496	18,328,228	1.7	37,207,877	3.4

From this table, it is seen that if *all* the net corporate income, which is available for dividends if the directors wished to apply them that way, were divided out in the form of dividends, the rates of dividend would have been 6.4 per cent. in 1913, 3.7 per cent. in 1914, 4.0 per cent. in 1915, 6.7 per cent. in 1916, 4.7 per cent. in 1917 and 1.7 per cent. in 1918. Even these rates would have been so low as to be in most cases utterly inadequate as a return upon capital. But when we find that the actual average rate divided upon the common and preferred stock ranged from 3.4 per cent. to 4.2 per cent., we see a good reason why railway enterprise in Canada fails to attract capital and why most of the railways are unprogressive and incapable of keeping pace with, to say nothing of being in the van, of the onward advance. Sooner or later we shall wake up to the fact that in the desire for progress we are pitilessly handicapped by a multitude of inefficient, if not derelict, railways, unless the near future should show an entire change of policy toward them.

Year.		Total stock outstanding.	Index No.	Total funded debt outstanding.	Index No.	Total railway capitalization.	Index No.	Gross earnings.	Index No.	Mileage in operation.	Index No.
1900	......	$ 410,326,095	100	$373,716,704	100	$ 784,042,799	100	$ 70,740,270	100	17,657	100

PERSONAL NOTES

Mr. F. W. Mo[illegible] has been elected to the directorate of [illegible] Co., Ltd.

Mr. John Baillie has been elected to the directorate of the Dominion Glass Co., Ltd.

Mr. C. H. Isard, of Bryant, Isard and Co., Toronto, has been elected a member of the Toronto Stock Exchange.

Mr. A. R. Boswell, superintendent of insurance and registrar of loan corporations for the province of Ontario, has resigned.

Mr. G. N. Jackson, a former president of the Winnipeg Board of Trade, and who has been prominent in many of Winnipeg's community service projects, has been appointed chairman of the Manitoba Minimum Wage Board.

Mr. G. A. Morrow has been appointed managing director of the Central Canada Loan and Savings Co. in succession to Mr. E. R. Wood, who will still continue as president. Mr. Morrow has been vice-president and assistant manager. Mr. A. B. Fisher, who has been secretary, becomes assistant manager. Mr. W. J. Hastie succeeds Mr. Fisher as secretary.

OBITUARY

Mr. J. Harrington Walker, son of the late Hiram Walker, founder of the distilling firm of Hiram Walker and Sons, Walkerville, Ont., died at the Hotel Biltmore, New York, last week. Mr. Walker had been in poor health for some time. He was 60 years of age.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks recently opened:—

Attercliffe, Ont. (Sub to Dunnville)	Canadian Bank of Commerce
Nelles Corners, Ont. (Sub to Cayuga)	Canadian Bank of Commerce
Mannville, Alta.	Canadian Bank of Commerce
Windsor, Ont. (Wyandotte Street East)	Canadian Bank of Commerce
Vancouver, B.C. (Homer St.)	Royal Bank

The Union Bank of Canada may locate in the Border Cities, Ontario, in the near future. Efforts are being made to secure a site there, by officials of the bank.

Mr. John Murray, manager of the branch of the Dominion Bank of Canada at Belleville, is retiring, and will be succeeded by Mr. Hall, of Dresden, Ont.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first three weeks of December:—

Canadian Pacific Railway.

	1919.	1918.	Inc. or dec.
December 7	$3,797,000	$3,480,000	+ $ 317,000
December 14	3,935,000	3,780,000	+ 155,000
December 21	3,715,000	3,731,000	— 16,000

Grand Trunk Railway.

December 7	$1,294,019	$1,379,502	— $ 85,483
December 14	1,341,590	1,385,902	— 44,312
December 21	1,255,059	1,494,406	— 259,347

Canadian National Railways.

December 7	$2,070,372	$1,714,173	+ $ 356,199
December 14	1,918,932	1,800,902	+ 118,030
December 21	2,002,317	2,095,401	— 93,084

BANK OF COMMERCE ANNUAL REPORT

In its annual report for the financial year ended November 29th, 1919, the Bank of Commerce assets are shown to have increased from a total of $440,310,703, as at 30th November, 1918, to $479,644,205 as at November 30th, 1919. Net profits for the year were $3,074,892, compared with $2,850,318 for 1918. In addition there was a balance of $1,444,842 brought forward, making a total of over $4,500,000. Dividends at 12 per cent. per annum required $1,800,000. The next largest item is $750,000 "to adjust British and foreign investments on existing exchange rates, not otherwise provided." The sum of $250,000 was written off bank premises, $150,000 for war tax on bank-note circulation and $120,000 transferred to pension fund.

A comparison of the statement of assets and liabilities with that of the previous year shows a general expansion of business. While circulation has dropped by $1,500,000, and demand deposits practically unchanged, savings deposits have increased from $202,148,245 to $241,916,674. Current loans in Canada have risen from $199,672,294 to $213,189,170. Other comparisons are:—

Liabilities.

	Nov. 30, 1918.	Nov. 30, 1919.
Circulation	$ 31,583,694	$ 30,047,659
Demand deposits	151,010,570	151,688,481
Savings deposits	202,148,245	241,916,674
Total deposits	353,158,816	393,605,156
Balance due banks elsewhere	10,322,592	8,727,208
Acceptances under letters of credit	13,048,927	14,866,446
Liabilities to shareholders	31,444,842	31,427,735

Assets.

	Nov. 30, 1918.	Nov. 30, 1919.
Gold and silver coin	$ 15,686,046	$ 15,425,252
Gold in central gold reserve	6,500,000	6,500,000
Dominion notes on hand	28,785,117	31,436,349
Dominion notes in central gold reserve	11,000,000	10,000,000
Total coin and notes	$ 61,971,163	$ 63,361,602
Notes of other banks	2,293,472	2,433,211
Cheques on other banks	15,701,358	14,372,830
Balances due by banks elsewhere	8,267,187	10,589,390
Dominion and provincial government securities	36,165,259	46,865,379
British, foreign and colonial public securites and Canadian municipal securities	29,884,242	29,847,537
Call and short loans in Canada	13,843,130	20,750,828
Call and short loans elsewhere	28,018,919	24,854,885
Current loans in Canada	199,672,294	213,189,170
Current loans elsewhere	17,617,641	24,938,269

GOVERNMENT BOND QUOTATIONS

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	95⅜	95⅝
United Kingdom 5½% (Nov. 1, 1921)	95½	96
United Kingdom 5½% (Nov. 1, 1922)	96⅜	96⅝
United Kingdom 5½% (Aug. 1, 1929)	95	95½
United Kingdom 5½% (Feb. 1, 1937)	87½	88
City of Paris 6% (Oct. 15, 1921)	92½	93
French Cities 6% (Nov. 1, 1934)	92⅛	92½
Dominion of Canada 5½% (Aug. 1, 1921)	98	99
Dominion of Canada 5½% (Aug. 1, 1929)	93½	94½
Russian Govt. Ext. 5½% (Dec. 1, 1921)	22	23½
Russian Gov. Ext. 6½% (July 10, 1919)	22	24
Swedish Govt. 6% (June 15, 1939)	89	90

THE BANK CLERKS' UNION

LABOR organizers have been endeavoring for some weeks past to form unions of bank clerks in Montreal and Toronto. The meetings have been well attended, but comparatively few have joined the new organizations. It is no secret that during the past two or three years bank employees have shared the discontent which has been widespread, and trades unionism, following up its success in the field of manual work, finds this an opportune time to try to strengthen itself by bringing in clerical workers. Thus far no attempt to organize bank clerks has succeeded, though a considerable one was made about 1911. Because of the large amount of purely clerical work, and the fact that the different stages are fairly standardized, success seems quite possible.

But when we go back to examine what has caused the growth of trades unionism, certain differences between factory work and that of bank clerks are apparent. Trades unions arose as the step from the employed to the employing classes became increasingly difficult. This was the result of the organization of industry on a large scale; considerable capital was required, coupled with skill and experience in management, finance and marketing. The manual work, on the other hand, became simpler rather than more difficult, because the factory worker as a general rule did not even understand the machine which he operated, much less the wider conditions under which the business was conducted. Formerly, the ambitious workman passed from the stage of apprentice to that of journeyman, and from that of journeyman to that of master workman, with little difficulty, because each stage trained him for the next. The new situation meant that he would always be an employee, and in recognition of the fact that all factory workers, and more especially those in a single industry, had interests in common, trades unions were organized and thrived.

This condition is not found in banking, where there is a direct path of promotion from the lowest to the highest rank. Earnings in the earlier years of service are lower than the wages of unskilled labor, because the later years bring indefinitely greater rewards in proportion to ability. The same condition holds good in the clerical departments of other lines of industry as well as in mercantile and financial institutions. Banking work can also be carried on to a comparatively advanced age, and in Canada pensions are provided for retired employees. Considering the early age at which beginners are employed, and the fact that only a mediocre education is required, the financial rewards compare well with those of other occupations. Where a future is assured by certainty of employment, as in the service of the government and of such large financial institutions as the Canadian banks, earnings in years of prosperity may not be so large as in other lines of endeavor, but over a long period they may be as good if not better.

It is curious to see a labor movement in the banking field, because banks are institutions for the collection and investment of capital. The threat of a tying up of banking service because of a strike would also be a novelty to the public mind. Perhaps it would not be an unmixed evil, however, as the public is always prone to underestimate the usefulness of institutions which have become such an essential part of everyday life.

NOVEMBER BANK STATEMENT

THE summary of chartered banks' statements to the Dominion government for November shows a decrease of $125,000,000 in saving deposits. This is, of course, due to Victory Loan payments. During the 1918 Victory Loan month, a decrease of $137,000,000 was recorded. Other comparisons from the statement, which will be printed in detail next week, are:—

	Nov., 1919.		Changes from Oct., 1919.
Note circulation	237,547,162	+	1,069,683
Demand deposits	728,657,589	+	23,377,348
Notice deposits	1,137,858,277	—	124,888,707
Total deposits in Canada ..	1,866,515,866	—	101,511,359
Dominion notes	178,880,842	+	13,483,553
Call loans in Canada	121,754,469	+	21,205,079
Call loans outside	169,626,880	+	11,432,795
Current loans in Canada ..	1,189,408,523	+	84,408,363
Total assets	3,100,138,639	+	132,539,791

INTERNATIONAL LABOR CONVENTIONS

THE International Labor Conference which closed on November 29th, after sitting continuously for a month, was one of the most notable economic events of recent years. Originating in the peace treaty, and called together by the United States government as stipulated in that treaty, it may pass into history as merely an important experiment, or on the other hand it may be the beginning of an international organization of vast influence in the economic sphere. In any case, the organization of a permanent body was completed, and certain conventions were adopted. The latter will not be submitted to the legislative authorities in the countries concerned, and the initial success of the conference depends to a large extent upon the treatment they receive. Canada played a prominent part in the conference; this was partly the result of present industrial conditions in the United States, which diverted the attention of the United States representatives, who would normally have taken the lead in upholding the views derived from our common experiences on this continent.

The principal convention adopted was the eight-hour day or forty-eight-hour week. So many exemptions were provided, however, as in the case of seasonal industries, that this measure is scarcely radical. Either the eight-hour day or the forty-eight-hour week now obtains in a good proportion of the industries in Canada and the United States to which this convention will apply. It was this question, however, which led the delegates into a careful examination of comparative conditions of production in the numerous and varied countries represented, a study which has hitherto been confined to the economic theorist and the heads of great international industries. The reasons for variation in costs were investigated, in a broad way, including living standards, natural resources, and the extent to which the most modern methods had been adopted. Some light was thrown on the economic forces which determine trade balances, and leadership of countries in certain industries.

While labor leaders view the results as a step in advance, the public as a whole is not yet certain whether they will be beneficial. Consumers have found too often that a labor victory means another slice out of the dollar, and when all have adjusted their income to the new living costs it is found that nothing has been gained. International competition proved an insurmountable obstacle in the path of labor, for when the margin of profit had been reduced to a minimum, a further step could mean only a cessation of production and consequent unemployment. In other words, international competition required each nation to exchange a certain minimum of product in return for the dollar, and thus maintained a standard of production in proportion to cost. The enforcement by international convention of new conditions of work might counteract this competition, but it would be at the expense of a further reduction in the purchasing power of the dollar. It would set up a maximum rather than a minimum standard, limited by the ability of the most successful nation producing under the conditions defined.

WORLD WHEAT SUPPLY BELOW AVERAGE

STATISTICS which arrived a few days ago, by cablegram from the International Institute of Agriculture in Rome, indicate that wheat production this year is below normal. The total production of wheat in 1919 in Denmark, Spain, France, Great Britain, Italy, Netherlands, Rumania, Switzerland, Canada, United States, India, Japan, Algeria and Tunis is 2,074,753,000 bushels, against 2,238,100,000 in the same countries in 1918, and 2,150,000,000, their average annual production in the five years, 1913-1917. The production of rye in Denmark, Spain, France, Italy, Netherlands, Rumania, Switzerland, Canada and the United States is 189,104,000 bushels, against 189,500,000 in 1918 and a five years' average of 150,050,000.

The production of barley in Denmark, Spain, France, Great Britain, Italy, Netherlands, Rumania, Switzerland, Canada, United States, Japan, Algeria and Tunis is 598,000,000 bushels, against 678,000,000 in 1918, and a five years' average of 602,000,000. The production of oats in the same countries as for barley is 2,034,340,000 bushels against 2,402,000,000 in 1918, and a five years' average of 2,233,000,000. The production of corn in Spain, Italy, Rumania, Switzerland, Canada and the United States is 3,126,194,000 bushels, against 2,723,000,000 in 1918, and a five years' average of 2,995,000,000.

The production of potatoes in England and Wales, Scotland, Netherlands, Italy, Switzerland, Canada and the United States is 792,638,000 bushels, against 900,800,000 in 1918, and a five years' average of 765,800,000. The production of flaxseed in Italy, Rumania, India, Canada, United States and Japan is 26,340,000 bushels, against 42,700,000 in 1918, and a five years' average of 43,500,000.

EXCHANGE RATES AND GOVERNMENT BUSINESS

BECAUSE of the fact that charges for postal notes and money orders were nominal, having been fixed when exchange varied only slightly from par, the Dominion government has found it necessary to alter its regulations since New York exchange has risen so high. Government orders were utilized to an abnormal extent for sending funds to the United States, whereas when payments were coming this way the sender, if he was wise enough, bought a draft on Canada at a discount. Earlier this month the sale of money orders to the United States was stopped, but they have now been resumed, at the following enhanced scale of charges, based on a premium of 8¾ per cent: For sums not exceeding $2.50, 20c.; $5, 40c.; $10, 85c.; $15, $1.30; $20, $1.70; $25, $2.15; $30, $2.60; $35, $3.05; $40, $3.45; $45, $3.90; $50, $4.35; $55, $4.80; $60, $5.20; $65, $5.65; $70, $6.10; $75, $6.55; $80, $6.95; $85, $7.40; $90, $7.85; $95, $8.30; $100, $8.70. Postal notes are not yet being issued.

There is another effect of the exchange situation which is being considered by the government; this is the way in which the calculation of customs duties at par of exchange enhances or lowers the degree of protection, according as the exchange on a country is below or above par. For instance if goods invoiced at £100 are imported from Great Britain, the cost, exclusive of duty, is about $412. If the rate of duty were, say, 30 per cent., the amount would be 30 per cent. of $486, or $146, which works out at over 35 per cent. of the actual value of the imports. Goods invoiced at $100 and imported from New York would cost about $108 at the present rate of exchange, and duty at 30 per cent. would amount to just $30, which is about 27.7 per cent.

These effects of methods of calculating customs are, of course, quite apart from the vastly greater advantage enjoyed by the country, whose exchange is at a discount. The low quotations of sterling, for instance, encourage purchases in Great Britain, while the premium on American funds reduces our purchases across the border. Thus the customs calculations affect only in a small degree the effects of the exchange rates themselves. When these points are considered, there does not appear to be any ground for changing the method and calculating duties on the basis of current rates of exchange, as was urged by the council of the Montreal Board of Trade in a discussion with the finance minister on December 22. The fluctuations of exchange are so rapid that no uniformity and accuracy could very well be maintained. The United States adheres to the custom of calculating at par of exchange, although it is interesting to note that the current rate is used as the basis in Jamaica.

A new low-price chain of stores is to be started in Canada early next year. A similar chain will be established in the United States at the same time. The Canadian company is the L. R. Steel Co. and has purchasing offices in Toronto. It is proposed to sell articles at prices up to one dollar.

HIGH PRICES NOT DUE TO HIGH PROFITS

Commerce Board Points Out General Rise in Costs to all Producers—Farmers Have Had Best of It

IN a further statement in explanation of its objects, after three months of experience, the Board of Commerce emphasizes that high costs are unavoidable. The statement says:—

"It is thought desirable that this board should once more point out that its functions under the fair prices part of the acts establishing it are principally to consider whether profits made on the sale of the necessaries of life are excessive. It is entirely erroneous for anyone to suppose that the function of the board is to reduce legitimate costs. The high cost of living is not necessarily made up of excessive profits. That cost is necessarily high because of the extraordinary demand there has been for all commodities during and since the war, and particularly because of the extended foreign demand.

"As is readily seen, the costs of all our imports are extraordinarily higher. Our wheat and the numerous products based thereon have been and are at high figures. Animals and animal food are affected accordingly and the prices thereof likewise keep step therewith. The scarcity and high price of certain classes of labor play their own part in all this. It must not be overlooked that in a certain sense the foreign demand is beneficial to the extent of any surplus that the country may have to spare. The trouble is that we have been shipping more than our legitimate surplus and that the home consumer has been forgotten in the endeavor to take advantage of the foreign demand. The foreign demand, of course, benefits Canadian trade and production. The Dominion government has set up agencies whose special object is to encourage to the utmost the supplying of the foreign demand and thereby improving the Dominion's financial position and the position of its manufacturers and producers. These strong agencies of the Dominion government are insistent in season and out of season in promoting the export of our natural products, including all the things which are known as necessaries of life.

"The result inevitably is to force up the price of supplies to the home consumer. The producer wants the high price, and if he does not get it at home he will get it abroad. So far the consumer's position has not been such that an embargo would be placed upon any commodity merely to keep down price for the home consumer. When embargoes have been hinted at there have been outcries from the manufacturing and producing elements.

"This board has not the power to place a general embargo upon necessaries of life, even those of the most ordinary type of which there should in this country of agricultural effort be ordinarily a superabundance. The very suggestion on one occasion from an outside source that the board should embargo a certain class of farming product met with denunciation.

Can't Bring Prices Down

"One of the difficulties that the board faces is that if it fixes profits on native products such as those of the farm and dairy there will be a rush of these goods to the seaboard and the local demands may not be met at all or may be so reduced that distress will be caused. So what with the high prices of foods and the existence of the foreign demand, it is unreasonable to expect this board to do very much in keeping down prices of anything that may be shipped abroad, which, as a matter of fact, includes everything that comes under the head of necessaries. Almost everything that is made in Canada to-day can be shipped out at a high price to foreign markets. It is largely because of that that we at home have to pay so high.

"The huge loans that have been floated in this country by the government have had their effect on prices in a way that perhaps has not been recognized. One of the chief inducements in the canvass for subscriptions was that every dollar would be spent in Canada. That can be read together with the Canadian trade commission's efforts. Huge credits have been extended to foreign countries by the Dominion on the terms that they would spend the money in Canada. This meant that these countries were buying from Canada the very products that are to us necessaries of life, and so we have, in the interest of our producers, in fact, created the foreign demand which has made living so costly to the Canadian citizen. It is not at all presumed to find fault with this condition, but this board points to this material fact as constituting a very strong factor in the increase of prices to the home consumer at the present time.

"What with the high price of wheat and of mill feeds and the creating of the foreign demand for all products it is hopeless for some time to expect any relief from present price conditions. The cost of labor which enters into all production is itself made exceedingly high because of its own cost of living, which cost is forced up in the same way. Our manufacturing, distribution, and producing classes are benefiting from this state of affairs. The farming producer should have the least objection to make. He has had for years now unequalled high prices. His purchases for necessaries are, in the nature of things, lower than those of the citizen in other walks of like. He has been the least affected by the war in any of its phases, yet when the slightest approach has been made to touch upon the price of commodities which originate with him, there is an immediate outburst of protest. In the history of the board of commerce so far, these protests have been based upon imaginary facts. There have been absolutely no foundation for them. The board has been charged by the farmer representative with doing things which were never in its mind, but these are merely indicative of the attitude of producers in that direction. Distributing classes at home, e.g., retailers, are not profiting by the conditions of things, but the manufacturer and exporter who can take advantage of the foreign demand is greatly benefited. The only benefit to the state is heavy taxation of tion of the law."

"In view of all these circumstances it will be seen that the causes of present high prices are in present conditions natural and that these prices will be stable until radical economic changes take place both at home and abroad. It is the policy of this board, however, that whenever it is found that advantage is taken of any of the aforesaid conditions to demand extorionate prices there shall be a drastic application of the law."

BANK OF TORONTO STATEMENT GOOD

In keeping with the growth registered by other banks, the financial statement of the Bank of Toronto for the year ended November 29th, 1919, shows an increase of $9,000,000 in assets. Net profits for the year were $1,011,359, compared with $844,402 last year, a gain of $166,957. Total deposits have increased from $79,039,274 to $86,712,997. This increase was about evenly divided between interest-bearing and demand deposits. Immediately available assets have risen from $47,018,174 to $49,911,625, and are now 51 per cent. of the bank's liabilities to the public. Last year the percentage was 53, the large increase in deposits slightly changing the ratio. Cash and gold reserves have grown from $13,922,182 to $14,705,222. Commercial loans have kept pace with other forms of expansion, and reflect participation in the country's active business conditions, the figure now being $54,077,641, compared with $49,168,819 a year ago.

There are few changes of importance in the profit and loss account apart from the larger profits and increased dividend. Early in the year the bank increased its dividend from 11 to 12 per cent., hence the distribution to shareholders for the year amounted to $600,000 instead of $550,000. The sum of $100,000 is reserved for federal tax. The amount for officers' pension fund stands unchanged at $25,000. Patriotic subscriptions were $18,000, compared with $36,200 last year, while the amount written off bank premises is $100,000 as against $110,884. There is a good increase in the amount carried forward to next year, which is $793,983, compared with $625,623.

LIFE INSURANCE AND COMMODITY PRICES*

A Discussion Before the Life Agency Officers' Association,
Chicago, November 11th, 1919

By Philip Burnet,
President, Continental Life Insurance Co., Wilmington, Del.

THE accompanying chart suggests that some sort of relation exists between the production of new life insurance and the trend of commodity prices. It will be noted from the chart that the amount of new life insurance annually issued in this country from 1860 to 1880 parallels with remarkable accuracy the rise and fall of commodity prices during the same period. The only notable exception is for the years 1864-5, when prices rose more sharply than the amount of new insurance. You will also note practically the same phenomenon for the years from 1913 to 1919, inclusive. Prices rose in much the same way as they did from 1860 to 1866, and the amount of new life insurance increased in a similar manner.

It is yet to be determined what, if any, is the casual relation between the two sets of phenomena; if there is such a relation, then it would follow that an attempt to forecast the trend of life insurance production would resolve itself largely into an effort to predict the trend of prices.

The Trend of Commodity Prices

Taussig says that "what determines prices in a highly developed community is the relation between the quantity of goods and the quantity of purchasing power in terms of money."† From this it would follow that an increase of purchasing power or a decrease in the quantity of goods would raise prices; and, conversely, that a decrease of purchasing power or an increase of goods would lower prices. Let us see, then, if we can make any sort of a guess as to whether purchasing power and goods are likely to increase or decrease.

Purchasing Power

Our banks either own or are carrying for their customers approximately 6,500 millions of war bonds.‡ As borrowers pay off these loans, or investors buy the bonds from the banks, deposits will be reduced to a like extent, thereby decreasing purchasing power. But the Federal Reserve Bank of New York reports that the credit released by the liquidation of government securities has been promptly absorbed by the demands of production or distribution, or of the speculation in commodities, securities and real estate, which is taking place practically all over the country.§ Moreover, the government itself is not yet through borrowing. Disbursements exceed revenue; the only way to meet the deficiency is by further borrowing, which, although decreasing, is likely to continue for some time.

On the whole, therefore, it does not seem that the total purchasing power in terms of money is likely to be reduced

---

Bankers in Great Britain: The London Joint City & Midland Bank, Limited The Royal Bank of Scotland

in the near future. On the contrary, it may be further enlarged by the continued expansion of credit, which appears to be limited only by the desire of borrowers for credit [illegible] and the capacity of our gold reserves to sustain it. This is implied by the Federal Reserve Bulletin for October, which says: "There is no ready method in Reserve banking by which the use of reserve facilities can be withheld from use in undesirable lines of activity without also being withheld from use in desirable lines. The problem of controlling the volume and uses of credit in a country with so much diversity of interests and business temper as the United States is far from simple and far from certain of solution.

Now, if there is no check to expansion, save the capacity of our gold reserves to sustain a larger credit structure, then with the legal requirement for reserves fixed at 35 per cent. for federal reserve deposits and 40 per cent. for federal reserve notes, our existing reserves are sufficient, it seems to me, to sustain a further expansion of at least 25 per cent. of our total bank deposits and money in circulation.

From this it would follow that if expansion continues, as appears likely, and the quantity of goods does not increase, we may expect prices to rise approximately 25 per cent. above their present high level before they reach their highest point. If, however, the quantity of goods also increases, that should check the rise in prices; on the contrary, if the quantity of goods should decrease, the rise in prices may be accelerated. Let us see, then, what is likely to happen to the quantity of goods.

The Quantity of Goods

For the first eight months of this year we exported more than 3,000 million dollars of goods in excess of our imports. That large balance in our favor was paid for, not in cash, but in foreign securities which foreign governments gave to our government. But that arrangement practically ceased in June. The foreigners must now pay us for our exports either in goods, gold or securities; and since they can spare few goods and no gold, and their securities do not appear to find favor with our investors, the foreigners are no longer able to take our commodities in the previous quantities, with the result that for the month of September our exports fell off sharply, imports increased to the largest figures for any single month in the history of the country, and our exports, over and above our imports, dropped to the smallest figures, with but two exceptions, for any single month since the war started.

Exports are likely to be still further curtailed and imports increased until we actually import more than we export. In fact, Europe already owes us such a tremendous sum that she must send us every year some five or six hundred millions of goods in excess of what she receives from us merely in order to pay the interest on her debt to this country.

Consequently, instead of continuing to send abroad some three or four thousand millions a year in excess of our imports, as we have been doing, we may keep our whole product at home, besides having it supplemented for us to the extent of five or six hundred millions from abroad. This is equal to an addition of from 3,500 to 4,500 millions of goods each year to our own stock in this country, provided the production of goods in this country is not reduced.

On the other hand, the labor situation is such that production may be reduced by an amount at least equal to our saving in exports. Of course, if labor gets wholly out of hand, almost anything may happen, but I suspect that our large producers are quite willing to have production reduced at a time when our foreign market is cut off by Europe's inability to pay for our goods, and, therefore, that concessions will be made to labor to whatever extent may be necessary to keep production at such a point as will cause prices to approximate the figure that will yield the best returns to industry.

The Relation Between the Two

It would seem, therefore, that since the quantity of purchasing power in terms of money is likely to increase some 25 per cent. and the quantity of goods is likely to remain, for the time, more or less stationary, we should look for an increase in prices of about 25 per cent. above their present level before the maximum is reached. But rising prices may stimulate production; if so, the increase in goods may check the rise in prices, so that prices, instead of rising 25 per cent. above present levels, may be checked after a rise of 10 per cent. or 15 per cent. This, however, is likely to take a year or more before it is worked out.

Meanwhile Europe will be gradually getting on her feet, reorganizing her industries and increasing her production of goods. Our high price level should attract those goods to this market and our imports should increase, thus increasing the quantity of goods in this country, and consequently causing prices to fall. Moreover, we shall have to pay for those increased imports in gold; this should force a contraction of our enlarged credit structure and reduce the quantity of purchasing power, thus causing prices to fall still further. This fall in prices should continue until our price level reaches an equilibrium with the price level in gold in other countries when imports should be checked, the outflow of gold stopped, and commodity prices pegged at about the world level of prices on a gold basis, whatever that may prove to be.

This movement, instead of being worked out in one or two years, is likely to continue several years; its duration depends largely on how rapidly Europe can be reorganized so as to be able to offer substantial quantities of goods in our market. Then, when prices in this country have found an equilibrium with world-prices, we may expect them thereafter to fluctuate only within relatively narrow limits, barring, of course, the recurrence of such disturbing influences as war, famine and pestilence, or radical changes in the social structure.

Conclusions

On the whole, therefore, it seems to me that we may expect prices to continue to rise for a year or more, then steadily to decline for several years, and after that to remain more less stationary. If life insurance production continues to follow the trend of commodity prices, as it has done before, then we ought to have a year or more of good business, followed by several years of declining business, and then a gradual but steady improvement resulting from the natural growth of population and the increasing popularization of insurance.

If this prediction proves correct, the European war will have resulted in much the same kind of an experience as we had during and after the Civil War, when the production of life insurance increased rapidly throughout the war period and for four years thereafter, declined steadily for the next ten years, and then started on a gradual up-grade which has continued ever since, barring slight reactions following the financial panics of 1893 and 1907, the investigation of 1905, and for a short time after the outbreak of the European war. Of course, all this is highly speculative. I give it to you not as a prophecy arising from any fixed conviction, but merely as what seems to me most likely to happen.

Trade Relations With the West Indies*

Free Trade Connection Between Canada and Southern Islands Would Lessen Dependence on United States — Present Tariff Might Become British Preference, and General Rate Increased.

By T. B. MACAULAY,

President, Canadian and West Indian League

TRADE co-operation between the different parts of the empire was always desirable, but a crisis has now been reached which makes it essential. The United Kingdom, Canada and the West Indies all import from the United States vastly greater values than they export to that country. Before the war the adverse trade balances were offset by interest on American securities owned in Britain. Most of these securities have now, however, passed into American ownership, and there is also a large annual interest which both the United Kingdom and Canada have to pay in New York. The rates of exchange indicate how hard pressed we are to provide funds to pay for these American purchases. In Britain the New York exchange has risen to a premium of 23 per cent., in Canada to over 5 per cent., and in the West Indies to over 20 per cent., and the end is not yet. These premiums are offered to induce the sale by English owners of their American securities so that the proceeds may be applied to the payment of the American purchases. When American securities are not available British and Canadian securities are offered in New York on the bargain counter at corresponding discounts below the British and Canadian prices. The supply, however, is not unlimited. How long can this continue?

The situation is terribly serious. Leaving the British problem to be dealt with by British statesmen, let us consider the relations of Canada and the West Indies to the United States.

Buy Heavily from the United States

There are few things which the people of the United States require to purchase outside of their own boundaries, especially since their requisition of Porto Rico. As a contrast, Canada must go abroad for all tropical and semi-tropical requirements, and the West Indies must go abroad for all their northern requirements. At present Canada makes these purchases largely from the United States and the West Indies make their purchases also largely from the United States, both rolling up a huge indebtedness to that country. If these two parts of the empire were but to enter into partnership, so that each would buy from the other, instead of from the United States, they would cancel much of their mutual indebtedness to that country, and each be much more prosperous and more populous.

As an illustration, British Guiana in 1917 bought from the United States $7.27 for every dollar the United States bought from her, while she bought from Canada 41 cents for every dollar of her produce which Canada bought. But for the preferential treaty with Canada, the trade of the islands would by this time be almost exclusively in American hands.

As president of the Canadian and West Indian League, the writer recently paid a visit to the eastern group of islands and British Guiana, consulting with the leading people and addressing many chambers of commerce, and therefore speaks with confidence as to the attitude of the people in these colonies. The suggestion of closer trade relations was everywhere received with enthusiasm. He advocated that the present preference of 20 per cent. be increased to 50 per cent., to apply, as does the present preference, to imports into the Dominion from the West Indies, and in the West Indies to imports from either Canada or the mother country. He was left no doubt as to the willingness of these colonies to make this arrangement. The granting of the recent British preference has removed all particle of doubt, if any there were.

Might Mean Higher General Tariff

The question of revenue has to be considered, but the writer always pointed out that the preference could be given by making their present tariff the preferential scale and merely doubling the same for the general tariff, thus avoiding all loss of revenue, making the preference to the mother country and Canada larger and more valuable, and lessening the inequality of concession which result when the percentage of preference is calculated on a low tariff by the West Indies and on a much higher tariff in Canada. This solution seemed to appeal to everyone. Nowhere did the writer hear one word of objection to it.

Incidentally, the new British preference on sugar has introduced a complication. Although the rate is but one-sixth, the British duty is so high that the preference comes to about 80 cents per 100 lbs. or more than double the present Canadian preference. This would result in all British West Indian sugar going to the mother country, thus destroying the Canadian connection. The writer, however, is quite confident that the difficulty will be solved by the increasing of the Canadian preference to equal the British preference. The Minister of Commerce of Canada has power to do this without further authority from parliament.

While all the colonies are ready for a 50 per cent. preference, British Guiana desires to consider the question of going much further. The position of that colony is unique. While the resources of the islands are somewhat fully developed, Barbados having nearly 1,100 to the mile, British Guiana has 90,000 square miles with a population of 300,000 or three to the mile. The colony is in urgent need of development and has great possibilities in sugar, rice, cattle, etc. A railway is urgently desired to open up the savannas in the south-west of the colony. Other public works should also be undertaken. Above all, British Guiana requires to be taken under the wing of some great northern nation which will undertake its development with energy.

The proposed railway would serve also north central Brazil which has enormous savannas with no present outlet or inlet except by the Amazon for two thousand miles to the sea. This great territory could be commercially annexed, especially if a preference treaty were arranged between Brazil on the one hand and Canada and British Guiana on the other.

Commerce with British Guiana

The United States are reported to be negotiating for Dutch Guiana, and if they secure it, will develop it vigorously. Is British Guiana to remain undeveloped because it is British? The natural course would be for the mother country to undertake this work. If, however, Canada is to do this, what basis could be arranged? From the commercial standpoint the admission of British Guiana as a Canadian province would be satisfactory, but the people there do not desire it and nothing more need be said on this point.

There is, however, in British Guiana, a very strong and widespread desire for commercial union, due chiefly to the efforts of Hon. Capt. J. M. Reid, Hon. George Russell Garnett and others, to whose wisdom and patriotic energy the writer would pay unstinted homage. The legislature of the Bahama Islands has twice put on record its desire for political union with Canada, but the other colonies are hardly

[illegible] achieved. Under any form of political union British Guiana could reasonably ask to be treated as the provinces were treated. For the maritime provinces the Intercolonial Railway was built; for Prince Edward Island the P.E.I. Railway; and for the prairie provinces and British Columbia the Canadian Pacific Railway. It is practically certain that with political union the Dominion would unhesitatingly undertake the building of the British Guiana Railway and other necessary public works. How closely can we approach this arrangement without actual political union?

Commercial Arrangement

Porto Rico has its own local legislature but no voice in the government of the United States. There is free trade between that island and the American mainland, while the full American tariff is applied against imports from all other parts of the world. The customs revenue goes, however, to the island legislature and not to the United States. Under this arrangement the exports of Porto Rico have grown from $8,000,000 in 1901 to over $74,000,000 in 1918, and the imports from $9,000,000 to $63,000,000, $59,000,000 coming from the United States and $4,400,000 from the rest of the world. The island has become exceedingly prosperous and the trade has been forced into strictly American channels.

A similar arrangement between Canada and British Guiana should produce corresponding results. It is true that Canada has not the population of the United States, but: (1) The Canadian population is growing rapidly; (2) that population is exclusively northern without any competing semi-tropical section as in the United States; (3) the United States has also to provide markets for Hawaii, the Philippines and Cuba. A Canada and British Guiana customs union should provide a 50 per cent. preference for the mother country and this should be made an essential part of the arrangement.

Under a permanent customs union the Dominion would be justified in taking an interest in the development of British Guiana and suggestions are made in this connection. This idea was received with enthusiasm in Georgetown and has been much discussed and advocated since. There has been a chorus of popular approval in the Press and elsewhere, but the writer has not heard one disapproving voice.

Free Trade with Canada

Any form of union would imply free trade between Canada and the West Indian colony. Whether British goods could also be admitted free of duty is discussed. The conclusion is that to secure revenue and to justify Canada in undertaking the development, no better arrangement is posible than the full tariff against the United States, with a 50 per cent. preference to the mother country.

This position is reasonable. So far from injuring the trade of the mother country with the islands and the northern sections of South America it would save that trade from extinction and develop it to much larger figures. If nothing be done that trade will inevitably be captured by the Americans and be lost to both Canada and the mother country. Some details are given of the plans of the United States to capture that trade, and unless Canada intervenes, that British trade will be lost just as surely as the trade with Porto Rico has been lost.

The imports of the West Indian colonies consist chiefly of northern produce, flour, biscuits, grain, cheese, butter, corned beef, pork, salt fish, etc., and these can only be secured from either the United States or Canada. Shall these goods be supplied by one of the empire's dominions or by a foreign country? For goods which the mother country can supply in competition with the United States, the 50 per cent. preference would give her a tremendous advantage over that country.

The United States desires even the ownership of these islands. Striking quotations from American speakers are given. The suggestion is being continually heard that Britain should sell these colonies. In Jamaica, in particular, an insidious agitation is being carried on in favor of annexation, Porto Rico being pointed to as an illustration of the prosperity Jamaica would enjoy under the stars and stripes. The transfer of Jamaica or the other islands would, however, be the beginning of the break-up of the empire. Canada being exclusively northern must have tropical adjuncts if she is to have an independent commercial development and be really independent of the United States. No matter how loyal the people of the Dominion, she must otherwise become in time financially and commercially dominated by the United States. The West Indies are necessary to Canada's future. The United States wants them, but in a commercial sense, Canada wants them and needs them.

There are precedents. The Union of South Africa controls much of Africa; Australia has New Guinea and New Zealand Samoa. Why should not Canada have specially close relations with the West Indies?

But for Confederation the Canadian provinces would be a mere string of detached colonies along the northern border of the United States with probably but two-thirds of their present population and wealth, and completely under American control financially, commercially and probably politically. They would, in fact, by this time almost inevitably have joined the American Union. It might have been argued that it was unfair to the mother country to allow goods from Upper and Lower Canada to have an advantage over those of the mother country in the markets of the maritime provinces. Confederation, however, has saved the trade with Canada and has developed it to vastly greater proportions.

Southern Adjunct Most Desirable

The same objections could now be made to Newfoundland's joining the Dominion. For every commercial advantage resulting from a partnership of two northern countries one hundred advantages would result from a partnership of northern and tropical. Just as certainly as the federation of the Canadian provinces has increased the population and prosperity of every province and developed the trade of the mother country, so surely would a partnership between Canada and the West Indies have similar and even more beneficial results and build up the empire in North America to an importance at present hardly dreamed of. This arrangement would do much to solve the American exchange problem in Canada and the West Indies, and would assist even the mother country in this respect.

If we were to wait till a confederation of the West Indian colonies should first take place, we might wait till we are all in our graves, and the problem have settled itself in favor of the United States. In any case, it is doubtful if British Guiana would confederate with the islands. Her interests are antagonistic. She requires development, and union with the already developed islands would give the latter the power to stop Guiana's development. Would the people of Barbados, for example, vote to tax themselves to develop British Guiana?

British Guiana requires to be developed and Canada is ready, if requested, to undertake the task. It is not necessary to decide now the nature of the partnership or even whether there should be a partnership at all. That question can only be settled after lengthy conference. The Board of Trade of British Guiana has passed a unanimous resolution favoring union with the Dominion, and desires the appointment by the colonial government of a committee to discuss the matter with the Dominion government, the mother country also being represented on this committee. The joint committee would, after a full consideration, make a united recommendation which would be the basis for future action. The matter should be carefully studied in this way and well-thought-out recommendations be made by such a committee, which would not be binding on any legislature, but should be of great value in guiding their deliberations.

The appointment of such a committee may have great and far-reaching consequences, and is not merely wise, but most highly important and desirable. It would be a step forward in the consolidating of the empire in America and should lead to the solution of some at least of the empire's problems.

QUEBEC PROVINCE MAKES GOOD SHOWING

Funded Debt Reduced During Last Fiscal Year—Considerable Borrowing Planned for 1920

WITH the exception of the financial year 1917-18, when receipts from succession duties were unusually large, the revenue of Quebec province for the year ended June 30, 1919, was the largest thus far. These and other points regarding the provincial finances were brought out by Hon. Walter Mitchell, treasurer, in his speech in the legislature on December 17. He stated that the guiding principle of the government was that when the receipts were larger than the estimates larger expenditures could be made for colonization, good roads, education and agriculture and the expenditures on these had amounted to $5,099,852. Mr. Mitchell referred to the intention of the government to borrow $5,000,000 for colonization purposes, and foretold very substantial increases in the grants to agriculture, and for the other public services, which grants would be augmented from time to time as the revenue warranted.

Answering criticism regarding the increase of the funded debt the treasurer pointed out that this had been spent on the public services mentioned, and a considerable sum on the development of the water powers, and illustrated the wisdom of this by mentioning that the investment of $2,894,057 on the St. Maurice and St. Francois River water storages had already brought in $251,079 per annum, and as the years went on this income would increase with the building of new manufacturing plants and the sale of power, and at no distant date the government would be entirely repaid for its outlay and in addition would receive a substantial increase from these works. This revenue going to the consolidated fund meant less taxation.

Results for Year

The treasurer then turned to the results for the year 1918-19. There had been anticipated an ordinary revenue of $10,293,484, and an ordinary and extraordinary expenditure of $10,019,243 which would have left an estimated surplus of $274,240, whereas the actual results of the year's operations showed an ordinary revenue of $12,666,352, and an ordinary expenditure of $12,272,675, leaving a surplus of $393,676. The extraordinary expenditure for the year, however, paid out of the ordinary revenue was $98,455, which gave an actual surplus of ordinary revenue over both ordinary and extraordinary expenditure of $295,221. The ordinary revenue was more than the estimates by $2,372,867 and the estimate of the ordinary and the extraordinary expenditure was exceeded by $2,351,887. The cash operations of the province showed that although the financial year started with a balance in hand of $999,484 it finished with an adverse balance of $47,873, this being due to the fact that the total receipts from all sources was $14,699,136, while the payments were $14,994,978 plus $751,516 for outstanding warrants.

Assets and Liabilities

On the liabilities and assets of the province the provincial treasurer stated that the liabilities were $43,965,512 while the assets aggregated $10,930,221 leaving an excess of liabilities over assets of $33,035,290. The funded debt was $37,716,286 having been reduced by $299,367 during the year. The unfunded debt of the province was $4,167,298 but against this the government had in the form of cash, claims against individuals and corporations for advances, and Quebec's share of the Common School Fund, amounting to $1,169,009, a total of $8,848,295 leaving a surplus of assets over the unfunded debt of $4,680,996.

The Current Year

Dealing with the question of the current year Mr. Mitchell stated that the receipts from ordinary revenue for the five months ended on the 30th of November, 1919, were very satisfactory and the estimated receipts would probably be exceeded at the end of the fiscal year. There would also be an increase over the estimates in the ordinary and extraordinary expenditure for the current fiscal year by the amount of special warrants issued since 1st July, namely: $527,500, and also by the supplementary estimates to be submitted for amounts required for the different services to complete the necessary expenditure for the current year. It was expected that this increase in expenditure would be more than covered by the increase in revenue judging by the receipts up to the 30th of November.

Will Borrow Heavily

The treasurer said the estimates for 1920-21 for revenue were $11,673,904, ordinary expenditure, $11,590,563, leaving an estimated surplus of $83,340. In the matter of good roads he stated that the payments to municipalities and on government roads amounted to $18,813,298 out of the twenty millions authorized by the legislature. It was the intention of the government to secure authorization to borrow an additional sum so that the many demands for the building of highways could be met. Mr. Mitchell did not mention what this amount would be, but it is generally understood it will be $10,000.000 and that together with the federal grant of six millions, which will be an absolute gift to the province, and which will probably be voted in the proportion of forty per cent. of the cost of each highway undertaken, leaving the municipalities and the province between them to pay the remaining sixty per cent. This sum will enable a much more comprehensive scheme of road improvement to be undertaken than in any past year.

Mr. Mitchell concluded by speaking of the fact that the credit of the province was of the best in the money markets of the world.

Industrial Growth

Turning to industry, he pointed out that in the decade 1905-15, the number of industrial establishments grew from 4,965 to 7,158, the annual wages paid employees from $38,703,763 to $80,217,258 and the value of products from $219,861,648 to $387,900,585. During the present year it had been estimated that the industrial output of the province would amount to not less than $500,000,000.

Opposes Borrowing

C. E. Gault, member for St. George, Montreal, discussed the budget briefly on behalf of the opposition. He maintained that had all accounts been paid there would have been a deficit instead of a surplus shown. He also opposed any immediate borrowing. "With the English money market practically closed," he said, "and the exchange situation in such a precarious condition, I trust that the necessity for further borrowing may be put off as long as possible. It would no doubt, be advantageous if money could be borrowed in the United States, but I doubt if it could be, and the tenderer would want to take advantage of the exchange rate. While I am not afraid of the credit of the province, nor afraid to borrow when necessary for the advancement of the province, especially where the expenditure will show large returns, it would be a great thing if this province would show the world an example of economy by keeping its expenditure down to its revenue. This is especially desirable in view of the wave of insanity and the insane desire for wealth spreading over the world, and the great extravagance which exists. The next six or nine months would be most critical in the history of the world, and if it can be weathered Canada will be in for a great era of prosperity. The war had shown us our capacities and our strength and our weaknesses, also our energies, and if these energies were properly directed, there should be no limit to the growth of the country."

On December 20th the legislature adjourned until January 8th.

Admission to the British Industries Fair, to be held at London, Birmingham and Glasgow in February next, is by invitation only. Canadian buyers who propose to visit the Fair can obtain invitations from the British Trade Commissioners in Canada at Montreal, Toronto and Winnipeg, respectively.

The Hamilton Provident and Loan Society

DIVIDEND No. 97

COST OF GOVERNMENT IN ONTARIO

Per Capita Cost is $56.06 in Toronto, $44.02 in Hamilton and $45.79 in London

THE Citizens' Research Institute of Canada has issued a third study of the cost of government, this one being for Ontario. Figures are given for Toronto, Hamilton and London. During the year 1916-17 the provincial government had a revenue of $18,269,597, and an expenditure of $16,518,223. These are analysed by the bureau as follows:—

REVENUE

Lands, forests and mines	$ 3,579,196	or 19.6%
Succession duties	3,110,495	" 17 %
Dominion of Canada	2,605,949	" 14.3%
Provincial war tax	2,119,732	" 11.6%
Taxation on corporations and companies	1,962,719	" 10.7%
Hydro-Electric Power Commission, interest paid by municipalities under R.S.O., 1914	1,185,091	" 6.5%
Department of public highways (including motor vehicles)	954,654	" 5.2%
General fees, fines, licenses, etc.	737,819	" 4 %
Amusement tax	587,721	" 3.2%
Charitable institutions	536,167	" 3 %
Casual revenue	400,883	" 2.2%
T. & N. O. Railway	250,000	" 1.4%
Agriculture	141,219	" .77%
Education department	61,168	" .33%
Other items	36,784	" .2%
	$18,269,597	100%

EXPENDITURE

Statutory expenditure	$ 3,342,577	or 20.2%
Education	2,588,586	" 15.7%
War expenditure	2,414,447	" 14.6%
Public institutions maintenance (including hospitals for the insane, reformatories and industrial farm)	2,255,875	" 13.7%
Civil government	1,798,809	" 10.9%
Public buildings, general	821,003	" 5 %
Charges, Crown lands	819,328	" 5 %
Agriculture	811,060	" 4.9%
Hospitals and charities	543,536	" 3.3%
Highways	438,303	" 2.6%
Miscellaneous (including refunds)	684,699	" 4.1%
	$16,518,223	100%

The expenditure on general education was 15.7 per cent. of the total expenditure.

The total expenditure represented an expenditure per head of population of $6.02 (Canada Year Book).

Coming to the revenue and expenditure of the cities, these are analysed as below.

Summarizing, the total cost of government in Ontario, per capita, is as follows for the cities mentioned:—

	Municipal. 1917.	Provincial. 1916-17.	National. 1917.	Total.
Toronto	$33.64	$6.02	$16.40*	$56.06
Hamilton	21.60	6.02	16.40*	44.02
London	23.37	6.02	16.40*	45.79

---

*Does not include subsidies to provinces, as these are shown in provincial expenditures.

T. Kelly Dickinson Leaves Journalism for Finance

Issues the Following Open Letter to Investors in the Several Provinces of the Dominion

I am inclined to the belief that after constant, and, I dare to hope, conscientious application to financial journalism for a period in excess of fifteen years, it may be of interest to you to know that I have decided to take the short and direct step from the profession of financial journalism to that of practical finance and investment banking.

It has been my extreme pleasure to accept an invitation to join two gentlemen in the formation of a new Financial House (under the company name of Winans, Dickinson & Whitehead, Limited, Investment Bankers), and thereby directly to participate in the important work of constructive finance, at a time when we are on the threshold of the greatest material development ever experienced in this young country.

My associates are Lt.-Col. B. G. Winans and Mr. W. T. Whitehead. Lt.-Colonel Winans is a Banker of many years' experience, and for the past ten years has been engaged in the creation and flotation of industrial securities, and in addition to extensive dealings in provincial and municipal bonds and debentures. Mr. Whitehead's creative faculty is well-known throughout industrial Canada, as is his administrative association with many industrial enterprises.

The new company will thus have the services of an experienced banker; the guidance of a practical industrial operator, and the experience of a financial journalist, who has spent more than half his active business years in concentrated study of all matters relative to financial and corporation affairs.

During the long period of work and study as a financial critic, I have come into intimate association with many thousands of investors throughout Canada, and to me the association has been altogether delightful, especially on those occasions when I could be of service in helping to solve the problems and lessen the difficulties which prompted the desire and the request for advice.

It will still be a pleasure at all times, personally, or by correspondence, to give any information or advice requested by the investors of this country. Besides this promise of personal attention, I may say that it is the company's intention to issue, periodically, a circular letter pertaining to current finance and industry, copies of which will be mailed on request, without, of course, any charge to the investor.

Please address all cammunications to our offices at the Dominion Express Building, 143 St. James Street, Montreal.

Very truly yours,

T. Kelly Dickinson

December 18, 1919.

INTERPRETATION OF INTEREST ACT CLAUSES

Clauses Six and Seven Have Given Rise to Several Important Legal Cases—Three Recent Ones

By M. L. Hayward, B.C.L.

By Sections 6 and 7 of the Interest Act the Parliament of Canada has made the following provisions:—

Section 6: Whenever any principal money or interest secured by mortgage on real estate is, by the same, made on the sinking fund plan, or any plan under which the payments of principal money and interest are blended, or on any plan which involves an allowance of interest on stipulated repayments, no interest whatever shall be chargeable, payable or recoverable, on any part of the principal money advanced, unless the mortgage contains a statement showing the amount of such principal money and the rate of interest chargeable thereon calculated yearly or half-yearly, not in advance.

Section 7: Whenever the rate of interest shown in such statement is less than the rate of interest which would be chargeable by virtue of any other provision, calculation or stipulation in the mortgage, no greater rate of interest shall be chargeable, payable or recoverable, on the principal money advanced, than the rate shown in such statement.

Instalments Stipulated in Agreement

These provisions were considered by the Supreme Court of Canada in the case of the Canadian Mortgage Investment Co. vs. Cameron, in which the mortgagor entered into the following covenants contained in the mortgage:—

"First: That he will pay to them, the said mortgagees, the above sum of one thousand four hundred dollars and interest thereon at the rate hereinafter specified in gold or its equivalent, at the office of the said mortgagees at the City of Toronto, in the Province of Ontario, as follows: That is to say, in instalments of one hundred and seventy-nine 90 100 dollars half-yearly on the 24th days of June and December in each year until the whole of said principal sum and the interest thereon is fully paid and satisfied, making in all ten half-yearly instalments. The first of said instalments to become due and be payable on the 24th day of December, 1907. All arrears of both principal and interest to bear interest at ten per centum per annum as hereinafter provided.

"Secondly: That he will pay interest on the said sum or so much thereof as remains unpaid at the rate of ten per centum per annum by half-yearly payments on the twenty-fourth days of December and June in each and every year until the whole of the principal money and interest is paid and satisfied, and that after maturity interest shall accrue at the rate aforesaid from day to day, and that interest in arrear, whether on principal or interest, and all sums of money paid by the mortgagees under any provision herein contained or implied or otherwise, shall be added to the principal money and shall bear interest at the rate aforesaid, and shall be compounded half-yearly, a rest being made on the twenty-fourth days of the months of December and June in each year until all such arrears of principal and interest are paid; and that he will pay the same and every part thereof on demand."

Contended Amounts Not Shown

The mortgagor contended that the covenants quoted above did not contain "the statements showing the amount of principal money and the rate of interest chargeable thereon calculated yearly, or half-yearly, not in advance," as required by Section 6 and that, therefore, "no interest whatever shall be chargeable, recoverable or payable," as provided by said Section 6.

The Supreme Court of Canada held that as the mortgagor had covenanted to pay the principal and interest in ten half-yearly payments and to pay interest on the principal or so much thereof as remains due at the rate of ten per centum per annum and the same rate on any sum in arrear, the mortgagee may collect the interest as Section 6 has been complied with, and that if the mortgage shows the amount of principal and the rate of interest calculated as required a special statement, complete in itself, showing the amount of the principal and the rate of interest is not necessary.

"In this second paragraph," said Judge Davies in referring to the covenant in the mortgage quoted above, "each of the stipulated half-yearly instalments contains the sum charged for interest at the rate of ten per centum payable half-yearly and that interest at this rate is chargeable under the mortgage and payable at such intervals. That, I think, is a sufficient compliance with Section 6 of the Interest Act."

Second Case Also Decided

In another case along the same line, the Standard Reliance Mortgage Corporation vs. Stubbs, argued before and decided by the Supreme Court of Canada at the same time as the Cameron case, the mortgagor covenanted to pay the sum of $700, "together with interest thereon as hereinbefore provided, said principal and interest being payable as follows: The sum of $8.75 on the first Monday of each month for the period of 135 months, and it is further agreed that the principal is $700 and the rate of interest chargeable thereon is ten per centum per annum as well before as after default."

In this case the same point was raised—namely, that the mortgage in question did not contain a sufficient statement of the principal and interest to comply with the requirements of Section 6 of the Interest Act, but in this case as well the decision was in favor of the mortgage corporation, the Court holding that the provision quoted above was a sufficient compliance with Section 6.

Interest Act Not Clear

"The purpose and effect of the concluding clause of Section 6 of the 'Interest Act' are certainly not as clear as could be desired," said the Court. "Consideration of its terms, however, has led me to the conclusion that it does not prescribe that the mortgage shall set forth the calculation by which the several blended payments or instalments of principal and interest are computed, or that it shall be shown what amount of principal and what of interest is comprised in each such payment or instalment. What the prescribed statement is to show is (a) 'the amount of such principal money advanced'—namely, the amount of the principal money secured which has been advanced and is to be repaid in the blended payments; (b) 'the rate of interest chargeable thereon'—namely, the rate at which the interest to be paid is to be computed. (c) The section further prescribes that such interest shall be 'calculated yearly or half-yearly not in advance,' and the 'statement' shall show that it is intended to be so computed. The adjective 'chargeable' clearly relates to and qualifies the word 'rate.' The participle 'calculated' equally clearly relates to and qualifies the word 'interest.' It cannot apply to the word 'rate'; a 'rate of interest' is not 'calculated.' But the 'rate' is distinctly affected by the frequency with which it is calculated or computed and interest in advance is appreciably more advantageous to the lender than interest not in advance. Ten per cent. per annum computed monthly, is a rate materially higher than ten per cent. per annum computed yearly. There is nothing in the statute which precludes requiring payment by quarterly, monthly or even weekly instalments of blended principal and interest. But however frequently the payments are to be made, not only must the rate of interest chargeable be stated, but it must also appear that such interest is to be 'calculated' 'yearly or half-yearly and not in advance.' If the rate be stated to be say 10 per cent. per annum, although this is not an explicit statement that the interest is to be computed yearly, such a computation is implied, and I should regard it as a sufficient statement to that effect and as precluding the computation of interest on any other than a yearly basis. So, too, with the provision 'not in advance.' Unless the contrary is expressly stipulated, I would read a reservation of interest at 10 per cent. per

[illegible] precluding computation of interest in advance. That the interest in such a case is to be computed 'not in advance' is, I think, the reasonable implication from the stipulation. The statement in the mortgage before us that the rate of interest chargeable thereon is 10 per cent. per annum as well before as after default is, in my opinion, a sufficient statement of the rate of interest and that it is to be calculated yearly and not in advance."

A More Intricate Case

In the case of Biggs Freehold Loan and Savings Co., [illegible] decided by the Supreme Court of Canada, the mortgage was given to secure the payment of the sum of $20,000 with interest at 9 per cent. payable half-yearly, and contained the following provisos:—

"The amount of principal money secured by this mortgage is $20,000 and the rate of interest chargeable thereon is 9 per cent. per annum payable half-yearly, not in advance. The said sum of $20,000 is to be due and payable in two years after date. Provided (1) that on default of payment for two months of any portion of any money hereby secured the whole of the instalments hereby secured shall become payable, and (2) that on default of payment of any of the instalments hereby secured the interest at the rate above mentioned shall be paid on all sums in arrear and also on the interest by this proviso secured at the end of every half-year that the sum shall be unpaid."

The mortgage was in default for over two months, whereby the whole amount became due and payable, whereupon the savings company claimed that it was entitled to interest at the rate of 9 per cent. on the amount in default, according to the second proviso quoted above, while the mortgagor contended that the company could not collect more than the then legal rate of interest—namely, 6 per cent., and in this case the decision of the Court was in favor of the mortgagor, on the ground that the principal sum of $20,000 coming due under the first proviso quoted above was not an "instalment in arrear."

"The language of these provisos," said the Court, "has very intelligible application to the case of the loan where the principal sum advanced and interest thereon at a rate agreed upon are blended together and the sum of the amounts so blended is made payable by instalments until the whole blended sum is repaid, and the effect of the first of these provisos in such mortgage plainly is, that upon any one of those instalments becoming in arrear and continuing so for two months after the day prescribed in the mortgage for payment thereof, then the whole of the subsequent instalments shall become immediately payable in advance, whereupon the mortgagee may exercise all the powers contained in the mortgage for the recovery of the whole amount remaining on the security of the mortgage in anticipation of the day specified in the mortgage for payment of the last instalment."

MUTUAL LIFE AND CITIZENS' ASSURANCE CO.

At the annual meeting of this company, which was held in Sydney, N.S.W., the financial statement for the year ended December 31st, 1918, was presented. It shows assets amounting to $73,400,000, of which 74 per cent. is invested in government securities, municipal securities and loans to public bodies. The whole of the company's accumulations since August, 1915, have been invested in war loans, including those of the Dominion of Canada. The average rate of interest earned is 5 per cent. In the ordinary branch the company's expense ratio is 10.90 per cent. and in the industrial branch 35.44 per cent. Claims during the year totalled $4,135,000 against $3,590,000 in 1917. New business showed an increase of $2,500,000, compared with 1917.

The following were the shipments of ore, in pounds, from Cobalt Station for the week ended December 20th, 1919:—

O'Brien Mine, 64,020. Total, 64,020. The total since January 1st is 23,759,692 pounds, or 11,879.84 tons.

UNION MUTUAL FIRE ASSOCIATION

A special meeting of the Union Mutual Fire Insurance Association was held in Woodstock, Ont., on December 15, for the purpose of drafting by-laws suitable to all the companies concerned. The following were among those present: J. Collins, from the Brant Mutual, Brantford; T. M. Cayley, the Otter Mutual, Norwich; T. R. Mayberry, Dereham and West Oxford Mutual, Ingersoll; F. H. Harris, Dereham and West Oxford Mutual, Mt. Elgin; and J. C. Dance, Dorchester Mutual, Dorchester.

SECURITY LIFE SHARES BIG BUSINESS

In recent years the Security Life Insurance Co. of Canada, which was originally incorporated in 1907 under the name of the Prudential Life Insurance Co. of Canada, has made good progress, and the figures of new business for this year, shown elsewhere in this issue, indicate that a good share of the large volume now being written each month is obtained. Applications for new business for the first eleven months of the year amounted to about two and one-half times those for the whole year 1918. Since 1911 the company has been writing under a Dominion license.

BRITISH COLUMBIA TAXATION INQUIRY

On November 20th the British Columbia government commenced an inquiry into the subject of municipal revenue. A board, composed of Hon. John Hart, minister of finance, R. Baird, inspector of municipalities, and R. Johnson, inspector of revenues, held sessions in Victoria on November 20th and 21st, and in other cities at later dates. The new Municipal Act, which has been discussed for some time, will be taken up at the next session of the provincial legislature, and this inquiry will be an important factor in determining the legislation. At the opening meeting, Hon. John Hart pointed out that at the last session of the legislature a municipal delegation had asked for more sources of revenue, and for this reason the present inquiry was being held.

These sessions have now been completed, but no announcement has been made. In addressing the Vancouver Board of Trade on December 9th, Hon. John Hart stated that they had not had an opportunity to review the evidence. Reviewing the finances of the province since 1910, he said that in 1910 there was a surplus of approximately $9,000,000, and a public debt of $10,300,000. In November, 1916, the public debt was $23,153,000, with a floating debt of $2,000,000. The revenue from 1910 to 1917 was about $65,000,000. The expenditure, including the surplus, for those seven years approximated $90,000,000. Together with this, the province had contingent liabilities in the way of guarantees to railways of $47,000,000 to the C.N.R., and $20,000,000 to the P.G.E. It was taking a lot to carry on the P.G.E. construction work. It was the government's policy to endeavor to complete next year the P.G.E. to Fort George. This would require approximately $3,000,000, which with $1,000,000 for interest, would bring next year's cost approximately to $4,000,000. As for the C.N.R., it was fortunate the federal government had taken it over. This meant an end to provincial liabilities, he believed.

When the government went into office, it was faced with a large debt which required approximately $4,000,000 to meet. Owing to the financial position of the province at that time, the best price that was offered for bonds meant a cost of 7.40 per cent. to the government. This offer was refused. The charges the government was forced to meet, in the way of interest payments, grants to hospitals and schools, etc., amounted to about $7,500,000. With the revenue at approximately $6,000,000 it was plain to see, he said, that it had been necessary to bring about increased taxation. Efforts had been made to reduce expenditures in the civil service, but in view of the increase in the cost of living, he thought there would really be an increase in that department.

INDUSTRIAL EVENTS OF THE WEEK

Developments in the Pulp and Paper Field—No Agreement Yet Between Great Lakes Co. and Twin Cities—Dominion Steel Has Large European Contract—Government Order for Canada Car

SEVERAL important developments in the pulp and paper field have been announced this week. Probably the most important is the report of the increasing interest by the M. J. O'Brien Co., in connection with the installation of a large pulp and paper mill at the north end of Lake Timiskaming. The O'Brien Co. is a $20,000,000 corporation, and controls among other properties, two important silver-producing mines, namely, the O'Brien at Cobalt and the Miller Lake-O'Brien at Gowganda. The corporation also controls a part of the Des Quinze power, which will develop upwards of 100,000 h.p. It is stated that the company is investigating the various methods employed in other plants, and is considering the possibility of electrically heated boilers, etc.

The manufacture of bleached sulphite has commenced at the new plant of the Kipawa Fibre Co., which is a subsidiary of the Riordon Pulp and Paper Co., situated at the south end of Lake Timiskaming. During the second week of December, the first unit was brought into operation and is expected to turn out about 50 tons daily. Following the actual commencement of production comes the information that the company has already begun specifications for the installation of another unit of equal size, the first having been installed with the fixed object in view of adding other units. It is stated that the aim of the company is to ultimately have about five such units, to be installed at the approximate rate of about one a year until the whole is completed.

C. R. Whitehead, president of Wayagamack Pulp and Paper Co., confirms the report that the company has acquired by purchase the Breakey Timber Limits, in Gaspe, Que., situated on the York River, which cover a total of 450 square miles and will be particularly valuable to the Wayagamack Co. as 90 per cent. of the timber on the limits is spruce, the kind of wood the company requires for the manufacture of its kraft products. The York River is driveable through the entire length of the limits now acquired and it is the intention to ship to the Wayagamack plant at Three Rivers, Que., by means of steam barges. It is understood that it will not be necessary for the company to effect any additional financing in connection with this important purchase.

The Northumberland Paper and Electric Co. is said to have just completed a transaction which is of considerable interest to the paper trade of Canada. It has bought out the Canada Boxboard Co., with mills both at Montreal and Frankford, Ont. The importance of the deal is shown from the fact that the Frankford mills make almost twenty-five tons of boxboard per day, whereas the mills now under the ownership of the Northumberland Paper and Electric Co. have a combined output exceeding one hundred tons per day.

Great Lakes Pulp Mill Question

No definite agreement between the Great Lakes Pulp and Paper Co. and the cities of Port Arthur and Fort William has yet been arrived at. A delegation of the two cities conferred with representatives of the pulp company and the hydro at Toronto last week, and the price of power was definitely decided upon at $17.50. The question of the location of the site for the proposed plant, and the power agreement between the commission and the company are as yet undecided.

Dominion Steel Rail Order

Official announcement has been made by the Dominion Steel Corporation that an order has been received for 7,500 tons of special shaped rail for export to Rumania. The preparation of the rolls necessary to produce these rails has been undertaken and it is now expected that the rolling can be started in January. As soon as the rolls are ready the rail mill will be started on single shift and this means that from three to four weeks' work is now in sight for this department. To permit the production of this extra tonnage without interfering with the other smaller mills now in operation, and in the hope of further business offering prior to the completion of the present order, it is now the intention to operate two blast furnaces beginning about January 1st. If conditions at that time warrant, some further steel furnaces will then be placed in operation.

Government Work for Canada Car

A contract with the Fort William works of the Canadian Car and Foundry Co., for the repairing of 1,500 freight cars at present in use on the Grand Trunk Pacific, has been closed with the Canadian government. Word to this effect has been received by Dr. R. J. Manion, M.P. for Fort William from the Hon. Dr. Reid, minister of railways and canals.

Other Industrial Notes

A new woodturning industry is to be located in Parry Sound, Ont., pending the closing of the options on the building now owned by Mr. James Allen, located near the Parry Harbor dock. A request for about fifty horse power has been made, and machinery, it is expected, will be on the way about the beginning of January.

The manufacturing, transportation and mercantile committee of the Sudbury, Ont., Board of Trade met last week to deal with communications with regard to new industries which were referred to them at a recent meeting. It was decided to forward at once to the Kersch Mfg. Co. and the United Charcoal Co., of Chicago, data concerning the advantages of Sudbury as a manufacturing centre, and also to ask these companies for further information as to their plans and requirements.

The Mead-Morrison Manufacturing Co., of Boston, Mass., has purchased all the interests in M. Beatty and Sons, Ltd., Welland, Ont., and will shortly take over the plant. The American company will continue the business conducted by the Beatty Co. in the manufacture of contractor's plant.

Messrs. Alex. Young, Ltd., will erect a $300,000 plant in Regina, Sask., for the manufacture of new cut stone and monumental goods.

Construction of the main buildings of the British Columbia Manufacturing Co., New Westminster, B.C., plant No. 2. is now under way, and this additional plant, which is designed to have twice the capacity of that now in operation, will be in a position to make fruit boxes for next year's season.

Woodstock is to have another large new industry in the near future if the proposal made by two prominent Toronto manufacturers is accepted by the ratepayers of the city. These men propose to form a company to be known as the Karn Manufacturing Co., Ltd., and will rejuvenate the Karn name and patents in the manufacture of pianos, player-pianos and piano actions. They have taken an option on the factory to buy it for the sum of $40,000.

MONTREAL INVESTMENT HOUSE FORMED

Winans, Dickinson and Whitehead, Ltd., is the name of a new investment firm, the formation of which was announced in Montreal a few days ago. Offices have been secured in the Dominion Express Building. They will deal in Victory Loan bonds, provincial and municipal bonds and debentures, and industrial securities. The members of the firm are Lt.-Col. B. G. Winans, who is well known in financial circles in Montreal, Toronto and Winnipeg, T. Kelly Dickinson, who was for fifteen years a financial journalist and recently editor of the "Montreal Financial Times," and W. T. Whitehead.

In addition to the lists of fire and casualty insurance companies already given in *The Monetary Times* as subscribers to the 1919 Victory Loan, the Continental Insurance Co., and the Fidelity-Phenix Fire Insurance Co. also subscribed for $50,000 each.

THE SECRET OF SUCCESSFUL SALESMANSHIP

If the salesman has unlimited confidence in the company he represents and in the goods he is offering, it will not take long to communicate that confidence to the prospect. And this applies to Life Insurance more than to any other article. Agents of the Mutual Life of Canada meet with extraordinary success for that simple reason—they devoutly believe in Life Insurance and above all in "Mutual" Life Insurance. The Mutual Life has been conducted for fifty years exclusively in the interests of its policy-holders. The result is an unprecedented demand to-day for Mutual Life Policies. With the Mutual "the secret of successful salesmanship" is simplicity itself—the Agent knows that he has the Company and the Policy that the prospect NEEDS. The rest soon follows.

The following is a list of companies recently incorporated, with the head office and authorized capital:—

Caledonia Springs, Ont.—Caledonia Front Cheese Factory, Ltd., $2,000.

Galt, Ont.—Stauffer-Dobbie, Ltd., $1,000,000.

Lachine, Que.—Rose-McLaurin, Ltd., $100,000.

Cutler, Ont.—Ferguson and McDonnell, Ltd., $20,000.

Arnprior, Ont.—Climax Clothing Co., Ltd., $100,000.

Midland, Ont.—St. Margaret's Club, of Midland, Ltd., $25,000.

Maple, Ont.—Maple Farmers Co-operative Co., Ltd., $10,000.

Belleville, Ont.—Weed Harvester Machine Co., Ltd., $50,000.

Chatham, Ont.—Crawford Skead Gold Mines, Ltd., $1,000,000.

Baie Saint-Paul, Que.—Donnacona Silver Fox Farms, Ltd., $20,000.

Smith's Falls, Ont.—Record-News Press, of Smith's Falls, Ltd., $40,000.

New Toronto, Ont.—Goodyear Tire and Rubber Co. of Canada, Ltd., $30,000,000.

Ottawa, Ont.—Capital Sales and Distributing Co., Ltd., $24,000; Foundries, Ltd., $24,000.

Sherbrooke, Que.—Canadian Connecticut Cotton Mills, Ltd., $6,500,000; J. M. Nault and Freres, Ltd., $45,000.

Victoria, B.C.—George I. Warren and Co., Ltd., $10,000; Canadian Lignite Co., Ltd., $90,000; Salmon River Silver Mines, Ltd., $50,000.

Vancouver, B.C.—North-West Biscuit Co., Ltd., British Columbia, $10,000; B. F. Fell, Ltd., $50,000; Vancouver Sheet Metal Co., Ltd., $5,000; Turpin Bros., Ltd., $50,000.

Quebec, Que.—Franquelin Lumber and Pulp Wood Co., Ltd., $550,000; National White Mica Mine, Ltd., $500,000; Saguenay Lumber Co., Ltd., $100,000; Tarrien Lumber Co., $199,000.

Hamilton, Ont.—John Lennox and Co., Ltd., $500,000; Bird Machine Co. of Canada, Ltd., $1,000; Canadian Foamite Firefoam Co., Ltd., $50,000; Canadian Hart Products, Ltd., $500,000; Brown's Hardware Co., Ltd., $30,000; Court Ambitious Building Committee, Ltd., $15,000.

Winnipeg, Man.—Hudson Mines, Ltd., $5,000,000; General Development Corporation, Ltd., $50,000; Thomas L. O'Brien Co., Ltd., $200,000; Motor Mart, Ltd., $2,000; Transoceanic Trading Co., Ltd., $5,000; Pelican Carbon Co., Ltd., $20,000; Aerial Transport and Taxi Co., Ltd., $75,000; Manitoba Clays and Building Supplies, Ltd., $300,000.

Montreal, Que.—Lazier Paper Mills, Ltd., $45,000; La Compagnie J. S. Laughran, Ltd., $90,000; Standard Woollen Co., Ltd., $45,000; Eriez Stove and Manufacturing Co. of Canada, Ltd., $200,000; John Allen Safe Co., Ltd., $75,000; Mitchell-Dossert Co., Ltd., $50,000; Kel-Ola Co., Ltd., $200,000; Canadian Financial and Trading Corporation, Ltd., $100,000; Vlit Manufacturing Co., Ltd., $150,000; Specialities, Ltd., $50,000; Montreal Printing and Publishing Co., Ltd., $99,000; Rotisseries, Ltd., $45,000; U. H. Dandurand, Ltd., $20,000; Montreal Townlots, Ltd., $500,000; The Bradford Cap Manufacturing Co., Ltd., $20,000; Jolicoeur, Ltd., $49,900.

Toronto, Ont.—Canadian I. T. S. Rubber Co., Ltd., $600,000; Harris Wood Products Co., Ltd., $100,000; Allied Drug Co. (1919), Ltd., $100,000; Eastern Cafeterias of Canada, Ltd., $500,000; Ward Baking Co., Ltd., $1,000,000; Republic Flow Meters Co. of Canada, Ltd., $50,000; Bowes Co., Ltd., $1,000,000; Universal Sales Co., Ltd., $50,000; Commercial Lumber Co., Ltd., $40,000; General Services, Ltd., $100,000; Ivey Storage Batteries, Ltd., $500,000; Canadian Confectionery and Spice Co., Ltd., $40,000; City Dye Works, Ltd., $40,000; British Harold F. Ritchie and Co., Ltd., $400,000; J. M. Smoot and Co., Ltd., $40,000; Dominion Wine Growers, Ltd., $100,000; Wolfe Wilder Fur Co., Ltd., $20,000; Canadian Fireclay Products, Ltd., $40,000.

WHY "ACADIA" SHOULD BE FORMED

Great Savings in Public Expenditures—Development of Other Provinces Compared

SOME suggestions for the union of the three maritime provinces of Canada, and for their administration as a unit, are made by Hon. J. B. M. Baxter in a Christmas issue of the St. John, N.B., Standard. "The three eastern provinces," he says, "naturally look for that share in the development of our country to which we feel we are entitled. Our contribution to the revenues of Canada have rendered possible the expenditures which have developed the west. Our population, however, has barely held its own, considered from the standpoint of natural increase. It has had no such development as has taken place in the western provinces. We may take Quebec and Ontario somewhat as standards, these being the older and more settled provinces whose populations are less likely to undergo sudden changes. During the ten years from 1901 to 1911 the first-named province increased its population about 21½ and the latter about 15½ per cent. That of Nova Scotia was increased but little more than 7 per cent., New Brunswick about 6¼ per cent., while Prince Edward Island decreased by nearly 9¼ per cent. Contrast this with Manitoba's growth of 78½ per cent., British Columbia nearly 120 per cent., Alberta 413 per cent. and Saskatchewan nearly 440 per cent. These four provinces in 1901 had an aggregate population of a little under 600,000, while the maritime provinces then possessed nearly 894,000. The latter attained in 1911 to about 938,000 as against 1,715,000 for the western group."

Regarding the public debt, Mr. Baxter says: "It may be that the amalgamation of the debt would require a good deal of consideration. Looking, however, at the 1916 statement of Prince Edward Island, we find that the debt, without taking into consideration the sinking funds, is about $10 per capita. Nova Scotia at the same period is about $27 per capita and New Brunswick about $26. Prince Edward Island has sinking funds which almost extinguish its debt, while Nova Scotia and New Brunswick have assets which perhaps are not immediately realizable. Both the latter provinces have also considerable indirect liabilities, all of which, no doubt, would need to be carefully considered in framing a financial scheme.

"But after all it is not the debt per head which is most important. Perhaps the fair measure of the burden of government is the yearly demand for income, and we find that Prince Edward Island raises about $5.30 per head; Nova Scotia about $3.90 and New Brunswick about $4.30. The Island province can, therefore, actually enjoy a lessening of immediate taxation. It is not, however, what a country pays, but what it gets for its money that is the real test of successful administration, and if the united province had an income estimated at $5 per capita, giving it an annual expenditure of about $4,700,000, it might reasonably be anticipated that extremely good results would be produced by the expenditure of that amount."

NEW YORK BANKS WILL COMBINE

It is announced by the Merchants National Bank of New York that the boards of directors of that bank and the Bank of Manhattan Co. have approved a plan for the consolidation of the two institutions. It will be recalled that the control of the Merchants National Bank was acquired in 1918 by interests connected with the Royal Bank of Canada and Aldred and Co. The result of this consolidation will create an institution which will have a capital and surplus of about $20,000,000. Of these amounts the Merchants National Bank contributes $6,500,000 in capital and surplus, while the Bank of Manhattan brings in about $13,500,000. Its total resources will be more than $200,000,000.

Jones and Proctor Bros., insurance agents, have moved their offices from Wellington Street, to 60 King Street West, Toronto.

THE CANADIAN BANK OF COMMERCE

Statement of the result of the business of the Bank for the year ending 29th November, 1919

Balance at credit of Profit and Loss Account brought forward from last year		$ 1,444,842 68

B. E. WALKER, President. JOHN AIRD, General Manager.

Report of the Auditors to the Shareholders of The Canadian Bank of Commerce.

In accordance with the provisions of sub-sections 19 and 20 of section 56 of the Bank Act, 1913, we report as follows:—

We have audited the above Balance Sheet and compared it with the books and vouchers at Head Office and with the certified returns from the branches. We have obtained all the information and explanations that we have required, and are of the opinion that the transactions of the Bank which have come under our notice have been within the powers of the Bank.

We have checked the cash, and verified the securities representing the investments of the Bank, at its chief office and principal branches at a date other than, and in addition to, the verification at 29th November, 1919, and found that they were in agreement with the entries in the books of the Bank relating thereto.

In our opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the affairs of the Bank according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

T. HARRY WEBB, C.A.,
of George A. Touche & Co.
JAMES MARWICK, C.A.,
of Marwick, Mitchell, Peat & Co.
} Auditors.

Trade of Canada for November

TRADE of Canada for the month of November, 1919, showed an increase of more than $18,000,000, as compared with the same month in 1918. The figure of the Department of Customs for the month was $215,714,257, and for the same month in 1918, $197,543,153. For the eight months ending November 30, 1919, the figure was $1,475,362,631, as compared with $1,492,037,038, a decrease of over $16,000,000.

Exports for the eight months showed a decline of approximately $35,000,000, compared with the same period in 1918, while on the other hand, imports increased by nearly $3,000,000.

The value of wood, paper, etc., exported during the eight months was nearly $32,000,000 higher than during the same period in 1918. The value of domestic agricultural products exported was more than $70,000,000 more than last year, and animals and their products, $67,000,000. A great falling off in the value of miscellaneous products is shown. Exports under the head miscellaneous declined about $165,000,000. The statement is given in detail below:—

STANDARD RELIANCE INVESTIGATION

At the inquiry into the affairs of the Standard Reliance Mortgage Corporation, which was resumed on December 23rd, W. S. Dinnick described the steps leading up to the formation of the syndicate to handle the Grand Valley Railway. The corporation's solicitor had advised that such an investment would be quite proper, and it was only after sums of money had successively been sunk in it, in the hope of putting it on a paying basis, that the item was written off the books.

A uniform discount rate of ten per cent. on Canadian money has been arranged in Detroit. Stores will charge this rate, and will in turn be charged ten per cent. by the banks. The arrangement was made by the Clearing House Association.

GOVERNMENT AND MUNICIPAL BONDS

Alberta Disposes of $2,000,000 Bonds to Toronto Syndicate—Province Pays Over 6 Per Cent. for Money—Manitoba Asks for $4,000,000

THE province of Alberta has disposed of by private tender an issue of $2,000,000 5½ per cent. 10-year bonds to a Toronto syndicate comprising Messrs. Dominion Securities Corporation, A. E. Ames and Co. and Wood, Gundy and Co., according to Deputy Treasurer W. V. Newson. The price paid was 96.30 and accrued interest, which means that the province paid over 6 per cent. for its money. It is expected that all the bonds will be disposed of in the United States in view of the prevailing exchange conditions, which enable brokers to sell profitably across the line. Another million will, it is expected, be purchased by the same syndicate under an option.

Outside of this issue the week was quiet owing to Christmas holidays and pending municipal elections. Only one issue of any importance is due for this month—namely, York Township, particulars of which were given in these columns last week. Other issues offered are:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
York Tp., Ont.	$ 562,564	Various	Various	Dec. 29
Manitoba	4,000,000	6	5-years	Dec. 30
Sherbrooke, Que. ..	342,500	Various	Various	Jan. 5
Nanton, Alta.	6,000	6½	10-instal.	Jan. 15

La Tuque, Que.	50,000	6	25-instal.	....
St. Thomas, Ont. ..	100,000	5½	20-instal.	....

Red Deer, Alta.—Tenders are being asked until January 16, 1920, for the purchase of $50,000 6 per cent. 10-instalment treasury bills. The total issue is $100,000.

St. Thomas, Ont.—Debentures to the amount of $100,000 are being offered for sale; $75,000 is for school purposes and $25,000 for the purchase of car-barns and equipment. Debentures will be issued in amounts of $50 and upwards and for any term of years from one to twenty. They will have interest coupons attached at the rate of 5½ per cent. per annum.

Manitoba.—Tenders will be received by the Hon. Edward Brown, provincial treasurer, until December 30, 1919, for the purchase of $4,000,000 6 per cent. 5-year gold bonds of the province. The amount represents a considerable portion of the debt of the province, which matures in the city of New York on February 1, 1920, so that the issue does not increase the present indebtedness of the province. (See announcement elsewhere in this issue.)

Fredericton, N.B.—The city is raising money for permanent paving work by the issue of one and two-year bonds to the Bank of Nova Scotia, and by selling bonds due 1922, 1923 and 1924 to the public at par.

Victoria, B.C.—A by-law for the raising of $20,000 by debenture issue for municipal golf links, will be sent to the ratepayers at the January elections. The bonds will be issued on a serial basis.

Chatham, Ont.—City Treasurer Cottier informs *The Monetary Times* that during the year over $110,000 worth of 5½ per cent. 20-instalment bonds have been sold locally over the counter. During the previous year 6 per cent. debentures to the amount of $218,000 were disposed of in the same manner. The city sells practically all debentures locally over the counter.

The following table, compiled by R. G. Dun and Co., Toronto, shows business failures in Canada for the four weeks ended December 19, 1919, compared with the 1918 figure:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1918.

NEWS OF MUNICIPAL FINANCE

Montreal Debt Reaches High Water Mark—Good Business Conditions in Toronto Evidenced by Favorable Tax Report

Stratford, Ont.—The treasurer's statement shows that receipts for the six months up to December 1 amount to $75,535, and balance $3,415.

Barton Township, Ont.—The financial statement for 1919 shows the following items: Receipts, $360,277; expenditure, $239,862; total assets, $759,467; liabilities, $663,693.

Dundas, Ont.—The annual financial statement shows expenditures of $210,405, with a surplus of $2,039 on hand. The assets of the town are given as $423,551, and the liabilities at $366,026.

Halifax, N.S.—Estimates for the year 1920-21 total $1,188,422, as compared with $1,291,312 for the preceding period. Some of the largest amounts required are: Schools, $458,245; consolidated fund, 1905, $177,569; sinking fund, $35,552; works department, $256,975.

Saskatoon, Sask.—Application will be made to the Local Government Board to purchase £300 City of Saskatoon 4½ per cent. bonds, due November 1, 1940, from a Toronto broker. Interest is payable May 1 and November 1 at $4.86⅔ per £1. The price is 78.22 and interest yielding 6.40 per cent. These securities will be purchased, subject to the board's permission, as investment of the sinking fund.

Lethbridge, Alta.—The last financial statement of the city shows that the bonded debt is $3,950,361. From this is taken $668,102 for sinking fund, and $5,608 for debenture principal payable, leaving a total of $3,276,649. Under the heading of sundry creditors the amount of $196,273 is shown. Depreciation reserve amounts to $804,672, included in which amount is $479,075 for sinking fund instalments and interest and bonded debt redeemed. The sinking fund reserve amounts to $15,213.

Edmonton, Alta.—The city council of Edmonton at a meeting last week appointed Mayor Joseph A. Clarke as finance commissioner. The council have also under consideration the appointment of a third commissioner to assist with the increasing duties of the commission board. It is quite probable that the tax prepayment scheme, which gave such signal success this year, will be made more attractive by the allowing of the maximum discounts at earlier dates next year. Speaking of the prepayment scheme, Mayor Clarke stated that he favored a 10 per cent. discount on current taxes up to March 15. From that time until April 30, the reduction would be 8 per cent., and then drop at the rate of 1 per cent. each month for the remainder of the year. According to the mayor, an attempt will be made to get the tax rate struck early this year. The commissioners have sent out instructions for the estimates to be prepared by all departments.

Montreal, Que.—The 1919 debt is estimated to be $121,277,622, and for 1920 the estimate is $121,901,622. Of the total debt of $121,901,622, the sum of $27,000,000 is due to recent annexations of adjoining municipalities. In 1910, when a number of municipalities were annexed to Montreal, which provided new city wards, the debt was increased by $6,500,000. In the year 1917 new annexations produced about $2,000,000 more debt. When Maisonneuve was annexed to Montreal in 1918, another $18,000,000 was added.

One of the features of the civic debt is the presence of two permanent loans, which can never be redeemed unless the holders of the obligations consent to sell their holdings. The corporation of Montreal has been endeavoring for a number of years to buy in as much of this first loan as is possible to obtain. This loan, which was made in 1867, or fifty-two years ago, and the amount of which was $587,600, now stands at $496,400, as $91,200 has been redeemed. This loan is at 7 per cent., the city getting as much as 116 for a part of it. The second permanent loan was floated in 1890 for the amount of $7,000,000, at the time of the consolidating of the civic debt. The rate of interest is much better than for the first loan of that nature, as it is but 3 per cent., the city securing less for its securities than in the first instance.

Toronto, Ont.—The annual tax statement for 1919 has been issued by Finance Commissioner Bradshaw. It shows that the taxes collectible in 1919 amounted to $19,402,297, or $805,403 less than in 1918, due to the current tax rate of 28½ mills, being 2 mills less than that of the previous year. The amount actually received during the year was $16,756,418, or 86.16 per cent. of the total due, as compared with 84.64 per cent. in 1918. The commissioner states that in view of the unsettled conditions incident upon the cessation of hostilities, this high percentage of collections cannot but be regarded as decidedly encouraging.

"Recently, the department has strongly emphasized the collection of overdue amounts, and during the current year $2,699,927 was received on account of those taxes which fell due in 1918 and previous years," stated Mr. Bradshaw. "This amount, added to that received for taxes for the current year, brings the aggregate tax receipts in 1919 up to $19,456,345."

Mr. Bradshaw states that the fact that the total arrears are $554,376 less than at the same period in 1918, and that the major portion of these is less than one year overdue is also an evidence of the soundness of business conditions generally within the city.

Referring to the annual tax sales the commissioner reports: "The usual annual sale of properties upon which taxes were three years in arrear, was held in March last, and the outcome is a substantial evidence of the highly satisfactory condition of real estate holdings in the city. While there were 4,350 parcels liable for sale, against which there were taxes outstanding of $295,383, no less than $262,130 in respect to 4,059 was received prior to the date of the sale and only 229 parcels, covering $26,157, were actually sold for taxes. In 26 parcels, the taxes against which amounted to $4,110, the prices offered were below the arrears outstanding, and were therefore acquired by the city."

Winnipeg, December 3rd, 1919. 32

PROVINCIAL PAPER MILLS COMPANY, LIMITED

Notice is hereby given that Dividends of one and three-quarters per cent. (1¾%) on the Preferred Stock and one and one-half per cent. (1½%) on the Common Stock of the Provincial Paper Mills Company, Limited, have been declared payable January 2nd, 1920, to shareholders of record at the close of business, December 15th, 1919.

S. F. DUNCAN,
Secretary.

Toronto, December 13th, 1919. 39

NOVA SCOTIA STEEL AND COAL COMPANY, LIMITED

DIVIDEND NOTICE

A dividend of two per cent. (2%) on the Preferred Stock and one and one-quarter per cent. (1¼%) on the Ordinary Stock of the Company for quarter ending December 31st, 1919, has been declared, payable on the 15th of January, 1920 to shareholders of record at the close of business on December 24th, 1919.

By Order of the Board.

THOMAS GREEN, Cashier.

New Glasgow, Nova Scotia, December 20th, 1919. 49

DEBENTURES FOR SALE

PROVINCE OF MANITOBA

A REFUNDING ISSUE

TENDERS

The undersigned will be pleased to receive tenders up to 2 p.m. of Tuesday, the 30th of December, 1919, for an issue of Engraved Gold Bonds of the Province of Manitoba:—

Amount—$4,000,000.00.

Term—Five-year.

Interest—6%. Payable half-yearly, both principal and interest, in New York City in the U.S.A., and in Montreal, Toronto and Winnipeg in Canada.

Issue to be dated January 2nd, 1920.

The amount represents a considerable portion of the present debt of the Province, which matures in the City of New York on the 1st of February next, so that the issue in question does not increase the present indebtedness of the Province.

The last Budget statement, presented to the Legislature as at the 30th November, 1918, disclosed the following facts with reference to the financial position of the Province, viz.:—

Gross Debt	$33,900,000.00
Revenue-bearing Debt	19,300,000.00
Net Debt	14,500,000.00
Of this latter amount there might fairly be deducted the cash in hand representing unexpended capital balances	1,103,000.00
Cash on hand and Capital Investments	7,600,000.00
Surplus of Assets over Liabilities	34,200,000.00

Interim Bonds can be supplied in five days.

Definitive Engraved Gold Bonds in one month from the date of acceptance.

The proceeds of the issue may be payable in Canadian currency, and payment will be accepted in Toronto or in Montreal as if it was made in Winnipeg.

Delivery of the Bonds in question will be made in Montreal or in Toronto without charge.

The lowest or any tender not necessarily accepted.

EDWARD BROWN,
Provincial Treasurer.

Winnipeg, Man., December 26th, 1919. 48

INVESTMENTS AND THE MARKET

Abitibi Paper Enterprise to be Reorganized—New Brunswick Telephone Co. Applies for Increased Rates—Southern Canada Power Presents Good Report

Montreal Tramways Co.—It has been officially announced that a dividend of 2½ per cent. on the common stock of the company has been declared for the quarter ended June 30, 1918. As this is the period when dividends on the common ceased last year, it is expected that the company will pay back the 17½ per cent. dividends now in arrears in due course.

Granby Consolidated Mining, Smelting and Power Co.—The output of the company for November amounted to 1,776,863 lbs. of copper, compared with 2,164,344 lbs. in October, 1,584,515 lbs. in September, 2,171,204 lbs. in August, and 2,050,000 lbs. in July. In November of last year the production was 2,147,405 lbs., and in the same month of 1917 it amounted to 2,886,489 lbs.

Winnipeg Electric Railway Co.—The dispute between the city and the company regarding the right of the company to impose increased car fares will be heard in the courts on January 26. The city is opposing the recent increase from five to six cents, one of the grounds being that the public utilities commissioner had no power to sanction an increase, another basis being that the company broke the contract it made with the city to supply street car rides at five cents.

Abitibi Power and Paper Co.—The directors of the company have announced a plan for the reorganization of the enterprise. A new company—Abitibi, Ltd.—is to be formed with a capital of $31,000,000, divided into $30,000.000 common and $1,000,000 preferred stock. This new organization is to take ever the present Abitibi Power and Paper Co. as a going concern, giving the holders of the latter's common stock five shares of common for each share presently held, the preferred holders receiving share for share alike. There would thus be issued at the outset of the new company's career $25,000,000 in common and $1,000,000 in preferred stock, leaving a balance of $5,000,000 in the treasury for disposal among shareholders at the discretion of the directors. In addition, holders of Abitibi, as of record on January 2nd next, will receive a dividend of 4½ per cent., bringing the disbursement for the year 1920 up to a full 6 per cent., the initial payment on the junior securities of the company having been declared on September 23rd last, and paid on October 1st.

New Brunswick Telephone Co., Ltd.—Application has beeen made by the company to the Public Utilities Commission at St. John, N.B., for increased rates, the first since 1911. The application has been filed and the date for hearing has been set for January 21, 1920. The company claims a construction programme. of $600,000, and the greater part of that expenditure must be made from the reserve fund, as the claims of depreciation and obsolescence must now be met and the moneys temporarily borrowed from depreciation reserve, instead of being obtained from hanks or shareholders, must now be returned and devoted to the uses for which the fund was created. To obtain this money for replacement purposes above outlined, it will be necessary to sell stock on which dividends must be paid, entailing additional earnings of about $48,000 annually. The following is the estimated financial position of the company for the next twelve months, from November 1, 1919, calculated per station: Operating, maintenance, general expenses and depreciation at 7 per cent., figured on basis of actual cost for the last six months, $26.98; increased maintenance wages and material required to keep plant up to standard, $4.82; increase in wages, $3; return on investment at $100 per station, $8; total, $42.80; revenue per station under the present rates, $31.64. Average increase per station required, $11.16, which, for 23,700 stations now in use, amounts to $264,492.

Southern Canada Power Co., Ltd.—The annual financial statement of the company for the year ended September 30 last, shows gross earnings of the parent and subsidiaries of $566,091, compared with $475,009 a year ago, and $432,634 in 1917. Total profits from operations in the twelve months at $210,412, as compared with $154,328 in the same period of 1918. After adding in profits from other sources, amounting to $6,439, as compared with $6,600 in the previous year, total profits amounted to $216,851, as compared with $160,929 in 1918. After deducting charges including legal, engineering and administration, of $23,897, bad debts write-off of $801, and bond and other interest of $134,126, a surplus of $58,027 remained, which compares with $48,159 in the previous fiscal year. After adding in the balance carried forward from the previous year, total balance at credit of profit and loss account was $201,036, as compared with $143,009 in 1918.

The balance sheet shows plant investment at $7,961,898, as against $6,505,241. Cash on hand is lower at $27,548, as against $34,803; notes receivable up at $215,641, against $140,836; accounts receivable down at $37,529, against $45,653; inventories up at $124,491, against $82,958; and investments down at $48,948, against $64,024. Total assets amount to $8,425,707, as compared with $6,892,933 in 1918. Among the liabilities the common stock outstanding has increased in the year from $3,520,000 to $4,000,000. Bonded debt is also up being $3,147,678, against $2,676,266. Notes payable show a large increase, being up to $497,055, as against $91,263. Accounts payable are also largely higher at $233,097, against $142,434. The report of the board says:—

"Transmission lines from Drummondville through Actonvale to Sherbrooke and St. Hyacinthe, which were under construction a year ago, have been completed and put into operation. During the year the distribution plants were extended to take care of the requirements of over a thousand new customers, bringing the total number to slightly over nine thousand customers, which the company was serving at the close of the fiscal year. The new power development at Drummondville has been completed, and is now in successful operation. The dam, forebay and head works, etc., are completed for the ultimate 18,000 horse-power development. The power house has been completed for the first two units, with a capacity of 3,500 horse-power each, which are now in operation."

St. Catharines, Ont.—December 22—Factory of the Dominion Electric Co. on Church Street was destroyed. Estimated loss, $15,000, partly covered by insurance.

St. John, N.B.—December 18—One block of wooden buildings at Mill Street and Paradise Row was damaged. Estimated loss, $50,000.

Summerland, B.C.—December 14—Hospital was destroyed. The patients and staff escaped uninjured. Estimated loss, $12,000.

Toronto, Ont.—December 19—Restaurant owned by Sam Shullman, situated at 269 Yonge Street, was damaged. Cause unknown. Estimated loss, $500.

December 21—Garage at the rear of 1585 Yonge Street containing three cars was damaged. Cause, gasoline explosion. Estimated loss, $41,000, and fully insured.

December 23—A one-story frame house, situated at Stop 27, Lake Shore Road, owned by W. Wallace, was destroyed. Cause unknown. Estimated loss, $1,000.

Windsor, Ont.—December 16—Office of Dr. Raymond Rheaume, in the Ellis Block, was damaged. Cause, defective fireplace. Slight damage was also done to the jewellery store of A. Ashby. Estimated loss, $150.

Yarmouth, N.S.—December 21—Building, including post-office, custom house, shipping office, harbor master's office and the janitor's quarters, was damaged. Cause, spontaneous combustion. Estimated loss, $5,000.

ADDITIONAL INFORMATION CONCERNING FIRES

Woodstock, Ont.—December 9—Oxford Garage building and a barn were damaged. Caused by crossing wires from storage battery, the spark setting fire to some gasoline. Estimated loss, $21,300. Insurance carried, $17,750.

St. Malachie, Que.—December 4—Storehouse, flour mill and grain elevator, owned by Dorchester Co., Ltd., was destroyed. Cause unknown. Estimated loss, $113,000. Insurance carried to the amount of $69,521 as follows: Mount Royal, $7,500; Home Insurance Co., $5,000; Royal Insurance Co., Ltd., $5,000; Liverpool-Manitoba, $5,000; Connecticut Fire, $5,000; Globe and Rutgers, $5,000; Sun Insurance Co., $5,500; Yorkshire Insurance Co., $5,000; British Empire, $2,500; Cie du Canada, $2,500; Nationale de Paris, $2,500; La Nationale, $2,500; Strathcona Fire Insurance Co., $2,500; Phœnix Assurance, $11,521.

Vancouver, B.C—November 21—Shingle mill occupied by Nasmyth Lumber Co. was destroyed. Cause, sparks from refuse burner. Estimated loss, $4,000. Insurance carried in British Crown Co., $3,200.

Ontario.—The fire loss in the province for the month of October was $541,397, according to the fire marshal's report. The insurance loss was $384,754, and the loss not covered by insurance, $156,643. The total for the ten months was $7,924,935; insurance loss, $5,086,696, and the loss not covered by insurance, $2,838,239.

Manitoba.—The Provincial Fire Commissioner, in a statement of fires and fire loss for November, 1919, says:—

"A total of 149 fires occurred in the province during the month of November, involving a property loss of $230,436, an increase of $82,603 over that of the previous month. The major portion of this destruction is accounted for in three heavy fires: the Echo flour mill, Gladstone, with a loss of $130,000; the Trafalgar Hotel fire, Belmont, $30,000; the Griswold fire, destroying a residence, office and hotel, and involving a loss of $15,000.

"Eighty-nine fires, or 56 per cent. of the total, occurred in Winnipeg, with a comparatively small loss of $20,388, or 9 per cent. of the total of the fire loss of the province for the month. One hundred fires, or 68 per cent. of the total number of fires, occurred in frame buildings with a loss of $39,320, or 16 per cent. of the total fire loss for the month. Carelessness with hot ashes caused fourteen fires with a loss of $32,390. Eleven fires reported as of unknown origin caused a loss of $13,039.

"Reports received at this office show that within the province during the month of November there were four deaths due to fire. Of this number, two lives were lost in the Trafalgar Hotel fire, Belmont; a girl six years of age was fatally burned while playing with matches; a seven-year-old boy lost his life in a fire which destroyed his home in Tuxedo."
